[illegible] future. (Ida Gibbs

October 1918

General Sherburne, Commanding Officer of the 167th Field Artillery (92nd Division) said to Major Patterson (Colored), Division Judge Advocate, that there was a concerted action on the part of the white officers throughout France to discredit the work of the Colored troops in France, and that everything was being done to advertize those things that would reflect discredit upon the men and officers, and to withhold anything that would bring to them praise or commendation.

The truth of this remark was evidenced, when in November, immediately after the armistice, I made a trip to Paris, stopping enroute in several towns on the front, and everywhere an opportunity presented itself I talked with white officers relative to the work of the Colored soldier, in almost every instance they were referred to as cowards, rapists, or other remarks made relative to their work which were absolutely untrue, and which were intended to cause a bad impression.

In Nov. 20, 1918.

An instance of such propaganda occurred on a train between Nancy and Paris, where I occupied a compartment with three other American (white) officers and two French officers. As the conversation progressed it developed into a discussion of the Colored soldiers of France and America. The French officers stated that they had nothing but the highest of praise for there black soldiers, the Sengalese, and that they loved them for the work that they had done at Verdun, and on all of the other fronts. There was an American officer in the discussion who hailed from Virginia, and he said to the Frenchmen that they had no use for "niggers" in the United States, and were only trying them out in the war, that so far they had proved themselves a bunch of cowards, and that everyone of the ----------would rape a white woman if he was not held down by the whites. In concluding his remarks he said that one of the first things that he wanted to do upon his return to the States was to join in a lynching bee, and said to the Frenchmen, that he would "send them a piece of a nigger as a souvenir".

French Military Mission August 7, 1918

Duplicate

7-h-23

Confidential

Concerning Black American Troops.

1. It is well for French officers who are called upon to command Negro American Troops, or to live near them, to understand clearly the sitiuation regarding the Negro in the United States. They ouhgt, therefore, to learn of the things told in the following note, and it is important that they be generally known and deseminated It is the province of the French military authorities to inform the French population, through the French civil authorities, at the cantonments of colored American troops upon this subject.

2. The American point of view on the Negro question may seem strange to the Frenchman, but the French have no right to discuss what is known as prejudice. American opinion is unanimous upon the Negro question and does not admit of discussion.

The lagre nujber of Negroes in the United States , about 15,000,000, threatens the degeneration of the white race in the Republic unless there is an inexorable separation between blacks and whites.

As this danger does not exist for the French people they are accustomed to treat the Negro familarly and to accept attentions from them.

This indulgence on their part and this familarity profoundly hurst the Americans. They consider it a blow to their national doctrine. They fear that contact with the French will fill American Negroes with ideas which the whites consider intolerable. It is important that every effort be made to avoid profoundly estranging American opinion.

a source of profound ~~xxxxxx~~ regret ~~to~~ in our cononial experimnets, (de nos coloniaux experimentes) since they are a serious danger to the presitge of the white race.

The military auhtorities cannot directly intervene on this question but they can influence the population thorugh the civil authorities.

34-1-4

Expéditeur : Mr. Mengant. Brest (France). C 6

L'opinion d'un Français, concernant l'article de Mr. Linard, tentant d'insinuer par une propagande aussi injuste que stupide, un renversement dans les idées françaises au sujet des Américains de couleur.

2/24/47

Il est un fait connu de tous les Français qu'il existe entre les Américains blancs et noirs, une barrière infranchissable ne leur permettant pas de vivre en bonne intelligence entre eux. - Mais lorsqu'on se trouve en présence d'articles semblables à celui-ci-dessus désigné et dont le fondement n'a pour base qu'une jalousie, ne reculant devant rien pour arriver à un but déterminé, on se demande si ces paroles émanent d'un être humain, sain d'esprit, - car il est inadmissible qu'une nation comme l'Amérique ait recours à de tels agissements à seule fin d'arriver à introduire en France, les procédés ignobles et barbares qui existent aux Etats-Unis et qui touchent les noirs.

J'ose croire qu'il y a en Amérique des gens civilisés et intelligents comme il en existe partout ailleurs, surtout dans le siècle que nous traversons, et qu'il serait odieux de la part de gens civilisés, de continuer de tels agissements.

Je ne discuterai pas les ordres donnés aux officiers français qui commandent ou qui vivent avec les troupes noires

car je connais l'esprit juste et loyal de mes compatriotes, et ce n'est pas avec des arguments pour la plupart mensongers et déloyaux que l'on corrompt les Français, qui ont pour habitude de n'agir que suivant leur conscience et sans parti pris.

Les troupes noires Américaines qui sont venues en France sur terre comme sur mer, ont répondu à l'appel qu'on leur a adressé avec autant d'enthousiasme que leurs frères blancs ; tous ont fait leur devoir dans la sanglante mêlée qui s'est déroulée sur la terre de France, et où beaucoup hélas! dorment leur dernier sommeil. Au point de vue militaire, si ces hommes commettent quelques fautes de la compétence des officiers français, ces officiers sauront les juger avec toute leur impartialité habituelle, et si ces soldats ont droit à des éloges, nous sauront les leur décerner en tout temps et devant qui que ce soit.

Voilà où se bornera tout ce que je pourrai dire, concernant les ordres militaires, mais il est nécessaire que je réponde aux questions les plus importantes parues dans ce fameux article

Si les Français traitent actuellement les noirs avec familiarité et indulgence, c'est qu'ils ont appris à comparer. — A part quelques commerçants français intéressés (car l'influence néfaste du dollar à malheureusement produit son effet chez certains) non pas que ces derniers pensent indifféremment des autres français, mais ces derniers ont une raison : La marche de leur commerce

la généralité des français, estiment les noirs, qui sont pour nous qui ne les maltraitons pas d'une correction parfaite, et malgré tous les efforts des blancs pour nous montrer ces hommes sous la plus hideuse forme, nous sommes obligés de reconnaître que les blancs Américains ne se conduisent pas chez nous de la même façon. — Je sais parfaitement que parmi les noirs il existe de mauvaises natures, mais y a t'il sur la terre quelqu'un de parfait et sans défaut ?-

Si l'on établissait une statistique pour les délits, agressions, vols, etc..., commis par les troupes américaines en France, le total de ces délits serait infiniment plus élevé du côté blanc; car ces derniers qui ont été reçus en France, comme jamais étranger ne l'a été voient avec jalousie que les Français les délaissent pour reporter sur les noirs l'estime qu'on leur avait confié. — Les blancs à leur arrivée ont affecté pour nous des sentiments qu'ils n'ont jamais éprouvés. — Las, de jouer la comédie, ils se sont enfin découverts tels qu'ils sont : Impolis, Brutal, Injuste, et même poltrons suivant le cas. (Je possède d'ailleurs des faits de nature à démontrer que les paroles que je prononce, sont l'exacte vérité; ces faits trop longs à énumérer je les tiens à votre disposition si vous le désirez.).

Je ne répondrai pas aux allusions faites au sujet du caractère de l'intelligence, et surtout du vice dont parle Mr. Linard, pas plus que je ne répondrai aux conclusions de ce dernier; je ne dirai aux Français que ces seuls mots : Jugez et appréciez.

Les blancs devraient savoir que l'on arrive beaucoup mieux à faire ce que l'on veut de quelqu'un par la douceur que par la brutalité, et si il vous est donné quelquefois de réprimer rudement pour exemple cela n'aurait pas lieu si ces hommes étaient traités comme tels et non comme des bandits ou des pestiférés.

Vous prétendez avoir fait un choix des meilleurs hommes de la race noire pour envoyer en France, Cela est insensé et soyez persuadé que vos arguments sont pour les français tout à fait inoffensifs. — Les blancs ont décidément l'épiderme trop chatouilleux et c'est regrettable, car cette sensibilité est même risible et exagérée

Je suis en relations amicales depuis seize mois avec bon nombre de noirs, et jamais je n'ai eu à me plaindre de leur manière de faire, ce qui n'aurait certainement pas duré avec les blancs car pour eux "les crapauds" (nom vulgaire donné aux français par ces Messieurs) sont trop ignorants et pas assez civilisés ni intelligents pour rester en bonne relations; Je crains fort qu'avec leur fierté et leur dédain pour tout ce qui n'est pas Américain ils ne deviennent complétement " gaga ".

Que les autorités militaires se détrompent en croyant exercer sur la population civile une influence quelconque, — Ce sera une campagne absolument désastreuse; — Pour ma part mon opinion est trop bien implantée, et il suffira à mes compatriotes de lire des articles comme ceux que vous imaginez pour que leur opinion égale la mienne

" Bon crapaud ": mais Français, ce qui est synonyme de : Justice, Liberté, Egalité, Fraternité et Humanité

(78)

The opinion of a Frenchman concerning the article of M. Lisard, trying to insinuate by a propaganda as unjust as it was stupid a reversal in French ideas regarding Colored Americans.

It is a fact known to all Frenchmen that there exists between white and black Americans an insurmountable barrier, which does not permit them to live together with a good understanding. But when one finds himself in the presence of articles like that indicated above, articles whose foundation is jealousy, and which stop at nothing to attain the end determined upon, one is forced to ask himself if these words emanate from a sane human being, — for it cannot be admitted that a nation like America would have recourse to such actions in order to introduce into France the ignoble and barbarous methods which exist in the U.S. concerning the blacks.

I dare to believe that there exist in the U.S. people as civilized as are to be found anywhere else, especially in this century, and that it would be odious to such civilized people to customize such methods,

I will not discuss the orders given to the French officers who command or live with black troops, for I know the just and loyal spirit of my compatriots, and it is not by arguments for the most part false and disloyal that Frenchmen are corrupted, - Frenchmen, who have the habit of acting according to their conscience and without prejudice.

The black American troops who have come into France on land as on the sea, have responded to the call addressed to them with as much enthusiasm as their white brothers; all have done their duty in the bloody mêlée upon the soil of France, where many alas, sleep their last sleep. From a military point of view, if there were commit blunders in the judgment of the French officers, these officers will judge them with their habitual impartiality, and if these soldiers have earned the right to praise, we shall praise them at any time and in any presence.

I shall stop here as far as the military orders are concerned, but it is necessary that I should answer the most important questions which have appeared in this famous article.

If Frenchmen at present treat the blacks with familiarity and indulgence, it is because they have learned [illegible] comparisons. Aside from certain interested French merchants

(for the evil influence of the dollar has unhappily produced its effect with some) not that these latter think differently from other Frenchmen, but they have a reason: the progress of their business) the generality of Frenchmen esteem the blacks, who are most correct in their conduct towards those of us who do not mistreat them, and in spite of all the efforts of the whites to show us these men under a most hideous aspect, we are obliged to recognize that white Americans do not conduct themselves as well in our homes. — I know perfectly well that among the blacks there are bad natures, but is there on earth anyone perfect?

If one should make a table of the crimes, acts of aggression, robberies, etc., committed by American troops in France, the total of these crimes would be infinitely higher on the side of the whites; for the latter, who have received in France as no foreigner has been, see with jealousy that the French forsake them and transfer to the blacks the esteem which one had (at first) for them. — The whites on their arrival have affected sentiments toward us which they have never felt. Tired of playing comedy, they have at last shown themselves such as they are; impolite, brutal, unjust, and even cowardly, as the case may be. (Furthermore I have in my possession facts of a nature to demonstrate

that [illegible]ords which I have just pronounced are the exact truth. These facts, too many to enumerate here, I hold at your disposal, if you desire them).

I shall not respond to the allusions ~~made~~ on the subject of character, of intelligence, and especially of race, made by M. Luiard, and neither will I discuss the conclusions of the latter. I shall say to Frenchmen only these words: Judge and appreciate!

The Whites ought to know that one can do more with people by kindness than brutality, and if they sometimes have occasion to repress them rudely, these occasions would not arise if these men were treated as such, and not as bandits and outcasts.

You claim to have made a selection of the best men of the black race to send to Europe. This is senseless (talk), and you may be persuaded that your arguments are to the French quite harmless. The Whites have a skin too sensitive, and it is to be regretted that this sensibility is even laughable and exaggerated.

I have been in friendly terms for sixteen months with a large number of blacks, and I have never had to complain of their actions; a situation which would certainly not have

...with the whites; for for them "les crapauds"
(the name given to Frenchmen by these messieurs) are to
ignorant and not enough civilized to remain on good terms.
I fear that with their pride and their contempt for everything
not American they would become completely "gaga".

How can authorities undeceive themselves ~~when~~ they think
that they exercise on the civil population any influence.
It will be an absolutely disastrous campaign. For my
own part, my opinion is too well fixed, and it will
suffice for my fellow-countrymen to read articles like
those which you imagine in order that their opinions
will coincide with mine.

"Oby crapaud", but French, which is the
synonym for Justice, Liberty, Equality, Fraternity, and
Humanity!

Pvt. Louis Williams

TO THE OFFICERS OF THE NINETY-SECOND DIVISION:

Name Seymore F. Williams, Rank 1st Cl, Company Co A, ~~Regiment~~ 350 M.G.Bn.
~~Division~~

My address in the United States is, No. 535, Nebraska Avenue,
City of Kansas City, State of Kansas.

Give in the space below, your personal experiences and observations. Do not be too modest. A full and complete account of your personal experiences and observations is exactly what is wanted. For example, if a big shell struck your P. C., and tore the roof off and you narrowly escaped, put it in here. If you went to the German trenches and at the point of your revolver made a dozen or more Huns line up and while just in the act of marching them off to your line they discovered that you were alone and refused to go, put that in. It will require only a few minutes, so do not lay this aside for later compliance, but do it now and return it to the Division Judge Advocate at once.

2/26/118

Upon reaching the States send your photograph to me at 3102 South State St, Chicago, Ill.

ADAM E. PATTERSON,
Major, Judge Advocate.

On Sept. 19, 1918 while defending the village of Frapelle in the Vosges, during a german attack & bombardment a german shell struck a tree about 6 feet from the emplacement tearing a large limb off of the tree and tearing a portion of the door of the dugout away, which was directly behind us and totally covering a corporal two pointers & myself with pieces of wood & dirt. The gun emplacement which was upon a mound of dirt was partly ~~torn~~ torn down and this gun ~~emplacem~~ put out of action for a short time. We remained with the gun & immediately continued the fire. The tree evidently saved us & the gun. Only slight bruises were received by us. At this time I was with Co. H. 350 M.G. Bns

On Nov. 4, 1918 I was sent with a section of machine gun, from Co. A 350 M.G. Bn. to assist a platoon from Co. K. 366 Inf in a raid upon Effy a small villages on the Seille River. Effy was 3 kilometers from our most advance post. We entered the town just about day break & the infantry took the town. I discovered a band of german ~~Boot~~ beyond the town with M.G. fire. We remained in the town about one hour and in the meantime the Germans out numbering at least 3 or 4 to one pushed in on our left flank through the edge of the town & got between us and our lines. We withdrew to the edge of the town (over)

were slightly wounded. I received a slight bruise in the side from the enemy shell fire, several cut from the enemy wire & was shot through my rain coat by a rifle. The brave work of the machine gun section saved the lives of the infantry & their own lives as well. One private (Pte. Lewis Watkins) received a D. S. C. for his work.

opened fire long enough to reduce the enemy fire advanced 5-0 yds & went into action & repeated the process. Again I took my guns out of action & withdrew from the town but advanced to within about 5-0 yds of the position - held by some of the enemy. I again put my guns into action & held the enemy fire under our control with two machine guns & 18 men with pistols, while the infantry withdrew. The pistols & five of the withdrawing infantry held the German who were close at hand, while the machine guns kept those from 100 to 200 yds away from advancing. After the infantry had withdrawn, I had the guns taken out of action and withdrew along a road leading to our lines. Only the distance of the road being between us and a number of German light machine guns. Only a shallow water drain kept us from being hit. We being forced to crawl with a snake like motion through water & mud. The German artillery put a box barrage around out making it necessary for us to either crawl directly into the barrage or give up. I was determined not to give in so I led my men straight through the artillery barrage. After crawling for ½ kilometers we were all by keeping low & making short rushes reached our lines. I lost one Sergt. killed by rifle fire & several

(Over)

2/26/105

But here is the situation: These men belonged to the Sixth Pioneer Infantry, and when they left the Sixth Pioneer Infantry, I don't kno w whether it was the colonel of that regiment or not, but somebody told them that they were only going to stay up in this labor battalion for a few weeks and then they were going to be discharged; and the next thing that happened in the Service Battalion down there was that they "busted" the non-coms; they did not want any colored non-coms; they were going to have white non-coms. That was the next thing. Then they transferred the officers they had and gave them some quartermaster officers and they did not like that, and they turned them out and gave them some line officers. They did not get to know who was in command of them; one came and went; they were all new to them, every one of them.

The men were in fact all around all the time; they were sent out all over camp, and Major Smith has already commented on that. They came in contact everywhere with the men who were being discharged.

Gentlemen those of us who have been here---every one knows who has been here, that it is hard enough in the companies where you had men who have graduated from High Schools and colleges, and men in white organizations, to keep them satisfied, to keep them contented. I sat in the orderly room and I know my experience is not any different from that of all of the rest of the camp. Any one who has been engaged in demobilization and listening to all the complaints, and trying to keep them satisfied knows what it means. And still those men over there got on their fatigue uniforms every morning and went out to fix the fires and police the camp and take care of the organizations; and nobody listened to hear whether they wanted to go home, or whether they had a chance to go home.

When they came over, they did the most natural thing that any child would do. They came over and they asked the company commanders and he could not tell them, so they went over and asked the battalion commander and he could not do anything for them, and what did they do next?

The next thing they did they went down and asked the camp commander. Perfectly natural!

And when they had a meeting down at the Liberty Theatre, the commanding general, as Mechanic Henderson and Wickliffe, both testified, told them "now you have acted like children, you have acted like children," he said, "we are going to forget this. You go back tomorrow and go out to work, and I will forget it."

2/24/156

p. 842, 843

Q. Do you remember of any papers being passed around down there?

A. Yes, sir.

Q. Do you know what they were about?

A. They was about "busting" the colored sergeants; that is the only thing I remember.

Q. About "Busting" the colored sergeants?

A. Yes, sir.

Q. What colored sergeants?

A. Those that were shipped down there out of the Pioneer Regiment.

Q. Oh, those that were transferred down from the Pioneer Regiment?

A. Yes, sir.

Q. They were all made privates when they were cut down on the labor organization?

A... No, they was not made privates; they was cut down to corporals.

Q. Some of them had been sergeants?

A. Yes, sir.

Q. When you were down in V section did you ever hear anything about any strike in the utilities department, the quartermaster's?

A. Yes, sir. Why the whole company, our Company C, the whole company worked over into the Quartermaster's Departments, and that was the talk they have been there, how the white fellows got out, and what the

p. 843

white fellows would tell them they ought to do, the same thing to get out.

Q. What did the white fellows do down there?

A. Why, stopped work.

Q. What did they do then after they stopped work, do you know?

A. They discharged them, I guess, I do not know.

Q. Where did you men, Company C, work over in the utilities?

A. Why, some of them worked with the plumbers, some of them worked with the carpenters, some of them worked with the automobile fellows.

Q. What were you, just helpers with them, just helpers with the mechanic?

p. 172

Q. General Glenn talked to you there?

A. Yes, sir.

Q. What did he say?

A. I don't know exactly what he did say. He said he would have told them about getting passes, and being paid off, and he thought that had been done--- I don't remember what he said.

Q. Do you remember anything that he told the Battalion to do?

A. Well, he told them, he says, "I want you to go back and fall out in the morning on fatigue," and we said we would.

p. 65

A. Well, I will give you one incident. On the morning of May 5th, I heard Green talking and he made the statement that he said, "I haven't had a square meal since I have been in the United States Army." That is one statement.

p. 113

A. There was a gathering in front of my quarters in building N-1

Q. At what hour?

A. 7:10 when it first came to my attention, 7:10 A.M.

Q. State who assembled at that time and place?

A. The members of the various companies of the 418th Service Battalion.

Q. The five companies?

A. No, sir, in one gathering.

Q. About how many?

A. Approximately three hundred.

Q. At that time how many composed the battalion?

A. 824.

Q. What happened when they gathered in front of N-1?

A. The crowd was noisy, the gathering was unauthorized and I asked them what they wanted, and they proclaimed in various shouts that they wanted to know when they were going to be discharged.

Q. Can you identify any of the accused as being present on that occasion?

A. I can not.

CHAPLAIN'S WORK AS I FOUND IT IN FRANCE

by

A Chaplain.

As soon as America declared war, as College Pastor at Talledega, I warmly advocated 100% loyalty to our Flag. I never dreamed that one year later, the vortex of the World's Whirlpool, would draw me under orders to sail to France. The office of Chaplaincy begged me to accept. When all the aspirants of my church for the post failed to qualify, in order to complete the Congregational quota of colored chaplains, Dr. A. C. Garner of Washington, asked my permission to use my name. I consented with the understanding that he was to be diligent beyond measure, to induce some of the younger ministers to volunteer to serve the boys.

Into my home, after war had been declared, there had arrived a child, a girl baby. Her coming seemed to have made any voluntary service to my country very remote. To my surprise, in February 15, 1918, I was commissioned as First Lt. Chaplain of U. S. A.

I had no clear conception of my new duties. In some vague way, I thought of myself as an Ambassador of God to minister to the moral and religious needs of our boys, at an abnormal time in the life of the world. I had no special training for my office, in order to perform my task in a comprehensive, liberal and efficient way. And I discovered, that our Army had made no provision to furnish the raw Chaplains the desired instruction. Later, there was a Chaplain's School at Fort Monroe, Va.

From civilian to military life, I plunged, without any knowledge of military rules, regulations and courtesies. I was so green, that the high sounding name of Sergeant-Major, was enough to compel me to stand at attention and give him a snappy salute. During my brief stay of less than a week at Camp Lee, two Company Commanders had me inspecting with them their troops on eve of leaving for France.

After one month in the Army, I was in Blois, France, where for the first time, I who had inspected the drilling of others, drilled for the first time myself.

The Congregational Denomination of Churches had provided no funds to equip me to exercise the duties of Chaplain effectively. To make bricks without straw is a real hardship in an army, but to make them without clay is well nigh impossible.

With these handicaps, I began to minister in France to the 506 Service Battalion of Engineers. I was soon to find another serious one in the hostile attitude of the Army Authorities. What was it ?

CHAPLAIN'S WORK AS I FOUND IT IN FRANCE

****

As one old Chaplain of the regular army expressed it to me, as he had heard it frequently, "A damned Chaplain," say some officers, "hasn't anything to do but meddle." My assignment as Chaplain, to be stationed at Camp St. Sulpice near Bordeaux, was for most part interpreted. The Authorities, who could have helped me, stood aloof, as I waded into deep water, to watch me drown. I had gumption enough to realize I was the first - and only Chaplain in this camp, - and I had it within my power to honor or dishonor this office of Chaplaincy. I loved its good name, and believed I could through it, do some good for the boys.

I was to find both my greatest draw back and opportunity in my color. Racial frictions were bitter and threats of racial wars and mutiny of black troops were talked altogether too loosely, by both races. My contribution to help win the war, was to be in my ministry of reconciling the white and black troops, that they war not on each other and work harmoniously to speed up the war and win a victory that would end slaughter and suffering.

On my arrival at Brest, I, who had visited France before the war, was surprised to find evidences of the Color Line as it exists in the South today. I was not impressed by the slovenly military bearing of the Stevedores - as American Soldiers on foreign soil. I explained this defect to my own satisfaction by the herculean activities of these black men in unloading the many convoys of troops and materials, that left little time for their military training.

At the Casual Officer's Camp at Blois, no experience encountered or conversation over heard, lent any suspicion of the Color Line, working to break the spirit of black men on or behind the battle line.

During my first days with the boys of 506th Service Battalion, I was lionized. They had been in France five months without a religious service. They showed the moral deterioration that over takes men, when beyond the influences of good women. My first service in their midst, was on Mother's Day. The unfinished Y. M. C. A. hut was crowded. The Battalion Band furnished the music. I spoke on the "Heart of a Mother." Fourteen boys "hit the saw dust trail." The start of my ministry, without song books and pulpit, had been made. The response was heartening; there was a place of usefulness for me in the Army.

My quiet personal contact with the men in the barracks and on the project, laying steel, at the ware houses loading supplies for the front, revealed that they chafed under the yokes of homesickness, racial propoganda, lack of incentive of promotion as all white engineers enjoyed to all non-commissioned offices, and the woman question, - and social relationship with the French people. They were in danger of believing as a Colored Captain expressed it, "That the only good white man is a dead one with the marble slab securely fastened."

CHAPLAIN'S WORK AS I FOUND IT IN FRANCE

My cool investigation of conditions at this camp, revealed that the hours of work were long; that moral laxities were pronounced; that recreation was much neglected; that racial discriminations were countenanced in the Camp; that the status of the Negro Soldier at St. Sulpice was not clearly defined. I over heard a white corporal saying in all earnestness to a Frenchman; "You can't work a nigger too hard, I'm a foreman and I know."

The Authorities were unequal to cope with this ugly situation. With each rise of insurgent spirit by these black boys, their newer spirit was met by more brutal use of force. The Provost Marshall of this camp and its environs was daubed "the Beast." He admitted to me, that he had instructed his military police, to "beat up" all saucy soldiers. I saw more than one head beaten to pulp. And the wages of oppression, was a broken morale. A private was overheard to say, "God has done resigned and hell is running amuck." Our Camp was frequently referred to as the "Hell Hole" of France.

3/13/20

Unlike Moses, who when he saw his own flesh and blood beaten, tried to right the wrong by slaying the Egyptians, I took time to try to get the sympathetic point of view of the white officers, before striking my blow to improve conditions. I found that the woman question in France had, in the main, inflamed racial antipathies and dethroned reason and moderation. Many white officers honestly felt that the status of Negro soldier ought not be any different in France than in Georgia. Some were ready to concede that social recognition should be given, where the individual soldiers made good in France. Only a few took the sane attitude that after all is said and done, social relations adjust themselves in France as in America. I felt that much of the racial trouble began in the way a white man's psychology ~~thinks of~~ prints the Negro. I would have him think the Negro human, patriotic and loyal to his flag.

From the French point of view, I found a good deal of genuine appreciation for sacrifices the black boys were making to save France. The French temperament naturally admired certain of the Negro's traits more than the Anglo-Saxons. The Negro was polite to an extraddinary degree. And the Negro's love for the children and respect for his elders, his capacity to sing and dance and smile in a strange land, won for him a warm place in hearts of the substantial middle class of French people.

The first step had to be made to relieve the racial strain. I would in certain quarters be called "meddlesome," in others, I would be soundly abused as "a damned meddlesome nigger Chaplain." After mature thought, I could not do other than memoralize General Scott of the Base Headquarters to reduce the hours of work, provide recreation, abolish racial discrimination in Camp, and define clearly the status of the black boy - soldier or serf.

CHAPLAIN'S WORK AS I FOUND IT IN FRANCE

In preparing this memorial, I was ably assisted by the Y Hut Secretary, Matthew Bullock, the former Negro Dartmouth Football Player. Having a Lawyer's training, he was asked to draft the form.

To bring peace and good-will and cooperation to our Camp, we went so far as to suggest ways to the General to effect this:- Give the same opportunity to the Negro Soldier to advance as the white; provide non-commissioned posts for these Negro Units; exclude all women from the Camp; provide more Chaplains for the troops; have Negro Military Police where Negro units are in preponderance.

Our boldness at first angered this General of Southern birth and traditions, but our quiet confidence in his patriotic devotion to the welfare of all his troops, and our own gentlemanly manners, at least won a hearing and a promise to investigate first hand conditions at Camp St. Sulpice.

As the news of our mission leaked out and gained currency, Major Clemons of my Battalion asked "Did you sign the petition? You've stirred up a lot of hostile feeling and you are likely to be punished." On every hand, the white officers expressed their disapproval of my course.

There were other minor conditions in our camp life, that made difficult a fruitful ministry of consolation and inspiration. On Sunday mornings at the Chaplain's bugle call to worship, our Camp was always a bee hive of activity with drills and inspections. The officers defended this practise on the score of Sunday being the only free day. They resented a suggestion of a different hour. It never dawned on their minds, that a service of song and worship might under-gird the morale of the army far more than drills. The officers seemed to fear the message of the Chaplain, as a devilish device for spreading and deepening discontent. They had no confidence in my mission to serve the men in such a helpful way as to make better soldiers.

The decisions of the Summary Courts were flagantly unfair, making the arbitrary wills of tyrannous officers, work ill and hardships to the privates. I have known of a petty thief of a box of candy, worth 30 cents, being sentenced six months to the "jug." And behind the thievery of this soldier, was a sugar starvation; due to scarcity of sweets. The Summary Court was a daily irritant of peaceful race relations.

Many crimes were born in idleness and ignorance. I thought, if only our Army could get some of the ignorant boys in school, during their off hours, the number of petty crimes would be reduced and these

CHAPLAIN'S WORK AS I FOUND IT IN FRANCE
****

men started in right direction of American citizenship.

Three evils especially seemed to lay snares for the boys, and they were caught by the thousands. These evils were cognac, prostitutes, and gambling.

There were six prophylatic stations in Bordeaux, where soldiers when taking their days off, if exposed, could receive treatment. During the month of May, 1918, it is reported that 10,000 cases were treated at these stations. On July 4th, at Bassens, it is claimed, when 1,600 soldiers were on pass, 600 reported for treatment. Some of the short-sighted officers advised me to confine all my sermons wholly to the theme of social purity. I listened courteously, but followed my own mind, as my tongue belonged only to God. I was between Sylla and Chyrabdis. To have so preached, would have destroyed the faith of my soldiers in my unmuzzled speach, as I would have appeared a tool of prejudiced Army Authorities. I found it impossible to attack this evil effectively, on the ground that it multiplied racial misunderstanding and that the peril to health was great. My public presentation of this topic was purely religious. The body of every soldier is the temple of God. The way to honor it, is to keep it from all uncleanliness. God would require a strict account of all deeds done in the body. The truth of this, my boys never questioned. And this message never lent suspicion, that I was the tool of thos military authorities, obsessed unduly with sex relations, as a constant religious theme.

3/13/22

Gambling made no pretense to hide its head in our Camp. In fact, rumours abounded that it had the sanction of most officers and M. P. protection. Some officers were under suspicion of getting profits from the games, carried on in the open, especially with detached outfits. Co. C. of 506th Battalion, before its headquarters, had a mammoth dice, worked in white sand stone, enthroned as the central figure in an artistic design, prepared by a mechanical wizard of Pittsburgh. There was a tolerance of this evil, on the part of some American officers that was, to say the least disloyal to the best traditions of our American Flag. I felt the humiliation of having our iniquities, exposed in the full gaze of the French people. I found the white soldiers as prone to gamble as the blacks. At La Gorp, a small town where Co. D. was busy laying steel, I went there to hold an open air service on a beautiful afternoon in May. These boys also had been five months in France without a religious service of any kind. They were detached and under canvas in a small town. Under the eyes of the officers and the gaze of the French people; the boys carried on dice shooting with great animation. I encircled all these gamblers in an open air service and made them a part of my audience. During the service, they all promised to renounce the game. I was elated. One gambler said, "When the Chaplain said, you get on your knees, I felt like standing up and dusting mine, for I was just off my knees." My joy was short lived, for the next day when I passed by on the train, I saw that the boys in

CHAPLAIN'S WORK AS I FOUND IT IN FRANCE

this lonely spot, were still "rolling the bones," same as ever, showing that a good influence must be steady and constant in its operation to bear fruit.

Most of the more serious crimes were committed, when the soldiers had too many drinks of cognac. Alcoholic drinks were not supposed to be obtained in the camp. Actual drunkeness seem to speak otherwise. This I do know, that wine was obtained near the camp all too easily, and indulged in all too freely, for the morals of the men and discipline of the Army. One American Bar was just across the main highway, passing our Camp.. One bright observer of Drunken soldiers said, "The soldier 50% stewed up is inclined to be careless; 75% he'll do anything; and 100% does not know when he has committed a heinous crime."

While all these problems were begging solution, I felt the bottom of despair, when all our colored Y. M. C. A. workers of St. Sulpice were summarily dismissed and ordered to report to Paris for their sailing orders. How could I tread the wine press alone? What good would my lone voice in the wilderness be? These workers had at least given me their sympathy. And I needed them to be equal to my task. Some over-zealous and neurotic busy body had mis-represented our fine staff of Y. workers to Gen. Scott as of the Niagra Movement in France, for the expressed purpose of warming up the discontent of black soldiers to delay victory. I doubt if all those workers had even heard of this movement, that had before the war, come to grief.

3/3/23

Just at my darkest hour of despair, light began to break to save my faith in the American Army. Following hard in the wake of an Investigating Committee, sent by General Scott, as result of the memorial, Capt. Simmons, Camp Commander, under whom these evils existed, was removed and Colonel Gray of 6th Cavalry was put in command. He was a cold, crusty personality, but every inch, an American Soldier. And he called all the camp officers to interview him, among them myself and [redacted] another colored Chaplain, that was now stationed here; and he gave us all to understand, that from henceforth, the camp would have just one head - himself; and that every soldier in Khaki would be treated as an American soldier.

His first orders were light shining in darkness. There would be no more Sunday drills; no more trials by Summary Court. There could, under the two Chaplains, be a post school, but attendance would be voluntary. Gambling be prohibited.

In a further interview with Col. Gray, he encouraged me to promote amusements, assist the soldiers in every possible way. On the other hand, he warned me to stick to the simple gospel. [redacted]

CHAPLAIN'S WORK AS I FOUND IT IN FRANCE

I was told not to mix politics, nor to set myself up to rule Military Authorities. He asked me not to try to settle the social question. I hardly needed this specific advice, but received it in the spirit given, to the end that our great camp might function efficiently to bring swiftly Germany to her knees. This objective I kept ever before me, even when it was darkest.

That the military authorities saw the fairness and reasonableness of colored non- commisioned officers was shown by Col. Gray's willingness to adopt this plan. The white non-commissioned officers, by a vigorous and united vice, defected this reform. A deep seated fear of M. P. reform and social relief, which would have given the Negro soldier, equality with the white soldiers, made this change too difficult to effect in a short time. These limitations are those of the American nation with its Nordic superiority complex. Had they not existed in America, we would not have been troubled with them in France.

Col. Gray did remove the "White Only" signs at bath houses and lavatories. In one infamous and clever order, he sought himself to regulate in our camp the social question of France. "No white soldier shall go with colored woman inside the camp and no colored soldier shall go with a white woman inside the camp." This order awakened little fury, as in the camp itself-, the colored soldier had a timidity of socializing under the critical eyes of his own white officers, many of whom came from the South. It was resented mostly for the social stigma it gave the Negro in the eyes of the French people, quick to interpret every move of the A. E. F. for the full meaning. I have documentary evidence that high military authorities tried to change the French attitude on the race problem.

3/13/24

The coming of Colonel Mc'Mahon to be our Camp Commander, and the signing of the armstice, encouraged me to hope to help right one other wrong, that would contribute so largely to the peace and happiness of the large number of men in our camp. On November 21st, I received an order making me Chaplain for the Colored Troops, stationed at Camp St. Sulpice. This period of slow demoblization of service troops would be a great opportunity to serve. The Y. M. C. A. had suffered in the esteem of all the men in our camp. I quote from a letter I censored of a private:- "The Y. M. C. A. in the states is alright. Here in France it is out to collect the coin. The only thing it ever does for the buck private is to give a little paper. It overcharges for everything else." One lone white secretary over the colored hut, where there had been six workers, was the most unqualified worker I have ever seen enlisted in religious work. He also holds the record for laziness. His motive for being in the Y. work was evidently "to see France." Here was a great Christian organization, functioning inefficiently and hurting the cause of religion in the eyes of the men it ought to have served.

CHAPLAIN'S WORK AS I FOUND IT IN FRANCE

Once again I had to risk being called "meddlesome," and let our Camp Commander know exactly how the men felt towards the Y. M. C. A., and the desire of colored soldiers to be ministered unto by colored workers. The Colonel saw this situation from a sympathetic point of view, and promised relief. His first step was to dismiss this white secretary that gave the Y the black eye. He was assigned duty at Y. M. C. A. Ware Houses in Bordeaux. No white hut would have him; and colored did not want him.

Then one of those strange things of Providence took place. There was assigned to our Camp Secretary Howard, as white a white man, as God ever made. He loved the Lord and he loved black men. When there was added to his staff, two colored secretaries, which was sign of promise of an all colored staff of workers, in behalf of all our grateful soldiers, I assured this white secretary that we were one, in wanting him to remain as our hut leader. As he felt deeply that a staff, all colored, would best serve the boys, so against our wishes, he insisted on this policy being carried out, and in January of 1919 he left, with our love and good wishes.

There appeared in our section Ben Seldon that had a splendid record as Y. Worker in France with the Buffaloes. I thought him the right man for the post and requested our Camp Commander to endorse him. He very graciously said, "You remember Chaplain, that three months ago, I took the position of Colored Workers for Colored men. I have not changed my opinion. The making good of the two colored secretaries confirm my opinion that Mr. Seldon as General Secretary will do well. Tell the General I endorse Mr. Seldon."

The coming of Mr. Seldon, six months after the expulsion of all our colored workers, was interpreted by all of my own race, as the triumph of a just cause. Under him, the hut functioned as never before to meet the needs of the men.

The scandal attending so much of the Y activities was unfortunate. There are certain conditions that will modify adverse opinions if taken in consideration. The supplies to suit the needs of the soldier were often difficult to purchase. Equally as difficult, at most times, was to secure transportation of supplies to the soldiers in the camps, so widely separated. The secretaries were trained not primarily in bookkeeping. Whatever, had been the mistakes of the Y. M. C. A., honest efforts were made to repair them. The days following the Armstice, witnessed some highly consecrated men in the Y. M. C. A. service in the S. O. S. and some consecrated work done.

I had, in addition, to carrying the weight of these racial adjustments to be handy man, to censor letters, to make trips to city for the boys, defend soldiers at court-martial, visit hospitals and prisons and act as sort of Clearing House for all manner of complaints and co-

CHAPLAIN'S WORK AS I FOUND IT IN FRANCE
****

operate to coordinate all camp activities to avoid frictions and overlapping. My position had presented, many and increasing difficulties, which I would always try to solve in cooperation with the Commanding Officer. By nature I am shy, and thrive best in an atmosphere of love and appreciation. Circumstances had forced me out in the open to risk many things for the fair peace and contentment of the boys. A Frenchman said:- "By nature you are strangely modest and bold." I wanted to promote good will and cooperation among the races, knowing that my usefulness was at an end, unless in all things I proved fair to both races. I shared the feelings of one of the expelled Y workers:- "I sometime wonder why I have so much trouble. I try to be conservative and do my level best, but when I would do good, evil is at hand."

3/3/26

In point of service in this camp, few if any officers had a longer record for service than I. I had put in all my time of service in France and in the Army in just one camp. I had seen this camp outgrow its headquarter, its buildings for social activities, its hospitals and guardhouse and change commanders four times. I had seen our population increase from three thousand to at least eleven. I had seen for our physical comfort, electric lights and shower baths installed. The very moral tone of the Camp, I had seen, undergo a change for the better. Six Chaplains soon served, where there had been just myself.

Always my endeavour had been to get the camp together, grow together and be godly together. I found the camp far from this ideal. I had been able to help it move up a notch. On the one hand, one of the well informed colored privates wrote me this, "I have some knowledge, as you know, of the fight that you made at this place, without the flying of banners and at the risk of much indeed. I am too firm a believer in the cause you represent to doubt your good efforts will not be fruitful. Some good has already come of them." Chaplain Freeland of the 6th Cavalry said to me of the other colored Chaplain of our camp that had been assigned to the 92nd Division, that after four month's service, if he had used my tact, he might not have been ordered to join the 92nd Division. And the most hated officer among the whites, "The Best" gave me the surprise of my life, when he expressed his readiness to give every soldier a square deal. After four months of resenting my presence and ignoring my existence, it seemed strange that this man of all men should change his attitude enough to make this admission. His death from the "flu" was interpreted by the boys as judgment of God. In the end, all things came out well; I had the love of my boys and the confidence and cooperation of Military Authorities.

As I look back on my activities, nothing pleases me any more than the thought I had some share in keeping up the spirit of the soldiers who were "The stomach of the Army." One of the boys of the Battalion Band after a year's sojourn in France, said he was contented with his lot because he

CHAPLAIN'S WORK AS I FOUND IT IN FRANCE
****

smiled. "The smile is the thing. You must smile and smile, until your smile becomes a grin. When you get so you can smile and chew quinine pills at the same time, you will make it a go in France." I had to learn this lesson at St. Sulpice. In censoring a letter of a white corporal, I have treasured the compliment he paid the Negro soldier. "If it were not for the continual happiness of the Negro," writes he, "I would often become lonesome. He is always up to some new mischief. We have no trouble with him. He works fine." I happen to know that the "cheerful" Negro would have made trouble, if conditions had not changed. The change had cost me many a tear and prayer and cross. Without the help of God, I would have failed. I lived to see vice in the open disappear. Company C., on its own will and accord enthroned a cross, where a huge dice was its decoration. When our religious hut functioned 100%, the number of arrests decreased. I had detailed as my assistant, a young man, an expert as physical director. We had a recreational program always to engage the idle soldier.

As the Negro loves music, I planned a series of French Concerts, paid for from the Chaplain's fund, that brought to our camp first rate French musicians. This was a good course in appreciation of French music; and a good change from Jazz music.

3/13/27

I saw the fear of the white officers dispelled as we had a finer morale among our men. While the social, moral and physical welfare was of deep concern, I majored, primarily in trying to get the gospel message lodged into the hearts of the men. Religion is a great dynamic. I remember one series of sermons I preached on the Strange Land: Songs in Strange Land; Honor; Self Control and Home Hunger. One private said, "You preached to me this morning. I replied, "I had to have a target." To this he said, "You surely did hit the bull's eye."

Through all the trials and perplexities of my army life, day by day, I felt the hand of God leading me safely by pitfalls and bogs. And as I was lead safely, I was emboldened to try to lead the boys to the "Unerring Guide." The boys forced on me a loving cup, but nothing so pleased me during my stay in France, as Secretary Brick, who said in the hut, "I have met several men in Europe, none of whose spirit I admire more than Chaplain ————. His spirit is one of being used without cost. You are fortunate to have him as a leader."

I went to France with the purpose of being used, regardless of cost. If to any degree I succeeded, the glory belongs not to me, but to God. I saw all things made visible by light, and know that God is light. Truly on reaching France I dwelt in darkness, and often my faith all but failed me that the Light would shine. I rejoice now that I kept the faith. It meant something to the boys of St. Sulpice.

Salem

Saint Sulpice,

I did not go to Saint Sulpice until January 1919, but Rev. Clifford Miller (Chaplain there) gave me this information. He handled this case.

51 Claud Wilson was hanged on Sept. 1, 1918 for attempting to assult an old French women. He was a green country boy 19 years old of the 356 Engineers and from South Carolina. He could not talk French. The women accepted his money; he thought this opened the way for him. Capt. Ware, who died one month after with the flu', pushed the matter. The boy never should have been hanged. As fate would have it on the day he was hanged a white boy committed rape in the same camp. He was judged half crazy and given twelve (12) years, but why any sentence if he was crazy.

Rev. Miller who was chaplain and with the boy up to his death will verify this. Address 77 Copeland Street, Boston, Mass.

~~Rape.~~

One of the worse cases of rape I have ever known happened during my time at Saint Sulpice. I knew the little girl well and the man who tried to catch the criminal. The funny thing about the whole affair is that they tried to blame it on some light colored fellow, but Monsieur Jean Delteil, with whom I lived) who saw the man running said it was a Marine. They never found the man. The little girl's name is Odette Mazelle. She was nine years old. The people of St. Sulpice were very indignant about it.

In the early part of January, 1918 orders came to our Regimental Headquarters, Ninth Cavalry, Camp Stotsenburg, Pampanga, Philippine Islands, extending an invitation to volunteers to come to America and assist in the organization of a colored Artillery. Knowing full well the value of artillery, having served in Camp with the Sixth Field Artillery, at Douglass, Arizona, during the years of 1914-1915, and having had in addition two years foreign service with the Second Field Mountain Artillery, at Camp Stotsenburg, Philippine Islands, I at once realized the glorious opportunity to be of some assistance in the world's great struggle.

3/13/18

Without delay I forwarded my application along with others, to Division Headquarters, Manila, P. I. My application was accepted. In about fifteen or eighteen days an order came for me to proceed by the first available transportation to Camp Dix, New Jersey. On February 15, 1918 thirty-seven members of the Ninth Cavalry, and I set sail for America by way of Nagasaki, Japan, and Honolulu. H.T. We arrived in San Francisco, Cal. March 18, 1918. After remaining there until March 25, we entrained for Camp Dix, New Jersey, by the Southern Route, arriving at the Camp, April 25, 1918.

Upon our arrival we were separated and assigned to different organizations at the direction of the Commanding Officer, Colonel Dan T. Moore. Fortunately for me I was assigned to Battery "F" 349th Field Artillery, April 5, 1918 and was appointed First Sergeant April 8, 1918. I found the Battery already partly organized with Captain Thomas D. Wadelton in command. It was considerable time before we were organized completely. We were blessed from time to time with fresh recruits from other Camps.

Day after day we labored unceasingly with the "Three-inch guns", without a thought of weakening. In June our efforts were crowned

with success, and we were ready to sail for Europe. On the morning of June 13, 1918, we entrained from Camp Dix, N. J. to Pier 54, Forty-second Street, New York City. From there we sailed for France aboard the U.S.S. Ringdam, June 15, 1918.

We arrived at Brest, Finistere, France, June 27, 1918. We left Brest June 30, 1918, arriving at Montmorillon, France, July 2, 1918. Here we were cordially received by the civilian population. On the fourth of July, 1918 we paraded in that French city. We remained in Montmorillon until August 12, 1918. While at this place Captain Noble M. Coe, assumed command of the Battery. From Montmorillon we went to La Courtine, (Creuse), France. Here we received six weeks training with the French 75mm. guns, concerning which we were absolutely unfamiliar when we arrived in camp.

3/13/11

After the close of our course of instruction and repeated target practice on the range we were pronounced efficient artillerymen. This news was received with delight by everyone in the Battery. On October 13, 1918, we left La Courtine in box cars for the firing line, arriving at the front a few days later. We first stopped at Toul, France, October 16, 1918. In the vicinity of this historic city we took quarters at a modern French Fortress called Villy de Sec.

After loading trucks with our guns, we departed from this fortress October 18, 1918, arriving at Ville au Val (Village of the Valley) October 19. Here we placed our guns in position on the night of October 20. Our Third and Fourth Sections moved their "pieces" to Atton where they took position in an open field. The other sections soon followed. Soon we were in a position near Mousson, an historic hill in the neighborhood of Pont-a-Mousson from which a statue of Joan of Arc still stands, unharmed, notwithstanding the repeated shell attacks from the Germans during the war.

Our telephone detail of which we have every reason to be proud,

established communications between Ville au Val and our Regimental Headquarters, and between our positions and the Battalion Headquarters. They indeed worked and fought faithfully and bravely through shell fire and poisonous gases with nothing in mind but "Victory". This same splendid fighting calibre characterized all of the men while they were facing the enemy.

After our guns were placed in position the drivers and other men who were not in action were stationed at our Battalion "Echelon", near Belleville, France. Here they were kept in constant danger from the enemy's artillery bombardment and air raids. Although our men endured many hardships and privations and came dangerously near being gassed, shell shocked, or struck by falling shrapnel, they remained on the firing line until the enemy surrendered by signing the Armistice which went into effect at eleven o'clock November 11, 1918. Fortunately indeed, we did not lose a single man in action.

5/13/12

After the fighting ended, we repaired, November 15, 1918, to an old shell-torn tannery at Dieulouard, France. Although this was not an ideal place for Barracks it was heartily welcomed by our tired and worn out fighters. Upon leaving Dieulouard, we marched to Pont-a-Mousson, France, arriving there December 10, 1918.

We found Pont-a-Mousson in a wrecked condition. We managed to make life comfortable in the shell-torn houses in which we quartered. We were surprised to find in this shell-torn city a few houses that were in a condition as perfect as they were before the bombardment by the Germans.

We left here December 19, 1918, arriving two days later at Liverdun, France. Our men were much attracted at the beauty of Liverdun and the country surrounding it, perhaps the most picturesque in France. We marched from this place on December 22, 1918, arriving at Maron the following day. Here we entrained in box cars for Domfront (Orne), France

which is in the very heart of Normandy. We remained here from December 26, 1917 to January 23, 1919.

From Domfront, we went to LeMans, France the next day, an embarkation center. We left this place February 1st 1919, arriving at Brest, France, the next day. During our stay here, duty was very regular but our men responded remarkably. The worst feature of our sojourn in Brest was the weather. It rained nearly every day. On February 25,1919, we went aboard the "H. M. T. Carolina", at Brest, and sailed for the U. S. A., arriving at New York City, March 6. From here we went immediately t to Camp Upton to await orders for demobilization.

3/13/13

The 349th Field Artillery was trained at Camp Dix. They sailed June 15th and reached Brest June 27, 1918. They received training at the artillery range LaCourtine and their work was commended by French and American officers. October 18 they were sent to the front in the Toul Sector relieving the 135th Field Artillery. They were in the sector east and west of the Mosselle River at Pont-a-Mousson and supported several infantry raids. They were holding the Bois Frehaut and Bouixières when relieved. They participated in the advance of the second army October 10 and 11th toward Metz.

3/13/14

Zellner

On the 19th of June 1918 I landed at Brest. On going to the Head Quaters of one of the colored labor Co. commanded by white commissioned and non-commissioned officers I asked could I use the phone' to call up Y Head Quaters for provisions for our men; while using the phone' a Leuit. came in and asked the Sargent if the Coons had finished a certain piece of work. He could not have seen me at first for after a pause he asked the same question only using the word Shine instead of Coon. I turned around and looked him square in the eyes. He then addressed me saying "I hope I have not offended you, they would rather be called Coons or Shines instead of colored." I told him that he knew as well as I that what he said was untrue.

At Marseille I stopped at the Hotel Splendid. A southern Leut. tr tried to induce the manager to put me out of the dinning room. Not succeeding in the attempt he would not finish his dinner and left the hotel in company with another Leut. Both of these officers behaved themselves badly in the dinning room. When they went out two white officers, a Captain and a Leut, came and took a table near me.

A NEGRO SOLDIER WRITES OF HIS LIFE IN FRANCE

Miss Mary A. Lynch, Livingstone College

Dear Miss Lynch: I am quite sure you will be surprised to hear from me at this time, since it has been so long since I was in your class. However, I think of you very much, and especially since I am in France. I am thinking now of the things that you very often told us about while over here years ago. I don't suppose that you would like to be over here now anyway, ha! ha!

Ever since being in the army I have had good health, and at this time I am enjoying the best health of my life. Am hoping that you are quite well as when I left, and hope that it may ever remain so through the passing years; so that your great work as a teacher may never be abridged.

3/4/19

There was a motto I signed once that ever comes up before me now; it was a temperance pledge, and everywhere I am reminded of it. This is a "wet" country as you know. Every time I think of this I am reminded of you and the great work that you are so nobly trying to finish to the end. May I state that I have not broken that pledge, and am striving every day not to?

There is no need for me to state anything about the beauty of France, because you saw it before I. However, I may state that it has not lost any of its beauty since your visit. The venerable buildings that were once so prized may be gone to ruins, yet the greatness, heroism and sufferings that they stood for are still seen in the debris.

Although you may not think so, yet I am striving to stand at the top in whatever position I am serving in; and this moment I am thinking of that, not only for today but for tomorrow as well. I am now ward master in the Infirmary spoken of in the address given. I hope that by my next writing that I may be able to say that I have some higher rank.

I am dying, as you might say, to hear from dear old "L. C." and the way that everything went on there this year. Suppose that quite a few of the boys were drafted, Heard of Roy Brown, Jesse and a few of the others, being taken away. It is also stated that the latter is in France.

Had to stop a little while just now to help the doctor sew a bad cut a soldier got from a piece of flying shell. Such things happen every day; my days are full of such, therefore I cannot begin to relate them, as it would take to long. Please give my regards to all concerned, especially Miss Richardson, another one of my teachers of yesterday. Am hoping that you are not too busy to answer for I am anxious to hear from home, and especially one of my old teachers. If you should see Wesley tell him to please write.

I'll recite to you your ditty taught me in the 7th grade from the Psalm of Life:

"In the world's broad field of battle,
In the bivouac of life,
Be not like dumb driven cattle,
Be a hero in the strife."

That's my motto. Hoping never to prove the reverse in any of the teachings you gave me of an ideal man, I remain

Ever your scholar and soldier,

C. A. Carson,

Medical Dept., Camp Infirmary, A. P. G., 716, A. E. F.

3/6/14

Coa-25

AMERICAN RED CROSS

Camp Pontanezen
BREST. France

19 feb. 1919

I have been hoping that you would be able to drop in on us here before our departure. We are slated to leave here at 4 A.M. on the 21st supposedly abroad the Aquitania. It was my desire to talk with you about the offer to officers and men in the A.E.F. to attend a schove in France or England. I made application and was shown the endossement by the Regt Commander that the offer did not apply to transient officers. The knowledge was obtained from a telegram received from Hdq. One our officers went to the Commanding General of this Camp to obtain a copy of the telegram which could not be or was not produced. Capt Chas. Fisher went in person to the General and requested permission to attend stating that he volunteered for service, left his practisi and family at a sacrifice and that he thought the Goot owed it to him to give him a chance and attend school here. The General took his name and the Organization to which he belongs promising to let him hear from him, but as yet nothing has been done. This Camp is practically a penal institution and prejudice against us is very strong. Some day there is likely to be some grave disturbance here. The conditions aressimply awful: mud every where, leaky tents and barracks and lack of sufficient and proper toilets. The men are worked quite hard, some at night and others in the day, rain or shine. As a consequence there are quite a number of sick men in our organization. Since our arrival here, the roads have been improved quite a bit (due to the work of the 92nd div.) and you do not have to wade an ankle deep mud. Boards walks have been placed on the main thorofares and duck board walks here to nearly all the tents and barracks. There is so much talk about the rotten conditions that the Camp Officials are making feverish efforts to be ready for the proposed inquiry.

The work of each organization is graded by the Camp Officer in Charge of details and if not satisfactory, the organization may be placed at the bottom of the sailing list or removed temporarily. Commanding Officers of separate units or regiments are practically helpless and if they complain too much against the treatment accorded them, are kept here until the Commanding General sees fit to let them go

I am begining to wonder whether it will ever be possible forme me tossee an American (~~blanc~~) without wishing that he were in his Satanic Majesty's private domain. I must pray long and earnestly that hatred of my fellow man be removed from my heart and that I can truthfully lay claim to being a Christian.

If you could possibly aid some Negro Officer to obtain permission to enter one of the noted Universities over here, it would open wonderful opportunities for us. If we leave on the 21st as Scheduled, it will be too late for me to enjoy that earnestly bought for opportunitiy. Whether I am permitted to stay or not it is my purpose to post at some respectable Medical School before resuming civil practice

Citation in the Order of the Army.

ORDER NO. 10.168 "D" (EXTRACT)

2/28/19

With the approbation of the Commander in Chief of the American Expeditionary Forces in France, the General Commander in Chief cites in the Order of the Army.

. . . . . .

Private Lewis KENNETH, 372 Reg., Inf.

"An excellent soldier, devoted to his duty. Was seriously wounded at his post of combat."

. . . . . .

At General Headquarters, September 26, 1918.

The General Commander in Chief,

PETAIN.

For Original Extract:
The Lieutenant Colonel,
Chief of Personnel Bureau.

Official Tribute

S. P. 179, France,

August 13, 1918.

My dear Mrs. Lewis:

Please pardon the informality of a total stranger addressing you, but I desire to express my sympathy to you in your hour of sacrifice.

Kenneth Lewis was particularly near and dear to me, for he was my orderly in Camp Stuart and on our voyage to France.

I chose him here in "the line" as one of the twelve best men in my detachment of forty-six. He lived up to my expectations in every way and conducted himself as a good, clean man and a soldier. Though sorely wounded he displayed true American grit to me and to his nurses in the hospital.

In recognition of his devotion, courage and sacrifice the French Army granted him the Medal Militaire, a high honor.

Not only as his commanding officer, but as his friend, permit me to extend my condolences in your sorrow and to assure you that he gave up his life like a man, for honor and his Country.

Most sincerely yours,

(Signed) John L. Blackman,

Capt. M. R. C., Surgeon 372 Inf.

Kenneth Lewis :

S.P.179 France
August 2/1918.

Inform Mr. Pew -

Mrs Lewis,
Dear madam :-

If according to the mode of precedings in the A.E.F.of notifying by telegram,the parents of those listed among the casualties,within 24 hours or as shortly thereafter as possible this bit of informartion I am about to disclose,you will the better be prepared to absorb.

I am the fellow who lived across the street at 2003/12th street,and Kenneth (Lewis) and I have been in the same detachment since May 1917 when he enlisted,being one so closely allied with him I deem it my duty to appraise you of his misfortune.

On the 31st of July /18.during a short bombardment by the enemy,he was struck by a piece of shrapnel as he was entering his underground shelter the small scrap of iron entered his abdomen from the rear and passed out of his thigh.

He died this afternoon,every thing possible was done for him,but I fear that his intestines were punctured and(Perontinitis) set in,few men

2/28/21

survive such wounds.

He has been given a(Croix de Geurre)or(Medaille de Honeur)I dont know which,it is a fitting tribute of the French Government showing their heartiest appreciation for services rendered in their behalf.Though small recompense for the supreme sacrifice that he has made,it show that he was not alone in this struggle or his efforts in vain.

A boy among men he had a splendid reputation in the making when the grim reaper chose to call it to a close,he was in charge of a dressing station with the 1st Battalion,twice he had been of servâce to the wounded,and acquitted himself nobly,once under fire.

I can imagine your grief,placing you in my mother place,such news to her in regards to me or my brother would be extremely heart-rending.

You have my greatest sympathy and deepest regrets I truly hope you will bear up well under this occurance,and feel that though a loss irreparable to you it was one of necessity to humanity,and any profits

Mr. George Lewis,
2008 - 12th Street, N. W.,
Washington, D. C.

42/82/2

Dear Sir:-

In behalf of the District Council of Defense and of the community, I desire to express our heartfelt sympathy with you and Mrs. Lewis in the loss of your son, Maxwell Kenneth Lewis, who is reported as having died of wounds received in action.

Nothing can make up to you the loss of your son but the brave manner in which he met his death will I know be a great consolation to you as well as the thought that he has helped to add to the brilliant record which has already made the world debtor to the brave Americans who have successfully faced and pushed back the best troops of the merciless Germans.

Assuring you of the sympathy of the community in your bereavement, I am,

Yours very sincerely,

Wm B King

Vice-Chairman.

Please return

Mrs Phillip B. Lewis

The citizens of Washington have ample reason to feel proud of the signal honors brought to this city , and to the Negro race, by the heroic conduct of one of the youngest volunteers in the present war.

An undergraduate of the Dunbar High School when war was declared, and anxious to do his bit to see that the world, including his own home-land, should be made a decent place to live in, Kenneth Lewis, of 2008 12th Street, N.W., eighteen years of age, volunteered as a member of the First Separate Battalion, District of Columbia National Guard, in May 1917, and with the whole organization was inducted into the National Army in August of the same year.

2/28/25

As soon as our boys reached the shores of France, Lewis showed unusual aptitude to do hard things and frequently risked his life to keep up the good name of our colored boys "over there." So distinguished was his conduct on the front that the French government immediately recognized in him a young intrepid soldier of fearless determination and as a consequence of of heroic action on his part publicly awarded him the coveted prize of the French nation," A medal of Honor"

Thus the tradition of our Negro soldiers is kept alive by the youth of the land, while fighting "over there" Letters recently received show that our boys have been in the thick of the fiht on the west of Verdun during the heaviest of fighting in that sector and on the Argonne salient. Very recently they have been in actual conflict on the east of Verdun, as well as in the Vosges regeion. The very latest news fron the front shows that we are not only fighting side by side with the white soldier but that we are capturing villages , taking prisoners, and treating the inhabitants as they should be treated.

Kenneth Lewis was wounded on July 31, being struck by a piece of shrapnel which passed entirely through his body, the result of which he died August 2, 1918.

We should honor and perpetuate the memory of our first hero of the First Separate Battalion as he died as the result of his volunteer action and

Please return

Mrs Hettie B. Lewis

We should honor and perpetuate the memory of the first hero of the First Separate Battalion because he died as a result of his volunteer action and not because he was forced into the fighting arm of the government. His conduct is but typical of the attitude of our young, vigorous, courageous man power of the race, who although they suffer untold persecutions, and humiliations at home, yet they are willing to enter the fight to make the world a decent place to live in.

Having known of the death of Kenneth Lewis, who was a member of the 19th Street Baptist Church for about five years, the pastor of that church has contributed the following poem as a heart-balm to the bereaved mother, and has dedicated the same to the First Separate Battalion, National Guard:

2/28/26

See 3/m poem

W. P. Star

1

A gold star will be added to the service flag of the Nineteenth Street Baptist on Sunday , September 15 in honor of this young hero who thus brings added honor to his chirch, his race, and his country.

B T Washington

What these men did in civil life

Lieutenant Clarence B. Curley was a graduate of the Kortrecht High School of Memphis, and of the college, commercial, and law departments of Howard University. He was at various times Assistant Principal of the Manassas Industrial School, Cashier of Howard University, and a teacher in its Commercial Department. In 1917 he was made secretary of the committee of college men which rendered such fine service in the campaign for a training camp for colored officers. Lieut. Curley has a wife and three children. Sgt. Burgess was a college professor in Elizabeth City, N.C., before entering the service. Sgt. Owens was a student at Morristown Normal and Industrial College, a member of the Press Reporting Syndicate of St. Louis, and associate editor and business manager of the Progressive messenger, Charlotte, N.C. He was highly recommended by Captain Douglas for his efficiency and zeal in the work of the Finance and Accounting Office. Sgt. Miller, a former student of Talladega College and of Oberlin Business College, had been bookkeeper and teller for the Alabama Savings Bank, Birmingham, and at the time of his induction into the service was in the office of the Chief accountant of Tuskegee Institute. A few days before the division sailed for America Sgt. Miller's was commended highly by the inspector for the A. E. F. Harry was a student in Boston, Mass., N. B. Ellis a teacher in the public schools, Birmingham, Ala., N. B. Kimbrough an insurance inspector, Salem, N. C., and the other members of the department were either students or were following their civilian trades when called into the military service.

Ballou (p. 7)

The Commander of the 92nd Division

The command of the 92nd division was given finally to General C.C. Ballou, ~~a native of Louisiana~~, Ballou of the Des Moines Training Camps. Ballou of the disputed Bulletin 35.

a native of Louisiana,

Ballou, regarded by many as well-meaning, but undoubtedly, as the facts show, weak, vacillating, without great ability, and inadequately fearful of southern criticism, antagonized this division from the very beginning. Just as at Des Moines, so here at his new command, he seemed morbidly impressed by the horror of this unusual 'experiment' and proceeded from the very first to kill the morale of his troops with orders and speeches,

317th. Engineers Regiment,

Camp Sherman, Ohio.

The following is brief outline of life of Capt. William H. Thompson, from which you can use along with photo.

Capt. William H. Thompson, 317th Engineers, recently commissioned from the training camp at Fort DesMoines, Iowa, is the son of Rev. T.A. Thompson D.D., an eminent minister of the A.M.E. church, who held pastorate in Pittsburg, Pa., Columbus, Ohio, Cincinnati, Ohio, Louisville, Ky and Covington, Ky., and Nashville, Tenn.,

Capt. Thompson is peculiarly fitted for the honor conferred upon him in being commissioned a captain in the army as he is a battle scarred veteran of the Spanish-American war in Cuba, 1898 the Philippine insurrection, 1899; the Boxer insurrection in China, 1900; the Mexican trouble where a number of the famous 10th Cavalry were killed at Carrizal.

He first enlisted in the 25th. U.S. Infantry, 1897, and his ability as a soldier was soon recognized and his advance went to the highest position held by an enlisted man. He served through the grades of First Sergt. of Co.L. 25th Inf. and later joined the Tenth Cavalry in 1900, where he saw active service with that magnificent body of horsemen and rising to the rank of Regt. Supply Sergt. from which position he was chosen to attend the officers training school at Ft. Des Moines, Ia., where he was appointed assistant instructor in military science in Co.No.3.

Capt. Thompson is a very congenial gentleman and enjoys the respect and confidence of all his speriors as well as of a host of friends who are eagerly waiting the time when he will be promoted to the rank of Major which so rightful deserves. He has in his possession numerous testimonials from officers of the highest rank in the army testifying to his achievements and ability as a soldier. Capt. Thompson has traveled extensively here and abroad which has added to his already rich store of knowledge, .He is a well informed man, full of wit and wisdom, a credit to his country and his race.

Capt. Charles Ecton, Adjutant 317th. Engineers, is a native of Ohio, and a graduate of the Fort Bes Moines officers training camp.

Capt. Ecton first entered the service of the United States, My 14, 1898, as a member of Co. "A", 9th Ohio Vol. Inf., and served during the Spanish-American War with that organization. He served during the Philippine insurrection in Co. C, 48th U.S. Vol., from Spptember 19, 1899, to June 3o, 1901. He re-enlisted on September 29 1901, for the 24th U.S. Inf., and served continuously in that regiment until October 14, 1917 when he was discharged to accept commission as Captain in the Officers Reserve Corps. He has served four tours of duty in the Philippine Islands and was a member of Pershing's punitive expedition in Mexico from March 26, 1916 to February 5, 1917. At the time of his commission as Captain, he was a Regimental Supply Sergeant of the 24th. Infantry.

2/26/54

2/24/55

Capt. Joseph S. Lowe, U.S.R., enlisted in the service of the U.S. army on the 17th. day of October, 1898, at St. Louis, Mo., Appointed Corporal 19th day of February, 1904; appointed Sergeant 6th. day of April, 1905; appointed First Sergeant, 1st day of August, 1913; commission as captain 15th day of October, 1917. Service in Philippine Islands, July 28, 1899 to February 16. 1902, and from September 13 1907, to September 11, 1909. Service in Hawaiian Islands from January 14, 1913, to June 6, 1917. I have travelled the U.S. from Canada to the Mexico and from the Atlantic to the Pacific ocean, and now enroute for over there. I will tell you about it when I return.

Joseph S. Lowe,

Capt. 317th. Engineers.

2/24/52

First Lieut.Wm.W. Robinson enlisted in the regular army September 5,1898,and was assigned to Co.G. 24th Infantry,Camp Wikoff, Montauk Point,L.I.N.Y. Served at the following named places; Ft. Douglas,Salt Lake City,Utah;Vancouver Bks.,Wash.;Ft. Wright,Wash.; Ft. Harrison,Helena, Mont.; Presidio,San Francisco,Cal.;Madison Blk., N.Y. Ft.Russell,Wyo.;Ft. Bliss,Texas, and Ft. Des Moines,Iowa.

Served in the Philippine Islands against insurgents on Luzon from October 29,1900 to July 6 ,1902;from November 30,1906 to February 7,1908, he served on the islands of Leyte,Samar and Cebu against Pulajanes (outlaws). His last service in the islands was from January 1,1912 to September 14,1915. He also served in ~~the~~ Mexico from April 22,1916 to February 7,1917. He was a member of Co.B. 24th. Infantry,from March 22,1899 to October 14,1917 the date he was commissioned. He has had several visits to Nagaski,Japan and Honolulu ,H.T. en route to and from Manila,P.I.

Robert E. Anderson, A.F.&A.M. First Lieutenant 317th Engineers, was born in the state of South Carolina. He was educated in the public schools of Charleston, the Garrison School of the U.S.A. and the school of Application for Cavalry and Field Artillery for non-commissioned officers, 1904-1905. At Reserve Officers Training Camp June, 1917 to October, 1917.

Served during the Spanish-American War and the Philippine insurrection. Two years in the S.C. Militia and twenty years in the Regular Army.

2/24/57

Company D, 317th Engineers.

Camp Sherman, Ohio.

Leroy H. Godman is a product of Columbus, Ohio, where he was educated, having finished the high school there, attended the Ohio State University for three years and graduated from the Law School of Howard University. In civil life he was enjoying a good practice in law; active in Y.M.C.A., Masons and Episcopal church, being director and tenor soloist.

He was the first colored Assistant Attorney General of the state of Ohio and before that an attache of the United States court He is a member of the Alpha Phi Alpha and numerous other organizations among colored people.

He was one of the "A" class men from Ohio and at the Officers Training Schhol, he was an instructor in military Law and Court Martial for Cos. 8 and 10. He received a commission as captain being one of the very few civilians to receive the same.

At Camp Sherman he has had the distinction of appearing as counsel before the General and Special Courts Martial in several cases with much success and is at present with the Engineers Regiment at said place.

To whom it may concern:

This is to certify that Lieut. James O. Jones has served under me as a Platoon leader of Company "A", 317th Engineers for the past nine months.

I have found him to be energetic, capable, a man of good habits, and he has always performed the duties intrusted to him ina most satisfactory manner.

While Lieut. Jones is an Infantry Officer, he has shown a good deal of ability in handling men on technical work.

I take pleasure in commending him to his future Commanders or Employers.

William H. Ferguson
Major, Ist Bn. 317th Engineers.

¶ The Distinguished Conduct Medal has been given by the English government to the following Negroes: Color-Sergt. Mohammad Osman, Mohammed Abukker, Sergt.-Maj. Disi, Sergt. Yohanne, Sergt.-Maj. Mumuni Moshi and Lance-Corporal Akanno Ibadan.

¶ Arthur Johnson, a Negro youth of Uniontown, Pa., was awarded the *Croix de Guerre* with one palm, which was presented to him personally by Marshal Foch for gallant conduct exceeding the line of duty; and also the Distinguished Service Cross, personally presented to him by General Pershing for valiant service at Soissons.

¶ The United States Government is in need of competent stenographers and typists. Salaries range from one thousand to twelve hundred dollars per year.

¶ Negro soldiers of the 24th Infantry killed seventeen white persons in Houston, Tex. The entire battalion of 636 members has been removed to Columbus, N. M. Thirty-four of them are charged with murder.

14-313

32-3-15

¶ Negro soldiers of the 24th Infantry killed seventeen white persons in Houston, Tex. The entire battalion of 636 members has been removed to Columbus, N. M. Thirty-four of them are charged with murder.

14-313

¶ Two thousand colored draftees from the South have been sent to Camp Devens, Mass., and three thousand more are to follow.

¶ The Bates Hotel has been turned into a club house for colored soldiers in Chillicothe, Ohio. When the colored troopers are removed the building is to be used as a social settlement for Negroes.

¶ The thirty-five Negro draftees in Ocala, Fla., were given a reception at the Metropolitan Theatre, where addresses were delivered by the Mayor, postmaster, and prominent Negroes.

¶ Three thousand Negro draftees will be housed at Fort Wayne, Detroit, Mich., at the home of the Twenty-sixth Regular Infantry.

¶ The city of Pittsburgh has accepted a Negro battalion of three hundred as a part of the Home Defense League.

¶ The Army Club of the 366th Infantry, colored, in Des Moines, Iowa, is the largest club for colored soldiers in the United States. It is run at the expense of $400 a month. The secretary is Herbert Wright, formerly U. S. Consul to Venezuela.

¶ The Circle for Negro War Relief has over fifty units in twenty-five states. It has distributed over five hundred knitted garments, besides numbers of comfort kits. One unit has an ambulance nearly paid for.

¶ Colored officers for two colored companies of the Minnesota Home Guard have been commissioned.

¶ An improvement is noted at the stevedore camp, Camp Hill, Va., where Y. M. C. A. activities, moving pictures, etc., have been started.

¶ The ratio of Negroes accepted for the National Army to those called has been 11 per cent higher than the ratio of white men accepted to those called, according to the United States Official Bulletin.

¶ Dr. Robert R. Moton, Principal of Tuskegee Institute, Ala., announces that the institution has been selected by the War Department as a place to train Negro soldiers in various trades. Approximately 400 Negro soldiers, selected from army camps, will be assembled at the institute, May 15, and will be given intense courses in auto mechanics, carpentry, blacksmith work and other trades. After completing a two months' course the first contingent will be succeeded by other groups.

¶ A Hostess House under the Y. W. C. A. has been opened for colored troops at Camp Upton. Mrs. Theodore Roosevelt gave the first money toward it. Miss Eva D. Bowles has appointed Mrs. Emilie D. Brown as hostess director and workers will be trained here under the direction of Mrs. John Hope, wife of President Hope of Morehouse College, Atlanta, Ga., for other houses soon to be opened at Camp Dix, New Jersey; Camp Jackson, South Carolina; Camp Gordon, Georgia; Camp Dodge, Iowa; Camp Sherman, Ohio; and Camp Funston, Kansas. Among the women in training are Mrs. Amanda Gray and Mrs. B. F. Highwarden of Washington, D. C.; Mrs. R. B. Hucles and Mrs. C. Viola Grey, of Richmond, Va.; Mrs. Charlotte Seabroke, of Columbia, S. C., Mrs. Kallie Edwards, of St. Louis, Mo.

¶ Among ten men cited for bravery recently by the Secretary of the Navy was Robert E. Hill, a colored gunner's mate.

¶ Seventy-five thousand Negroes have already been certified for service in the National Army, or eight per cent of the total enlistment. Of every one hundred colored men called thirty-six were certified for service, as against twenty-five out of every one hundred white men.

LT. JACKSON

¶ Lieutenant Charles C. Jackson, of Akron, Ohio, was awarded the *Croix de Guerre* for capturing the Belgian town of Lorgny, while he was with a machine-gun company serving with the "Suicide Squad" of the Ninety-second Division.

¶ Among ten men cited for bravery recently by the Secretary of the Navy was Robert E. Hill, a colored gunner's mate.

¶ Arthur Johnson, a Negro youth of Uniontown, Pa., was awarded the *Croix de Guerre* with one palm, which was presented to him personally by Marshal Foch for gallant conduct exceeding the line of duty; and also the Distinguished Service Cross, personally presented to him by General Pershing for valiant service at Soissons.

¶ Francis Cain, an American Negro, has been recently decorated for bravery by the French. He has been wounded five times and has three colonial medals for distinguished conduct.

LT. JACKSON

¶ Lieutenant Charles C. Jackson, of Akron, Ohio, was awarded the *Croix de Guerre* for capturing the Belgian town of Lorgny, while he was with a machine-gun company serving with the "Suicide Squad" of the Ninety-second Division.

¶ First Sergeant Clarence S. Janifer, M. R.C., a medical student of Howard, received the Croix de Guerre, while his division was with the Fourth French Army.

¶ First Sergeant Clarence S. Janifer, M. R.C., a medical student of Howard, received the Croix de Guerre, while his division was with the Fourth French Army.

¶ The Military Training Camp, inaugurated by Dr. J. E. Spingarn of New York, is now assured of success. General Wood's demand that at least two hundred and fifty enroll before he organized the camp has been more than met. On April 5th, two hundred and eighty-one applications had been received. Of these eighty-one are under-graduates of Howard University, forty-six of Hampton, three of Fisk. Every business and profession is represented, including law, medicine, the ministry, dentistry, high-school and college teaching (including one president!), government service, banking, journalism, etc. It is a fine body of men, as fine as any body in the country regardless of race, creed or color. Nearly all have had college training, and many have military experience of some sort. At least ten pastors of prosperous churches are among those anxious to serve their country. A number of physicians have enrolled in order to get the necessary military preparation to serve as surgeons in the army.

As we go to press the exact details of the camp have not yet been settled. The sudden exigencies of war may change all the plans for military training camps this summer, but unless this happens, the camp is assured. The authorities at General Wood's headquarters are considering place, date, and other details. It is likely that the camp will be held from June 5th to July 2nd, at some fort or army post along the eastern seaboard between New York and Washington. Any man between nineteen and forty-five who has had a high-school, normal school or college education is eligible for admission. The cost will be entirely defrayed by the government, but men must pay their fare to the camp and leave a deposit for the use of their uniform. Both fare and deposit will be returned at the end of the camp, and transportation home furnished free. All applications should be sent to Dr. Spingarn at 9 West 73rd Street, New York.

¶ Francis Kane, a member of the Twenty-fourth Infantry in France, has been given the red, white and blue salvage medal for catching a spy. He has three colonial medals for bravery and distinguished conduct. Several times he has been wounded in battle.

for colored soldiers. He is co-operating with the American Library Association and may be reached at 61 Bible House, New York City.

¶ The work of constructing the new colored Y. M. C. A. building on 135th street, New York City, has begun. It is to be six stories high and will cost $200,000.

¶ White people of Baltimore are backing a campaign to save St. Elizabeth's Home, a colored orphanage with three hundred inmates, which is in financial difficulty.

¶ Federal Judge Dyer, of St. Louis, Mo., has made permanent his temporary injunction against the Negro segregation ordinance.

¶ Edith Durant, a colored girl of Oklahoma, will be of age July 2. She owns an oil well in Tulsa County which gives her a large income. She will receive something like $150,000 in cash and title to land worth a million dollars. Mrs. Sallie Hodge Lee also comes of age this year and will receive a large fortune. She is married and has one child. Bertha Rector, who has already been mentioned several times, is only fourteen years old and is worth close upon a million dollars. White guardians have done much to waste the money belonging to these minors.

¶ When the colored school children found that their parents were being segregated at a concert which the children were giving at the Colored High School, Evansville, Ind., they struck until the colored people were allowed to sit where they pleased.

¶ As a result of a bill appropriating $5,000 for a public employment office in "that locality which in the opinion of the Industrial Commission would best serve the interest of the Negro population," an office has been opened in the Harlem section of New York City. Assemblyman E. A. Johnson was the author of the bill.

¶ A parade in Atlanta, Ga., represented every phase of colored life. It was reviewed by the Governor and the Mayor. Thousands of school children were in line. Negro troops from Camp Gordon took part in the procession and were enthusiastically applauded.

¶ President Wilson received in conference recently Dr. R. R. Moton, the Hon. Emmett J. Scott, Dr. Ernest Lyon and the Hon. William H. Lewis. The subject of a loan to Liberia was discussed.

¶ The Kentucky Legislature has passed

32-2
310

[illegible] has signed the bill for the establishment of a tuberculosis sanitarium for colored people. The appropriation for the first year is $50,000, and the second $25,000.

¶ Through efforts of the local branch of the N. A. A. C. P., the "Jim-Crow" signs at Hog Island, near Philadelphia, effecting 3,500 colored men employed in government shipbuilding, have been removed.

¶ A five day campaign for one thousand members has added 1,365 members to the Twelfth Street Branch of the Y. M. C. A. in Washington, D. C. S. W. Rutherford was general chairman and R. P. Hamlin [illegible] rector.

16-63 308-6-19

¶ Two thousand colored draftees from the South have been sent to Camp Devens, Mass., and three thousand more are to follow.

The Philadelphia, Pa., *North American* speaking of the same action, says:

Lieutenant R. C. Grame was in command of the group which received the brunt of the enemy fire which, besides the barrage, added a heavy fire of large minenwerfers. There was no flinching; the group always worked under perfect control, keeping all combat posts manned, though three men were knocked down by the explosion of shells. Others commended for courage in the face of fire are Corporal Frank Harden, Private H. D. Brown, Corporal Bean, Sergeant G. A. Morton and Private Sanders.

15-60 308-6-2 **BAKER.**

LET us raise our hats to Newton Diehl Baker, Secretary of War. He has not done everything we could wish, but he has accomplished so much more than President Wilson or any other member of this administration that he deserves all praise. He has carried out the draft with absolute fairness, notwithstanding delays. He has put black troops in nearly every cantonment. He has commissioned nearly 700 Negro officers in the United States Army. He has sent black troops to the front. He has made no discrimination in treatment or pay or opportunity. To be sure, we are segregated; but that was according to a foolish law for which the Secretary was not responsible. We are not permitted to volunteer beyond our four regiments but there, again, the authority of the Secretary is, at least, in doubt. Considering his limitations and the tremendous opposition to any act of justice to the Negro, Secretary Baker has done well. And he has crowned his well-doing by appointing an official advisor who belongs to the Negro race.

There remains one more thing for Secretary Baker to do. We have not yet our full quota of Negro officers. There were 86,300 Negroes called in the first draft. Allowing us no officers higher than captain, this would call for a thousand colored officers, and if we furnish 200,000 Negro troops in the second draft, as seems likely, we should have at least three thousand officers. We have at present seven hundred. *We need a second officers' training camp next January.* We can furnish the men; will the Government furnish the instruction? Every reader of THE CRISIS should urge this upon Secretary Baker and upon his congressmen. *Don't delay. Write immediately.*

A HERO.

308-6e-
32

THE New York *American* publishes the following story of heroism in the War Transport Service:

There were white men and Negroes on the lifeboat, and the struggle quickly became a race battle. White men tried to pull their fellows up on to the boat and shove the Negroes off, and the Negroes did the same.

A man stood as much chance of stopping it as he did of pushing over the Rock of Gibraltar—at least, that is the way it seemed, until one Negro, a horseman named Green from Newport News, rose so far above the ruck of humanity about him that he turned the brutal, fighting tumult into men again. He restored democracy on the bottom of that lifeboat.

A few of us had kept cool enough to lie quietly on the overturned craft, trying to talk the others into manhood once more, but we might as well have ordered the sea to become calm.

All of a sudden something hit me in the back of the head. Something else grabbed me under the shoulders, and I found myself in the water.

The blow on the head had nearly stunned me, and I was just able to flounder around enough to keep afloat. Suddenly I felt a body bump against me, and saw the big black face of the Negro, Green, right beside my own.

I went mad. I thought he was going to drown me, to make one less white man in the beastly fight for life that was still raging. I would have struck at him, but my arms would not work.

As though in a dream, I felt his arms slip under my shoulder.

"You'll be all right, boss," he said, and struck out for the lifeboat, keeping my head above water. He put me with my hands on the edge and swam off again. White men on the boat's bottom pulled me out of the water. Presently the Negro returned with another white man in his arms. This man also was pulled on to the boat. Next time the big black returned he had one of his own race.

By then, I was strong enough to help pull the rescued Negro on board, and some of the other white men, who had seen Green save two of us, fought their own men off when they tried to throw the rescued black back into the water.

Three times more, Green returned to the lifeboat, each time supporting the head of a drowning man, black Negro and white alike. One by one, those of us on the boat and around it, began to fight, not for places, but to subdue those who were trying to save themselves by drowning others.

It was the heroism of this big Negro from Newport News which redeemed the disgraceful conduct of the men in the capsized boat. For an equivalent act in the trenches, men are decorated, but Green was only a horseman. I never even saw the story of his bravery published.

French Deputies Taunt America on Race Feeling

PARIS, Dec. 30.—In the Chamber of Deputies to-day, during a debate on Algeria, Deputy André Berthon said he regretted that the nations had not rallied to the doctrine of President Wilson.

"He ought to have commenced by regulating the question of the blacks in the United States," interjected Deputy Molinie. "There is no such question among us."

M. Berthon, in reply, said: "There is also in America a certain imperialism. I was pained during the war at seeing American officers refuse to salute black officers who were fighting in the same cause for civilization and justice."

To the Editor: **The following news story is sent you without charge and the accuracy of the statements herein made is guaranteed. JOHN R. SHILLADY, Secretary.**

FOR IMMEDIATE RELEASE:

An Address to the Nation calling upon Congress for an investigation of lynching in the United States was made public today over the signatures of ex-President William Howard Taft, A. Mitchell Palmer, Attorney General of the United States; Elihu Root, Charles Evans Hughes, ex-Governor Emmett O'Neal of Alabama, Dr. Henry Van Dyke, ex Minister to the Netherlands; six state governors, seven presidents of universities, six bishops and more than 100 prominent persons throughout the country.

The document is the outcome of the National Conference on Lynching, held in New York City on May 5 and 6 last, at which it was decided to draw up an address to the nation.

"The people of the United States suffer justly under the grievous charge that they continue to tolerate mob murder," says the address. "In the year 1918 no less than 67 persons were done to death without trial or any process of law, having been denied the right to a day in court accorded by the federal and state constitutions to all citizens.

"Mobs have even invaded court rooms and prisons to seize and murder prisoners whose punishment had already been fixed. Early in 1919, a hospital was invaded by a mob, and the attack resulted in death from shock of a patient that day operated upon. Local and state authorities frequently offer only the feeblest objection to the actions of the mob which is permitted to do its will unchecked.

"The time has come," the document continues, "when

They were big wor... oad and fairly
radiated good health. They demonstrated the care that Uncle Sam took of his men "over there."

And at their head, and in command of the contingents, strode a Cincinnati man — Lieut. Col. Answell Deitsch, son of the late Chief of Police Philip Deitsch. He was second in command of the 365th infantry in France and was commended for gallantry in action in the Argonne. He left here many years ago, but there were several old friends along the line of march who greeted him.

School Children—

When the parade swung ou... Central Union depot it marched ... over Fourth street, between lin... children from the Stowe and D... lass schools, which had been ... missed for the day in order to ... ticipate in the home-coming ... onstration. It seemed as if every colored man, woman and child in Cincinnati had massed on the Fourth street sidewalks. They carried small flags which they waved in time to the music as the men swung along.

"This is worth going to war for," ejaculated one big sergeant, as he acknowledged with a salute the cheers of a group of colored girls.

Three Cincinnati colored officers also were in the parade. They were Lieutenants F. H. Gow, A. E. Gamblee and George E. Austin. Lieutenant Gamblee, who lives on Kerper avenue, was severely wounded and gassed during the Argonne fight. His name appeared only last week on the casualty list.

The Citizens' Reception committee, composed of twenty-five colored citizens, greeted the soldiers at the depot and distributed chocolates and cigarettes among the men. At the Armory a feast awaited the soldiers. It was the supreme culinary products of hundreds of colored cooks. The afternoon was devoted to dancing.

COLORED OFFICER WINS

Order Barring Him ... Commission Because of Race Rescinded.

Special Dispatch to The American.

Washington, M... 17.—Following protests from colored people in all sections of the country, General March, chief of staff, has overruled the finding of an examining board at Camp Meade, which turned down an applicant for a commission in the regular Army on account of his race.

The man in question was Lieut. T. M. Dent, Jr., who served in France with the 368th Infantry. Following his return from France he sought a commission in the regular Army. His application was turned down, the examining board ruling that he was "unqualified by reason of the inherent qualities of his race."

Bishop Charles P. Smith, of the African Methodist Episcopal Church; W. T. Anderson, publisher of the Baltimore Daily Herald, and many others protested to the War Department. Emmett J. Scott, special assistant to the Secretary of War, took the ... up with General March, ... scinding order followed.

L'ALSACE-LORRAINE ET LA GUERRE

La nature a été généreuse pour l'Alsace. La plaine étend à perte de vue, des Vosges au Rhin, son riche damier de cultures, coupé de forêts. La montagne est couverte de sapinières, de hêtraies, de chênaies magnifiques. A ses pieds courent, d'un bout à l'autre, ces jolis coteaux qui portent le vignoble, flanqué de vieux châteaux roses. Tout pousse dans ce sol fertile. Et le climat est généralement doux. Bref comme paradis, il n'y aurait pas beaucoup mieux... si les Boches ne l'occupaient pas, ces maudits Boches que la population alsacienne appelle, dans son patois, depuis l'invasion, les *accourt-tout-de-suite*. La Lorraine, de son côté, n'est pas moins favorisée — les environs de Metz, par exemple, forment un immense verger — et son industrie représente d'énormes richesses naturelles.

Eh bien ! même pour reconquérir ces magnifiques provinces, qui nous furent arrachées en 1870, nous n'avons pas voulu la guerre.

Depuis quarante-huit ans, la France a multiplié les sacrifices pour sauver la paix !

En 1875, pour avoir, par simple prudence, refait son armée, elle est menacée par Bismarck d'une nouvelle attaque : elle avait encore tout vibrant le souvenir de ses provinces perdues, et pourtant elle n'a pas fait la guerre.

Un peu plus tard, l'Allemagne essaya de nous provoquer en organisant des incidents à la frontière d'Alsace : un magistrat fut attiré dans un guet-apens, deux chasseurs assassinés par un soldat allemand. Toute l'Europe s'en émut, mais la France garda son sang-froid et évita la guerre.

Puis ce furent les persécutions contre les Alsaciens-Lorrains, l'interdiction pour les Français de se rendre dans le pays, même pour fermer les yeux aux vieux parents restés là-bas... L'Alsace elle-même a préféré ses souffrances à la guerre, et la France a maintenu la paix.

Sans cesse elle l'a maintenue depuis, même lorsque le kaiser voulut, malgré l'Europe, se mêler de nos affaires en Afrique, même quand des Allemands venaient chez nous étaler leur arrogance et provoquer du tumulte à Nancy, même quand à Saverne un officier prussien lança contre l'Alsace, et contre le drapeau français, d'ignobles injures, et fut complimenté pour cela ! La France et l'Alsace, d'un même cœur, sacrifiaient leurs justes griefs à la paix du monde.

L'Allemagne nous accuse en vain : c'est bien elle qui a voulu la guerre.

Et maintenant qu'elle a commis ce crime de nous assaillir et de déchaîner les pires calamités à travers le monde, oui, maintenant nous voulons l'Alsace et la Lorraine ! Nous les voulons, pour que la défaite de l'Allemagne serve à jamais d'exemple aux nations de proie, pour que les braves — Français et Alliés — qui se sont fait tuer, ne se soient pas sacrifiés en vain, pour que nos frères annexés, qui ont longtemps souffert, soient enfin libérés, et pour que la paix soit désormais assurée !

Maison Française fondée depuis 1855

Les Alsaciens et les Lorrains sont Français de droit

C'est du dix-septième au dix-huitième siècle que l'Alsace et la Lorraine sont devenues françaises. Elles ont été réunies à la France aux mêmes époques que la Franche-Comté, les Flandres et le Roussillon.

Lorsqu'aux premiers jours de la Révolution elles ont pu exprimer librement leur opinion, elles se sont données à la France, le 14 juillet 1790, à la Fête de la Fédération, de même que toutes nos autres provinces. Elles firent donc partie intégrante de la France *une et indivisible*.

Toujours elles ont été loyales et dévouées. Toujours leurs enfants ont servi la grande Patrie, avant comme après la Révolution. Vingt-huit généraux alsaciens-lorrains ont leur nom gravé sur l'Arc-de-Triomphe, à Paris.

Aux mauvais jours de 1871, l'Alsace et la Lorraine ont protesté solennellement, par la voix de leurs députés à l'Assemblée de Bordeaux, contre toute cession à l'Allemagne, dans une admirable et énergique déclaration. En 1874, elles ont protesté, avec la même solennité, devant le Parlement de Berlin, et les Allemands leur ont répondu par des rires et des sarcasmes. Elles n'ont pas cessé de protester et de lutter depuis, inlassablement, contre l'envahisseur.

Le traité de Francfort, en vertu duquel nos provinces ont été cédées, a été déchiré par l'Allemagne, comme un « chiffon de papier », en août 1914, et 20.000 Alsaciens-Lorrains sont venus servir sous nos drapeaux.

C'est pourquoi, si le Droit des Peuples, qui donne aux nations le libre choix de leurs destinées, n'est pas un vain mot, les Alsaciens-Lorrains redeviendront Français comme avant 1871, selon la simple application de ce Droit, et en vertu de leur choix solennellement proclamé, historiquement reconnu.

Il n'existe aucune différence entre nos départements d'Alsace et de Lorraine et ceux qui sont actuellement envahis... Et la France, leur Mère-Patrie, leur tend les bras, avec cet amour infini qu'elle réserve également à tous ses enfants, et dont le poète a pu dire :

Chacun en a sa part et tous l'ont tout entier.

L'Alsace est Française

Les anciens d'Alsace se souviennent de la grande épopée. Napoléon Ier disait d'eux : « *Qu'importe leur patois alsacien ; ils chargent en français !* » — Si cet ancien, buvant la bonne bière et fumant le bon tabac d'Alsace, fut un des combattants de 1870, il a demandé d'être enseveli dans le drapeau tricolore...

BLEU — BLANC — ROUGE — Le peintre alsacien qui décore les poteries de Soufflenheim pense au drapeau français !

○ ○ ○

Le foie gras truffé de Strasbourg fut *inventé*, au dix-huitième siècle, par le cuisinier du maréchal de Contades, gouverneur d'Alsace. L'inventeur rendit populaire ce bon mets français, quand il monta boutique à Strasbourg.

L'Alsace est Française

Dès l'empire romain, l'historien Probus célébrait les vignobles d'Alsace. Les crus alsaciens de Riquewihr, de Hunawihr, de Turckheim, le Rangen, le Kitterlé, le Finkenwein savourés, autrefois, par le Tourangeau Rabelais, sont les trésors des bonnes caves françaises. »

JOUR DE FÊTE EN ALSACE

« La ménagère alsacienne, en ses plus beaux atours, apporte le gâteau national (kougelhopf) où elle a pris soin de piquer, entre le rouge et blanc d'Alsace, le dr peau tricolore. »

« La légende de la Grèce antique nous montre Pénélope, fidèle épouse du roi Ulysse, filant sans trêve en attendant le retour de celui qui était parti pour de longues et périlleuses aventures. L'Alsacienne fidèle fait tourner son rouet en attendant le retour de la France qu'elle aime ! »

Imp. Jean Cussac, Paris.

Copie conforme notifiée pour exécution chacun en ce qui le concerne à : I° 2° 3° Btns 368° R.I.U.S. - 9° CUIR. (à tI.rens.)

O R D R E du R E G I M E N T N° 4.

I. - Le Btn LAHURE liera son mouvement au mouvement du Rgt de droite.
II.- Le Btn LUSSAUD maintiendra un contact étroit avec l'ennemi et le fixera sur son front.
III. Le Btn SAGOT se tiendra prêt à exécuter le passage de ligne prévu dès que la progression sera reprise au Nord de la vallée MOREAU.

Le Lt-Colonel Cdt le 11° R.C.P.

P. O. le Capitaine adjoint

F. Monquin

GROUPEMENT RIVE DROITE

N°

P.C. le 29 Septembre 1918.

O R D R E

Le 9° Cuirassiers attaquera à l'heure H. la tranchée du DROMADAIRE entre la route de BINARVILLE et le point 34.34 .

Base de départ : Ravin de la Vallée MOREAU, à l'Est de la route .

L'occupation de l'objectif sera signalée par la fusée : " Je suis ici "

ARTILLERIE.-

La préparation sera maintenue sur l'objectif jusqu'à H plus 15 .

A H plus 15, le tir sera reporté sur la lisière Nord du Bois de la GRURIE et continuera en atalentissant progressivement la cadence jusqu'à la fin de l'opération (annoncée par téléphone).

LIAISON.-

Liaison assurée avec le 11° Cuirassiers par le détachement de l' HERMITE sur la base de départ et ultérieurement à la Cote 182 si possible.

Ordre particulier adressé au Capitaine de l'HERMITE.

Le Colonel Cdt le Groupement RIVE DROITE.

NOTA.- Le 368° R.I.U.S. ne prendra pas part à l'opération . Le Btn de 1ère ligne continuera à occuper la tranchée TIRPITZ et se mettra en liaison avec la 77° R.I.U.S., vers le Boyau des CUISTOTS.

Destinataires :
Général Cdt la 1ère D.C.P.
Général Cdt la Rive Gauche
ARTILLERIE
9me Cuirassiers
Régiment de droite
Division de droite.

2/24/43

By writing to the above mentioned officers and inquiring about the two colored officers, they may be able to help quite a bit in giving you information valuable to you in your preparation of the history of the Colored Buffalo Division.

The Surgeon was Jonathan N. Rucker, 1st Lieut. MRC. Chaplain, 1st Lieut. H. A. Rogers.

I would also like to add something in reference to the infamous General Order No. 40 Headquarters 92nd Div., Mayenne, France, published and issued to all of us by our Division Commander, Brig. Gen. Irwin, prohibiting our speaking to French inhabitants. We felt that a great injustice was done us. Of course, at that time we were under military discipline and didn't dare speak as we now can. The treatment accorded us by our American (white) comrades was as a rule almost unendurable, altho the French treated us extraordinarily well. Our American comrades as you know, tried hard to plant the seed of prejudice in France, but thank Heaven the result were contrary to their efforts and desires.

Please return the manuscripts when you have finished with them and verified my statements and facts.

Respectfully,

Clarence C. Holmes

135-26th St.
Ogden Utah

Formerly Sgt. QMC Co. C, 317 Motor Supply Train.

P. S. I would like to add that my Uncle, Mr. Charles Holmes (1105 Bragdon Ave, Pueblo, Colo) is president of the Pueblo National Association for the Advancement of Colored People, although I am not a member at the present time.

Continuation of anonymous article by
"X" entitled "L'Utilisation des Troupes Noires" in the Revue de Paris,
24e Année, Tome 6 (1917)
[Nov.-Dec. 1917]
pp.872 - 894.

[These pages in continuation begin on Page 881]

The question of footgear is always important for infantrymen, but it is of capital importance for the black troops. It is perhaps the great cause of the frozen feet in the month of April [1917]. The drenching of the shoes in the rain in the trenches, and their subsequent shrinking under the action of the icy wind which blew on the Chemin des Dames, cut off in a most painful way the circulation of the blood in the swollen members. But, more than this, the shoes present for the black soldiers permanent inconveniences.

Why do the Senegalese battalions of France wear shoes? To tell the truth, we do not know. The shoes are given to them in Morocco or Algiers, without any other reason than that the other troops in the vicinity, Europeans or Arabs..... are provided with them. The native African, at home, goes barefoot. Through a naive desire for uniformity we hampered with the regulation shoes the Turcos..... and, through the contagion of example, fifty years later, we did the same thing to the Senegalese, who had become their brothers in arms in Morocco and Algiers, though the Senegalese had been running through Africa for thirty years barefoot. Unfortunately, the feet of the black soldier are immense, and of a peculiar shape. For the want of a model better thought out we shoe them with "gunboats" of gigantic size, a mass of leather and nails of unbelievable weight. Very proud, as they are, to be provided with these beautiful ornaments, these great agile monkeys lose none the less one of their best qualities as infantrymen -- their elasticity of step. They gain in place of it a tendency to quick fatigue and a heavy, labored gait. They learn to know the vexation of blisters..... miseries which they have up to this time been ignorant of. Is it in reality necessary to impose these things upon them at the expense of their greatest usefulness? The question comes up for revision. To get the best out of it, we should bring to its solution neither prejudice nor preconceived idea.

In the first place, our beautiful French roads, even our fields, ploughed or mown, ought to be no worse for marching than the uncultivated soil of Africa; furthermore, the experiment has never been tried, in France or elsewhere, of letting the Senegalese tirailleur go without shoes, as he does at home. Thus, no argument drawn from practice can be alleged against it. Finally, if the shoe is intended to combat the cold and the freezing of the feet, it has been proven, as was to be expected, that it is completely useless and even harmful. And this is how the black soldier acts. He wears his shoes through vanity and to do as his neighbor does. But he does not learn the rules for the care of leather, which are, besides, difficult to follow out during a campaign. Once soaked, his shoes harden, and hurt him. Then, without intending any harm, he cuts away the part which troubles him, and the usefulness of the shoe is gone.

These facts lead to the following conclusion: we have the good luck to have an infantryman with a natural sole. Before making him lose his native agility, ought we not to seek to utilize him just as he is? For difficult cases (rocky roads, wire, etc.) we should furnish him, as he furnishes himself in his own country, with footgear suited to the emergency, quickly donned and quickly removed, something, for example, like the Soudanese samara, the Catalan espadrille, or, perhaps better, the thick sandal of alfa (grass) in use in the south of Algeria. An urgent, but soluble, question.

The question of the knapsack (or pack) presents an interest serious, if less so than the shoes. Indeed, as easy as we have made it for them, the tirailleurs have an

excellent means of getting rid of the trouble -- they throw it away without more ado. But, if this is the case, the inutility of the pack is proven. Why impose it upon people who never get completely used to it? The blacks, it is true, are used to bearing enormous burdens. In the immense African regions where the climate has not allowed beasts of burden, man is the only vehicle of all that is transported. The black man is a born porter -- but in his own manner, which is not ours. Outside of the forest races, little or not at all represented in the recruiting of the battalions, everyone carries his burden on his head and not on his back..... To help "Toumané" to live properly with "Azor" we have laid violent hands on the "regulation kit". It is, however, a pure loss. The sacrifice is not sufficient. Let us try an experiment. Here is a line of Senegalese with pack on back and at "attention", and so, by definition, motionless. Now look at this line at a little distance. It gives the impression of undulating, oscillating, without ceasing. Give the order "Sac à terre!" Now the line is rigid.....The pack is for the black soldiers an instrument of torture. Besides the fatigues which it causes to all infantrymen in general, it has for the blacks special inconveniences: pressure by the straps on the chest, already imprisoned by the coat (which also has inconveniences), and from this comes shortness of breath. Besides, and this is more grave, when the man perspires, the pack, by its pressure, makes a moist spot on the outer clothing, exactly over the respiratory organs. If the soldier puts down his pack there is produced, exactly over the lungs, a rapid evaporation, and consequently a chilling, and cold is a redoubtable enemy of the black soldier. One has ascribed to this cause, probably with justice, the fact frequently noted that numerous respiratory troubles declare themselves in summer after marches and violent exercises. For these reasons the pack is, for the Senegalese, undesirable. But how shall we replace it?

Here, too, it is necessary to begin at the beginning, without regard to precedent. Given a certain irreducible weight, what is, [redacted] suit the pleasure of the tirailleur, the best way to carry it?

darkest

This first is to be noted: in Africa the marches are long, the revictualling difficult, and the troops have no regimental means of transport, no company wagons, for there is no road over which they may go. The men themselves are therefore obliged to carry all that is needed. [redacted] The author of these lines has seen tirailleurs march and fight under the sun of the Soudan, and, because of the lack of water, carry eighteen days provisions besides the other indispensable things. The normal load of the black is heavier than that of our infantrymen, and permits a minimum supply of two hundred cartridges, of ordinary model 74, and consequently heavier than those with ball "D". How are they to carry this weight? At home, the tirailleur distributes it in his goatskins, which have over the pack and the knapsack the advantage of being impermeable. It is probable that he would do the same thing in Europe, if he was left free. It is in such liberty that resides, probably, the solution sought for. We can try this: eliminate from the pack various objects useful only to the European, as brushes, etc. Our man almost never sews on a button, except in the last extremity, for buttons are replaced by his national method of fastening, string. ..... He prefers, to retain the marvelous natural beauty of his teeth, to chew assiduously some fibrous wood, rather than use our tooth-brushes, which he ~~prefers~~ likes to use in oiling his arms. Holding ourselves to what is strictly indispensable, that is, change of clothing, food, and cartridges, let the tirailleurs arrange this load to suit themselves in knapsacks, if we do not find goatskins. ..... If we insist on the aesthetics of uniformity, we have only to choose, or rather let the men choose, the most practical model, which will then be prescribed.

[] [] []

[]
[] []

Let us suppose that the defects noted above have been eliminated. Here is our African equipped as he wishes to be. Now what are we going to do with this fellow? He is a 'voltigeur' (light infantryman), as we have seen. Yes, but a 'voltigeur' extraordinarily lightened, and capable, in consequence, of a more considerable physical effort, of a more rapid and more prolonged effort, than the soldier loaded down. The utilization of this soldier appears very clearly. He is the instrument indicated for the supreme act of assault, the last shock, brutal and brief, which will bring success, and then for the exploitation of that success by pursuit.

Of such a troop..... the Germans would not have the XXXX equivalent. Their famous XXXX Stosstruppen, which we have seen appear this year on the battlefields of the Aisne, have the dash and the spirit of sacrifice required for their perilous role, and they handle in a superior manner modern engines of war. But they would lack the lightness, and consequently the ardor, which we would obtain, without any possible comparison, from our own Senegalese under their normal conditions. Let us remark that the Stosstruppen have, besides, a grave inconvenience. They skim the cream off the mass of the infantry (so to speak), taking away, for their murderous ends, the best elements. Nothing like this is true of the black battalions of shock troops. XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX In their bounds forward with their sidearms their losses are in inverse ratio to their swiftness. Besides, the Senegalese remain at the front only about six months. Thus there is an automatic diminution of half in the using up of the units. We shall have, then, the power to throw into the struggle a combat element probably superior to those at the disposal of our adversary, and that without weakening in any respect the value of our other resources. It would be an excellent reply to his shock troops (of quite a different model, it is true), with the added certainty that he has not the material from which to forge the same tool.

How shall we realize this conception in actual practice? After the experiment made, it seems that the solution is to unite among themselves black and white units, in the proportion, for example, of one Senegalese battalion to two European, a union which has stood the test. Employed as third or fourth battalions, as the case may be, our Senegalese formations will permit us to realize a gain of three European battalions, that is one regiment per division, twenty regiments for sixty black battalions, in the total of about seven European divisions.

The magnificent dash of the troops of this composition, on the Aisne and more recently at Avocourt, where the blacks have struck, authorizes us to think that army corps of this type would possess, for shock purposes, a superior value to others. We have learned this from the German newspapers, for a somewhat ungrateful silence continues to weigh down upon the obscure devotion of our poor "Toumanés". Such troops would constitute, in an action of wide sweep -- as, for example, the broad and definitive rupture of the enemy front, the taking of an ensemble of positions particularly redoubtable, operations with strategic ends to which we shall return presently -- the offensive troop par excellence, and, subsequently, the necessary masse de manœuvre.

[]
[] [][]
[][] [][] []

Other remarks obtrude themselves in connection with the tool of war which is confided to us. Such as we are able to shape it in the course of operations, it needs, be it understood, certain conditions of employment. First of all, and a most important point, the authority which handles it must be adapted to it. It does not support incompetence. It is necessary to consider that this "human material", as the military experts from beyond the Rhine call it, is what it is. To obtain full service from black troops, their officers must have acquired practice, proven by the only argument which counts -- previous success. It is in the past that it will be necessary to demand guaranties for the future. Every colonial whom chance has placed at the head of these special troops does not find himself invested, ipso facto, with the aptitude to command them. It is necessary that he should know not only their material needs, but also the mental characteristics of the race. This is not acquired: it is a pure gift of nature. Among white men there are those who may have lived for years in the midst of the native races, and yet are as ignorant of their intimate soul as they were the first day. The leader enters here into the domain of the imponderable, of the moral, and here some know how to move and others do not. However, this constitutes the chief factor of success. Before demanding the supreme sacrifice from men, who are animated alone by their doglike devotion and their simple loyalty, a commander of black units must avoid tying them down to the role of beasts of burden, on account of other troops less exposed. For the tirailleur, this savors of African slavery. He feels that he is placed, in relation to his companions in arms endowed by fortune with a white skin, -- but from whom danger exacts no more than from him -- upon a lower plane, whose position he measures perfectly. This is, indeed, the fortune which awaits him -- experience has proven it -- if he finds himself distributed in groups too small, if he has not the force which comes from a certain mass, if he gives the impression of the poor relation trailing behind comrades in compact formations. To see themselves in large numbers is for these exiles, these 'uprooted' ones, a great comfort. In a troop they feel less strange. It is a little of their composite Africa, with its diverse races recognizable for them by the tattooing of the ethnic families, of its countries -- in the French sense of the word -- that their assembling realizes for them; something, in a word, of the patrie, which without doubt is not for them a political reality, but of which they have the equivalent in the very lively sentiment of race. In the mud of the trenches, at the bottom of damp shelters, around the plate of rice fearfully and wonderfully spiced, good humor and unconcern, which are the very foundation of their fatalistic bravery, will be just as much more lively, more enduring and more solid, as there are more voices raised in the greater number of idioms, evoking the more villages, rivers, corners, and common aspects of the natal land.

From a consideration of these data this need results -- a minimum numerical grouping. To what unit must it correspond? The 6th Army included three magnificent regiments, two of which were enlisted just as they came. Endowed with cohesion, spirited, fashioned with a master-hand by two expert corps commanders, composed, it is true, of the élite of our black troops, they proved once more that veteran tirailleurs can constitute units of a value equal -- or even superior, their officers say -- to any European unit. The experiment with the unit next above, the black brigade, remains to be made. The time for this does not appear ripe, and, under the present harsh conditions, we have no opportunity to see it tried without imprudence. Let us admit, then, that the regiment offers us, as the case stands now, the highest limit fixed by actual experience. The limit immediately below, the battalion, has also given entire satisfaction, under circumstances even more difficult. In this unit the number of natives is great enough to enable them to live after their own fashion, and, in consequence, to act through esprit de corps, to create their own traditions, to "former corps", to use their own definition, which is as expressive as it is accurate. It is thus that the

tirailleurs of the Paulet Battalion, the 34th, already cited at Douaumont, had the fixed idea of obtaining on April 16th, at Hurtebise, their second citation, which would give them the right to wear the fourragère.

A smaller division or unit (than the battalion) should not be adopted. In a unit capable of leading an action, that is to say, of sufficient importance to count tactically, no importance at all will be attached to the little company placed humbly on the left of the main body, perhaps somewhat as an experiment. Sometimes this method was adopted through the curiosity of the commanding officer, to see how the new recruits, newly come from the instruction camps, would act on the battlefields fertile in surprises for the young Africans. This same method is one of simple prudence in the case of any newly arrived native troop, and the same reasons have obliged us to divide up our recruits among the veterans already accustomed to the impressions of modern war, or to have them participate only after a period of careful preparation. But, this experiment once made, it is better not to prolong it, under pain of injuring the morale of the black soldiers. We know, through the publicity given to the affair, that in a certain important unit the Senegalese were broken up into companies lost amid the other units, and this in spite of warnings, and that, a short time afterward, the minister himself communicated to the press his order to revoke this unfortunate measure..... Such measures are condemned by the understanding which we ought to have of our native troops.

[] [] [] [] []

Thus motives purely military exact that the black troops should be grouped in units of sufficient size to give them consistency. Administrative reasons strengthen this conclusion.

We have tried to feed these troops completely in the European fashion. This method, from the standpoint of uniformity, presented incontestable advantages. Unfortunately, the black soldier, sparing when he must be, eats much. These Africans should have the proper nourishment whenever it is possible to give it to them. To convince ourselves of it, it is sufficient to note that the cultivated surface of French West Africa is much more extensive that the total surface of France. They have there two, and in some regions three, harvests annually, although the total population is not half that of France. Nevertheless, if we except a very small quantity of maize exported to Dahomey, no grain leaves the country, but it is all consumed there, a fact which does not prevent the occurrence of shortages.

But what is this production, this element of native nourishment? Farinaceous entirely. The use of meat, among the Soudanese, is quite exceptional. The preparations with a cereal and starchy base constitute, for the Nigerian who has become a soldier, the basis of nourishment. What does European food offer him? Bread, certain vegetables, potatoes, beans, which he accepts, but as condiments accompanying the principal dish, that is, the bowl of rice, maize, millet or bananas, which fills his stomach. In our culinary art, otherwise very much appreciated by him, this dish is lacking. The bread, without doubt, is a very agreeable novelty. The soft part has some likeness to the famous bowl which he regrets. But what is he to do with the crust, except to throw it away, or, better, to exchange it with some shrewd and famishing gamin for tobacco picked up on the sidewalks in the form of cigarette-ends, ... or for matches? On the whole, our man has not had his fill, and he ought to have it. We ought to return to his native dish, boiled rice, which is given to him as a supplementary ration.

Similarly, his clothing is not like that of the other poilus. He has no war-time "marraine" to knit him sweaters, which he needs even ~~before~~ more than the others do. He can count only upon the liberality of the clothing-shop for shoes and other

(Utilisation)

Continuation of anonymous article by "X" entitled "L'Utilisation des Troupes Noires" in the Revue de Paris,

24e Annee, Tome 6 (1917)
(Nov.-Dec. 1917)
pp. 872 - 894.

(These pages in continuation begin on Page 881.)

The question of footgear is always important for infantrymen, but it is of capital importance for the black troops. It is perhaps the great cause of the frozen feet in the month of April (1917). The drenching of the shoes in the rain in the trenches, and their subsequent shrinking under the action of the icy wind which blew on the Chemin des Dames, cut off in a most painful way the circulation of the blood in the swollen members. But, more than this, the shoes present for the black soldiers permanent inconveniences.

Why do the Senegalese battalions of France wear shoes? To tell the truth, we do not know. The shoes are given to them in Morocco or Algiers, without any other reason than that the other troops in the vicinity, Europeans or Arabs ..... are provided with them. The native African, at home, goes barefoot. Through a naive desire for uniformity we hampered with the regulation shoes the Turcos.....and, through the contagion of example, fifty years later, we did the same thing to the Senegalese, who had become their brothers in arms in Morocco and Algiers, though the Senegalese had been running through Africa for thirty years barefoot. Unfortunately, the feet of the black soldier are immense, and of a peculiar shape. For the want of a model better thought out we shoe them with "gunboats" of gigantic size, a mass of leather and nails of unbelievable weight. Very proud, as they are, to be provided with these beautiful

ornaments, these great agile monkeys loss none the less one of their best qualities as infantrymen -- their elasticity of step. They gain in place of it a tendency to quick fatigue and a heavy, labored gait. They learn to know the vexation of sores, blisters..... miseries of which they have up to this time been ignorant. Is it in reality necessary to impose these things upon them at the expense of their greatest usefulness? The question comes up for revision. To get the best out of it, we should bring to its solution neither prejudice nor preconceived idea.

2/12/100

In the first place, our beautiful Franch roads, and even our fields, ploughed or mown, ought to be no worse for marching than the uncultivated soil of Africa; furthermore, the experiment has never been tried, in France or elsewhere, of letting the Senegalese tirailleur go without shoes, as he does at home. Thus, no argument drawn from practice can be alleged against it. Finally, if the shoe is intended to combat the cold and the freezing of the feet, it has been proven, as was to be expected, that it is completely useless and even harmful. And this is how the black soldier acts. He wears his shoes through vanity and to do as his neighbot does. But he does not learn the rules for the care of leather, which are, besides, difficult to follow out during a campaign. Once soaked, his shoes harden, and hurt him. Then, without intending any harm, he cuts away the part which troubles him, and the usefulness of the shoe is gone.

These facts lead to the following conclusion: we have the good luck to have an infantryman with a natural solo. Before making him lose his native agility, ought we not to seek to utilize him just as he is? For difficult cases (rocky roads, wire, etc.) we should furnish him, as he

furnishes himself in his own country, with footgear suited to the emergency, quickly donned and quickly removed, something, for example, like the Soudaness samera, the Catalan espadrille, or, perhaps better, the thick sandal of alfa (grass) in use in the south of Algeria. An urgent, but soluble, question.

The question of the knapsack (or pack) presents an interest serious, if less so than the shoes. Indeed, as easy as we have made it for them, the tirailleurs have an excellent means of getting rid of the trouble -- they throw it away without more ado. But, if this is the case, the inutility of the pack is proven. Why impose it upon people who never get completely used to it? The blacks, it is true, are used to bearing enormous burdens. In the immense African regions where the climate has not allowed beasts of burden, man is the only vehicle of all that is transported. The black man is a born porter -- but in his own manner, which is not ours. Outside of the forest races, little or not at all represented in the recruiting of the battalions, everyone carries his burden on his head and not on his back....To help "Toumane" to live properly with "Azor" we have laid violent hands on the "regulation kit". It is, however, a pure loss. The sacrifice is not sufficient. Let us try an experiment. Here is a line of Senegalese with pack on back and at "attention", and so, by definition, motionless. Now look at this line at a little distance. It gives the impression of undulating, oscillating, without ceasing. Give the order "Sac a terre!" Now the line is rigid . . . The pack is for the black soldiers an instrument of torture. Besides the fatigues which it causes to al infantrymen in general, it has for the blacks special inconveniences: pressure by the straps on the chest, already imprisoned by the coat (which

also has inconveniences), and from this comes shortness of breath. Besides, and this is more grave, when the man perspires, the pack, by its pressure, makes a moist spot on the outer clothing, exactly over the respiratory organs. If the soldier puts down his pack there is produced, exactly over the lungs, a rapid evaporation, and consequently a chilling, and cold is a redoubtable enemy of the black soldier. One has ascribed to this cause, probably with justice, the fact frequently noted that numerous respiratory troubles declare themselves in summer after marches and violent exercises. For these reasons the pack is, for the Senegalese, undesirable. But how shall we replace it?

2/12/01

Here, too, it is necessary to begin at the beginning, without regard to precedent. Given a certain irreducible weight, what is, to suit the pleasure of the tirailleur, the best way to carry it?

This first is to be noted: in darkest Africa the marches are long, the revictualling difficult, and the troops have no regimental means of transport, no company wagons, for there is no road over which they may go. The men themselves are therefore obliged to carry all that is needed. The author of these lines has seen tirailleurs march and fight under the sun of the Soudan, and, because of the lack of water, carry eighteen days provisions besides the other indispensable things. The normal load of the black is heavier than that of our infantrymen, and permits a minimum supply of two hundred cartridges, of ordinary model 74, and consequently heavier than these with ball "D". How are they to carry this weight? At home, the tirailleur distributes it in his goatskins, which have over the pack and the knapsack the advantage of being impermeable. It is probable that he would do the same

thing in Europe, if he was left free. It is in such liberty that resides, probably, the solution sought for. We can try this: eliminate from the pack various objects useful only to the European, as brushes, etc. Our man almost never sews on a button, except in the last extremity, for buttons are replaced by his national method of fastening, string. . . He prefers, to retain the marvelous natural beauty of his teeth, to chew assiduously some fibrous wood, rather than use our tooth-brushes, which he likes to use in oiling his arms. Holding ourselves to what is strictly indispensable, that is, change of clothing, food, and cartridges, let the tirailleurs arrange this load to suit themselves in knapsacks, if we do not not find goatskins. . . . If we insist on the aesthetics of uniformity, we have only to choose, or rather let the man choose, the most practical model, which will then be prescribed.

Let us suppose that the defects noted above have been eliminated. Here is our African equipped as he wishes to be. Now what are we going to do with this fellow? He is a 'voltigeur' (light infantryman), as we have seen. Yes, but a 'voltigeur' extraordinarily lightened, and capable, in consequence, of a more considerable physical effort, of a more rapid and more prolonged effort, than the soldier loaded down. The utilization of this soldier appears very clearly. He is the instrument indicated for the supreme act of assault, the last shock, brutal and brief, which will, bring success, and then for the exploitation of that success by pursuit.

Of such a troop . . . the Germans would not have the equivalent. Their famous Stosstruppen, which we have seen appear this year on the battlefields of the Aisne, have the dash and the spirit of sacrifice required for their perilous role, and they handle in a superior manner modern engines of

war. But they would lack the lightness, and consequently the ardor, which we would obtain, without any possible comparison, from our own Senegalese under their normal conditions. Let us remark that the Stosstruppen have, besides, a grave inconvenience. They skim the cream off the mass of the infantry (so to speak), taking away, for their murderous ends, the best elements. Nothing like this is true of the black battalions of shock troops. In their bounds forward with their sidearms their losses are in inverse ratio to their swiftness. Besides, the Senegalese remain at the front only about six months. Thus there is an automatic diminution of half in the using up of the units. We shall have, then, the power to throw into the struggle a combat element probably superior to those at the disposal of our adversary, and that without weakening in any respect the value of our other resources. It would be an excellent reply to his shock troops (of quite a different model, it is true), with the added certainty that he has not the material from which to forge the same tool.

2/12/101

How shall we realize this conception in actual practice? After the experiment made, it seems that the solution is to unite among themselves black and white units, in the proportion, for example, of one Senegalese battalion to two European, a union which has stood the test. Employed as third or fourth battalions, as the case may be, our Senegalese formations will permit us to realize a gain of three European battalions, that is one regiment per division, twenty regiments for sixty black battalions, in the total of about seven European divisions.

The magnificent dash of the troops of this composition, on the Aisne and more recently at Avocourt, where the blacks have struck, authorizes us to think that army corps of this type

would posses, for shock purposes, a superior value to others. We have learned this from the German newspapers, for a somewhat ungrateful silence continues to weigh down upon the obscure devotion of our poor "Toumanes". Such troops would constitute, in an action of wide sweep -- as, for example, the broad and definitive rupture of the enemy front, the taking of an ensemble of positions particularly redoubtable, operations with strategic ends to which we shall return presently -- the offensive troop par excellence, and, subsequently, the necessary masse de manoeuvre.

Other remarks obtrude themselves in connection with the tool of war which in confided to us. Such as we are able to shape it in the course of operations, it needs, be it understood, certain conditions of employment. First of all, and a most important point, the authority which handles it must be adapted to it. It does not support incompetence. It is necessary to consider that this "human material", as the military experts from beyond the Rhine call it, is what it is. To obtain full service from black troops, their officers must have acquired practice, proven by the only argument which counts -- previous success. It is in the past that it will be necessary to demand guaranties for the future. Every colonial whom chance has placed at the head of these special troops does not find himself invested, ipso facto, with the aptitude to command them. It is necessary that he should know not only their material needs, but also the mental characteristics of the race. This is not acquired: it is a pure gift of nature. Among white men there are those who may have lived for years in the midst of the native races, and yet are as ignorant of intimate soul as they were the first day. The leader enters here into the domain of the imponderable, of the moral, and here some know how to move and others do not. However, this

constitutes the chief factor of success. Before demanding the supreme sacrifice from men, who are animated alone by their doglike devotion and their simple loyalty, a commander of black units must avoid tying them down to the role of beasts of burden, on account of other troops less exposed. For the tirailleur, this savors of African slavery. He feels that he is placed, in relation to his companions in arms endowed by fortune with a white skin, -- but from whom danger exacts no more than from him -- upon a lower plane, whose position he measures perfectly. This is, indeed, the fortune which awaits him -- experience has proven it -- if he finds himself distributed in groups too small, if he has not the force which comes from certain mass, if he gives the impression of the poor relation trailing behind comrades in compact formactions. To see themselves in large numbers is for these exiles, these "uprooted" ones, a great comfort. In a troop they feel less able for them by the tattooing of the ethnic families, of its countries -- in the French sense of the word -- that their assembling realized for them; something, in a word, of the patrie, which without doubt is not for them a political reality, but of which they have the equivalent in the very lively sentiment of race. In the mud of the trenches, at the bottom of damp shelters, around the plate of rice fearfully and wonderfully spiced, good humor and unconcern, which are the very foundation of their fatalistic bravery, will be just as much more lively, more enduring and more solid, as there are more voices raised in the greater number of idioms, evoking the more villages, rivers, corners, and common aspects of the natal land.

From a consideration of these data this need results -- a minimum numerical grouping. To what unit must it cor-

2/12/106

respond? The 6th Army included three magnificent regiments, two of which were enlisted just as they came. Endowed with cohesion, spirited, fashioned with a master-hand by two expert corps commanders, composed, it is true, of the elite of our black troops, they proved once more that veteran tirailleurs can constitute units of a value equal -- or even superior, their officers say -- to any European unit. The experiment with the unit next above, the black brigade, remins to be made. The time for this does not appear ripe, and, under the present harsh conditions, we have no opportunity to see it tried without imprudence. Let us admit, then, that the regiment offers us, as the case stands now, the highest limit fixed by actual experience. The limit immediately below, the battalion, has also given entire satisfaction, under circumstances even more difficult. In this unit the number of natives is great enough to enable them to live after their own fashion, and, in consequence, to act through esprit de corps, to create their own tradition, to "former corps", to use their own definition, which is as expressive as it is accurate. It is thus that the tirailleurs of the Paulet Battalion, the 34th, already cited at Dousumont, had the fixed idea of obtaining on April 16th, at Hurtebise, their second citation, which would give them the right to wear the fourragere.

Thus motives purely military exact that the black troops should be grouped in units of sufficient size to give them consistency. Administrative reasons strengthen this conclusion.

We have tried to feed these troops completely in the

European fashion. This method, from the standpoint of uniformity, presented incontestable advantage. Unfortunately, the black soldier, sparing when he must be, eats much. These Africans should have the proper nourishment whenever it is possible to give it to them. To convince ourselves of it, it is sufficient to note that the cultivated surface of Franch West Africa is much more extensive that the total surface of France. They have there two, and in some regions three, harvests annually, although the total population is not half that of France. Nevertheless, if we except a very small quantity of maize exported to Dahomey, no grain leaves the country, but it is all consumed there, a fact which does not prevent the occurrence of shortages.

80/1/21/2

But what is this production, this element of native nourishment? Farinaceous entirely. The use of meat, among the Soudanese, is quite exceptional. The preparations with a cereal and starchy base constitute, for the Nigerian who has become a soldier, the basis of nourishment. What does European food offer him? Bread, certain vegetables, potatoes, beans, which he accepts, but as condiments accompanying the principal dish, that is, the bowl of rice, maize, millet or bannanas, which fills his stomach. In our culinary art, otherwise very much appreciated by him, this dish is lacking. The bread, without doubt, is a very agreeable novelty. The soft part has some likeness to the famous bowl which he regrets. But what is he to do with the crust, except to throw it away, or, better, to exchange it with some shrewd and famishing gamin for tobacco picked up on the sidewalks in the form of cigarette-ends, . . . or for matches? On the whole, our man has not had his fill, and he ought to have it. We ought to return to his native dish, boiled rice, which is given to him as a supplementary ration.

Similarly, his clothing is not like that of the other poilus. He has no war-time "marraine" to knit him sweaters, which he needs

even more than the others do. He can count only upon the liberality of the clothing-shop for shoes and other

24e Annee, Tome 6 (1917)
(Nov.-Dec. 1917)
pp. 872 - 894.

(These pages in continuation begin on Page 881.)

The question of footgear is always important for infantrymen, but it is of capital importance for the black troops. It is perhaps the great cause of the frozen feet in the month of April (1917). The drenching of the shoes in the rain in the trenches, and their subsequent shrinking under the action of the icy wind which blew on the Chemin des Dames, cut off in a most painful way the circulation of the blood in the swollen members. But, more than this, the shoes present for the black soldiers permanent inconveniences.

Why do the Senegalese battalions of France wear shoes? To tell the truth, we do not know. The shoes are given to them in Morocco or Algiers, without any other reason than that the other troops in the vicinity, Europeans or Arabs ..... are provided with them. The native African, at home, goes barefoot. Through a naive desire for uniformity we hampered with the regulation shoes the Turcos.....and, through the contagion of example, fifty years later, we did the same thing to the Senegalese, who had become their brothers in arms in Morocco and Algiers, though the Senegalese had been running through Africa for thirty years barefoot. Unfortunately, the feet of the black soldier are immense, and of a peculiar shape. For the want of a model better thought out we shoe them with "gunboats" of gigantic size, a mass of leather and nails of unbelievable weight. Very proud, as they are, to be provided with these beautiful

ornaments, these great agile monkeys loss none the less one of their best qualities as infantrymen -- their elasticity of step. They gain in place of it a tendency to quick fatigue and a heavy, labored gait. They learn to know the vexation of sores, blisters..... miseries of which they have up to this time been ignorant. Is it in reality necessary to impose these things upon them at the expense of their greatest usefulness? The question comes up for revision. To get the best out of it, we should bring to its solution neither prejudice nor preconceived idea.

In the first place, our beautiful Franch roads, and even our fields, ploughed or mown, ought to be no worse for marching than the uncultivated soil of Africa; furthermore, the experiment has never been tried, in France or elsewhere, of letting the Senegalese tirailleur go without shoes, as he does at home. Thus, no argument drawn from practice can be alleged against it. Finally, if the shoe is intended to combat the cold and the freezing of the feet, it has been proven, as was to be expected, that it is completely useless and even harmful. And this is how the black soldier acts. He wears his shoes through vanity and to do as his neighbot does. But he does not learn the rules for the care of leather, which are, besides, difficult to follow out during a campaign. Once soaked, his shoes harden, and hurt him. Then, without intending any harm, he cuts away the part which troubles him, and the usefulness of the shoe is gone.

These facts lead to the following conclusion: we have the good luck to have an infantryman with a natural solo. Before making him lose his native agility, ought we not to seek to utilize him just as he is? For difficult cases (rocky roads, wire, etc.) we should furnish him, as he

furnishes himself in his own country, with footgear suited to the emergency, quickly donned and quickly removed, something, for example, like the Soudanese samera, the Catalan espadrille, or, perhaps better, the thick sandal of alfa (grass) in use in the south of Algeria. An urgent, but soluble, question.

The question of the knapsack (or pack) presents an interest serious, if less so than the shoes. Indeed, as easy as we have made it for them, the tirailleurs have an excellent means of getting rid of the trouble -- they throw it away without more ado. But, if this is the case, the inutility of the pack is proven. Why impose it upon people who never get completely used to it? The blacks, it is true, are used to bearing enormous burdens. In the immense African regions where the climate has not allowed beasts of burden, man is the only vehicle of all that is transported. The black man is a born porter -- but in his own manner, which is not ours. Outside of the forest races, little or not at all represented in the recruiting of the battalions, everyone carries his burden on his head and not on his back....To help "Toumane" to live properly with "Azor" we have laid violent hands on the "regulation kit". It is, however, a pure loss. The sacrifice is not sufficient. Let us try an experiment. Here is a line of Senegalese with pack on back and at "attention", and so, by definition, motionless. Now look at this line at a little distance. It gives the impression of undulating, oscillating, without ceasing. Give the order "Sac a terre!" Now the line is rigid . . . The pack is for the black soldiers an instrument of torture. Besides the fatigues which it causes to al infantrymen in general, it has for the blacks special inconveniences: pressure by the straps on the chest, already imprisoned by the coat (which

also has inconveniences), and from this comes shortness of breath. Besides, and this is more grave, when the man perspires, the pack, by its pressure, makes a moist spot on the outer clothing, exactly over the respiratory organs. If the soldier puts down his pack there is produced, exactly over the lungs, a rapid evaporation, and consequently a chilling, and cold is a redoubtable enemy of the black soldier. One has ascribed to this cause, probably with justice, the fact frequently noted that numerous respiratory troubles declare themselves in summer after marches and violent exercises. For these reasons the pack is, for the Senegalese, undesirable. But how shall we replace it?

Here, too, it is necessary to begin at the beginning, without regard to precedent. Given a certain irreducible weight, what is, to suit the pleasure of the tirailleur, the best way to carry it?

This first is to be noted: in darkest Africa the marches are long, the revictualling difficult, and the troops have no regimental means of transport, no company wagons, for there is no road over which they may go. The men themselves are therefore obliged to carry all that is needed. The author of these lines has seen tirailleurs march and fight under the sun of the Soudan, and, because of the lack of water, carry eighteen days provisions besides the other indispensable things. The normal load of the black is heavier than that of our infantrymen, and permits a minimum supply of two hundred cartridges, of ordinary model 74, and consequently heavier than these with ball "D". How are they to carry this weight? At home, the tirailleur distributes it in his goatskins, which have over the pack and the knapsack the advantage of being impermeable. It is probable that he would do the same

thing in Europe, if he was left free. It is in such liberty that resides, probably, the solution sought for. We can try this: eliminate from the pack various objects useful only to the European, as brushes, etc. Our man almost never sews on a button, except in the last extremity, for buttons are replaced by his national method of fastening, string. . . He prefers, to retain the marvelous natural beauty of his teeth, to chew assiduously some fibrous wood, rather than use our tooth-brushes, which he likes to use in oiling his arms. Holding ourselves to what is strictly indispensable, that is, change of clothing, food, and cartridges, let the tirailleurs arrange this load to suit themselves in knapsacks, if we do not not find goatskins. . . . If we insist on the aesthetics of uniformity, we have only to choose, or rather let the man choose, the most practical model, which will then be prescribed.

Let us suppose that the defects noted above have been eliminated. Here is our African equipped as he wishes to be. Now what are we going to do with this fellow? He is a 'voltigeur' (light infantryman), as we have seen. Yes, but a 'voltigeur' extraordinarily lightened, and capable, in consequence, of a more considerable physical effort, of a more rapid and more prolonged effort, than the soldier loaded down. The utilization of this soldier appears very clearly. He is the instrument indicated for the supreme act of assault, the last shock, brutal and brief, which will, bring success, and then for the exploitation of that success by pursuit.

Of such a troop . . . the Germans would not have the equivalent. Their famous Stosstruppen, which we have seen appear this year on the battlefields of the Aisne, have the dash and the spirit of sacrifice required for their perilous role, and they handle in a superior manner modern engines of

war. But they would lack the lightness, and consequently the ardor, which we would obtain, without any possible comparison, from our own Senegalese under their normal conditions. Let us remark that the Stosstruppen have, besides, a grave inconvenience. They skim the cream off the mass of the infantry (so to speak), taking away, for their murderous ends, the best elements. Nothing like this is true of the black battalions of shock troops. In their bounds forward with their sidearms their losses are in inverse ratio to their swiftness. Besides, the Senegalese remain at the front only about six months. Thus there is an automatic diminution of half in the using up of the units. We shall have, then, the power to throw into the struggle a combat element probably superior to those at the disposal of our adversary, and that without weakening in any respect the value of our other resources. It would be an excellent reply to his shock troops (of quite a different model, it is true), with the added certainty that he has not the material from which to forge the same tool.

How shall we realize this conception in actual practice? After the experiment made, it seems that the solution is to unite among themselves black and white units, in the proportion, for example, of one Senegalese battalion to two European, a union which has stood the test. Employed as third or fourth battalions, as the case may be, our Senegalese formations will permit us to realize a gain of three European battalions, that is one regiment per division, twenty regiments for sixty black battalions, in the total of about seven European divisions.

The magnificent dash of the troops of this composition, on the Aisne and more recently at Avocourt, where the blacks have struck, authorizes us to think that army corps of this type

would posses, for shock purposes, a superior value to others. We have learned this from the German newspapers, for a somewhat ungrateful silence continues to weigh down upon the obscure devotion of our poor "Toumanes". Such troops would constitute, in an action of wide sweep -- as, for example, the broad and definitive rupture of the enemy front, the taking of an ensemble of positions particularly redoubtable, operations with strategic ends to which we shall return presently -- the offensive troop par excellence, and, subsequently, the necessary masse de manoeuvre.

Other remarks obtrude themselves in connection with the tool of war which in confided to us. Such as we are able to shape it in the course of operations, it needs, be it understood, certain conditions of employment. First of all, and a most important point, the authority which handles it must be adapted to it. It does not support incompetence. It is necessary to consider that this "human material", as the military experts from beyond the Rhine call it, is what it is. To obtain full service from black troops, their officers must have acquired practice, proven by the only argument which counts -- previous success. It is in the past that it will be necessary to demand guaranties for the future. Every colonial whom chance has placed at the head of these special troops does not find himself invested, ipso facto, with the aptitude to command them. It is necessary that he should know not only their material needs, but also the mental characteristics of the race. This is not acquired: it is a pure gift of nature. Among white men there are those who may have lived for years in the midst of the native races, and yet are as ignorant of intimate soul as they were the first day. The leader enters here into the domain of the imponderable, of the moral, and here some know how to move and others do not. However, this

constitutes the chief factor of success. Before demanding the supreme sacrifice from men, who are animated alone by their doglike devotion and their simple loyalty, a commander of black units must avoid tying them down to the role of beasts of burden, on account of other troops less exposed. For the tirailleur, this savors of African slavery. He feels that he is placed, in relation to his companions in arms endowed by fortune with a white skin, -- but from whom danger exacts no more than from him -- upon a lower plane, whose position he measures perfectly. This is, indeed, the fortune which awaits him -- experience has proven it -- if he finds himself distributed in groups too small, if he has not the force which comes from certain mass, if he gives the impression of the poor relation trailing behind comrades in compact formactions. To see themselves in large numbers is for these exiles, these "uprooted" ones, a great comfort. In a troop they feel less able for them by the tattooing of the ethnic families, of its countries -- in the French sense of the word -- that their assembling realized for them; something, in a word, of the patrie, which without doubt is not for them a political reality, but of which they have the equivalent in the very lively sentiment of race. In the mud of the trenches, at the bottom of damp shelters, around the plate of rice fearfully and wonderfully spiced, good humor and unconcern, which are the very foundation of their fatalistic bravery, will be just as much more lively, more enduring and more solid, as there are more voices raised in the greater number of idioms, evoking the more villages, rivers, corners, and common aspects of the natal land.

From a consideration of these data this need results -- a minimum numerical grouping. To what unit must it cor-

respond? The 6th Army included three magnificent regiments, two of which were enlisted just as they came. Endowed with cohesion, spirited, fashioned with a master-hand by two expert corps commanders, composed, it is true, of the elite of our black troops, they proved once more that veteran tirailleurs can constitute units of a value equal -- or even superior, their officers say -- to any European unit. The experiment with the unit next above, the black brigade, remins to be made. Gustave Mercier - Indigènes Nord-Africains et la guerre.

Revue de Paris, 1918, Tome 4, pp. 203-222.

Free translation:

The role played during the war by the native populations of our colonies, and especially by those of North Africa, attracts attention to their present and future situation with regard to the mother country. The French colonies are not, like the English Dominions of Canada or Australia, children of full age and emancipated from home government, who come spontaneously to group themselves around her in the hour of danger. But, although younger and more dependent, their aid has not been the less efficacious, and one can say that the help of North Africa has been one of the elements essential to success. All the world knows the splendid part played at Charleroi, on the Marne, in Champagne, at Verdun, and on the Somme, by our zouaves, our tirailleurs, our Moroccan division, those shock troops par excellence. It is a matter now, after having studied near at hand how these native troops have been made up, of seeing under what form our gratitude toward them can be made manifest.

On the other hand, the coming into France of some tens of thousands of arabised Berbers, a certain number of whom create attachments in the country which survive the war, produces various results which also interest us.

The rules which will guide us in our new relations with the natives will influence, in a very large measure, the future of our colonies. May the experience of the past keep us, in such matters, from yielding to headlong impulses!

****

Until recent years the participation of the Algerian natives in the national defence was purely voluntary. The three regiments of tirailleurs and the three regiments of spahis of Algiers were recruited only through enlistments. The Berbers went into the infantry, attracted

by the double-allurement of a bonus and a retiring allowance, granted after twelve years of service. A small allowance, indeed (from two to three hundred francs), but one which not the less made of its beneficiary a privileged person, a man with an assured existence, in a society little exacting and where life is hard.

The Arabs of the half-nomadic tribes of the High Plateaus and of the South have always had an aversion to service in the infantry, in which one must carry the knapsack, which they call by a term of contempt the 'bardaa', the pack-saddle of an ass or mule. The flaming burnoose of the spahis, on the other hand, has always excited their desire. The Arab is at bottom an aristocrat. He is a horseman, a cavalier. He consents to serve us only if we permit him to satisfy his tastes. The ideal of the military state for him is that of the Arab cavalier of the bureau, who is an officer of administration as well as a soldier, that is, one who proceeds from the chief and his authority. To conform to the political ideas of the Arabs, and to please them, it is necessary that this authority should be absolute, or should seem to be so.

Our native contingents had given satisfactory proofs in many a colonial expedition, and more recently in Morocco. There could be not the shadow of a doubt concerning their loyalty. They have proven that it was superior to every other sentiment, even religious. Tirailleurs and spahis have shown, against Moroccoans of their own race and faith, an ardor without equal, and which, indeed, it was sometimes difficult to restrain. But the tested loyalty and valor of this handful of regular troops could not give them an important role in a contest in Europe.

To tell the truth we had been busy for several years trying to get a better advantage from the seven millions of Mohammedan subjects of Algiers and Tunis. Tunis has always known, even before the time of our occupation, obligatory military service. The antiquated recruiting-system of the army of the Bey had been adopted for our own troops, for

the want of a better. The people accepted it just as it was, and it was relatively easy to develop and intensify it. In Algiers the question was much more complex. Compulsory service had not been put into practice since the conquest. The natives disliked it intensely. They invoked against it the terms of the capitulation of Algiers, which pledge respect for their statutes. They had never, even in the time of the Turks, furnished the elements for regular armies, and they offered us generously 'goums' and footsoldiers, to constitute a local militia. From the French colonists, too, there was lively resistance, but for very different reasons. The three general councils of Algiers, and especially that of Constantine, saw in the obligatory service of the natives a dangerous similarity to the obligations incumbent upon Frenchmen alone, and feared that parity of duties might bring parity of rights, and that military service must sooner or later mean suffrage. They foresaw in the native mass an opposition which could become even insurrection, and mean for the colony an era of troubles and difficulties. To meet the needs of the hour they advocated the development of the system of voluntary enlistments, through an intense propaganda and through the offering of bonuses and pensions.

The government acted, but took account, in large measure, of the objections which had been set up. The system adopted had nothing in common with the French military law. It managed the transition by establishing a very mild form of drawing lots, which was to take only ten per cent of the annual contingent. It authorized substitutes, although these were prejudicial, in a way, to voluntary enlistments, and it gave bonuses to those called, in order to place them on a par with those who had enlisted. Finally, it offered no compensation in the way of political rights.

The first class was called in 1912. The recruiting took place without trouble. The cases of individual resistance took the form of

insubmission, and were relatively numerous. None the less an important step had been taken. Compulsory service was instituted and was functioning in some fashion at least, and the Arab tribes consented to serve the 'roumi' (the Christian), and even in the infantry! Time would do the rest, and with it would come further developments of the system. But it was just this element of time that was going to be lacking.

The nuclei of new regiments were set up in 1912, and were to increase by the addition of the contingents of the two following years, the term of service being three years. The incorporation of the class 1913, as small as that of 1912, was made without difficulty, but the war surprised us in the midst of our organization, and before the new plan had been able to bear fruit and develop normally.

****

We acted then under stress of necessity rendered pressing by events and by the needs of our effective forces. The task of the organizers was complex, for the combats of August and September, 1914, had been especially deadly to our native troops. The number of African regiments having been once fixed . . . . . it was necessary to keep them up, responding steadily to the needs of the armies. The solution was very wisely left to voluntary enlistments. A new kind of enlistment was improvised, and immediately gave excellent results. The enlistment was for the duration of the war, estimated provisionally at six months, but this estimate had no consequence for the enlisted man other than this, that it gave him a right to a renewal of the bonus at the end of each completed period,. It was sufficient to fix this bonus at one hundred francs, and the enlistments flowed in. A subsequent law raised it to two hundred francs, but only for the first enlistment period.

It is not for us to say here what resources these enlistments procured for us, nor to set down the figures. It suffices to affirm that the expectation of the organizers was not deceived. The great needs for men which were manifest in the last months of 1914 could be compl[illegible]

satisfied. Any other method of recruiting would have probably provoked in North Africa grave complications, at a time when it was indispensable that we have absolute tranquillity.

The native populations had no very precise notions about the war. The country people are so ignorant that France is for them a word almost without meaning. They knew only that from there came the roumis (christians), and that it was necessary to cross the sea to get there. Is it a city, or several cities, or a country, and of what extent? God knows. I talked recently with one of the imans sent into France at the very beginning of the war for the religious service of the Mohammedan troops. He was a very keen man who, in spite of his complete ignorance of the French language, has adapted himself perfectly to the new existance into which he has been thrown in one of our pretty villages of the South of France. As I was astonished at his complete isolation, and asked him if his family was not planning to join him, he said, "They are savages. They will never consent to cross the sea. They imagine that the war is in Marseilles."

It would have been dangerous, under such conditions, to have developed intensively a system of conscription established over night, and to call out large quotas of young soldiers whom their parents would regard as doomed to a certain death. It was necessayy also to avoid the danger of a yielding which would have been interpreted as a mark of weakness and fear. The government and the Algerian administration proceeded in this matter with wisdom and prudence. They levied at the usual time, as in preceding years, a small fraction of the classes of 1914, 1915 and 1916. But the calling out of the class of 1917 was made somewhat earlier, and the proportion of those called was increased. The local resistance which this measure met in Algiers proved that we had been inspired wisely in not pressing the matter before.

But it is important to note that for two years there has been a

considerable change of feeling. France is better known, and the dangers of the war are more justly appreciated. The fantastic stories which circulate in savage countries, and which some of the enlightened still peddle about, encounter today ears that are less credulous. The government was able to decide to levy the whole of native class 18 without provoking the least protest. The annual contingent of those called out is multiplied ten times. Thus a few years have sufficed to give to the problem which excited so many apprehensions a complete and adequate solution.

It remains now to explain how voluntary enlistments have been able to produce, alone or almost alone, such fine results from the beginning of the war, when the native population was, as a mass, hostile to military service. It is not necessary to see in these enlistments a movement comparable to that of the volunteers of the French Revolution, who came, in the face of a foreign danger, to make the sacrifice of their lives upon the altar of their country. What motive, then, could drive this mass of men who were not candidates for a military career, since they preferred to limit their service by the length of the war, rather than choose an enlistment for a definite term, which would entitle them to a pension? Some of them - and it would be most unjust not to recognize it - were driven by a sincere love of France, but these belonged to an élite small in numbers, and we have seen that the élite were, at bottom, averse to service in the infantry. The great chiefs, the young men of noble family, wished to organize tribal cavalry and enroll themselves therein. In this way they satisfied their patroitic sentiments and their taste for display and parade; but the tribal horseman have not played and could not play, in this struggle so different in character from that which we had foreseen, anything but a secondary role. There is no place in the trenches for a feudal troop, nor for fantasy! The tirailleur, on the other hand, found his place there, and was all the more in place, when it was necessary to climb out for an attack, were it

against barbed wire badly demolished by artillery, or under a hail of shells and shrapnel!

The fact is that this tirailleur is a soldier in his soul. He was quite unaware of his powers, a peaceable agricultural laborer or a 'khammes' (farmer on shares), but the war breaking out, has reawakened in him atavistic instincts, dormant forces. There is in Algiers a whole class of people who, without having any assured means of existence, nevertheless pass their lives doing nothing. They call themselves 'chemmas', that is, 'drinkers of the sunlight'. Stretched out in the sun all day long, they work only when they cannot do otherwise, and stop as soon as they have wherewith to satisfy their immediate needs. For the 'chemmas' the allurement of a bonus, which though small, is immediately available, is irresistible. Now a few months suffice to make of the 'chemmas' a soldier.

Another excellent recruiting agent was the daily allotment, generously accorded to native, as to French, families. In this society with rudimentary needs a monthly allowance of thirty-five francs and more gives comfort, almost riches. A number of families get together and persuade one of their members that it is his duty to sacrifice himself for the good of all. One knows how powerful has remained the authority of the father of the family in native society. It is he who assigns to each one his duty, and at need even imposes on him a sacrifice. We have seen cases where he has driven one of the younger sons to accuse himself falsely, to save the oldest son who was justly accused of murder. A large number of those who enlisted for the war did so under pressure of their families, who sacrificed them for the common good. In the case of these poor people, always uncertain of tomorrow's subsistence, future security was based, as it were by the irony of fate, on the most frightful catastrophe which has ever overwhelmed the human race, and the very duration of that catastrophe rendered the profit more advantageous.

Finally, there was that crowd of men without a fixed domicile nor a known profession, those who encumber the sidewalks of the cities, and who, in the country, busy themselves with the theft of cattle and with nocturnal excursions. With these the official propaganda was all the more efficacious since they felt themselves menaced by previous convictions. They found in the army an asylum, a refuge, a security against possible disasters.

For all it was, besides, the great adventure. Many of these young men had never seen the sea. They knew our great cities, our Algerian ports, only by hearsay. They were going to traverse the Mediterranean, to see France - the unknown, almost fabulous land - and, more than all, they were going to fight! These are indeed the men who gave to Carthage those mercenaries capable of crossing the Alps and of exterminating the Roman legions at Trasimus and at Canne. In them still boils the blood of the troops of Jugurtha, who every year left the plow to indulge in raids.

As to what this war could be they had certainly no clear notion, but none of them was ignorant of the dangers of it. The power of Germany was known, and it was known also that she had formerly vanquished France. If they did not know exactly what her means of action might be, they knew at least that they were formidable. They knew also her desires, they knew that she coveted North Africa, Morocco and Algiers. In the most distant villages exaggerated or absurd rumors found belief. A chief from the South told me that many under his charge had been shaken because they had been assured that Germany would reduce their taxes to fifty centimes a head. Others spoke of a landing of Turks in the south of Tunis, and of an attack by the Tripolitans in southern Algiers. From time to time some fanatic would run through the villages, announcing that the government no longer existed, and that there was no more law or police.

It was the business of the war councils to prove that the law

of that Moroccan division -- composed mainly of Algerians -- who, in May 1915, near Arras, penetrated the German lines to a depth of seven kilometers, and were cut to pieces. What officers and what 'non-coms' were those Europeans who directed and lead such troops. The hard thing for the company commander is, not to carry them with him, but to keep up with them, for nothing can restrain their madness but their love for their leader, which holds sway over them even in the hour when their savage instincts are let loose. For one of the most touching characteristics of these warriors is that they never abandon their leader, and innumerable instances are known of tirailleurs who have been killed trying to save a wounded officer, or bring his body into our lines.

****

These qualities of the professional soldier we shall find in the twenty-year old, in the recruits of the classes of 17 and 18, for they are qualities of the race. With them the separation from their families is painful, and sometimes not effected without resistance, for, to break bonds so strong in a native society, there are not great enthusiasms such as ~~have~~ have performed miracles among us Frenchmen -- the love of country, devotion to ~~superior~~ lofty ideas, to a form of civilization, to an ideal whose safety is preferred to life itself. It was absolutely necessary to withdraw these young men from the depressing influence of the family circle. Their military education will be given henceforth in France -- a happy thought, whose first consequence is to awaken the minds of young men lacking neither in intelligence or power of adaptation by showing them a form of life so different from their own.

An imperious religion, exacting to the degree of dominating all the habits of life, including even food and clothing, has so fashioned their spirits that they are offended, wounded, by a thousand daily details -- the necessity of eating the flesh of animals not killed according to certain rites, the eating of leavened bread, the impossibility of saying the five daily prayers preceded by the prescribed ablutions, and above all, the

rigid discipline, the regular employment of hours and minutes hitherto spent in idleness, all these new things make the process of detachment from the home-land a painful one. The young man who has never left his 'mechta' or village is homesick for a nature more ardent, a sun more warm, and for the days of idleness in the midst of his family. His first letters to his parents show prejudices so great that they hide the truth from him, and we find in them an appreciation of their new country of residence hardly to be expected from inhabitants of the semi-desert steppes. "They told us", said one of them, "that France was a beautiful country, but in reality it is a monotonous country, a poor country, a country of mountains."

But soon, whatever his disappointments, he has to yield to the evidence. The young soldier is better clothed, better lodged than at home, and he wears with pride his fine red chechia (cap) and his long khaki coat. The food, richer and more abundant, develops him in a few weeks, and he feels his strength grow in the good air of France and with the daily exercise. The visits of the imam quiet his scruples about the non-observance of the rules of the Koran, for has not God said that in war-time even the fast of the Ramadan, the first and most rigorous of religious rules, is not imposed on the soldier, for it would weaken the fighter for the great benefit of his enemies? Little by little, in contact with the veterans and with the non-commissioned officers, the military spirit does its work. The life of the regiment, so absorbing in its minutiæ, so completely regulated in its smallest details, takes possession of the whole man. The officer, by interesting himself in his men, by speaking to them as he would do to children, acquires a great ascendancy over them. The visits of the officer-interpreters, and their talks, awaken in these young men new ideas about France, about civilization, and about the great war the world is waging against the powers of oppression, murder and pillage. Has not even the head of the Mohammedan religion placed himself on the side of justice, and in opposition to the false Mohammedans, servants of William, the incendiary?

Thus a moral conquest has been effected of which our country should be proud. No means have been used which did not appeal to reason or to the moral sentiments, and there have been no brutalities such as the Germans have used in similar cases, and whenever they have wished to use native troops in their colonies. No corporal punishment has ever been inflicted, and there has been no occasion for it, and this is indeed a subject for wonder, when we think that these people, left to themselves, have always made of tortures and physical punishments their principal means of government.

Their satisfaction is expressed in their correspondence in naive formulas, with a phraseology entirely oriental . . . . . .

"To that golden chain, that mine of generosity and of perfect education, my brother. To him be a thousand greetings, and may each one be followed by a thousand others, with as many benedictions from God. To that noble and glorious lady, also, our mother, give a thousand greetings, and twice a thousand to that intrepid knight, our father. (He who speaks thus is the son of a peasant, a humble fellah.) Know that I am well, that I praise God if you are as well as I."

Another has a personal touch:

"The major sent for me, and I think he takes me for the son of a cadi. When he observed that I spoke French he said, "You do your duty well, you are intellgient, and I shall make you an acting corporal." So when I come to see you on leave I shall have on my sleeve those two proud little wool stripes! Tell this to my wife. I hope, indeed that henceforth you will address her as "Madame corporal."

These nineteen-year old children, many of whom are already married, have a clear notion of their duties, and the desire to do them. One of them writes to his parents:

"Be tranquil on my account. I neither drink, gamble, nor frequent evil resorts, but on the contrary I am busy about my duty. If God decrees my

death, bow in submission, and be not troubled. If He permits me to return to you, may He be praised!"

Such is the spirit of this young class. Can one doubt, if he should go into battle, that he will show himself worthy of the professional soldiers, who have constituted up to now, with those enlisted for the war, the bulk of our regiments of tirailleurs?

But, forstalling events, let us ask ourselves what is going to become, after the victory, of so many natives who will have lived for years the life of Europe, and who will have received ideas which had never stirred the minds of their fathers. What will be, with relation to us, the new situation of these natives, not only soldiers, but thousands of Algerian, Tunisian and Moroccan workmen, whom the scarcity of labor has drawn into our shops to satisfy the needs of war and industry?

The soldiers called out, and the workers, too, who were drafted, have no thought other than to return there to take their places once more amid their own people and to busy themselves about their own affairs. These will certainly give France some good advertising, a propaganda spreading into the remotest villages. Life for the farmer is hard in Algiers, amid the caprices of a climate in which the extremes -- mistral and sirocco, frost and blazing sun, drought and inundation -- alternate with other scourges, of which the locusts are not the least. They will recall the easy and assured life which they led in France, and that life, once free from the dangers and chances of war, will appear tempting to many others, who will want to enjoy it. Unfortunately, the movement of emigration thus set up will not bring into the mother-country the best elements of native society. All those who have the means of assured existence, a family to which they are firmly attached, will not think of leaving their native country. To tear them from their environment, there would be needed an irresistible force like that which draws them today, and which, let us hope, will not be manifest again. On the other hand, the disinherited, the men out of work,

the Kabyle workmen who came even before the war to sell their labor in the mines of the North, will come in crowds. Our industry will find in them a considerable resource, which the scarcity of labor will make valuable; but certain dangers may arise out of it, and to these I will return later on.

The former tirailleurs, the survivors of the first engagement, who, for the most part, have made long stays in our sanitariums and our convalescent depots, have undergone an evolution of ideas in these three years. They have contracted new habits -- not always good ones, alas, notably that of drinking -- and these have become for them second nature ..... They have become accustomed to 'sweet France'. Some have formed attachments, and ask to establish themselves here. Many wish to be discharged in France. They have been the object, in the hospitals and in the course of their convalescence, of care so devoted that they cannot forget it. How many times have I seen them manifest a lively and sincere gratitude for their admirable nurses.

"What they have done for me," said a native officer, who was to die under the beattiful sky of Nice after eights months of suffering, "neither my mother nor my sister will ever do."

Their desire is contrary to the regulations, which try to obviate the multiplication of false situations by yielding to the infatuation of a day, and encumbering the mother-country with people without any means of subsistence except a pension, (which is usually insufficient), and whom it will be necessary to repatriate later. But, on the other hand, is it not to be feared that these discharged soldiers, discontented on account of the smallness ot their pension, weaned away from the life of the Algerian bled, and many of them crippled, may not give us a very bad name in their native country, and become there centers of influence hostile to our cause? It must be admitted that, if it is too often true that their attachments in France are little to be commended, there are also

those which rest on a more serious basis, and have sometimes received legal consecration. Mixed marriages have already taken place, and others are on the way. Ought we to favor them, or on the contrary to prevent them by every means possible? A grave question, which merits serious study.

In general, these legitimate unions are not viewed in a favorable light by the authorities, and for many reasons. Too often the wife-to-be comes from a questionable environment, and sees in this 'regularization' only an occasion to profit by the advantages granted the wives of soldiers, as in the case of the allotment. On the other hand, the tirailleur married in France undergoes the domination of his new family, who often give him false ideas as to his rights and duties, ideas little in harmony with the exigencies of military service. If on the other hand the wife is an honest woman, it is she who runs grave and multiplied risks. To confine ourselves to the moral inconveniences, let us remember that the Mohammedans have a conception of marriage quite different from ours. They divorce and repudiate their wives at their own desire, and they are polygamous. Who can prevent these husbands, if they should return to Algiers, from contracting before the cadi, or merely before two witnesses of their own tribe, one or several marriages entirely valid according to Mohammedan law? And what will be the value of the union contracted in Europe, and quickly forgotten? What will be the legal status of the children?

And so we raise a great question, that of the validity of such marriages -- a very fine legal question, for we cannot compare these unions, at any rate as far as the Algerians are concerned, with marriages contracted by Frenchwomen with foreigners. The Algerian Mohammedan native is not, from the standpoint of international law, a French subject, but he is a Frenchman under a special rule of law, who has a personal and hereditary status entirely different from that of our codes. The Frenchwoman who marries him does not change her nationality. Can it be maintained that she changes her personal status? Not at all. And yet her husband can, according to his personal status, be a bigamist.

These difficulties sometimes lead the administrative or military authorities to consider that from a legal point of view these marriages have no value and must remain of no effect. As far as we are concerned, we find ourselves unable to admit this conclusion, which appears neither logical or equitable. It is not logical, for it would regard as invalid the marriage of a Frenchwoman with one of our colonial subjects, while the marriage of this same Frenchwoman with a foreigner would be valid. It is not equitable, for hostility shown toward legal unions will in fact set up a propaganda in favor of free unions, which cannot be restricted, prohibited or controlled. It is necessary, too, to think of the children, and to assure their civil state, if not their future. It would appear absolutely necessary, then, that there should be legislative intervention with a view to regulating the matter. The special civil law which we have given to the natives of Algiers provides that their voluntary appearance before a French public official, as a notary, for the drawing up of a contract, involves the renunciation of their personal status and the adoption of the French law in place of the Mohammedan custom. Why should it not be provided similarly that the appearance of the couple to be married before the French civil official should involve the same consequences? The future husband would then acquire the full French personal status. This would be a sort of civil naturalization, which would be affected automatically, and we are convinced that from a moral point of view the relations between the races would be improved thereby. It is most unjust to regard these unions as necessarily doomed to failure. I know non-commissioned officers . . . who have enough morality to make good husbands and excellent fathers of families.

This question leads one to the consideration of another which is allied to it -- naturalization. There are many former tirailleurs who, having shed their blood for France, desire to be numbered among her true

sons. We must admit that the thing is not made easy for them, as well because of the many formalities to be gone through, as because of the difficulties often raised by the Algerian administration.

It seems, however, that naturalization ought to be made easy for those who have served France as volunteers. It ought to be a right for those who have obtained a promotion, or an honorable distinction, as the croix de guerre. Just as it would be dangerous and foolish to grant political rights en bloc to people not at all prepared to receive them, at the risk even of endangering French domination and the work of colonization magnificently begun on the other side of the Mediterranean, just so it is fitting to welcome loyally those who come to us of their own will and desire, and who have given unequivocal proofs of their attachment. Those who have sealed with their blood their alliance, and who present besides the desired guaranties, should be received by France with open arms. It is indispensable, if we wish to hasten the work of civilization, that we should favor as much as we can the evolution of individuals.

A dangerous formula, and one which appeared to be very much in favor just before the war, consisted in crying up for Mohammedan natives NATURALIZATION IN THEIR OWN STATUS, that is to say, naturalization which would permit them to become French citizens without renouncing polygamy, or their customs which were established once for all, thirteen centuries ago in Arabia. It is clear that such a naturalization would have only one effect, that of conferring on them political rights. But this is the very last thing for which they care, and it is for us the most dangerous thing to grant. It is really putting the cart before the horse to try to make them electors before making them civilized men. Let us commence then by putting an end to this mediaeval confusion between religion and civil rights, which has prevented the evolution of Islam for so many centuries. Let us teach our subjects to distin-

guish between these domains. Let us give them a proper understanding of civil rights, and of property, and give them the independence and the dignity of life which proceed therefrom. Let us better their conditions of life from an economic and fiscal standpoint, and let us, first of all, equalize the taxes for them and the Europeans. Let us better also their administrative conditions, and in the political domain, just in proportion as instruction penetrates among them, let us commence by initiating them into the direct rule of their villages, by the election of their immediate representatives. They will come to us deliberately as soon as they understand our ideas and are capable of appreciating them. The effective bringing together of the two races is more a moral than a material work. It is the end of an entire evolution.

Generous beginnings have been made manifest recently with a view to granting to our North African subjects reforms which will be a tangible evidence of France's gratitude toward them. The nomination of M. Jonnart as governor-general of Algiers was a first pledge, for our natives know with what attentive solicitude he has always surrounded them, and how benevolent and wise is his guardianship.

Under M. Jonnart the program sketched above has entered into the era of realization. A decree of the new governor has reestablished the djemaas de douar, that first nucleus of native political life, by opening them to election. A complete recasting of the Algerian fiscal system, involving the equalization of French and native taxes, has been presented to the Algerian assemblies. Various laws have been proposed before Parliament, one of which, proposed by the government, has already received the approbation of the proper committees of the Chamber.

It provides, for certain classes of natives and particularly for those who have served France, complete naturalization, which will be henceforth a right, and no longer a favor. We applaud this most heartily. Let us open our arms wide to those who of their own free will come to us, and who

are worthy. But the proposed law grants, besides, special political rights to large classes of natives, who will in the future elect, not only their municipal councilors, but a third of the members of the general councils and one of the three financial delegations. This sudden extension of political rights may seem considerable. Finally, the native municipal councilors will have the right henceforth to participate in the election of mayors. In reality a large share of the municipal administration passes into their hands. Are they sufficiently prepared to exercise it? Let us not forget that an evolution can take place only by degrees, that by hurrying one risks spoiling everything. The principle of individual accession is a good one. Too rapid generalizations, and the passion for equality which remains one of the eccentricities of our national character, may have in such a case unforeseen consequences. Let us be prudent, and, while preserving a clear view of the goal toward which we must proceed, let us not forget that time is an indispensable auxiliary.

At the point we have now reached in the gigantic conflict which puts at grips over the whole earth the religion of force and the principles of justice and liberty, we are commencing to see certain fruitful germs which the war has brought forth, certain evolutions which it has hastened. Among the nations who have voluntarily united to fight against Germany, it must have created bonds of real relationship; and not only will the relations between free nations be established on bases entirely different, in the future international law which will arise from the defeat of the Central Powers, but the nations themselves will have contracted new obligations in relation to those younger peoples who brought aid which, while less ~~thoughtful~~ reflective, was none the less precious. These younger brothers will know us better, and there will be established between them and us more frequent, more regular, more intimate relations. The material benefit

will be doubled. The surplus of the population of the colonies will find in Europe its employment, and the problem of labor, in our own country especially, will find a more and more complete solution. The moral benefit will be immense. For the older nations this will consist in a clearer and more intimate consciousness of their duties, of their mission; for the protected peoples it will consist in a new-found confidence in their protectors, and above all in their entrance into intellectual and moral domains hitherto closed to them. Thus is the future unfolded in the noble fraternity of the blood shed in common for the most just cause.

(Gustave Mercier)

[Revue de Paris]

Gustave Mercier - Indigenes Nord-Africains et la guerre.

Revuede Paris, 1918, Tome 4, pp. 203-222

Free translation:

The role played during the war by the native populations of our colonies, and especially by those of North Africa, attracts attention to their present and future situation with regard to the mother country. The French colonies are not, like the English Dominions of Canada or Australia, children of full age and emancipated from home government, who come spontaneously to group themselves around her in the hour of danger. But, although younger and more dependent, their aid has not been the less efficacious, and one can say that the help of North Africa has been one of the elements essential to success. All the world knows the splendid part played at Charleroi, on the Marne, in Champagne, at Verdun, and on the Somme, by our zouaves, our tirailleurs, our Moroccan division, those shock troops par excellence. It is a matter now, after having studied near at hand how these native troops have been made up, of seeing under what form our gratitude toward them can be made manifest.

On the other hand, the coming into France of some tens of thousands of arabised Berbers, a certain number of whom create attachments in the country which survive the war, produces various results which also interest us.

The rules which will guide us in our new relations with the natives will influence, in a very large measure, the future of our colonies. May the experience of the past keep us, in such matters, from yielding to headlong impulses!

****

Until recent years the participation of the Algerian natives in the national defence was purely voluntary. The three regiments of tirailleurs and the three regiments of spahis of Algiers were recruited only through enlistments. The Berbers went into the infantry, attracted by the double-allurement of a bonus and a retiring allowance, granted after twelve years of service. A small allowance, indeed (from two to three hundred frances), but one which not the less made of its beneficiary a privileged person, a man with an assured existence, in a society little exacting and where life is hard.

The Arabs of the half-nomadic tribes of the High Plateaus and of the South have always had an aversion to service in the infantry, in which one must carry the knapsack, which they call by a term of contempt the 'bardaa', the pack-saddle of an ass or mule. The flaming burnoose of the spahis, on the other hand, has always excited their desire. The Arab is at bottom an aristocrat. He is a horse-man, a cavalier. He consents to serve us only if we permit him to satisfy his tastes. The ideal of the military state for him is that of the Arab cavalier of the bureau, who is an officer of administration as well as a soldier, that is, one who proceeds from the chief and his authority. To conform to the political ideas of the Arabs, and to please them, it is necessary that this authority should be absolute, or should seem to be so.

Our native contingents had given satisfactory proofs in many a colonial expedition, and more recently in Morocco. There could be not the shadow of a doubt concern-ing their loyalty. They have proven that it was superior to

2/19/2

every other sentiment, even religious. Tirailleurs and spahis have shewn, against Morocceans of their own race and faith, an ardor without equal, and which, indeed, it was sometimes difficult to restrain. But the tested loyalty and valor of this handful of regular troops could not give them an important role in a contest in Europe.

To tell the truth we had been busy for several years trying to get a better advantage from the seven millions of Mohammedan subjects of Algiers and Tunis, Tunis has always known, even before the time of our occupation, obligatory military service. The antiquated recruiting-system of the army of the Bey had been adopted for our own troops, for the wantof a better. The people accepted it just as it was, and it was relatively easy to develop and intensify it. In Algiers the question was much more complex. Compulsory service had not been put into practive since the conquest. The natives disliked it intensely. They invoked against it the terms of the capitulation of Algiers, which pledge respect for their statutes. They had never, even in the time of the Turks, furnished the elements for regular armies, and they offered us generously, 'goums' and foot-soldiers, to constitute a local militia. From the Franch colonists, too, there was lively resistance, but for very different reasons. The three general councils of Algiers, and especially that of Constantine, saw in the obligatory service of the natives a dangerous similarity to the obligations incumbent upon Franchmen alone, and feared that parity of duties might bring parity of rights, and that military service must sooner or later mean suffrage. They

2/15/3

foresaw in the native mass an opposition which could become even insurrection, and mean for the colony an era of troubles and difficulties. To meet the needs of the hour they advocated the development of the system of voluntary enlistments, through an intense propaganda and through the offering of bonuses and pensions.

The government acted, but took account, in large measure, of the objections which had been set up. The system adopted had nothing in common with the Franch military law. It managed the transition by establishing a very mild form of drawing lots, which was to take only ten per cent of the annual contingent. It authorized substitutes, although these were prejudicial, in a way, to voluntary enlistments, and it gave bonuses to those called, in order to place them on a par with those who had enlisted. Finally, it offered no compensation in the way of political rights.

2/19/4

The first class was called in 1912. The recruiting took place without trouble. The cases of individual resistance took the form of insubmission, and were relatively numerous. None the less an important step had been taken. Compulsory service was instituted and was functioning in some fashion at least, and the Arab tribes consented to serve the 'roumi' (the Christian), and even <u>in the infantry</u>! Time would do the rest, and with it would come further developments of the system. But it was just this element of time that was going to be lacking.

The nuclei of new regiments were set up in 1912, and were to increase by the addition of the contingents of the two following years, the term of service being three years. The incorporation of the class 1913, as small as that

of 1912, was made without difficulty, but the war surprised us in the midst of our organization, and before the new plan had been able to bear fruit and develop normally.

***** **********

We acted them under stress of necessity rendered pressing by events and by the needs of our effective forces. The task of the organizers was complex, for the combats of August and September, 1914, had been especially deadly to our native troops. The number of African regiments having been once fixed . . . it was necessary to keep them up, responding steadily to the needs of the armies. The solution was very wisely left to voluntary enlistments. A new kind of enlistments was improvised, and immediately gave excellent results. The enlistment was for the duration of the war, estimated provisionally at six months, but this estimate had no consequence for the enlisted man other than this, that it gave hime a right to a renewal of the bonus at the end of each complete period,. It was sufficient to fix this bonus at one hundred francs, and the enlistments flowed in. A subsequent law raised it to two hundred francs, but only for the first enlistment period.

2/19/5

It is not for us to say here what resources these enlistments procured for us, nor to set down the figures. It suffices to affirm that the expectation of the organizers was not deceived. The great needs for men which were manifest in the last months of 1914 could be completely satisfied. Any other method of recruiting would have probably provoked in North Africa grave complications, at a time when it was indispensable that we have absolute tranquillity.

The native populations had no very precise notions about the war. The country people are so ignorant that France is for them a work almost without meaning. They knew only that from there came the roumis (christians), and that it was necessary to cross the sea to get there. Is it a city, or several cities, or a country, and of what extent? God knows. I talked recently with one of the imans sent into France at the very beginning of the war for the religious service of the Mohammedan troops. He was a very keen man who, in spite of his complete ignorance of the French language, has adapted himself perfectly to the new existence into which he has been thrown in one of our pretty villages of the South of France. As I was astonished at his complete isolation, and asked him if his family was not planning to join him, he said, "They are savages. They will never consent to cross the sea. They imagine that the war is in Marseilles."

It would have been dangerous, under such conditions, to have developed intensively a system of conscription established over night, and to call out large quotas of young soldiers whom their parents would regard as doomed to a certain death. It was necessary also to avoid the danger of a yielding which would have been interpreted as a mark of weakness and fear. The government and the Algerian administration proceeded in this matter with wisdom and prudence. They levied at the usual time, as in preceding years, a small fraction of the classes of 1914, 1915 and 1916. But the calling out of the class of 1917 was made somewhat earlier, and the proportion of those called was increased. The local resistance which this measure met in Algiers proved that we had been inspired

wisely in not pressing the matter before.

But it is important to note that for two years there has been a considerable change of feeling. France is better known, and the dangers of the war are more justly appreciated. The fantastic stories which circulate in savage countries, and which some of the enlightened still peddle about, encounter today ears that are less credulous. The government was able to decide to levy the whole of native class 18 without provoking the least protest. The annual contingent of those called out is multiplied ten times. Thus a few years have sufficed to give to the problem which excited so many apprehensions a complete and adequate solution.

It remains now to explain how voluntary enlistments have been able to produce, alone or almost alone, such fine results from the beginning of the war, when the native population was, as a mass, hostile to military service. It is not necessary to see in these enlistments a movement comparable to that of the volunteers of the French Revolution, who came, in the face of a foreign danger, to make the sacrifice of their lives upon the alter of their country. What motive, then, could drive this mass of men who were not candidates for a military career, since they preferred to limit their service by the length of the war, rather than choose an enlistment for a definite term, which would entitle them to a pension? Some of them - and it would be most unjust not to recognize it - were driven by a sincere love of France, but these belonged to an elite small in numbers, and we have seen that, the elite were, at bottom, averse to service in the infantry. The great chiefs, the young men of noble family, wished to organize tribal cavalry

and enroll themselves therein. In this way they satisfied their patroitic sentiments and their taste for display and parade; but the tribal horseman have not played and could not play, in this struggle so different in character from that which we had foreseen, anything but a secondary role. There is no place in the trenches for a feudal troop, nor for fantasy! The tirailleur, on the other hand, found his place there, and was all the more in place, when it was necessary to climb out for an attack, were it against barbed wire badly demolished by artillery, or under a hail of shells and shrapnel!

The fact is that this tirailleur is a soldier in his soul. He was quite unaware of his powers, a peaceable agricultural laborer or a 'khammes' (farmer on shares), but the war breaking out, has reawakened in him atavistic instincts, dormant forces. There is in Algiers a whole class of people who, without having any assured means of existence, nevertheless pass their lives doing nothing. They call themselves 'chemmas', that is, 'drinkers of the sunlight'. Stretched out in the sun all day long, they work only when they cannot do otherwise, and stop as soon as they have wherewith to satisfy their immediate needs. For the 'chemmas' the allurement of a bonus, which though small, is immediately available, is irresistible. Now a few months suffice to make of the 'chemmas' a soldier.

Another excellent recruiting agent was the daily allotment, generously accorded to native, as to French, families. In this society with rudimentary needs a monthly allowance of thirty-five francs and more gives comfort, almost riches. A number of families get together and persuade one of their members that it is his duty to sacrifice himself for the good of all. One knows how powerful has remained the authority of the father of the

family in native society. It is he who assigns to each one his duty, and at need even imposes on him a sacrifice. We have seen cases where he has driven one of the younger sons to accused of murder. A large number of those who enlisted for the war did so under pressure of their families, who sacrificed them for the common good. In the case of these poor people, always uncertain of tomorrow's subsistence, future security was based, as it were by the irony of fate, on the most frightful catastrophe which has ever overwhelmed the human race, and the very duration of that catastrophe rendered the profit more advantageous.

Finally, there was that crowd of men without a fixed domicile nor a known profession, those who encumber the sidewalks of the cities, and who, in the country, busy themselves with the theft of cattle and with nocturnal excursions. With these the official propaganda was all the more efficacious since they felt themselves menaced by previous convictions. They found in the army an asylum, a refuge, a security against possible disasters.

For all it was, besides, the great adventure. Many of these young men had never seen the sea. They knew our great cities, our Algerian ports, only by hearsay. They were going to traverse the Mediterranean, to see France - the unknown, almost fabulous land - and, more than all, they were going to fight! These are indeed the men who gave to Carthage those mercenaries capable of crossing the Alps and of exterminating the Roman legions at Trasmemus and at Canne. In them still boils the blood of the troops of Jugurtha, who every year left the plow to indulge in raids.

As to what this war could be they had certainly no clear notion, but none of them was ignorant of the dangers of it.

The power of Germany was known, and it was known also that she had formerly vanquished France. If they did not know exactly what her means of action might be, they knew at least that they were formidable. They knew also her desires, they knew that she coveted North Africa, Morocco and Algiers. In the most distant villages exaggerated or absurd rumors found belief. A chief from the South told me that many under his charge had been shaken because they had been assured that Germany would reduce their taxes to fifty centimes a head. Others spoke of a landing of Turks in the south of Tunis, and of an attack by the Tripolitans in southern Algiers. From time to time some fanatic would run through the villages, announcing that the government no longer existed, and that there was no more law or police.

2/15/10

It was the business of the war councils to prove that the law of that Moroccan division -- composed mainly of Algerians -- who, in May 1915, near Arras, penetrated the German lines to a depth of seven kilometers, and were out to pieces. What officers and what 'non-coms' were those Europeans who directed and lead such troops. The hard thing for the company commander is, not to carry them with him, but to keep up with them, for nothing can restrain their madness but their love for their leader, which holds sway over them even in the hour when their savage instincts are known of tirailleurs who have been killed trying to save a wounded officer, or bring his body into our lines.

****

These qualities of the professional soldier we shall find in the twenty-year old, in the recruits of the classes of 17 and 18, for they are qualities of the race. With them the separation from their families is painful, and sometimes not effected without resistance, for, to break bonds so strong in

a native society, there are not great enthusiasms such as have performed miracles among us Frenchmen -- the love of country, devotion to lofty ideas, to a form of civilization, to an ideal whose safety is preferred to life itself. It was absolutely necessary to withdraw these young men from the depressing influence of the family circle. Their military education will be given henceforth in France -- a happy thought, whose first consequence is to awaken the minde of young men lacking neither in intelligence or power of adaptation by showing them a form of life so different from their own.

An imperious religion, exacting to the degree of dominating all the habits of life, including even food and clothing, has so fashioned their spirits that they are offended, wounded, by a thousand daily details -- the necessity of eating the flesh of animals not killed according to certain rites, the eating of leavened bread, the impossibility of saying the five daily prayers preceded by the prescribed ablutions, and above all the rigid discipline, the regular employment of hours and minutes hitherto spent in idleness, all these new things make the process of detachment from the home-land a painful one. The young man who has never left his 'mechta' or village is homesick for a nature more ardent, a sun more warm, and for the days of idleness in the midst of his family. His first letters to his parents show prejudices so great that they hide the truth from him, and we find in them an appreciation of their new country of residence hardly to be expected from inhabitants of the semi-desert steppes. "They told us", said one of them, "that France was a beautiful country, but in reality it is a monotonous country, a poor country, a country of mountains."

But soon, whatever his disappointments, he has to yield to the

2/19/11

evidence. The young soldier is better clothed, batter lodged than at home, and he wears with pride his fine red chechis (cap) and his long Haki coat. The food, richer and more abundant, develops him in a few weeks, and he feels his strength grow in the good air of France and with the daily exercise. The visits of the iman quiet his scruples about the non-observance of the rules of the Koran, for has not God said that in war-time even the fast of the Ramadan, the first and most rigorous of religious rules, is not imposed on the soldier, for it would weaken the fighter for the great benefit of his enemies? Little by little, in contact with the veterans and with the non-commissioned officers, the military spirit does its work. The life of the regiment, so absorbing in its minutiae, so completely regulated in its smallest details, takes possession of the whole man. The officer, by interesting himself in his men, by speaking to them as he would do to children, acquires a great ascendancy over them. The visits of the officer-interpreters, and their talks, awaken in these young men new ideas about France, about civilization, and about the great war the world is waging against the powers of oppression, murder and pillage. Has not even the head of the Mohammedan religion placed himself on the side of justice, and in opposition to the false Mohammedans, servants of William, the incendiary? Thus a moral conquest has been effected of which our country should be proud. No means have been used which did not appeal to reason or to the moral sentiments, and there have been no brutalities such as the Germans have used in similar cases, and whenever they have wished to use native troops in their colonies. No corporal punishment has ever seen inflicted, and there has been no occasion for it, and this is indeed a subject for wonder, when we think that these people, left to themselves, have always made of tortures and physical punishments their principal means of

2/19/12

government.

Their satisfaction is expressed in their correspondence in naive formulas, with a phraseology entirely oriental . . .

"To that golden chain, that mine of generosity and of perfect education, my brother. To him be a thousand greetings, and may each one be followed by a thousand others, with as many benedictions from God. To that noble and glorious lady, also, our mother, give a thousand greetings, and twice a thousand to that intrepid knight, our fater. (He who speaks thus is the son of a peasant, a humble fellah.) Know that I am well, that I praise God if you are as well as I."

Another has a personal touch:

"The major sent for me, and I think he takes me for the son of a cadi. When he observed that I spoke French he said, "You do your duty well, you are intelligent, and I shall make you an acting corporal." So when I come to see you on leave I shall have on my sleeve those two proud little wollen stripes! Tell this to my wife. I hope, indeed that henceforth you will address her as "Madame corporal."

These nineteen-year old children, many of whom are already married, have a clear notion of their duties, and the desire to do them. One of them writes to his parents:

"Be tranquil on my account. I neither drink, gamble, nor frequent evil resorts, but on the contrary I am busy about my duty. If God decrees my death, bow in submission, and be not troubled. If He permits me to return to you, may He be praised!"

Such is the spirit of this young class. Can one doubt, if he should go into battle, that he will show himself worthy of the professional soldiers, who have constituted up to now, with those enlisted for the war, the bulk of our regiments of tiraillerus?

But, forstalling events, let us ask ourselves what is going to become, after the victory, of so many natives who will have lived for years the life of Europe, and who will have received ideas which had never stirred the minds of their fathers. What will be, with relation to us, the new situation of these natives, not only soldiers, but thousands of Algerian, Tunisian and Moroccan workmen, whom the scarcity of labor has drawn into our shops to satisfy the needs of war and industry?

The soldiers called out, and the workers, too, who were drafted, have no thought other than to return there to take their places once more amid their own people and to busy themselves about their own affairs. These will certainly give France some good advertising, a propaganda spreading into the remotest villages. Life for the farmer is hard in Algiers, amid the caprices of a climate in which the extremes -- mistral and sirocco, frost and blazing sun, drought and inundation -- alternate with other scourges, of which the locusts are not the least. They will recall the easy and assured life which they led in France, and that life, once free from the dangers and chances of war, will appear tempting to many others, who will want to enjoy it. Unfortunately, the movement of emigration thus set up will not bring into the mother-country the best elements of native society. All those who have the means of assured existence, a family to which they are firmly attached, will not think of leaving their native country. To tear them from their environment, there would be needed an irresistible force like that which draws them today, and which, let us hope, will not be manifest again. On the other hand, the disinherited, the men out of work, the Kabyle workmen who came even before the war to sell their labor in the mines of the North, will come in crowds. Our

2/15/44

industry will find in them a considerable resource, which the scarcity of labor will make valuable; but certain dangers may arice out of it, and to these I will return later on.

The former tirailleurs, the survivors of the first engagement, who, for the most part, have made long stays in our sanitariums and our convalescent depots, have undergone an evolution of ideas in these three years. They have contracted new habits -- not always good ones, alas, notably that of drinking -- and these have become for them second nature . . . They have become accustomed to 'sweet France'. Some have formed attachments, and ask to establish themselves here. Many wish to be discharged in France. They have been the object, in the hospitals and in the course of their convalescence, of care so devoted that they cannot forget it. How many times have I seen them manifest a lively and sincere gratitude for their admirable nurses.

"What they have done for me," said a native officer, who was to die under the beautiful sky of Nice after eight months of suffering, "neither my mother not my sister will ever do."

Their desire is contrary to the regulations, which try to obviate the multiplication of false situations by yielding to the infatuation of a day, and encumbering the mother-country with people without any means of subsistence except a pension, (which is usually insufficient), and whom it will be necessary to repatriate later. But, on the other hand, is it not to be feared that these discharged soldiers, discontented on account of the smallness to their pension, weaned away from the life of the Algerian <u>bled</u>, and many of them crippled, may not give us a very bad name in their native country, and become there centers of influence hostile to our cause? It must be admitted that, if

it is too often true that their attachments in France are little to be commended, there are also those which rest on a more serious basis, and have sometimes received legal consecration. Mixed marriages have already taken place, and others are on the way. Ought we to favor them, or on the contrary to prevent them by every means possible? A grave question, which merits serious study.

In general, these legitimate unions are not viewed in a favorable light by the authorities, and for many reasons. Too often the wife-to-be comes from a questionable environment, and sees in this 'regularization' only an occasion to profit by the advantages granted the wives of soldiers, as in the case of the allotment. On the other hand, the tirailleur married in France undergoes the domination of his new family, who often gives him false ideas as to his rights and duties, ideas little in harmony with the exigencies of military service. If on the other hand the wife is an honest woman, it is she who runs grave and multiplied risks. To confine ourselves to the moral inconveniences, let us remember that the Mohammedans have a conception of marriage quite different from ours. They divorce and repudiate their wives at their own desire, and they are polygamons. Who can prevent these husbands, if they should return to Algiers, from contracting before the cadi, or merely before two witnesses of their own tribe, one or several marriages entirely valid according to Mohammedan law? And what will be the value of the union contracted in Europe, and quickly forgotten? What will be the legal status of the children?

2/19/16

And so we raise a great question, that of the validity of such marriages -- a very fine legal question, for we cannot compary these unions, at any rate as far as the Algerians are

concerned, with marriages contracted by Frenchwomen with foreigners. The Algerian Mohammedan native is not, from the standpoint of international law, a French subject, but he is a Frenchman under a special rule of law, who has a personal and hereditary status entirely different from that of our codes. The Frenchwoman who marries him does not change her nationality. Can it be maintained that she changes her personal status? Not at all. And yet her husband can, according to his personal status, be a bigamist.

These difficulties sometimes lead the administrative or military authorities to consider that from a legal point of view these marriages have no value and must remain of no effect. As far as we are concerned, we find ourselves unable to admit this conclusion, which appears neither logical or equitable. It is not logical, for it would regard as invalid the marriage of a Frenchwoman with one of our colonial subjects, while the marriage of this same Frenchwoman with a foreigner would be valid. It is not equitable, for hostility shown toward legal unions will in fact set up a propaganda in favor of free unions, which cannot be restricted, prohibited or controlled. It is necessary, too, to think of the children, and to assure their civil state, if not their future. It would appear absolutely necessary, then, that there should be legislative intervention with a view to regulating the matter. The special civil law which we have given to the natives of Algiers provides that their voluntary appearance before a French public official, as a notary, for the drawing up of a contract, involves the renunciation of their personal status and the adoption of the French law in place of the Mohammedan custom. Why should it not be provided similarly that the appearance of the couple to be married before the French civil official should involve the same consequences? The future husband would then acquire the full

French personal status. This would be a sort of civil naturalization, which would be affected automatically, and we are convinced that from a moral point of view the relations between the races would be improved thereby. It is most unjust to regard these unions as necessarily doomed to failure. I know non-commissioned officers . . . who have enough morality to make good husbands and excellent fathers of families.

This question leads one to the consideration of another which is allied to it -- naturalization. There are many former tirailleurs who, having shed their blood for France, desire to be numbered among her true sons. We must admit that the thing is not made easy for them, as well because of the many formalities to be gone through, as because of the difficulties often raised by the Algerian administration.

It seems, however, that naturalization ought to be made easy for those who have served France as volunteers. It ought to be a right for those who have obtained a promotion, or an honorable distinction, as the croix de guerre. Just as it would be dangerous and foolist to grant political rights en bloc to people not at all prepared to receive them, at the risk even of endangering French domination and the work of colonization magnificently begun on the other side of the Mediterranean, just so it is fitting to welcome loyally those who come to us of their own will and desire, and who have given unequivocal proofs of their attachment. Those who have sealed with their blood their alliance, and who present besides the desired guaranties, should be received by France with open arms. It is indispensable, if we wish to hasten the work of civilization, that we should favor as much as we can the evolution of individuals.

A dangerous formula, and one which appeared to be very much in favor just before the war, consisted in crying up for Mohammedan natives NATURALIZATION IN THEIR OWN STATUS, that is to say,

naturalization which would permit them to become French citizens without renouncing polygamy, or their customs which were established once for all, thirteen centuries ago in Arabia. It is clear that such a naturalization would have only one effect, that of conferring on them political rights. But this is the very last thing for which they care, and it is for us the most dangerous thing to grant. It is really putting the cart before the horse to try to make them electors before making them civilized men. Let us commence then by putting an end to this mediaeval confusion between religion and civil rights, which has prevented the evolution of Islam for so many centuries. Let us teach our subjects to distinquish between these domains. Let us give them a proper understanding of civil rights, and of property, and give them the independence and the dignity of life which proceed therefrom. Let us better their conditions of life from an economic and fiscal standpoint, and let us, first of all, equalize the taxes for them and the Europeans. Let us better also their administrative conditions, and in the political domain, just in proportion as instruction penetrates among them, let us commence by initiating them into the direct rule of their villages, by the election of their immediate representatives. They will come to us deliberately as soon as they understand our ideas and are capable of appreciating them. The effective bringing together of the two races is more a moral than a material work. It is the end of an entire evolution.

2/19/15

Generous beginnings have been made manifest recently with a view to granting to our North African subjects reforms which will be a tangible evidence of France's gratitude toward them. The nomination lf M. Jonnart as governor-general of Algiers was a first pledge, for our natives know with what attentive solicitude he has always surrounded them, and how benevolent and wise is his guardianship.

Under M. Jonnart the program sketched above has entered into the era of realization. A decree of the new governor has reestablished the djemaas de douar, that first nucleus of native political life, by opening them to election. A complete recasting of the Algerian fiscal system, involving the equalization of French and native taxes, has been presented to the Algerian assemblies. Various laws have been proposed before Parliament, one of which, proposed by the government, has already received the approbation of the proper committees of the Chamber.

It provides, for certain classes of natives and particularly for those who have served France, complete naturalization, which will be henceforth a right, and no longer a favor. We applaud this most heartily. Let us open our arms wide to those who of their own free will come to us, and who are worthy. But the proposed law grants, besides, special political rights to large classes of natives, who will in the future elect, not only their municipal concilors, but a third of the members of the general councils and one of the three financial delegations. This sudden extension of political rights may seem considerable. Finally, the native municipal councilors will have the right henceforth to participate in the election of mayors. In reality a large share of the municipal administration passes into their hands. Are they sufficiently prepared to exercise it? Let us not forget that an evolution can take place only by degrees, that by hurrying one risks spoiling everything. The principle of individual ascession is a good one. Too rapid generalizations, and the passion for equality which remains one of the eccentricities of our national character, may have in such a case unforeseen consequences. Let us be prudent, and, while preserving a clear view of the goal toward which we must proceed, let us not forget that time is an

2/19/20

indispensable auxillary.

At the point we have now reached in the gigantic conflict which puts at grips over the whole earth the religion of force and the principles of justice and liberty, we are commencing to see certain fruitful germs which the war has brought forth, certain evolutions which it has hastened. Amont the nations who have voluntarily united to fight against Germany, it must have created bonds of real relationship; and not only will the relations between free nations be established on bases entirely different, in the future international law which will arise from the defeat of the Central Powers, but the nations themselves will have contracted new obligations in relation to those younger peoples who brought aid which, while less reflective, was none the less precious. These younger brothers will know us better, and there will be established between them and us more frequent, more regular, more intimate relations. The material benefit will be soubled. The surplus of the population of the colonies will find in Europe its employment, and the problem of labor, in our own country especially, will find a more and more complete solution. The moral benefit will be immense. For the older nations this will consist in a clearer and more intimate consciousness of their duties, of their mission; for the protected peoples it will consist in a new-found confidence in their protectors, and above all in their entrance into intellectual and moral domains hitherto closed to them. Thus is the future unfolded in the noble fraternity of the blood shed in common for the most just cause.

(Gustave Mercier)

La Dépêche Coloniale illust. pp. 6-7

p. 6

Quotations and citations on bravery of Senegalese.

A French Captain who lost an arm in the Dardanelles campaign, writes to M. Lebrun, former Minister of the Colonies:

"Their dash was the same as that which made the reputation of their elders, and they ~~have shown~~ showed themselves shock troops of the first rank when they threw themselves into the sea at Koum-Kaleh, to take a village with the bayonet . . . . .their docility was exemplary, and they always left their shelter on the given signal to bound forward; their tenacity was perfect as long as they had officers whom they knew; they were devoted and attached to their chiefs, as in their tradition, and numerous are the examples of unknown tirailleurs exposing their lives to carry out of the fight a fallen officer."

Citation -- order of the Army.

Mamadou Diarra, Sergeant. Served as an auxiliary in 1898 in the column sent against Samory. In 1903 he became a regular tirailleur, and in 1913, at Kenifra (Morocco) was decorated with the 'medaille militaire'. Because of the following citations he has been proposed for the Legion of Honor.

Citation: non-commissioned officer of incomparable bravery and fierce energy. On July 9, 1916, has magnificently lead his tirailleurs in the assault, under a murderous fire of machine guns and artillery; has clung with a handful of men to a few yards of hostile trench into which he has flung himself at a favorable moment; has taken there 130 prisoners, including 7 officers, and captured 5 machine guns. Although afflicted with a penetrating bullet wound in the chest, has continued the fight foot by foot in the trench, and next morning has defended it against a violent counter-attack. Has left two days later, and only when ordered."

8/12/43

a hand to hand struggle. It is the needed shock which forever assures the infantry its title of queen of battles. Of moral rather than material significance, the phenomenon is symbolic and unchangeable. But its means vary without ceasing, and the whole terrifying machinery of war denominated "firearms" and "artillery" is only the putting of it to work. They have been so increased and so perfected, in the past three years, that they forsake the domain of the simple acts permitted in the midst of the tumult of battle to the infantryman with fixed bayonet, who makes up the mass of the waves of assault. Of him are demanded only courage and sacrifice. He has enough in him to make a hero, but not enough to make a good 'fusilier-mitrailleur, a 'mitrailleur,' or a 'canonnier de 37', whose machines need expert workers, specialists trained to their work.

3/20/29

The black soldier seemed to belong to the 'voltigeur' or light infantry class. His great physical strength . . . predisposes him to the throwing of the grenade. He excells in this. But automatic rifles amaze him at first, their frequent failures just at the worst crises of the fight, are a mystery to him, and weaken his faith in these complicated arms, which in his hands are not very sure. What happens? In the confusion he either ignores them or throws them aside, seizes his rifle, with his bayonet, or his trench-knife, and here he is once more an old-style infantryman. Is he then condemned to remain so indefinitely? Certainly not, and exceptions so numerous and so conclusive, invalidate the rule by taking away from it any general application. The machine-gun has given up all its secrets to the old tirailleur, long since trained to war. In using it these professional soldiers have acquired a complete automatism, analogous to that of the experienced automobilist or bicyclist, who drive their machines, so to speak, instinctively, and make the necessary motions by reflexes and quite unconsciously.

This familiarity of the man with the tool or machine can arise only from frequent and continuous handling, and this brings us back to our initial point -- the state of unpreparedness existing before the war. The effort put forth since has been considerable -- an effort, at first, of organization. In those few corners of France where the soldiers, transported suddenly from the tropics, has a chance to weather the somewhat mitigated rigors of our winter, there arose, conceived and realized in the American fashion, veritable black military cities, furnished with ranges, and with drill grounds suitable for trench work, and where fifteen or twenty thousand men could work without being too much in each other's way. . . . . But the events of the war showed how improvised were these efforts . . . . . The conclusions to which we were forced were that the Senegalese showed excellent spirit in operations of assault, but insufficient practice with complicated weapons. Besides certain defects appeared in the preparation of the man for combat.

To bring them up to the mark time was lacking. Whence it became necessary, during the summer campaign which was beginning, to restrict the use of the Senegalese in accordance with their powers. Simple good sense dictated that they should be relieved of incumbering material. Furnished with the side-arms, rifles, and a large stock of grenades, the black soldiers had just realized the type of light infantryman, but nothing else. Other and analogous facts relating to equipment obtrude themselves also.

There are no small details when it is a question of utilizing the forces of the soldier. Now, for example, two points have caused discussions without end among the officers of the black battalions, and these are his shoes and his carrying of the knapsack. [See attached pages 10 - 16 for Cahiers.]

The question of shoes is always important for the infantryman, but of capital importance for the black soldier. They are perhaps the chief cause of the frozen feet in the month of April. The drenching in the rain of the trenches, then the drawing-up under the action of the icy wind which blew

Stories from Seche -- Les Noirs.

p. 38 Direct translations from Seche. Anecdote I.

A tirailleur was left alone by Marchand on the banks of the Oubangh to guard the flag. A Belgian detachment comes up.

"You get out of here," says the Senegalese, "This belongs to the French. You can't stay here."

The Belgians, strong in numbers, pay no attention to the protestatio of our tirailleur. He grows suddenly angry.

"I am going to 'make war' on you," he says.

And, adds our narrator, he did 'make war', just as he had said, all alone, that is, he killed everyone he could, until he was himself killed. Madness? No. He regarded himself as absolutely reasonable, and believed that if he disobeyed an order given that there would happen to him, after death, things worse than death, for the White man's order, too, is a fetish.

The order of the white man, the order of the chief, is included for the black man in that prophetic expression which he is always repeating "y a service" (it is duty, it is service). When it is duty ', that suffices for him. He does not discuss, he does not seek to understand. He would kill father, mother, wife, children, in carrying out the order received. He is not responsible, a superior will guides his. "Y a service" -- these three words hold all that is above personal egoism, above interest, above desire, that is, duty, honor. And this conception, circumscribed and unshakable, is at once childish and sublime, like the one who yields to it.

In all the acts of the blacks, one finds this mixture of childishness and heroism, so much so that one is tempted to believe that t ir courage is an effect of the simplicity of their nature. Not at al The Senegalese is brave by nature; a primitive being, he does not One gives him an order, he obeys it without any th

may happen to him, There exist among the blacks magnificent examples of that which we may call "sacrifice to the sense of duty."

34-4-159

Anecdote II

p 39-41

In a lecture which he gave in 1911, at L'Ecole des Sciences Politique General (then Colonel) Mangin told the following:

Translation:

Captain of Engineers Cazemajon and interpreter Olive, sent on a mission into the region between the Niger and the Tchad with a small escort of Senegalese tirailleurs, were drawn into a trap by the Sultan of Zinder, assassinated in a most cowardly way, and their bodies were thrown into the bottom of a well, which was immediately filled up. At the same time the native sergeant who commanded the escort was seized treacherously in the market-place of Zinder, and put in irons together with some of the tirailleurs.

Corporal Kouby Kaita immediately took command, and put his camp in a state of defense. On that very day on which he repulsed two terrible assaults, in which he lost three men killed and five wounded, he summoned the sultan to surrender the prisoners, threatening otherwise to burn the town, in spite of its 10,000 inhabitants and its fortifications; and with eight men who ~~are~~ were left him he went during the night to burn a group of houses outside the town, without the enemy daring to budge.

The next day the sultan, frightened, delivered up the prisoners, and proposed to the tirailleurs to take them into his service!

"Give us first the bodies of our officers, and that which you have stolen, and then we shall see," responded haughtily Sergeant Semba Taraore, and the sultan promised on the next day to surrender the bodies of the white men.

Semba Taraore waited two days for the fulfillment of this [illegible]

which of course was impossible to keep, and then he at the wells where the inhabitants of Zinder go to get water, fortified himself there, and prevented access to the wells during four days of fighting. But a cloud of enemies finally drove him back into his fortified camp, and the brave Corporal Kouby Kaita, together with two tirailleurs, is killed, a servant wounded, and the munitions were almost exhausted. Semba Taraore, who has 'to report', resolves to withdraw to the first French post, which is 1100 kilometres from Zinder (the distance from Dunkirk to Perpignan). He commenced his retreat in the night, and was pursued during three days, losing one more man killed and three wounded, and at a cost of unheard-of privations and fatigues he arrived at last, after 54 days marching, at the first French post on Niger. (Thus far General Mangin).

30-12c-26

Seche continues:

Semba Taraore had 'to report'. It is always the same "y a service," always the same sacrifice to the sense of duty, -- for it is not reflection, not conscience, it is impulse, obstinacy, instinct. It is also a total absence of fear, and absolute scorn of death, dependent no doubt as much on the Senegalese's lack of 'nerves' as upon his beliefs. The calm of the blacks is akin to insensibility and thoughtlessness, and is blended, morever, with their heorism.

Anecdote III

"You are not wounded? You are not hurt?"

The Senegalese assumed the proper military position, [illegible] with his hand open along his bayonet sheath, his eyes front. He answered according to the formula taught him by the non-coms: "Nothing new."

The explosion had blown him to the bottom of the counterscarp, and he had picked himself up, recovered his rifle, and resumed his duty, for the order had not been changed.

(from E. Nolly - Gens de guerre au Maroc.)

30-12c-22

Anecdote V

p 44-45

Translation:

Lieut. Mallet relates the following:

He was at Reims with his black troops, and, knowing every corner of the city, he had succeeded in doing something thought to be impossible -- he had gotten some eggs! With a few tirailleurs he was going back to his quarters. Daba Doumbia was going ahead carrying the eggs in a basket.

"If you break them! . . . . . "said the lieutenant with an eloquent gesture.

So the tirailleur was carrying his basket with veritable respect. The little party was passing the theatre when a shell fell on the roof of that structure.

"Down, close to the houses!"

The lieutenant himself set the example. After the explosion he arose. There is Daba Doumbia, in the middle of the street, standing straight as a post.

"Did you not hear me? Why did you not get down?"

Then said Daba Doumbia, with the utmost composure, "Well, lieutenant, you said 'Lie down!' and you said that the eggs must not be broken, and I held on to the eggs!"

This is foolish, and it is magnificent. Because it was his duty, Daba Doumbia would not risk breaking the eggs confided to his care, even to avoid being killed.

Anecdote VI

(p. 45-47)

Translation from Séché:

I should not like to omit an eloquent page of General Baratier, in which that fine soldier, who was also a writer of great talent, has recorded the exploit of a tirailleur, an exploit worthy of a place among the finest acts in our history. It is well known, but the fact which it illustrates cannot be too often related.

The affair happened on the Ivory Coast.

(Says General Baratier:)

"At the taking of Kami, Lieutenant Kauffman asked for a man to reconnoitre a stockade which seemed deserted, but from which, a moment before, had come a terrible fusilade.

Baba Toure presented himself, first among several. He set out, concealed himself, and crawled through the brush. He drew near to the stockade. Nothing moved. He advanced a little nearer and reached the lower part of the stockade. He rose up and looked.

Not a man did he see. The place had been deserted. Just as he is going to announce the good news his voice is checked. At the left, twenty metres distant, is a trench filled with the enemy. Their guns are leveled at him. Let him but remain motionless, mute, and the natives will not fire, in order not to reveal their ambuscade. He does not hesitate, and, the better to indicate to his chief the direction whence are going to come the balls destined for him, he aims at those who are watching him, and fires first.

Twenty reports resound, and he falls seriously wounded. Presently his enemies will seize upon him

difference does it make? His officer is warned. And he raises his head above the grass to give a last look at those he has saved. What does he see? The lieutenant has just ordered 'Forward!', He does not imagine that it is to come to his aid, but he says to himself that he has not been understood, that his officer is going to fall into the trap, and that he must complete his information. Gathering up his strength he stands erect, offering himself as a target for the enemy, and before falling again he has time to cry out: "Do not advance, there are savages here!"

Brave petit tirailleur, (concludes Gen. Baratier with emotion), the sublime cry: "A moi Auvergne, voila l'ennemi!" He knew nothing of Assas, but he has a heart like him.

"I am black, but like you I have a white heart," the Senegalese are always saying, and many there are who have proved it!"

*Similar anecdote told of Louis, Chevalier d'Assas, belonging to the Auvergne regiment (1760). I have made a slight correction in the quotation.

E. C. W.

which of course was impossible to keep, and then he [illegible] at the wells where the inhabitants of Zinder go to get water, fortified himself there, and prevented access to the wells during four days of fighting. But a cloud of enemies finally drove him back into his fortified camp, and the brave Corporal Kouby Kaita, together with two tirailleurs, is killed, a servant wounded, and the munitions were almost exhausted. Semba Taraore, who has 'to report', resolves to withdraw to the first French post, which is 1100 kilometres from Zinder (the distance from Dunkirk to Perpignan). He commenced his retreat in the night, and was pursued during three days, losing one more man killed and three wounded, and at a cost of unheard-of privations and fatigues he arrived at last, after 54 days marching, at the first French post on the Niger.

(Thus far General Mangin).

30-12-21

Séché continues:

Semba Taraore had 'to report'. It is always the same "y a service," always the same sacrifice to the sense of duty, -- for it is not reflection, not conscience, it is impulse, obstinacy, instinct. It is also a total absence of fear, and absolute scorn of death, dependent no doubt as much on the Senegalese's lack of 'nerves' as upon his beliefs. The calm of the blacks is akin to insensibility and thoughtlessness, and is blended, morever, with their heroism.

Anecdote III

Citation - order of the army - French West Africa - Togoland:

"Thompson, English lieutenant in the Gold Coast regiment: placed, on August 22nd, before the fight at Chra, under the orders of Captain Chastaing of the Dahomey brigade, has given proof of great courage and of fine qualities of command, while leading his tiralleurs to the attack of the vigorously-defended German trenches. He fell mortally wounded fifty yards from the enemy. He merited by his fine example that almost the whole of the French (African) tirailleurs temporarily placed under his orders were killed defending his body."

34-4-164

Generals who have commanded the tirailleurs are not stingy in praise of them.

Gallieni says: " My tirailleurs obeyed coolly all my orders, crying out to me that they would defend themselves to the last extremity."

Mangin writes: "The attachment of the Senegalese to France is absolute. A few very rare examples of desertion and even of treason are cited in the civil personnel in our service, which Mohammedan fanaticism has sometimes provoked; but none of our soldiers has ever been suspected of an act of this nature; never has there been in the ranks the least hesitation. The Senegalese are as proud of their officers as their officers are proud of them, and Senegalese who have seen foreigners say: "Senegalese first among blacks; Frenchmen first among whites."

Letter of Senegalese soldier written during the terrific Dardanelles campaign (in very imperfect French): (Text is given in Séché)

Dardanelles, 10 August 1915.

My dear Brother:-

I am going to tell you a little about my trench. I sleep beside a stream and the frogs keep me from sleeping, and then there is a rat in a hole and the rat keeps me from sleeping. He has made a hole

and when I am sleeping he drops earth down on my neck, but I stopped up the hole, and now he won't make any more earth fall on my neck. When you send me a box put in some licorice ~~bonbons~~ sticks. For since there is no licorice my teeth fall out, and I have only 27 teeth left, no more.
To M. Aboudoulaye. Mamame.

34-4-165

The quaint French of this is worth producing. See typewritten sheet annexed.

"Camp of Frejus. - I am the brother of Samory, I am sergeant Babaki Kamara, the son of Guisamari Kamara at Sanankoro.

If the French win everything is saved, and I shall be happy. If the French do not win, I shall be dead. It is necessary to work for the French.

To Sergeant Pauli Kamara.

Characteristic letters from Africa to Senegalese at the Front;

Kouroussa, 2 September. - My beloved husband . . .

Try to crush the Boches like a clod of earth. You must listen to your officers without murmuring: there are no roses without thorns.
His wife Dielema Keita to Namouron Courouma.

Dakar 28/9 1915. My dear husband . . . .I wish you good courage and success over the dirty Boches. Weapon in hand, and with fixed bayonet, kill as many as you can. Vive La France and success to the Senegalese
Your wife: Nianon Sohouba to Damba Diarra,
Menton.

Le Dépêche Coloniale — Quotations, citations, letters, etc.

Dardanelles, 15 10 aout, 1915.

Mon brave frère . . .Je men vais te parlai un peu deu mon tranchée. Je couche à côtai dun ruisseau et les grenouilles m'empèche deu dormir et pis dans un trou y a un rat qui m'empèche deu dormir la nuit. Il y a fait un trou et quand je dor il me fait descendre deux la terre sur mon gueule, mai moi y a boucher le trou alors maintenant il me fera plus descendre deu la terre sur mon gueule. Et pis quand tu m'anvarra un colis tu me maitras des ~~bobons~~ bâtons de réglisse. Alors depuis que y a plus réglisse, moi y a tomber tout dents, alors il m'en reste 27 dents, pas plus.

A M. Aboudoulaye.

Mamame.

34-4-166

I shall never forget the emotion these words caused me. They were for me a sudden proof that the radiation of our civilisation, of our race, is not a vain and false expression of political rhetoric.

"The New Frenchmen are ready to exert their utmost efforts to remain French," said General Mangin in 1911. My Dahoman sergeant illustrates these words of the chief, who for ten years has devoted his tenacious activity to the formation of a powerful black force ('force noire').

I saw, in the camp of Fréjus, a tirailleur, Daouda Camara, who had been captured by the Turks in the Dardanelles Campaign. One night he succeeded in escaping, by crawling and by digging a passage with his hands under the barbed wire.

-- "Are not the Turks good people?" I asked him. He repeated, "Turks not good." Then he added: "Boches not good, English not good. French only good people." . . . . . .

The Crisis (news item):

The "fourragère", or shoulder-knot, is a French military decoration which is worn by every soldier of a regiment when the whole regiment has been citrd in army orders a certain number of times for extraordinary heroism. The 53rd Battalion of Senegalese Tirailleurs has just been awarded the right to wear the green and red shoulder-knot of the croix de guerre, which means that this black battalion has been citrd twice for extraordinary heroism.

34-4-160

Translation:

The Great War is over. As after a battle the roll of the survivors is called in preparation for new battles; so each people coming out of the tumult commences to strike a balance. Ours is heavy. Over against a debt such as France has never had before, she can hardly inscribe more than this word -- Victory. But it shines with a splendor so brilliant, and embodies latent realities so wonderful, that we have the right to carve on our door-sill the 'Salve' of our Roman ancestors, under the feet of the goddess who restores our home.

A right which quite naturally involves for us, on the other hand, special duties, as guardians of the Latin peace on the Rhine: Si vis pacem . . . . . What were the factors in the triumph? What is their relative value in the whole of our force? Urgent questions to be delimited, and set in their exact places in the whole round of our possibilities of tomorrow. Now among the unexpected factors in our success, there stands forth, not yet as decisive, but still much more than merely useful and emerging with a very honorable place, the military aid brought us by our colonies, some 600,000 soldiers or workmen. It was a discovery. The dogma of the short war, which made the Great War so long, and also, let us confess it, our proverbial ignorance of those cold and hot acres which have become today vast empires caused us five years ago to qualify as "more rambling" the very idea of counting on forces so far away. Necessity forced us to appeal to them, and, among them, to the one most within reach and also one of the most effective -- the black troops.

Their place in the ranks of the poilus in the course of the war

34-4-161

became increasingly longer. Without impediment, the plastic Sondanese peasant adapted himself to the conditions of the European struggle. In his rough hands the most improved weapons replaced the bow and arrow of his ancestors. He learned how to fix without fright upon his goodnatured, amused face the gas-mask, astonished only that the white demi-gods were such ferocious enemies. He lost neither his fatalisms, nor his inherited bravery.

In 1918, as soon as the fine weather had brought back to our western front the Senegalese battalions, which had spent the winter under milder skies, they caused remark even more than ever. In Rheims in ashes, but unconquered, on the Marne, at Mont de Choisy, the German rage broke itself to pieces against their mettle and their indomitable tenacity. From spite the newspapers from beyond the Rhine tried to avenge the humiliating reverses of their Stosstruppen by sarcasms and heavy pleasantries. On their side, our Africans did not fail to repeat the offence. At every minute of the last quarter of an hour, the press was full of their deeds of valor.

To discuss them at the beginning of this article is, it seems to me, to begin at the end. They appear, indeed, as a conclusion, a result of experiment to which the practice of the art of war has led. They put an end at last to ten years of obstinate struggle, full of controversies and of objections. . .in which oft times the meaning of realities profitable to our country was completely lost. Such we are, be it credited to us as a good or an evil. Our national dilettantism, fearing not to attain absolute perfection, once more neglected excellence.

There was, moreover, a precedent, and a very notable one. According to their leader, Colonel de Wimpffen, a personal friend of Napoleon III, the Algerian tirailleurs must be tried for the first time in Europe before Sebastopol. From the results of this experiment came the legendary Turcos of Wissembourg, then of the last war, shock-troops <u>par excellence</u>

34-4-162

The same thing happened to the black troops -- certainly in respectable numbers in our ranks today -- but not a tithe of what they might have been and should be, since, however, with arms in their hands and without being called they have won their case, which we showed little interest in having them plead.

In these days of victory, let us not indulge in recriminations . . . . . The Sondan is so far away! . . . We had not enough faith in the workers of the first hours, nor their master, the apostle, who devoted himself body and soul to this work of public safety -- to supplement our weakening forces by the black army. . . .

The Idea and its Promoters

Born at the epoch of Fachoda, the first idea of black troops links the names of General de Gallifet, then Minister of War, and generals -- at that time Captains -- Mangin, just back from the Marchand Mission, and Gourand, the vanquisher of Samory. Time passed. The idea had notresult. But, in 1908, Lieutenant-Colonel Mangin, became chief of staff of West Africa, took it up again, foreseeing this time a general European war. His propositions, strongly recommended by his superiors, General Audeoud, commander-in-chief of the troops of French West Africa, and General Achinard, commanding the army corps of colonial troops, and warmly commended on two occasions to the war offices by General de Lacroix, met with no response, in spite of the favorable reports of the Governor-General of Algiers, of the Resident of Tunis, and of General Voyron, one of the most experienced officers in our colonial wars.

This silence determined Lieutenant Colonel Mangin, in September, 1909, to reach public opinion through the press. The effect was immediate. A veritable abundance of articles and of interviews, for the most part favorable, brought the question of black troops suddenly into full publicity. Prospective politicians gave resounding interviews on

the future to be expected from these unlooked-for hopes of military reinforcement. They began on all sides to discover Africa.....
The impulse had been given, the matter "launched" before the public.....

34-4-163

The creation and organization were provided for in Algiers of two battalions called "experimental", and commission was sent into West Africa to guage the probable yield of this human reservoir. Made up, besides its head, of Colonel Mangin and four functionaries as colonial officers, it embarked at Bordeaux, May 18, 1910 where it received the last one of its members - the writer of these lines - and returned on Feb. 3, 1911. All of our West Africa had been visited. From a careful estimate done in collaboration, and supported by signed reports, by the local administration, the natives and the Commission, it resulted that an appropriate and well-managed campaign of propaganda, with some very small concessions made to the tirailleurs, would insure us probably an annual contigent of about 40,000 volunteers. This was destined to increase if the matter was properly advertised among a population. whom the French peace, the diffusion of vaccination, and polygamy (utilitarian and not luxurious), was increasing rapidly. This advertising was necessary to take the place of our system of recruiting in these countries without civil status. On the basis of these data Coponel Mangin in 1911* looked forward, <u>semi-officially</u> - for, curiously enough, he was never <u>officially</u> authorized, as things turned out, to put his idea into execution - to the creation in four years of seven divisions and of a "reservoir" destined to feed them.

What evil genius hindered the methodical development of this program? Ask it of the spirit of unpreparedness of the period before the war. In any case, the plain fact is this, that of the two experimental battalions provided in 1910 in Algiers the second was not created until 1913. The

without delay, had permitted the sending into Europe of forces employed elsewhere. Among the number was, notably, the 3rd Battalion of Morocco - the Frèrejean Battalion - which came from Taza into Champagne, and then by autobus into Flanders. Being placed on October 24th at the disposal of General d'Urbal, commanding the 8th Army, he formed a regiment of it under the orders of Major Pelletier, and after he was wounded, of Major Frèrejean, together with the two battalions from Algiers, whose lot it shared. As did they, it melted away in the battle on the Yser. To give all the details would be to indulge in repetitions, a few other bodies having come from Morocco, followed a little later. To all the troops who came from this source could be applied that remark of such a connoisseur as Colonel Debieuvre, that they "made a good showing. Good fighters, but we might reproach them with a lack of finish in their training."

34-4-171

Unfortunately, we could not rely upon having there solid units. The unpreparedness before the war was bearing fruit. The 'specialists' in black troops had feared for a long time in advance, and rightly, that, under the lash of necessity, we should no longer employ upon the European battlefields trained troops, but bands of black recruits -- a fatal consequence of the haste which succeeded our inertia.

The mobilization had, indeed, its echo in Western Africa, as it did in Morocco. M. Merlaud-Ponty, governor general of that land of the black troops, hastened to make up for the time which had been lost through no fault of his. Picking up such available forces as he could find within reach, in Senegal, Mauretania, and the lower Soudan, he made use of them to enroll such recruits as were encountered, men out of work, professional idlers yawning in the sun on the docks of Dakar. From the whole a regiment was formed, which embarked just as it was for France. It comprised, as does every unit, good and bad, a mixture from which the special effect of our discipline on the blacks would have made a unit as good as any other. But under the stress of events, as soon as they arrived in Marseilles, and

been assigned . . . . . .

The twelve or thirteen millions of inhabitants of French West Africa can surely give us 200,000 soldiers in less than a year. These are precious resources, which we have surely available, and which we must not neglect."

34-4-168

I stop here with my quotations. They are sufficiently strong to prove without question the value of the forces we have been so long in discovering.

Our black Africa is an immense land without railroads. The thousands of kilometers of countries rich in men are traversed for the most part on foot to the waterways or railways, which are still rare, and which lead to the ports of embarkation for Europe.

The full effect of the recruiting measures decided upon near the close of 1915, and badly carried out, as I have said, made themselves felt in the practical result (the entry into line of a large number of battalions) not until some time in 1917. The preparation was made, as in the preceding winter, on the Cote d'Azur, around Frejus, in Algeria-Tunisia, and in the too cold and too damp camp of Courneau, not far from Bordeaux. This improvised preparation of a relatively large number of troops -- a little more than 50,000 men -- did not go on without some difficulties.

The black recruiting material is as it is. It has its qualities, sobriety, rusticity, recklessness, but also its defects and sensibilities, a particular nosology, a propensity toward certain troubles and not to others, notably to those of the respiratory passages when the process of acclimatization is too much hurried. In brief, the black troops are more solid, physically, in certain respects, and less so in others, than the white troops. They are different. Such a state of things brings out

34-4-183

certain incontrovertible principles in connection with their training and the conditions of their instruction. To neglect these will be to place them, as it were, on the bed of Procrustes.

To create veritable black cities of several thousand inhabitants in a few months and under existing war conditions was no small affair. The department of the War Ministry charged with the direction of the colonial troops put its whole heart into the work, and succeeded in solving the problem in time. Our country owes it gratitude for this. Of course it could not make up entirely the time lost, and some lacunae in the instruction of certain Senegalese units was the inevitable consequence. However, it delivered to the armies of operation, by the end of March, 1917, not less than 26 black battalions (about 30,000 men), certain ones of which, notably the six which made up the 57th and 58th regiments of colonial infantry (Colonels Jacobi and Debieuvre), and each more than 3,500 strong, had not perhaps their equals, at this time, in the whole mass organized for the spring campaign.

The offensive of April 16,(1917), has been the subject of too many polemics, and it is perhaps unwise for the uninitiated to touch upon it. I believe that I can, without provoking new discussions, affirm in a purely objective way that General Nivelle proposed as his objective the destruction of that strategic absurdity, the front, where for three years we endured, with considerable losses, the invading will of the enemy, and the obscuring of all our offensive qualities as a warrior race. Such an objective naturally presupposed the existence of large resources, conforming to the great principle of Napoleanic good - sense - to attack everywhere . . . The execution of this gigantic manoeuvre, carried out by the English and by us from Arras to the Argonne, set to work several armies. That to which fell the principal role, the 6th Army, massed from Soissons to the West of Rheims, and comprising almost half a million men, was confided to General Mangin. It was to carry by assault the formidable bastion called "Chemin des Dames", where, dug in since 1914, . . . the

The Senegalese in 1918

34-4-167

Withdrawn from the front at the opening of winter, with their ranks filled out with recent recruits . . ., the Senegalese battalions recruited in 1915-16 went into the camps of the South to reform, organized this time in a superior way, and directed by one of the colonial generals, who, as he had made magnificent use of the black soldiers on the field of battle, knew them best. From the hands of this energetic soldier came the five organizations the stamina of which the Germans were able to put to the test in the spring of 1918. Composed of men most of whom had at least two years of service, they made a military tool suited for all kinds of w work. Facts, once more, have proved it. But can you believe that, in spite of the past, certain prejudices still existed toward our black soldiers at the very hour in which we were to make use of them? An illustrious colonial general received the echoes of these prejudices just two days before the German attack of the Chemin des Dames. "The Senegalese," some one said to him, "are afraid of artillery-fire!" Certainly they are, just as everyone is, and no more. According to this statement, which for some was a dogma to be accepted without question, the black soldiers must be placed in a quiet sector, on the 27th of last May, at Rheims. Now, to take possession of this, was part of the German's plan of surprises.

Between the martyr city and Soissons, ancient pillars of the gates of Paris, the German torrent was trying to squeeze through. Our first line troops were sustaining an unequal contest when the Senegalese came up. The German soldierx fears his black adversary, who is taller, stronger and more agile then he, who is fierce, and loves cold steel and the hand to hand combat, and who gives him generously blow for blow, and tries, moreover, as often as possible to strike first. These revelations we owe to the German newspapers, to their humanitarian clamors against the employment of black troops, and also to captured letters. The contact renewed in 1918 with these battalions . . . . .was to the assaulting enemy a disagreeable surprise. They did not keep on. Their blow had fallen short. They counted

The Question of the Black Force

34-4-192

The sad year of 1917, unfortunate in so many ways, full of political quarrels, was not favorable to military questions. The fashion was to look at them from a pacific -- indeed, a pacifist -- point of view. The eddies of these waves had submerged for a time the slight desire for recruiting black troops. It was admitted that there would be no more recruiting in our "Nigritie", people with about 30 million souls, of whom hardly a hundred thousand, (and they as many workmen as soldiers), had been sent to Europe. On the other hand interests apparantly economic, but perhaps not entirely public, were very much helped by an intensification in the exportation of munitions of war, whose list is evidently elastic . . . .

The coming of the Clemencean cabinet put things in place. In the sessions of the senatorial committees of the Army and of Foreign Affairs, over which he had presided, our present Premier had seen gathering over our heads the formidable storm against which the Russian treason had obliged us to struggle. Always preoccupying, the question of troops became, suddenly, the heaviest of his responsibilities. Our hour had come, as said Lloyd George, "to square our shoulders and shut our jaws," calling to our aid our resources.

Many political personalities, as one knows, had not subscribed to the parliamentary reprimand taken, in May, 1917, against General Mangin, against whom one could only bring 'the reproach that he was only a soldier', as M. Clemenceau said to an important personage . . . . . One of the first cares of the New President of the Council in taking charge of affairs was to proceed to the examination of the system of colonial recruiting. The results of this examination led to the establishment of a new program of action. There resulted eight decrees dated January 14, 1918, heavy with a new harvest of African bayonets. The 8th of February following the Bayerischer Kurier, a semi-official sheet circulated in South Germany, expressed its displeasure at this, moved in the name (of course)

Their employment is, besides, immediate, although, once more, it is late. There are upon the left bank of the Rhine, perhaps even further tomorrow, vast German territorial or economic pledges, which must be guarded now and for a long time in the future. For every black battalion on guard there, there is a white battalion, made up of our Soldiers of France, workmen, farmers, liberated for productive tasks. Are such workers lacking in our devastated regions? There is also the technical and profound study of the military value of the black, a study pursued in serene times of peace, which will drive away the nightmare of that which is to be one day the Greatest War. The stronger we shall be, the less we shall be menaced. The road is a broad one before our world mission, national and civilizing . . . . . Of this fecond future the first hour sounds. . . . . .

34-4-196

the future to be expected from these unlooked-for hopes of military reinforcement. They began on all sides to discover Africa..... The impulse had been given, the matter "launched" before the public.....

The creation and organization were provided for in Algiers of two battalions called "experimental", and a commission was sent into West Africa to guage the probable yield of this human reservoir. Made up, besides its head, of Colonel Mangin and four functionaries as colonial officers, it embarked at Bordeaux, May 18, 1910 where it received the last one of its members - the writer of these lines - and returned on Feb. 3, 1911. All of our West Africa had been visited. From a careful estimate done in collaboration, and supported by signed reports, by the local administration, the natives and the Commission, it resulted that an appropriate and well-managed campaign of propaganda, with some very small concessions made to the tirailleurs, would insure us probably an annual contigent of about 40,000 volunteers. This was destined to increase if the matter was properly advertised among a population, whom the French peace, the diffusion of vaccination, and polygamy (utilitarian and not ~~luxurious~~ lustful), was increasing rapidly. This advertising was necessary to take the place of our system of recruiting in these countries without civil status. On the basis of these data Coponel Mangin in 1911* looked forward, <u>semi-officially</u> - for, curiously enough, he was never <u>officially</u> authorized, as things turned out, to put his idea into execution - to the creation in four years of seven divisions and of a "reservoir" destined to feed them.

What evil genius hindered the methodical development of this program? Ask the spirit of unpreparedness of the period before the war. In any case, the plain fact is this, that of the two experimental battalions provided in 1910 in Algiers the second was not created until 1913. The

black units in service in Morocco were increased by a few others, eleven in all. But, absorbed by the necessities of conquest and occupation, these did not constitute, properly speaking, a force available in Europe. So that the "Black Army", a subject of interminable controversies, comprised in August, 1914, including the divisions and "reservoir", not from 200,000 to 240,000 men, as it should have done, but two lone Algerian battalions. Were there no consequences? Alas, nothing is lost, and this is particularly true of mistakes. Now that the value of our Senegalese is no longer disputed, but admitted, we can say that the presence at Charleroi of 100,000 of them or more, soldiers by vocation of two years or more of service - troops not made up in part of reservists called such as they were from Algiers by a telegram of mobilization - and officered by veterans grown old in the service would probably have weighed heavily in the battle, to judge by what followed. The shock of the Marne, for instance, would have been produced on the Aisne, rolling back the German flood as far as the Meuse. Have not the documents captured in 1917, at the time of our April offensive, revealed that the first line of resistance in case of the retreat of the enemy would have been located at that point? Thus, in the second month of the war our country would have been saved from invasion. A vain conjecture, you say? Who knows?.....

3/20/27

[INCOMPLETE]

followed immediately, carried with it most of the survivors, who threw themselves upon the enemy. Their rush stopped at the trench, then gave ground. The Germans were too many, the Senegalese too few. They retreated without panic to their lines, and there, strengthened by their reserves, they stopped and could not be budged. Six times during the night the Lavenir regiment, commanded then by Col. Merienne-Lucas, made counter-attacks, paying its large share of blood. The result we learned from the German Newspapers. In that vexed, inimitable tone of the Boches they recognized that the black soldiers were "good troops", "fought well," and that they had "never been attacked with so much fury" as on that occasion. In fact, ~~from~~ for the time during which the defence of Arras had been entrusted to it, the Lavenir regiment had saved Arras.

24-4-72

By what injustice of fortune or of men did this very honorable episode serve to cast anathema upon this unfortunate unit? Let us not try to find out. But the fact is that, when cut to pieces again and again, without men or officers, and because of this and the approaching winter, it was sent from the front to Morocco to be ~~reformed~~ discharged, it was followed on its whole journey by an undeserved story of cowardice. The future will later throw light on this episode, still too often used against this unfortunate regiment. Would any other regiment have done much better under similar circumstances?

In the Hell of Gallipoli

I have expanded somewhat more in detail on the first efforts of the black troops than may seem justified by their numbers. I do it because to the truth these moments of their history have been of capital importance. If the initiated, our officers of the "épopée africaine", had never doubted but that their black soldiers, properly trained, would equal any others in European value, general opinion, less informed, had for the most part waited for deeds. This time there was no longer room for doubt, and the truth appeared. A call was made for all available troops for the

Dardanelles expedition. Alas, there were only a few battalions which Morocco could furnish, and a few recruits gleaned in West Africa . . . . . .I cannot resist quoting the following document, a pathetic letter of one of our generals who is a 'specialist' in black troops, and at that time colonel of a mixed colonial regiment, (comprising one or two black battalions in every three or four), and who, as such, made a diversion on the Asiatic bank of the Bosphorus.

34-4-173

"Peninsula of Gallipoli, May 17, 1915 . . . The terrible storm, thanks to which we have set foot by main force on Turkish soil, commenced the 25th of April and has just ended. A period of nightmare, lived in the midst of fatigue, insomnia, heat by day, icy cold by night, amid a constant whining of bullets, the strident noise of shells, and the rattle of shrapnel . . .This end of the peninsula has been a veritable hell, a diabolical crucible in which our beautiful regiments have been melted down in striking from the front fanatic hordes, ~~led~~ led by excellent German officers, and preceded by imams, leading the Crescent in the charge against the Cross. The orders of operations taken by us from the dead bodies of Turkish officers show a savage energy.

On April 25th, at 5:30 in the morning, we arrived at the entrance of the Dardanelles. To my fine colonial regiment, the .....th, is given the honor of opening fire. We disembark by force at eleven in the morning ... A landing under a mad fusillade and a hail of 210-caliber shells, the very first of which fell in a loaded boat and killed and wounded thirty-eight men. . . My Senegalese did not like this, and, fixing bayonets, leaped into the water up to their necks, and in one black, irresistible tide, took the fort of ~~Koum~~ Kale.

I came up with the second line (white), and the same thing is repeated. I scale a steep slope in three jumps. One no longer feels fatigue at such times. The white tide follows me, bayonets High, and spread out over the fort behind the Senegalese, and over the village which is behind the fleeing Turks.

I organized the defense.

Bullets and shells rained continuously. Everyone smiled, for you get accustomed to it quickly. And the day passed in a mad struggle, which redoubled in fury at night under the incessant assaults of 10,000 Turks, (the whole Erenkeui division, comprising the 31st, 32nd and 39th regiments), amid a varied bombardment without respite. We fight at close quarters behind a thin network of wire which I was able to set up in haste. At dawn almost 2500 Turkish bodies are piled up all about us . . . . . .The combat diminished in intensity. We made 500 prisoners of those terrorized by our 75's. That night at seven we received the order to embark again . . . . . Our operation was a simple feint which cost us 17 officers and 780 men. At nine o'clock a large-caliber shell killed sixty of our men, wounded as many, scattered my baggage and wounded my orderly in three places.

34-4-171

The delicate operation of the withdrawal and the re-emparking succeeded marvelously. While it was going on a ball went through my left arm. There was nothing broken. It was my first wound.

The first of May, in the evening, we had been encamped for three days in the second line, upon an eminence making a continuation of the landing point facing the North. Before us was a little plain, that of Morto Bay. Beyond, other heights mount by gentle slopes toward the lofty summit of Achi-Baba, which dominates the whole region. Our first line is upon these slopes, the ...th mixed colonial regiment on the left. On the first, at eight o'clock in the evening, a furious combat began, which overwhelmed the thin line of a Senegalese battalion until 3 in the morning. The ...th Colonial was ordered to go to the rescue. We went in haste.

We were at the foot of the heights, at the base of a cliff 30 to 40 meters high. Above us is a furious fusillade, cries and vociferations. Behind, five batteries were firing continuously . . . . . .

We climbed the cliff. There are the Turks fifty meters away following up their victorious charge with fierce energy. There is no time to hesitate, nor to make calculations . . . . . "Come, my Marsouins, forward! Charge!" And my first battalion (European) goes forward like a flash, with magnificent dash. My Senegalese tirailleurs follow with the same spirit. Lieutenant-Colonel Yacher, commanding the ...th mixed regiment, fighting desperately with a handful of men, sounded the charge, too, and we carry the Turks back, not merely to our lost trenches, but 800 meters beyond. . . . . The 1st division, which left France with 14,000 men, lost in 10 days of battle 200 officers and 9,000 men. .....I left Toulon with 54 officers and 3,000 men, on March 4th. There remained on May 9th four officers (of which number I, twice wounded, made one), and 900 men. My third battalion (Senegalese), which set out with about 1,000 men, was reduced to 250.

It was a hard morsel. It is hard still. Behind their trenches we find once more the Turks of Plevna and of Tchataldja."

Before Verdun (1916)

While the last trained black battalions were being used up under fire without possibility of replenishing, the dream of the short war was vanishing, if not in all minds, at any rate in the most clearsighted, before the stern logic of facts. The new idea of a war of 'wear and tear', of hitherto unknown form and with an end impossible to foresee, but most likely very long, caused unsuspected problems to arise, among the first of which was the agonizing question of troops. "The Germans make war with material; and we with human bodies." With this formula M. Paul Doumer, setting out to ask the Czar Nicholas for reinforcements, summoned up a situation which was beginning to worry many. But where were the men to be found? Visits to the exempted and the discharged. . . furnished hardly as many as we might have expected, ... and these did not correspond either in number or quality to the growing gaps in our ranks. Class for class, the German contingents, known and increasing, were each year outstripping ours, which were constantly diminishing.

Our resources appeared to be reaching their limits. . . unless a sweeping gaze over our dominions should discover that Modern France is no longer bounded on the South by the Mediterranean, but by the Congo, and that, from its blood generously shed during forty years there had been born in the four corners of the world new Frances. There fifty millions of apprentice-Frenchmen, no doubt unconscious of our griefs, but saved by us, however, from savage German enterprise, would benefit, when peace should come, by our victory. What would be more just than to have them participate in our sacrifices? Besides, if we were to associate them with us in these sacrifices, why not explain to them, as far as possible, their sacredness. Thus, ceasing to reduce our world expansion to this question of a purely economic order . . . . . let us place this revenge for our European deceptions in its true light, which is humanitarian and simply human. Equity and interest both agree in asking from our exotic populations the aid which

34-4-176

the mother country in danger would very quickly need, that is, hundreds of thousands of soldiers, sturdy peasants of Asia and Africa, fighting side by side with their brother, the peasant of France, for her sacred soil.

This colonial conception, perhaps unexpected, will not fall in with the views of all. When I first proposed it, they told me peremptorily, "We shall put in line for the spring of 1916 eight battalions, eight fine Senegalese battalions, and not one more!" Eight, why eight? Did this arbitrary figure, perchance, measure the capacity of our black reservoir or the limits of our faculty of absorption? The moment appeared badly chosen for an experiment in military Malthusianism.

34-4-177

Two young deputies, full of that fever of energy which the experiences of war lived amid soldiers had given them, appeared. One of them, M. Pierre Masse, had already won his croix de guerre and his captaincy . . . . .; the other, the lamented Maurice Bernard, since killed as an aviator, had made his campaign as lieutenant in the chasseurs. Views exchanged resulted in the proposal of a law, set forth Sept. 16, 1916, by MM. Pierre Masse, Maurice Bernard, and Maurice Ajam. It provided for the creation of a native army drawn from all our colonies, except North Africa, and it set up there through appropriate means a system of mobilisation hitherto unused, which would be capable of calling out and absorbing the maximum human contribution of our possessions for our national defense. The most illustrious of our great colonial soldiers, creators of our empire over-seas, Generals Archinard, Gallieni, and Pennequin, and the writers, at the head of whom we must place M. Paul Adam, one and all supported these projects, publicly and pointedly. In the course of a long interview with M. Briand I was able to show him the fruitful consequences of the labors with which, in times of peace, General Mangin had kept him familiar. The President of the Council did not conceal the interest he felt in the question, and it was sure to find in him, personally and officially, an ardent supporter. If ever a matter presented itself under circumstances favoring success, it was this one. But nothing came of it. This is neither the time nor the place

to reveal how the political-financial influences, blinder even to their own interests than to the interests of their country, but all-powerful in certain colonial centers, made it fail. The Masse Law which, if it had been passed, would have given us at the critical moment an overwhelming and perhaps decisive increase of forces, succumbed under their attacks. Brought by M. Maurcie Bernard on Nov. 12, 1915, before the Committee on the Army, which adopted it unanimously, its career, without apparent cause, ended quickly with this ephemeral triumph. Let us not ask why . . . . . .

34-4-178

Between Chamber and Senate it disappeared. Broken up into fragments, from which all idea of it as a whole had been carefully removed, it served, thanks to the support of M. Clemenceau, president of the Senate Committee on the Army, and to the energy of M. Henri Berenger, ... to make up a series of special laws for each individual colony. The law which had practical charge of furnishing us with black troops for use in Europe is the law of Oct. 9, 1915. From semi-official statements made to the press, and notably to the Temps, it appeared that the special point about the new effort . . . . . would be the limiting of the recruiting for black Africa to 50,000 men. Of course even this was better than the "eight fine battalions" of the year before. But, levied in haste, . . . this contingent had to be sent over seas at once. It came into France in the course of a winter which was rough even on the 'Côte d'Azur', which was powdered with frost that year, and was installed in inadequate cantonments. Even in these specially unfavorable conditions, it was able, in the few months which preceded the campaign of the summer, in 1916, to combine with what remained of the old tirailleurs and to make a considerable number of units . . . . . .

A dozen battalions were able to take not merely an active but a glorious part in our operations, constantly reinforced by corps of the second

line. At the time the press reported with much detail the exploits of the Senegalese at Barleux, La Maisonnette, before Peronne, at the time of the offensive of General Fayolle on the Somme, and before Verdun, notably at Douaumont, during the operations carried out by General Mangin. I have under my eyes interesting reports of the end of the campaign, in which appear with singular clearness the strength and weakness of the young troops which we have thrown into battle a little hurriedly, but which were, however, capable of good work.

34-4-179

We read in one of them:

"In the attack of October 24th the black troops placed at the disposal of group D. E. (Mangin's group) were composed of the 43rd and 36th battalions of Senegalese tirailleurs, which had four companies each, and of two companies (2nd and 4th) of the 1st Battalion of Somali tirailleurs.

One of these battalions, the 36th, had been engaged on the 5th of September in the attack at 'The Quarries', 1200 meters north of Souville.

The battalion . . . . had drawn up three companies for the attack. One company, in support at the Quarries, was charged besides with the defense of the Quarries themselves. At seven o'clock the attack was launched. The tirailleurs, came out of their shell-holes and marched just as if at drill. But the disorder began as soon as the first Germans, frightened, fled toward the Quarries. Several tirailleurs were hit by the bullets of their own comrades. Similar things happened throughout the time of the assault. Not a prisoner was brought to the rear, and yet the prisoners must have been numerous.

The terrible barrage fire of the artillery and the fire of the machine-guns were evidently one of the reasons for the turning back of the tirailleurs. There was, however, another reason -- the Germans had fled before them. They had "gained the battle. I am going to rest." This is what many of them responded when stopped at the Quarries. Certain groups were seen around shell holes in which several dead Germans were found, giving themselves the commands of the bayonet exercise, and executing the

under fire — it was the war dance after victory. Others threw grenades in the holes, and leaned over the edge to see the effect of the explosion.

It is evident that with old tirailleurs who knew French better, and were better trained, these things would not have happened, and many losses would have been avoided.

Another gap in their training was that they had never seen machine-guns, and had not enough practice in throwing grenades. Many have wounded themselves with these things (report of Major G.)."

34-4-180

The preceding document does not lack the picturesque element. It demonstrates, at all events, the degree of inexperience and the youth of troops led, under such conditions, into the terrible hubbub of Douaumont...

Let us have a few more details. Another report says: "By the 24th of October the training of the ...th Battalion had not been much advanced. They did not yet know how to use either machine-guns, automatic rifles, or grenades . . . . . .

These were troops from the depot brigade, and had been employed as laborers in the sector up to the beginning of October. Under such conditions it was hardly prudent to engage them in the first line. So the command resolved to put them in the second line. It is in this situation, then, that the battalions were engaged on October 24th.

At the moment of attack the Senegalese companies left their trenches without hesitation, with much dash and courage, to the admiration of all their officers. One of them, Company D, even rushed to the assault in the first line under very difficult conditions. The signal for the attack had just been given, and the 4th Battalion of the regiment* of Colonial infantry of Morocco, to which Company D is attached, left its trench, when it was assailed by very violent rifle and machine-gun fire.

---

*This regiment has more citations than any in the whole French Army.

There is an instant of hesitation. Major M. and the company officers urge the men forward, aided by some non-commissioned officers and a few soldiers of magnificent courage. The two companies at the head of the battalion move forward. But there is a gap in the line, and an enemy group under cover of the mist has slipped into the center of the battalion. The Senegalese Company D did not hesitate. It rushed forward, attacking also in the first line. Thanks to its courageous intervention the German resistance is broken in a hand to hand struggle.

34-4-181

This magnificent dash of the Senegalese did not slow up. Everywhere they show great impetuosity in attack, even against machine-guns in action. Thus, at the moment in which the center of the line of attack of the ...th division, quitting the ravine of the Basil, its first objective, arrived on the western face of La Fausse-Côte, the whole line, met by machine-gun fire, stopped. Before the intensity of the fire the men in the first line lay down in the shellholes, and the fusillade continued. The 1st and 3rd companies of Senegalese tirailleurs, placed in the second line, CONTINUED TO GO FORWARD. They arrived at the crest of the first assault wave, they crossed it with a superb rush, and threw themselves upon the German machine guns, which they captured. Carried along by the magnificent dash of the Senegalese, the whole line rose up, and the Germans threw down their arms and surrendered. The whole German position was taken . . . . . .

The native units which took part in the attack at Douaument (concludes the general report) were composed of untrained recruits . . . . . The officers generally lacked experience, and few of the non-coms had been under fire. Many came from the cavalry, and had little experience with native troops. Besides, these battalions had no machine-gunners and their tirailleurs had little familiarity with the automatic rifle and the bomb-thrower. Therefore they were afraid to leave these companies grouped into battalions . . . . . but each native company formed the fourth company in a European battalion. These companies were usually placed in the second line. But,

[p21 MISSING]

34-4-182

Our black Africa is an immense land without railroads. The thousands of kilometers of countries rich in men are traversed for the most part on foot to the waterways or railways, which are still rare, and which lead to the ports of embarkation for Europe.

The full effect of the recruiting measures decided upon near the close of 1915, and badly carried out, as I have said, made themselves felt in the practical result (the entry into line of a large number of battalions) not until some time in 1917. The preparation was made, as in the preceding winter, on the Côte d'Azur, around Fréjus, in Algeria-Tunisia, and in the too cold and too damp camp of Courneau, not far from Bordeaux. This improvised preparation of a relatively large number of troops -- a little more than 50,000 men -- did not go on without some difficulties.

The black recruiting material is as it is. It has its qualities, sobriety, rusticity, recklessness, but also its defects and sensibilities, a particular nosology, a propensity toward certain troubles and not to others, notably to those of the respiratory passages when the process of acclimatization is too much hurried. In brief, the black troops are more solid, physically, in certain respects, and less so in others, than the white troops. They are different. Such a state of things brings out

certain incontrovertible principles in connection with their training and the conditions of their instruction. To neglect these will be to place them, as it were, on the bed of Procrustes.

34-4-184

To create veritable black cities of several thousand inhabitants in a few months and under existing war conditions was no small affair. The department of the War Ministry charged with the direction of the colonial troops put its whole heart into the work, and succeeded in solving the problem in time. Our country owes it gratitude for this. Of course it could not make up entirely the time lost, and some lacunae in the instruction of certain Senegalese units was the inevitable consequence. However, it delivered to the armies of operation, by the end of March, 1917, not less than 26 black battalions (about 30,000 men), certain ones of which, notably the six which made up the 57th and 58th regiments of colonial infantry (Colonels Jacobi and Debieuvre), and each more than 3,500 strong, had not perhaps their equals, at this time, in the whole mass organized for the spring campaign.

The offensive of April 16,(1917), has been the subject of too many polemics, and it is perhaps unwise for the uninitiated to touch upon it. I believe that I can, without provoking new discussions, affirm in a purely objective way that General Nivelle proposed as his objective the destruction of that strategic absurdity, the front, where for three years we endured, with considerable losses, the invading will of the enemy, and the obscuring of all our offensive qualities as a warrior race. Such an objective naturally presupposed the existance of large resources, conforming to the great principle of Napoleanic good - sense - to attack everywhere . . . The execution of this gigantic manoeuvre, carried out by the English and by us from Arras to the Argonne, set to work several armies. That to which fell the principle role, the 6th Army, massed from Soissons to the West of Rheims, and comprising almost half a million men, was confided to General Mangin. It was to carry by assault the formidable bastion called "Chemin des Dames", where, dug in since 1914, . . . the

German army had checked, at long range, our thrusts into Cha... the Somme, and virtually menaced our communications toward the Eas... Paris . . . . . .

34-4-185

It was figured in advance that the shock would be formidable and would need especially fine troops.

. . . At Fismes . . . the headquarters of General Mangin, I had the honor of hearing him, April 10th, develop the probable plan of battle and the last instructions which he gave his generals -- a brutal, irresistible assault .v. . after which, toward Laon, toward Saint-Quentin, free space, space reconquered, and the pursuit on the heels of the routed enemy. For the first effort at breaking the line the black army was particularly destined. The blind rush of the Senegalese under fire. . . is their military 'raison d'etre'. Three army corps, the 1st, the 6th and the 2nd formed the line of assault.

These great units had unequally divided among them the black battalions . . .

Truly a fatality seems to have hung over the battle. A freakish prolonging of winter retained over the land the bitter winds and tempests of snow. Coming from the South, where the first rays of the spring sun were already warming them, the blacks were caught in that liquid mud peculiar to the trenches, which the melting snow maintained near freezing-point. The last hours before the assault were cruel to the poor devils of Africans, motionless and benumbed with the cold in their trenches.

The assault was their deliverance. At dawn their assault waves bounded forth with a dash which pierced the first German line as if it were paper -- a matter of a few minutes. From five to seven kilometers, though a network of defences, were traversed. German officers fled. We know that the French torrent, black and white, was suddenly stopped. At ten o'clock it was motionless by order before the second German line, bristling with machine guns, with armed hollows, and organized shell-holes. This check was fatal to the blacks. They passed the day and night motion-

less in hiding-places, in trenches, and chance shelters, under an icy wind which swept the plateau. In their soaked and stiffened shoes, a foot covering to which they were not accustomed, but which an absurd mania of administrative uniformity had imposed on them, their gigantic feet, squeezed in, froze on account of lack of circulation. When the 2nd Colonial Corps was relieved, on the 18th, thousands of Senegalese could not walk. Such was the extent of the evil that entire battalions were temporarily disorganized. To cap the climax, being evacuated first because first in line, the blacks were scattered by the sanitary transports throughout the whole territory back of the lines, from Berck-sur-Mer to Neuchateau in Lorraine. The freezing, thanks to the season, was happily superficial, and the serious cases rare. The cures might have been effected nearer at hand, in a few days, and within reach of the various units. This scattering of the Senegalese was not necessary. When, cured, they rejoined their corps, General Mangin no longer commanded the army. Besides, the vast offensive projects had been abandoned.

34-4-186

Therefore, all the more reason for retaining this mass of shock troops under the hand most capable of making use of it. At the close of 1917 the black battalions were scattered throughout the whole of the front. Some divisions which received them found them a hindrance. Some were even astonished to see them with rifles. Little known by their new commanders, they were at first employed as units of laborers. Progressively, from obscure tasks, the repairing of roads, escorting of prisoners, some, appreciated, regained the rank of third battalions or fourth companies, in the weak formations holding tranquil sectors . . . . Honorably they participated, notably around Verdun, in the rare operations of that campaign. In fact, the lamentable year 1917, so rich in promise, failed the black troops as it did the others.

The Senegalese in 1918

Withdrawn from the front at the opening of winter, with their ranks filled out with recent recruits . . ., the Senegalese battalions recruited in 1915-16 went into the camps of the South to reform, organized this time in a superior way, and directed by one of the colonial generals, who, as he had made magnificent use of the black soldiers on the field of battle, knew them best. From the hands of this energetic soldier came the five organizations the stamina of which the Germans were able to put to the test in the spring of 1918. Composed of men most of whom had at least two years of service, they made a military tool suited for all kinds of w work. Facts, once more, have proved it. But can you believe that, in spite of the past, certain prejudices still existed toward our black soldiers at the very hour in which we were to make use of them? An illustrious colonial general received the echoes of these prejudices just two days before the German attack of the Chemin des Dames. "The Senegalese," some one said to him, "are afraid of artillery-fire!" Certainly they are, just as everyone is, and no more. According to this statement, which for some was a dogma to be accepted without question, the black soldiers must be placed in a quiet sector, on the 27th of last May, at Rheims. Now, to take possession of this, was part of the German's plan of surprises.

Between the martyr city and Soissons, ancient pillars of the gates of Paris, the German torrent was trying to squeeze through. Our first line troops were sustaining an unequal contest when the Senegalese came up. The German soldierx fears his black adversary, who is taller, stronger and more agile then he, who is fierce, and loves cold steel and the hand to hand combat, and who gives him generously blow for blow, and tries, moreover, as often as possible to strike first. These revelations we owe to the German newspapers, to their humanitarian clamors against the employment of black troops, and also to captured letters. The contact renewed in 1918 with these battalions . . . . .was to the assaulting enemy a disagreeable surprise. They did not keep on. Their blow had fallen short. They counted

34-4-181

on returning in force to the attack. The Wolff Agency explained to the world that 'the French have given up guarding Rheims, where they are maintaining only Negroes and Colonials' -- a warning notice of the second attack, begun on June 12th to the east of the city. A furious assault gave the enemy one of the key positions, the fort of La Pompelle, and there he commenced to organize his forces in feverish haste. But this time, too, he had reckoned without his host, for a mad rush of the Senegalese drove him out, and so fierce and murderous was the onslaught that the enemy was able to make no counter-attack. . . . . .To lessen the sting of this repulse they had to make a serious attack. On June 18th the Crown Prince gave the order to finish the job, cost what it might. It was an extensive affair. Over an extent of 25 kilometers, from West to East, from Vrigny to Pompelle, three first line divisions assaulted the circle of our defences, aiming, in the center, at the city, which held one of our metropolitan divisions enclosed, on its right from Ornes to Vrigny, and on its left from Sillery to La Pompelle, between two colonial divisions. There was the violent and customary preparation by gas shells, overmatched by our batteries. Its failure was monumental. The whole German effort spent itself on our advanced posts without touching our first lines. In one point alone, north of Sillery, the enemy penetrated a little under cover of the woods -- an ephemeral success. Once again Rheims was saved, and . . . the blacks had their large share in it.

"We fought," wrote a German officer, who was taken prisoner some days later, "against these Negro soldiers who hold like walls, wait until we are five yards away and throw themselves upon us."

The surprise of the Chemin des Dames brought the Germans, as we know, from the Ailette to the Marne in four days. The invading torrent swept the country clean. Terrified, the people fled, frightened processions marching directly to the South, toward the bridges. Upon the Chateau-Thierry road there was an endless column of fugitives. Behind it,

34-4-188

the broken debris of our decimated regiments, overflowing, little groups marching without confusion . . . . . Following, but not pursuing, at a little distance, without stopping or hastening, pushing before them the vanquished, came the German advanced guard. In the city, a scene of collective madness. In the streets, on the bridges, a crowd without guides, without chiefs, surging, moving without advancing, calling upon the soldiers for help, submerging them in its eddies, itself paralyzing its own defense. A human sea in which the enemy, firing shrapnel from the heights to the north of the city, sowed panic and death. In the midst of this tumult, cleaving the crowd, a man arrives, -- a general, whom a legendary crossing of Africa has already made illustrious. His energy and bravery are celebrated. He throws himself in front of a group of soldiers, lays hold of them, harangues them. "You know who I am," he cries, showing his stars and the insignia of a 'grand-officier' which gleam on his breast. "For yourselves, for these people, for France, my children, stop! Half-turn and hold fast. You must do it! I am bringing help. My division is following me!"

34-4-189

Wasted effort. In vain the men try to reform. Blindly, the crowd turns on itself, passes in a torrent, dragging along the soldiers in its flood. Now, the division, also, was far away. It was rolling along, in automobiles, yet leagues behind, and the general had with him, as an advance guard, only three battalions, one of which was of black troops. No matter! with that he will bar the way. The little troop jostles against the crowd, ascends the stream (sic). At the far end, in the proud ruins of the chateau, he installs his Senegalese. The order was: do not budge, defend the place without giving ground -- to the last. It was kept. The German flood beat vainly against the old walls, giving a little respite to the city, where the evacuation was able to organize. The rage of the assailants exhausted itself on the tenacity of the blacks. Against this handful of men it needed reinforcements, but without any result. An entire division was used up there. Meanwhile, our troops arrived, and when the ---th Senegalese

battalion received its order of relief, it marched forth in perfect order, taking its dead and wounded, in the face of the Germans, stupefied at the small number of their adversaries.

In rare cases, these acts of bravery have been made public. The Senegalese always share in the pain, but not always in the honor. Up to this time they have hardly benefited by the information "from an authorized source" abundantly furnished regarding other corps. On the other hand, they received the credit for a purely legendary exploit, and one has let it go. The black troops are supposed, on the 11th and 12th of June, at Courcelles and on the plateau of Mery, to have broken up the army of Von Hutier, to have saved Compiegne, and the road to Paris. AMICUS PLATO, SED MAGIS AMICA VERITAS. The truth compells me to say that during these glorious days the Senegalese were represented only by a single one of their troops: the faithful and devoted Baba Koulibaly, orderly of General Mangin.

34-4-190

The Question of the Black Force

The sad year of 1917, unfortunate in so many ways, full of political quarrels, was not favorable to military questions. The fashion was to look at them from a pacific -- indeed, a pacifist -- point of view. The eddies of these waves had submerged for a time the slight desire for recruiting black troops. It was admitted that there would be no more recruiting in our "Nigritie", people with about 30 million souls, of whom hardly a hundred thousand, (and they as many workmen as soldiers), had been sent to Europe. On the other hand interests apparently economic, but perhaps not entirely public, were very much helped by an intensification in the exportation of munitions of war, whose list is evidently elastic . . . .

34-4-191

The coming of the Clemencean cabinet put things in place. In the sessions of the senatorial committees of the Army and of Foreign Affairs, over which he had presided, our present Premier had seen gathering over our heads the formidable storm against which the Russian treason had obliged us to struggle. Always preoccupying, the question of troops became, suddenly, the heaviest of his responsibilities. Our hour had come, as said Lloyd George, "to square our shoulders and shut our jaws," calling to our aid our resources.

Many political personalities, as one knows, had not subscribed to the parliamentary reprimand taken, in May, 1917, against General Mangin, against whom one could only bring 'the reproach that he was only a soldier', as M. Clemenceau said to an important personage . . . . . One of the first cares of the new President of the Council in taking charge of affairs was to proceed to the examination of the system of colonial recruiting. The results of this examination led to the establishment of a new program of action. There resulted eight decrees dated January 14, 1918, heavy with a new harvest of African bayonets. The 8th of February following the Bayerischer Kurier, a semi-official sheet circulated in South Germany, expressed its displeasure at this, moved in the name (of course)

of 'right and humanity', interested, it would seem, in not letting savages with white skins, the destroyers of Louvain and Rheims, be beaten by honest peasants coming from the banks of the Niger, but who happened to be black.

We lack space here to examine the measures taken by the Administration of the Colonies for the carrying out of this program. All evidenced great good will . . . . . The recruiting operations were turned over to a special mission, headed by a Commissioner of the Republic, chosen in Parliament, M. Blaise Diagne. Keen, unusally intelligent, this fluent - nay, even eloquent - Senegalese had lived a long time in France. Of the immense West Africa he knew only the vestibule, Lower Senegal. But M. Diagne, being himself black, enjoyed over all possible European functionaries an immeasurable advantage. He understood this very well, and multiplying his force, he made up his mission of brothers of his own race: Young men belonging to the first families of our West Africa, former pupils of our lycées, enlisted as simple tirailleurs at the time of mobilisation, now officers who won their rank at the point of the sword, chevronned, cited, knights of the Legion of Honor such as Prince Ald-el-Kader Mademba, delicate poet, and his brothers, sons of the old King of Sansanding, Mademba, our faithful friend of six lustrums. Having the recruiting crusade preached by such apostles, very skilfully, M. Diagne nationalized it in the race, which he associated with the work of common liberation. The effort demanded ceased to be an unintelligible tax of blood, for distant and invisible ends, exacted by threats and very unpopular. It was the consent obtained from the mass of the people . . . . .

It is possible today to reveal, for the confusion of certain prophets, the number recruited, with the certainty of seeing it increase. There were 73,000 men in four months. They quite outstripped the calculations which M. Angoulvant, the distinguished Governor-General of our black Africas, believed himself justified in making. Themselves forcing the barriers, they saw for an instant the possibility of the regular absorption, through

34-4-193

permanent organs, of our black African availables, up to that time taken in unsystematically and by jerks. These beginnings caused the Germans painful surprises, conditioning, to a degree, the military contingencies which 1919 has spared us; and to our poilus, of settled age, it would have been good. . . to assure them young companions.

Thus . . . the question of the black troops has developed, so to speak, by force, under the pressure of events. Painfully, the function has created the organ. There, too, the conception of the whole war has taken time to come to light: three years of a vital, ferocious struggle, with the German steel at our breast, a delay which has not permitted the formation of the black army in shock divisions of which its author dreamed. But, at least, the Black force, intercalated among our own troops in the hours of supreme struggle and of the final assault, has been able to take its merited part in a noble task: the salvation of the most splendid country by the most splendid soldiers. It is through the door of victory that these new sons of France have entered the house, giving back to her a hundred-fold her blood shed for their liberation.

34-4-194

From the successful experiment it remains to draw this practical conclusion: the war has revealed a new factor of French power, the Black Army, whose general valor, as much European as Colonial, tested now, can no longer be doubted. It must then be used just as are our other elements of power. First, because it is one of those elements. Then, by simple reason of equity. Unconsciously no doubt, but none the less really, our black populations have participated in the benefits of victory. It has saved them from abominable German colonial slavery. It is then just that they should share our common military burdens. So, motives of right and of fact unite to oblige us to increase, as far as we can, the development of our black recruiting, beyond the duration of present circumstances.

Their employment is, besides, immediate, although, once more, it is late. There are upon the left bank of the Rhine, perhaps even further tomorrow, vast German territorial or economic pledges, which must be guarded now and for a long time in the future. For every black battalion on guard there, there is a white battalion, made up of our Soldiers of France, workmen, farmers, liberated for productive tasks. Are such workers lacking in our devastated regions? There is also the technical and profound study of the military value of the black, a study pursued in serene times of peace, which will drive away the nightmare of that which is to be one day the Greatest War. The stronger we shall be, the less we shall be menaced. The road is a broad one before our world mission, national and civilizing . . . . . Of this second future the first hour sounds. . . . . .

Continuation of (Guignard) (a)

Les Troupes Noires pendant la Guerre

by alfred Guignard.

(Revue des Deux Mondes, June 15, 1919) [6th Period, Vol. 51 May-June, 1919.]

(Continuation) Our black Africa is an immense land without railroads. The thousands of kilometers of countries rich in men are ~~a~~ traversed for the most part on foot to the waterways or railways which are still rare, and which lead to the ports of embarkation for Europe.

The full effect of the recruiting measures decided upon near the close of 1915, and badly carried out, as I have said, made themselves felt in the practical result (the entry into line of a large number of battalions) only until some time in 1917. The preparation was made, as in the preceding winter, on the Côte d'Azur, around Fréjus, in Algeria-Tunisia and in the too cold and too damp camps of Courneau, not far from Bordeaux. This improvised preparation of a relatively large number of troops — a little more than 50,000 men — did not go on without some difficulties.

The black recruiting material is as it is. It has its qualities, sobriety, rusticity, recklessness, but also its defects and sensibilities, a particular nosology, a propensity toward certain troubles and

not to others, notably to those of the respiratory passages, when the process of acclimatization is too much hurried. In brief, the black troops are more solid, physically, in certain respects, and less so in others, than the white troops. They are different.

Such a state of things brings out certain incontrovertible principles in connection with their training and the conditions of their instruction. To neglect these will be to place them, as it were, on the bed of Procrustes.

To create habitable black cities of several thousand inhabitants in a few months and under the existing war conditions was no small affair. The department of the War ministry charged with the direction of the colonial troops put its whole heart into the work, and succeeded in solving the problem in time. Our country owes it gratitude for this. Of course it could not make up entirely the time lost, and some gaps lacunae in the instruction of certain Senegalese units was the inevitable consequence. However, it delivered to the armies of operation, by the end of march, 1917, not less than 26 black battalions (about 30,000 men), certain ones of which, notably the six which made up the 57th and 58th regiments of colonial infantry (Colonels Jacobi and Debieuvre), and each more than 3,500 strong, had not perhaps their equals, at this time, in the whole mass organized for the spring campaign.

(1917) Guiguard (c)

The offensive of April 16 has been the subject of too many polemics, and it is perhaps unwise for the uninitiated to touch upon it. I believe that I can, without provoking new discussions, affirm in a purely objective way that General Nivelle proposed as his objective the destruction of that strategic absurdity, the front, where for three years we endured, with considerable losses, the invading will of the enemy, and the obscuring of all our offensive qualities as a warrior race. Such an objective naturally presupposed the existence of large resources conforming to the great principle of Napoleonic good sense — to attack everywhere ... The execution of this gigantic manoeuvre, carried out by the English and by us from Arras to the Argonne, set to work several armies. That to which fell the principal role, the 6th army, massed from Soissons to the West of Rheims, and comprising almost half a million men, was confided to General Mangin. It was to carry by assault the formidable bastion called "Chemin des Dames", where, dug in since 1914, ... the German army had checked, at long range, our thrusts into Champagne and on the Somme, and virtually menaced our communications around the East and Paris .....

(Lassigny) (d)

~~It was figured~~ in advance that the shock would be formidable and would need especially fine troops.

... at Frismes, ... the headquarters of General Mangin, I had the honor of hearing him, April 10th, develop the probable plan of battle and the last instructions which he gave his generals — a brutal, irresistible assault... after which, toward Laon, toward Saint-Quentin, free space, space reconquered, and the pursuit on the heels of the routed enemy. For the first effort at breaking the line the black army was particularly destined. The blind rush of the Senegalese under fire... is their military 'raison d'être'. Three army corps, the 1st, the 6th and the 2nd, formed the line of assault.

These great units had unequally divided among them the black battalions. . . .

Truly a fatality seems to have hung over this battle. A freakish prolonging of winter retained over the land the bitter winds and tempests of snow. Coming from the South, where the first rays of the spring sun were already warming them, the blacks were caught in that liquid mud peculiar to the trenches, which the melting snow maintained at near freezing-point.

the last hours before the assault were cruel to the poor devils of Africans, motionless and benumbed with the cold in their trenches.

The assault was their deliverance. At dawn their assault waves bounded forth with a dash which pierced the first German line as if it were paper — a matter of a few minutes. Four five to seven kilometers, through a network of defences, were traversed. German officers fled. We know that the French torrent, black and white, was suddenly stopped. At ten o'clock it was motionless by order before the second German line, bristling with machine guns, with armed hollows, and organized shell-holes. This check was fatal to the blacks. They passed the day and night motionless in ~~the~~ hiding-places, in trenches, and chance shelters, under an icy wind which swept the plateau. In their soaked and stiffened shoes, a foot covering to which they were not accustomed, but which an absurd mania of administrative uniformity had imposed on them, their gigantic feet, squeezed in, froze ~~for want~~ on account of lack of circulation. When the 2nd Colonial Corps was relieved, on the 18th, thousands of Senegalese could not walk. Such was the extent of the evil that entire battalions were temporarily disorganized. To cap the climax, being evacuated first, by the sanitary transports, became first in line, the blacks were scattered throughout the whole territory back of the lines, from Berck-sur-Mer

to Neufchateau in Lorraine. The freezing, thanks to the (Guignard) (6)
season, was happily superficial, and the serious cases
rare. The cures might have been effected nearer
at hand, in a few days, and within reach of the various
units. This scattering of the Senegalese ~~was not~~ was
not necessary. When, cured, they rejoined their corps,
General Mangin no longer commanded the army.
Besides, the vast offensive projects had been
abandoned.

Therefore, all the more reason for retaining the
mass of shock troops under the hand most
capable of making use of it. At the close of 1917
the black battalions were ~~dispersed~~ scattered throughout
the whole of the front. Some divisions which received
them found them a hindrance. Some were even astonished
to see them with rifles. Little known by their new
commanders, they were at first employed as units
of laborers. Progressively, from obscure tasks, the
repairing of roads, escorting of prisoners, some,
appreciated, regained the ranks of third battalions or
fourth companies, in the weak formations holding
tranquil sectors..... Honorably they participated,
notably around Verdun, in the rare operations of
that campaign. In fact, the lamentable year 1917,
so rich in promise, failed the black troops
as it did the others.

(Guignard) (9)

The Senegalese in 1918

Withdrawn from the front at the opening of winter, with their ranks filled out with recent recruits . . . , the Senegalese battalions ~~of the 1915-16~~ recruited in 1915-16 went into the camps of the South to reform, organized this time in a superior way, and directed by one of the colonial generals, who, as he had made magnificent use of the black soldiers on the field of battle, knew them best. From the hands of this energetic soldier came the fine organization ~~that~~ the stamina of which the Germans were able to put to the test in the spring of 1918. Composed of men most of whom had at least two years of service, they made a military tool suited for all kinds of work. Facts, once more, have proved it.

But can you believe that, in spite of the past, certain prejudices still existed toward our black soldiers at the very hour in which we were to make use of them? An illustrious colonial general received the echoes of these prejudices just two days before the German attack of the Chemin des Dames. "The Senegalese," someone said to him, "are afraid of artillery-fire!" Certainly they are, just as everyone is, and no more. According to this statement, which for some was a dogma to be accepted without question, the black soldiers

must be placed in a quiet sector, on the 27th of last May, at Rheims. Now, to take possession of this, was part of the German plan of surprises.

Between the martyr city and Soissons, ancient pillars of the gates of Paris, the German torrent was trying to ~~squeeze through~~. Our first-line troops ~~sustained~~ were sustaining an unequal contest when the Senegalese came up. The German soldier fears his black adversary, who is taller, stronger and more agile than he, who is fierce, and loves cold steel and the hand to hand combat, and who gives him generously blow for blow, and tries, moreover, as often as possible to strike first. These revelations we owe to the German newspapers to their humanitarian clamors against the employment of black troops, and also to captured letters. The contact renewed in 1918 with these new battalions ..... was to the assaulting enemy a disagreeable surprise. They did not keep on. Their blow had fallen short. They counted on returning in force to the attack. The Wolff Agency explained to the world that "the French have given up guarding Rheims, where they are maintaining only Negroes and Colonials" — a warning notice of the second attack, begun on June

12th to the east of the city. A furious assault gave the enemy one of the key positions, the fort of La Pompelle, and there he commenced to organize his forces in feverish haste. But this time, too, he had reckoned without his host, for a mad rush of the Senegalese drove him out, and so fierce and murderous was the onslaught that the enemy was able to make no counter-attack. .... To lessen the sting of this repulse, they had to make a serious attack. On June 18th the Crown Prince gave the order to finish the job, cost what it might. It was an extensive affair. Over an extent of 25 Kilometers, from West to East, from Vrigny to La Pompelle, three firstline divisions assaulted the circle of our defences, aiming, in the center, at the city, which held one of our metropolitan divisions enclosed, on its right from Ormes to Vrigny, and on its left from Sillery to La Pompelle, between two colonial divisions. There was the violent and customary preparation by gas shells, overmatched by our batteries. Its failure was monumental. The whole German effort broke spent itself on our advanced posts without touching our first lines. In one point alone, north of Sillery, the enemy penetrated

a little under cover of the woods — an ephemeral success. Once again Rheims was saved, and ... the blacks had their large share in it.

"We fought," wrote a German officer, who was taken prisoner some days later, "against these Negro soldiers who hold like walls, wait until we are five yards away and throw themselves upon us."

The surprise of the Chemin des Dames brought the Germans, as we know from the Ailette to the Marne in four days. The invading torrent swept the country clean. Terrified, the people fled; frightened processions marching directly to the South, toward the bridges. Upon the Chateau-Thierry road there was an endless column of fugitives. Behind it, the broken débris of our decimated regiments, overflowing, little groups marching without confusion, following, but not pursuing, at a little distance, without stopping or hastening, pushing before them the vanquished, came the German advanced guard. In the City, a ~~spectacle~~ scene of collective madness; in the streets, on the bridges, a crowd without guides, without chiefs, surging, moving without advancing, calling upon the soldiers for help, submerging them in its eddies, itself paralyzing its own defense. A human sea in which the enemy, firing shrapnel from the heights to the

Guiguard

north of the city, sowed panic and death.
In the midst of this tumult, gleaming the crowd, a
man arrives, — a general, whom a legendary
crossing of Africa has already made illustrious,
His energy and bravery are celebrated. He throws
himself in front of a group of soldiers, lays hold of
them, harangues them. "You [illegible] Where are
[illegible] the cross, showing his stars and the
insignia of a 'grand-officier' which gleam on his
breast. "For yourselves, for these people, for
France, my children, stop! Half-turn and
hold fast. You must do it! I am bringing
help. My division is following me!"
Wasted effort. In vain the men try to
reform. Blindly, the crowd turns in itself,
passes in a torrent, dragging along the soldiers
in its flood. Now, the division, alas, is far
away. It was rolling along, in automobiles, yet
leagues behind, and the general had with him, as
an advance guard, only three battalions, one of which
was of black troops. No matter! with that he
will back the way. The little troop jostles against
the crowd, ascends the stream (sic). At the far

(Gaignard → L

end, in the pond ruins of the Chateau, he installed a Senegalese. The order was: do not budge, defend the place without giving ground — to the last. It was kept. The German flood beat vainly against the old walls, giving a little respite to the city, where the evacuation was able to organize. The rage of the assailants exhausted itself on the tenacity of the blacks. Against this handful of men it need reinforcements, but without any result. An entire division was used up there. Meanwhile, over troops arrived, and when the ---th Senegalese battalion received its order of relief, it marched forth in perfect order, taking its dead and wounded in the face of the Germans, stupefied at the small number of their adversaries.

In rare cases, these acts of bravery have been made public. The Senegalese always share in the pain, but not always in the honor. Up to this time they have hardly benefited by the information "from an authorized source" abundantly furnished regarding other corps. On the other hand, they received the credit for a purely legendary exploit, and one has let it go. The black troops are supposed, [redacted] on the 11th and 12th of June, at Courcelles and

on the plateau of Mery, to have broken up the army of Von Hutier, to have saved Compiègne, and the road to Paris. Amicus Plato, sed magis amica veritas. The truth compels me to say that during these glorious days the Senegalese were represented only by a single one of their troops: the faithful and devoted Baba Koulibaly, orderly of General Mangin.

(Guignard) 11

The Question of the Black Force

The sad year 1917, unfortunate in so many ways, full of political quarrels, was not favorable to military questions. The fashion was to look at them from a pacific — indeed, a pacifist — point of view. The eddies of these waves had submerged for a time the slight desire for recruiting black troops. It was admitted that there would be no more recruiting in our "Afrique", peopled with about 30 million souls, of whom hardly a hundred thousand (and they as many workmen as soldiers) had been sent to Europe. On the other hand interests apparently economic, but perhaps not entirely public, were very much helped by an intensification in the exportation of munitions of war, whose list is evidently elastic.....

The coming of the Clemenceau cabinet put things in place. In the sessions of the senatorial committees of the Army and of Foreign affairs, over which he had presided, our present Premier had seen gathering over our heads the formidable storm against which the Russian treason had obliged us to struggle. Always preoccupied,

the question of troops became, suddenly, the heavi
of his responsibilities. War hour had come,
as said Lloyd George, "to square our shoulders
and shut our jaws," calling to our aid all our
resources.

Many political personalities, as one knows,
had not subscribed to the parliamentary reprimand
taken, ~~[illegible]~~ in May, 1917, against General Mangin,
against whom one could only bring the reproach
that he was only a soldier; as M. Clemenceau
said to an important personage, ... One of the
first cares of the new President of the Council
in taking charge of affairs was to proceed to the
examination of the system of colonial recruiting.
The results of this examination led to the establishment
of a new program of action. There resulted eight
decrees dated January 14, 1918, heavy with a new harvest

Continuation of

LES TROUPES NOIRES PENDANT LA GUERRE
by Alfred Guignard

(Revue des Deux Mondes, June 15, 1919) (6th Period, Vol.51 May-June, 1919)

(Continuation)

Our Black Africa is an immense land without railroads. The thousands of kilometers of countries rich in men are traversed for the most part on foot to the waterways or railways, which are still rare, and which lead to the ports of embarkation for Europe.

The full effect of the recruiting measures decided upon near the close of 1915, and badly carried out, as I have said, made themselves felt in the practical result (the entry into line of a large number of battalions) not until some time in 1917. The preparation was made, as in the preceding winter, on the Cote d'Azur, around Frejus, in Algeria-Tunisia, and in the too cold and too damp camp of Courneau, not far from Bordeaux. This improvised preparation of a relatively large number of troops - a little more than 50,000 men - did not go on without some difficulties.

The Black recruiting material is as it is. It has its qualities, sobriety, rusticity, recklessness, but also its defects and sensibilities, a particular nosology, a propensity toward certain troubles and not to others, notably to those of the respiratory passages when the process of acclimatization is too much hurried. In brief, the black troops are more solid, physically, in certain respects, and less so in others, than the white troops. They are different. Such a state of things brings out certain incontrovertible principles in connection with their training

and the conditions of their instruction. To neglect these will be to place them, as it were, on the bed of Procrustes.

To create veritable black cities of several thousand inhabitants in a few months and under the existing war conditions was no small affair. The department of the war ministry charged with the direction of the colonial troops put its whole heart into the work, and succeeded in solving the problem in time. Our country owes it gratitude for this. Of course it could not make up entirely the time lost, and some lacunae in the instruction of certain Senegalese units was the inevitable consequence. However, it delivered to the armies of operation, by the end of March, 1917, not less than 26 black battalions (about 30,000 men), certain ones of which, notably the six which made up the 57th and 58th regiments of colonial infantry (Colonels Jacobi and Debieuvre) and, each more than 3,500 strong, had not perhaps their equals, at this time, in the whole mass organized for the Spring campaign.

The offensive of April 16, 1917 has been the subject of too many polemics, and it is perhaps unwise for the uninitiated to touch upon it. I believe that I can, without provoking new discussions, affirm in a purely objective way that General Nivelle proposed as his objective the destruction of that strategic absurdity, the front, where for three years we endured, with considerable losses, the invading will of the enemy, and the obscuring of all our offensive qualities as a warrior race. Such an objective naturally presupposed the existence of large resources, conforming to the great principle of Napoleonic good sense - to attack everywhere. . . The execution of this gigantic manoeuvre, carried out by the English and by us from Arras to the Ar-

gonne, set to work several armies. That to which fell the principal role, the 6th army, massed from Soissons to the West of Rheims, and comprising almost half a million men, was confided to General Mangin. It was to carry by assault the formidable bastion called "Chemin des Dames", where, dug in since 1914, . . . the German army had checked, at long range, our thrusts into Champagne and on the Somme, and virtually menaced our communications toward the East and Paris. . . . . .

It was figured in advance that the shock would be formidable and would need especially fine troops.

. . . At Fismes, . . . the headquarters of General Mangin, I had the honor of hearing him, April 10th, develop the probable plan of battle and the last instructions which he gave his Generals - a brutal, irresistible assault . . . After which, toward Laon, toward Saint-Quentin, free space, space reconquered, and the pursuit on the heels of the routed enemy. For the first effort at breaking the line the Black army was particularly destined. The blind rush of the Senegalese under fire . . . is their military 'raison d'etre'. Three army corps, the 1st, the 6th and the 2nd, formed the line of assault.

These great units had unequally divided among them the Black Battalions. . . . .

Truly a fatality seems to have hung over this battle. A freakish prolonging of winter retained over the land the bitter winds and tempests of snow. Coming from the South, where the first rays of the Spring sun were already warming them, the Blacks were caught in that liquid mud peculiar to the trenches, which the melting snow maintained near

freezingpoint. The last hours before the assault were cruel to the poor devils of Africans, motionless and benumbed with the cold in their trenches.

The assault was their deliverance. At dawn, their assault waves bounded forth with a dash which pierced the first German line as if it were paper - a matter of a few minutes. From five to seven kilometers., through a network of defences, were traversed. German officers fled. We know that the French torrent, Black and White, was suddenly stopped. At ten o'clock it was motionless by order before the second German line, bristling with machine guns, with armed hollows, and organized shell holes. This check was fatal to the blacks. They passed the day and night motionless in hiding-places, in trenches, and chance shelters, under an icy wind which swept the plateau. In their soaked and stiffened shoes, a foot covering to which they were not accustomed, but which an absurd mania of administrative uniformity had imposed on them, their gigantic feet, squeezed in, froze on account of lack of circulation. When the 2nd Colonial Corps was relieved, on the 18th, thousands of Senezalese could not walk. Such was the extent of the evil that, entire battalions were temporarily disorganized. To cap the climax being evacuated first because first in line, the Blacks were scattered by the sanitary transports throughout the whole territory back of the lines, from Berck-sur-Mer to Neuchateau in Lorraine. The freezing, thanks to the season, was happily superficial, and the serious cases rare. The cures might have been effected nearer, at hand., in a few days, and within reach of the various units. This scattering of the Senegalese was not necessary. When, cured, they rejoined their corps, General Mangin no longer commanded

the army. Besides, the vast offensive projects had been abandoned.

Therefore, all the more reason for returning this mass of shock troops under the hand most capable of making use of it. At the close of 1917 the Black battalions were scattered throughout the whole of the front. Some divisions which received them found them a hindrance. Some were even astonished to see them with rifles. Little known by their new commanders, they were at first employed as units of laborers. Progressively, from obscure tasks, the repairing of roads, escorting of prisoners, some, appreciated, regained the rank of third battalions or fourth companies, in the weak formations holding tranquil sectors . . . . . Honorably they participated, notably around Verdun, in the rare operations of that campaign. In fact, the lamentable year 1917, so rich in promise, failed the Black troops as it did the others.

3/20/116

The Senegalese in 1918

Withdrawn from the front at the opening of Winter, with their ranks filled out with recent recruits . . ., the Senegalese battalions recruited in 1915-16 went into the camps of the South to reform, organized this time, in a superior way, and directed by one of the colonial generals, who, as he had made magnificent use of the Black Soldiers on the field of battle, knew them best. From the hands of this energetic soldier came the five organizations the stamina of which the Germans were able to put to the test in the Spring of 1918. Composed of men most of whom had at least two years of service, they made a military tool suited for all kinds of work. Facts, once more, have proved it.

But can you believe that, in spite of the past, certain prejudices still existed toward our Black Soldiers at the very hour in which we were to make use of them? An illustrious

Colonial General received the echoes of these prejudices just two days before the German attack of the Chemin des Dames. "The Senegalese", some one said to him, "are afraid of artillery-fire!" Certainly they are, just as everyone is, and no more. According to this statement, which for some was a dogma to be accepted without question, the Black Soldiers must be placed in a quiet sector, on the 27th of last May 1 at Rheims. Now, to take possession of this, was part of the German's plan of surprises.

Between the martyr city and Soissons, ancient pillars of the gates of Paris, the German torrent was trying to squeeze through. Our first line troops were sustaining an unequal contest when the Senegalese came up. The German Soldier fears his Black adversary, who is taller, stronger and more agile than he who is fierce, and loves cold steel and the hand to hand combat, and who gives him generously blow for blow, and tries, moreover, as often as possible to strike first. These revelations we owe to the German newspapers, to their humanitarian clamors against the employment of black troops, and also to captured letters. The contact renewed in 1918 with these new battalions . . . . . was to the assaulting enemy a disagreeable surprise. They did not keep on. Their blow had fallen short. They counted on returning in force to the attack. The Wolff Agency explained to the world that 'The Franch have given up guarding Rheins, where they are amintaining only Negroes and Colonials' - a warning notice of the second attack, begun on June 12th to the east of the City. A furious assault gave the enemy one of the key positions, the fort of La Pompelle, and there he commenced to organize his forces in feverish haste. But this time, too, he had reckoned without his host, for a mad rush of the Senegalese drove him out, and so fierce and

murderous was the onslaught that the enemy was able to make no counter-attack . . . To lessen the sting of this repulse, they had to make a serious attack. On June 18th the Crown Prince gave the order to finish the job, cost what it might. It was an extensive affair. Over an extent of 25 kilometers, from West to East, from Vrigny to La Pompelle, three firstline divisions assaulted the circle of our defences, aiming, in the center, at the city, which held one of our metropolitan divisions enclosed, on its right from Ornes to Vrigny, and on its left from Sillery to La Pompelle, between two colonial divisions. There was the violent and customary preparation by gas shells, overwatched by our batteries. Its failure was monumental. The whole German effort spent itself on our advanced posts without touching our first lines. In one point alone, North of Sillery, the enemy penetrated a little under cover of the woods - an ephemeral success. Once again Rheims was saved, and . . . the Blacks had their large share in it.

"We fought," wrote a German officer, who was taken prisoner some days later, "against these Negro soldiers who hold like walls, wait until we are five yards away and throw themselves upon us."

The surprise of the Chemin des Dames brought the Germans, as we know, from the Ailette to the Marne in four days. The invading torrent swept the country clean. Terrified, the people fled, frightened processions marching directly to the South, toward the bridges. Upon the Chateau-Thierry road there was an endless column of fugitives. Behind it, the broken debris of our decimated regiments, overflowing, little groups marching without confusion . . . . Following, but not pursuing, at a little distance, without stopping or hastening, pushing before them the vanquished, came the German advanced guard. In the city, a

scene of collective madness. In the streets, on the bridge, a crowd without guides, without chiefs, surging, moving without advancing, calling upon the soldiers for help, submerging them in its eddies, itself paralyzing its own defense. A human sea in which the enemy, firing shrapnel from the heights to the north of the city, sowed panic and death. In the midst of this tumult, clearing the crowd, a man arrives, - a general, whom a legendary crossing of Africa has already made illustrious. His energy and bravery are celebrated. He throws himself in front of a group of soldiers, lays hold of them, harangues them. "You know who I am", he cries, showing his stars and the insignia of a 'grand-officer' which gleam on his breast. "For yourselves, for these people, for France, my children, stop! Half-turn and hold fast. You must do it! I am bringing help. My division is following me!"

Wasted effort. In vain the men try to reform. Blindly, the crowd forms in itself, passes in a torrent, dragging along the soldiers in its flood. Now, the division, alas, was far away. It was rolling along, in automobiles, yet leagues behind, and the general had with him, as an advance guard, only three battalions, one of which was of black troops. No matter! with that he will bar the way. The little troop jostles against the crowd, ascends the stream (sic). At the far end, in the proud ruins of the chateau, he installs his Senegalese. The order was: do not budge, defend the place without giving ground - to the last. It was kept. The German flood beat vainly against the old walls, giving a little respite to the city, where the evacuation was able to organize. The rage of the assailants exhausted itself on the tenacity of the blacks. Against this handful of men it needs reinforcements, not without any result.

An entire division was used up there. Meanwhile, our troops arrived, and when the - - - th Senegalese battalion received its order of relief, it marched forth in perfect order, taking its dead and wounded in the face of the Germans, stupefied at the small number of their adversaries.

In rare cases, these acts of bravery have been made public. The Senegalese always share in the pain, but not always in the honor. Up to this time they have hardly benefited by the information "from an authorized source" abundantly furnished regarding other corps. On the other hand, they received the credit for a purely legendary exploit, and one has let it go. The black troops are supposed, on the 11th and 12th of June, at Courcelles and on the plateau of Mery to have broken up the army of Von Hutier, to have saved Compiegne, and the road to Paris. Amicus Plato, sed magis amica veritas. The truth compels me to say that during these glorious days the Senegalese were represented only by a single one of their troops: the faithful and devoted Baba Koulibaly, orderly of General Mangin.

3/20/120

THE QUESTION OF THE BLACK FORCE

The sad year 1917, unfortunate in so many ways, full of political quarrels, was not favorable to military questions. The fashion was to look at them from a pacific - indeed, a pacifist - point of view. The eddies of these waves had submerged for a time the slight desire for recruiting Black troops. It was admitted that there would be no more recruiting in our "nigritie", peopled with about 30 million souls, of whom hardly a hundred thousand, (and they as many workmen as soldiers) had been sent to Europe. On the other hand interests apparently economic, but perhaps not entirely public, were very much helped by an intensification in the exportation of munitions of war, whose list is evidently elastic . . . . . .

The coming of the Clemenceau cabinet put things in place. In the sessions of the senatorial, Committees of the Army and of Foreign affairs, over which he had presided, our present Premier had seen gathering over our heads the formidable storm against which the Russian treason had obliged us to struggle. Always preoccuping, the question of troops became, suddenly, the heaviest of his responsibilities. Our hour had come, as said Lloyd George, "to square our shoulders and shut our jaws," calling to our aid all our resources.

Many political personalities, as one knows, had not subscribed to the parliamentary reprimand taken, in May, 1917, against General Mangin, against whom one could only bring 'the reproach that he was only a soldier', as M. Clemenceau said to an important personage . . . . . One of the first cares of the New President of the Council in taking charge of affairs was to proceed to the examintion of the system

of colonial recruiting. The results of this examination led to the establishment of a new program of action. There resulted eight decrees dated January 14, 1918, heavy with a new harvest of African bayonets. The 8th of February following the Bayerischer Kurier, a semi-offical sheet circulated in South Germany, expressed its displeasure at this, moved in the name (of course) of 'Right and humanity', interested, it would seem, in not letting savages with white skins, the destroyers of Lonvain and Rheims, be beaten by honest peasants coming from the banks of the Niger, but who happened to be Black.

We lack space here to examine the measures taken by the Administration of the Colonies for the carrying out of this program. All evidenced great good will . . . . . The recruiting operations were turned over to a special mission, headed by a commissioner of the Republic, chosen in Parliament, M. Blaise Diagne. Keen, unusually intelligent, this fluent - May, even eloquent - Senegalese had lived a long time in France. Of the immense West Africa he knew only the vestibule, Lower Senegal. But M. Diagne, being himself black, enjoyed over all possible European functionaries an immeasurable advantage. He understood this very well, and multiplying his force, he made up his mission of brothers of his own race: Young men belonging to the first families of our West Africa, former pupils of our lycees, enlisted as simple tirailleurs at the time of mobilization, now officers, who won their rank at the point of the sword, chevronned, cited, knights of the Legi: of Honor such as Prince Ald-el-Kader Mademba, delicate poet, and his brothers, sons of the old King of Sansanding, Mademba, our faithful friend of six lustrums. Having the recruiting crusade preached by such apostles, very skillfully, M. Diagne nationalized it in the race, which he associated

with the work of common liberation. The effort demanded ceased to be an unintelligible tax of blood, for distant and invisible ends, exacted by threats and very unpopular. It was the consent obtained from the mass of the people . . . . . .

It is possible today to reveal, for the confusion of certain prophets, the number recruited, with the certainty of seeing it increase. There were 73,000 men in four months. They quite outstripped the calculations which M. Angonlvant, the distinguished German-General of our black Africas, believed himself justified in making. Themselves forcing the barriers, they saw for an instant the possibility of the regular absorption, through permanent organs, of our Black African availables, up to that time taken in unsystematically and by jerks. These beginnings caused the Germans painful surprises, conditioning, to a degree, the military contingencies which 1919 has spared us; and to our poilus, of settled age, it would have been good . . . to assure them young companions.

Thus . . . the question of the Black troops has developed, so to speak, by force, under the pressure of events. Painfully, the function has created the organ. There, too, the conception of the whole war has taken time to come to light: three years of a vital, ferocious struggle, with the German steel at our breast. A delay which has not permitted the formation of the Black army in shock divisions of which its author dreamed. But, at least, the Black force, intercalated among our own troops in the hours of supreme struggle and of the final assault, has been able to take its merited part in a noble task: the salvation of the most splendid country by the most splendid soldiers. It is through the door of victory that these new sons of France have entered the house, giving back to her a hundred-fold her blood shed for their liberation.

From the successful experiment it remains to draw this practical conclusion: the war has revealed a new factor of French power, the Black army; whose general valor, as much European as Colonial, tested now, can so longer be doubted. It must then be used just as are our other elements of power. First, because it is one of those elements. Then, by simple reason of equity. Unconsciously no doubt, but none the less really, our Black populations have participated in the benefits of victory. It has saved them from abominable German Colonial slavery. It is then just that they should share our common military burdens. So, motives of right and of fact unite to oblige us to increase, as far as we can, the development of our Black recruiting, beyond the duration of present circumstances.

Their employment is, besides, immediate, although, once more, it is late. There are upon the left bank of the Rhine, perhaps even further tomorrow, vast German territorial or economic pledges, which must be guarded now and for a long time in the future. For every black battalion on guard there, there is a white battalion, made up of our Soldiers of France, workmen, farmers, liberated for productive tasks. Are such workers lacking in our devastated regions? There is also the technical and profound study of the military value of the Black, a study pursued in serene times of peace, which will drive away the nightmare of that which is to be one day the greatest War. The stronger we shall be, the less we shall be menaced. The road is a broad one before our world mission, national and civilizing . . . . . Of this fecund future the first hour sounds . . . . . .

West Indian

13-32-24

Statements taken from a manuscript
WEST INDIAN IN THE LATE EUROPEAN WAR
by C. E. L. Pitt or Celp
Ex-Sergeant of the 9th Service Battalion
From St. Georges, Granada, B. W. I.
Served with the West Indian Regiment and the
Royal Medical Corp.

In the British Army, it was impossible for a full-blooded Negro to advance beyond the rank of Sergeant-Major. The Battalion embarked December 8, 1917, on Her Majesty's troop ship, the Magdelena. They were accompanied by three other transports with soldiers from Australia. They landed at Brest Christmas day. Many in hospital or on board on account of bronchitis. Welcomed by the French. Left December 26 and went through by train to Nantes, Bordeaux. Arrived in Marseilles December 31. Met artillery helpers. Sick a week in hospital. With full equipment, journied three days and nights to Rouen through Paris to British Rest Camps. Decided to re-inforce the 9th west Indian Regiment. They camped at St. Naen. This Battalion had been through the Battle of Aypres, assisting the artillery in the summer of 1917. Prepared to go to the front. Whole village up at 6 A.M. to bid them goodbye. Leave the stationof Buchy; went by the La Basse Canal and the Air-Sure-La Lise Canal. Bombardment lasted a week. The earth for hundreds of yards around shook as if it were a severe earthquake. Bombing planes dropped bombs and used their machine guns on the mine. West Indian regiments carried amunition and shells to their batteries and sometimes assisted

13-32-25

in the loading. Quit position the 20th of July. Stationed a few hundred years behind Diny Ridge beyond fire. "We cannot but blame some of the officers of the British West Indian regiment for their seeming indifference in so far as our men were concerned. If we had had th right type of officers, a greater number of West Indian soldiers would have returned to their homes with medals, as we are aware that there were many deeds performed by men in the B.W.I. regiment. The battallion went to Rouen; than by Paris to Marseilles to Italy. Finally, on the night of November 11, arrived at Toronto. We were highly amused on more than one occasion to hear the West Indians soldiers in France referred to as labour Battallion on our return home by the uninformed, and people who ought to have known better, a few facts about the difference between a labour Battallion and an Infantry Battallion may not be out of place at this time. The British Labour Battallions were paid higher wages than the British fighting troops, West Indians in France were always regarded as British troops, and received the same rate of pay as the Tommies. We carried full equipment as the English Infantry, and were only allowed to have oneblanket and the suit on our backs when up the lines. The Labour Corps were allowed to have more than one suit, and three blankets, and were only allowed to be behind the danger zone, and not on the field. They also had transportation to carry their kits, etc. We as other British soldiers had to carry our full equipment on our banks, except on long distances.

It is true that some of our men were called upon to perform certain duty which they rightly or wrongly regarded as labour work;-- but the Tommies were called upon to do the same kind of work, so we were not singular in that respect. But after all is said and done, the true criterion of service is to do whatever seems best, necessary, and

right to do at the moment not counting self.

The Battallion served with the Artillery successfully in the battles of Ypres in 1917, and in the Spring Offensive on the La Bassee Canal, and other sectionof that front, and in the final drive in 1918, at Mont St. Eloi, Vimy, Cambrai, Saint Quentin, right on to Douai and Valenciennes. Lost a good many men, and had several casualities from the effects of exposure on the field, killed, and wounded by enemy shells, and a few gassed.

13-32-36

Served with the 5th Army, the 1st, 51st. and 52nd Division, Divisions that have written their names in History, in letters of gold. Letters were received by our Commanding Officer, and read to the Battallion from the Commaners of the Army and Divisions named, expressing their appreciation of our services.

Saved four or more ammunition dumps from terrible explosions, by rushing to remove fuse, when enemh shells burst in the dump, and putting out fire under fire.

Names of more than twelve men were mentioned in despatch for bravery in the field. Three were recommended for Medals for distinguishing themselves in the field, one man to our certain knowledge received his medal after the war in Taranto, Italy. The battallion was on different section of the field from late in the spring right on to October 31st without retiring to rest for a single day behind the lines.

To us Colonel Willis was a good type of a man, as men go, but he had not the tact it appears to handle a crude type of soldiers, as the majority of the men of the 9th Battallion were, moreover, it appears that he had already associated with the Jamaicans in the 6th Battallion, and may not have formed a good impression, and had pleasant recollections of his days among them, at least, this was the impression we had, and formed from the conversation which we

13-22-27

overheard, however, be that as it may in fairness to the Colonel and the brave men of the 9th, it must be positively stated that the Colonel did not display that amount of wisdom which was necessary in one placed in the position as Commander of the Regiment,—one example should be adequate in support of this statement. On our way from Arras, we stopped on a bridge in Douai, It appears that the order was passed that the troops were to fall outon one side of the train only. Several of the men who were inthe back coaches were aware of such an order, Only when the Adjutant on the instructionof the Colonel directed the N. C. O.'s in charge of the various coaches to have all the men who fell out on the wrong side of the train to be placed in the guard room. This was the beginning of troubles, as several of the men were charged, and brought guilty for disobeying orders of which they were ignorant. By the time the train arrived in Taranto there were nearly a platoon of men in the compound undergoing punishment. Rightly or wrongly the men felt that they were not being given a square deal, and that they had a Commaner who was not in sympathy with them.

Armistice Message was Read Out With a Threat.

Whilst the world rejoiced as the result of the signing of the Armistice, there was just the opposite atmosphere among the men of the 9th Battallion. The day after the arrival in Taranto, the Battallion was drawn up and the Colonel read out Sir Douglas Haig's message on the signing of the Armistice, and without giving our men the opportunity to rejoice, he ended up with the threat that although the war was over, or rather an Armistice was signed, the men need not think that they could do as they want, or words to the effect, as he was there to discipline them, etc.; it was all so unbecoming that we drew a sigh of relief when we were dismissed. This atmosphere

3-32-28

of suspicion and istrust continued for days and weeks and the prisoners in the barbed wire compound grew in numbers. Finally, the tension broke, and on a bright evening and without warning the prisoners in the compound overpowered the guards, razed the barbed wire compound to the grounds, rushed to the Colonel's tent, laid hold of him, dragged him out of his tent, and belaboured him with blows. Fortunately, for the Colonel, Captain Norton and the narrator were not far off, being in the Medical Marquee, and on hearing the noise, we rushed to his aid. Captain Norton especially covering the Colonel with his own body, and as the men had the greatest respect for Captain Norton, he succeeded in persuading them to keep off, and so the life of the Colonel was saved, thanks to Captain Norton. As the men said openly afterwards, that it was their intention to beat the Colonel to death. Enraged at the thought that they were not allowed to carry out their self-appointed tasks, the now liberated prisoners fired volley after volley into the air from the rifles which they had taken from the guards.

An inquiry subsequently followed, the men were severely punished, and the Battallion was disbanded, and so ended the career of the brave and gallant 9th, which had covered itself with glory, first at Passchendaele, then at La Bassee, at Vimy, Hill, 60, Arras, Cambrai, etc. Such is the irony of war, and the result of an incompetent leader.

34-4-109

According to the Sydney Morning Herald several Australian aborigines have gone to the front with the Australian military forces. One of the most remarkable of these was Douglas Grant, who left Sydney with an Australian contingent in October, 1916. He was ready to go a couple of months before when he passed the sergeant's examination, but at the last moment a Government official discovered a regulation preventing an aboriginal from leaving the country, and much to his disgust and that of his comrades, for he was one of the most popular in the company, Grant had to stay behind till last week, when the authorities gave him the required permission to leave. He was the adopted son of the chief taxidermist at the Australian Museum, who came across him on an expedition in Northern Queensland. He was then a little child about two years old, abandoned and starving in the bush, his parents having been killed in a tribal disturbance ... Mr. Grant decided to adopt him and bring him south: he was well educated, and soon manifested a taste for drawing, and took a keen interest in the cadet movement. On reaching manhood he entered the service of a dock and engineering company, and was employed there for ten years as a draughtsman, becoming one of the most proficient. Outdoor life, however, naturally made a strong appeal to him. Having gained experience as a wool-classer, he

accepted a position of importance on a homestead. "This young aboriginal soldier is a man of high intelligence, with a great love for Shakespeare and poetry generally. He is a very good artist, and plays the bagpipes as well as any Scot." (p. 95)

Altogether the Negro peoples within the Union have been most eager to help the British and the South African Dutch in their struggle with the German Empire. Besides contributing to the contingent of about 40,000 workers which greatly assisted General Botha in his conquest of the region between the Orange River and the Kunene, they have even more eagerly contributed a valuable labour force to the war on the French front. They would have enlisted as actual soldiers and have made a dauntless dark-skinned army,

34-4-108

which would have become in a short time as disciplined as that of any European state. But there are two elements in Dutch-speaking South Africa. There is that which is represented so splendidly by General Botha and General Smuts, and which fortunately includes the best-educated and most intelligent of the descendants of the Dutch and German colonists. This party realises that there could never be a wholly Dutch South Africa any more than there could have grown up a wholly Dutch State of New York or a Dutch republic in North America. It realises its inherent kinship in language and racial characteristics with the British people, and is resolved to make common cause with them in building up and maintaining a British Empire of liberal institutions. But the other so-called Nationalist section, led by Dr. Hertzog, represents a singularly narrow outlook. These embittered Dutch people know practically nothing of Africa outside the borders of the Orange State, Cape Colony and the Transvaal. In their eyes the Negroes have no rights of any kind whatever. They were the predestined serfs of the White man. (P.76-77)

Company F went "over the top" at 5:30 A. M.; Company H, with which the Major was, went "over" at 12:30 noon; advancing four kilometers the battalion met the enemy's fire; the Machine Gun Company silenced the fire; Major Elser, who had halted in the woods to collect souvenirs from dead German bodies, immediately withdrew part of the battalion to the rear in single file about dark without notifying the rest of the battalion. Captain Dabney and Lieutenant Powell of the Machine Gun Company led the rest of the men out in order about 10:00 P. M. When the broadside opened on September 26, Major Elser stood wringing his hands and crying: "What shall I do! What shall I do!" At night he deplored the occurrence, said it was all his fault, and the next morning Major Elser commended the Machine Gun Company for extricating the deserted part of the battalion. Moving forward again at 11 A. M., two companies went "over the top" at 4 P. M. without liaison. With the rest of the battalion again, these companies went forward one and one-half kilometers. Major Elser stayed back with the Post-of-Command. Enemy fire and darkness again stopped the advancing companies and Captain Jones fell back 500 metres and sent a message about 6 A. M. on the morning of September 28 to the Major asking for re-enforcements. Captain Jones stayed under snipers' fire until about 3 P. M. and when no answer to his request came from the Major, he went "over the top" again and retraced the same 500 metres. Heavy machine gun and rifle fire again greeted him. He took refuge in nearby trenches, but his men began to drift away in confusion. All this time the Major was in the rear. On September 28, however, Major Elser was relieved of the command of the battalion and entered the hospital for "psycho-neurosis," or "shell-shock,"—a phrase which often covers a multitude of sins. Later he was promoted to Lieutenant-Colonel and transferred to a Labor Battalion.

Meantime, on September 27, at 4:30 P. M., the Third Battalion of the 368th Infantry moved forward. It was commanded by Major B. F. Norris, a white New York lawyer, a graduate of Plattsburg, and until this battle a Headquarters Captain with no experience on the line. Three companies of the battalion advanced two and one-half kilometres and about 6:30 P. M. were fired on by enemy machine guns. The Major, who was in support with one company and a platoon of machine guns, ordered the machine guns to trenches seventy-five yards in the rear. The Major's orders were confusing and the company as well as the platoon retreated to the trenches, leaving the firing-line unsupported. Subjected to heavy artillery, grenade, machine gun and rifle fire during the whole night of September 27 and being without artillery support or grenades, the firing line broke and the men took refuge in the trench with the Major, where all spent a terrible night under rain and bombardment. Next morning, September 28, at 7:30 A. M., the firing-line was restored and an advance ordered. The men led by their colored officers responded. They swept forward two and one-half kilometres and advanced beyond both French and Americans on the left and right. Their field officers failed to keep liaison with the French and American white units and even lost track of their own Second Battalion, which was dribbling away in one of the front trenches. The advancing firing-line of the Third Battalion met a withering fire of trench mortars, seventy-sevens, machine guns, etc. It still had no artillery support and being too far in advance received the German fire front, flank and rear and this they endured five hours. The line broke at 12:30 and the men retreated to the support trench, where the Major was. He reprimanded the colored officers severely. They reported the intense artillery fire and their lack of equipment, their ignorance of objectives and their lack of maps for which they had asked. They were ordered to re-form and take up positions, which they did. Many contradictory orders passed to the Company Commanders during the day: to advance, to halt, to hold, to withdraw, to leave woods as quickly as possible. Finally, at 6:30 P. M., they were definitely ordered to advance. They advanced three kilometres and met exactly the same conditions as before,—heavy artillery fire on all sides. The Company Commanders were unable to hold all their men and the Colonel ordered the Major to withdraw his battalion from the line. Utter confusion resulted,—there were many casualties and many were gassed. Major Norris withdrew, leaving a pla-

toon under Lieutenant Dent on the line ignorant of the command to withdraw. They escaped finally unaided during the night.

The Chief of Staff said in his letter to Senator McKellar: "One of our majors commanding a battalion said: 'The men are rank cowards, there is no other words for it.'"

A colored officer writes:

"I was the only colored person present when this was uttered: It was on the 27th of last September in the second line trenches of Vienne Le Chateau in our attack in the Argonne and was uttered by Major B. F. Norris, commanding the 3rd Battalion. Major Norris, himself, was probably the biggest coward because he left his Battalion out in the front lines and came back to the Colonel's dugout a nervous wreck. I was there in a bunk alongside of the wall and this major came and laid down beside me and he moaned and groaned so terribly all night that I couldn't hardly close my eyes—he jumped and twisted worse than anything I have ever seen in my life. He was a rank coward himself and left his unit on some trifling pretext and remained back all night."

From September 26-29 the First Battalion of the 368th Infantry, under Major J. N. Merrill, was in the front-line French trenches. On the night of September 28 it prepared to advance, but after being kept standing under shell-fire for two hours it was ordered back to the trenches. A patrol was sent out to locate the Third Battalion, but being refused maps by the Colonel it was a long time on the quest and before it returned the First Battalion was ordered to advance, on the morning of September 29. By 1:00 P. M. they had advanced one mile when they were halted to find Major Merrill. Finally Major Merrill was located after two hours' search. A French Lieutenant guided them to positions in an old German trench. The Major ordered them forward 600 yards to other deserted German trenches. Terrific shell-fire met them here, and there were many casualties. They stayed in the trench during the night of September 29 and at noon on September 30 were ordered to advance. They advanced three kilometres through the woods, through shell and machine gun fire and artillery barrage. They dug in and stayed all night under fire. On October 1 the French Artillery came up and put over a barrage. Unfortunately, it fell short and the battalion was caught between the German and French barrages and compelled hastily to withdraw.

The regiment was soon after relieved by a French unit and taken by train to the Marbache sector. Major Elser, of the Second Battalion, made no charges against his colored officers and verbally assumed responsibility for the failure of his battalion. There was for a time strong talk of a court martial for him. Major Merrill made no charges; but Major Norris on account of the two breaks in the line of the Third Battalion on September 28 ordered five of his colored line officers court-martialed for cowardice and abandonment of positions—a Captain, two First Lieutenants, and a Second Lieutenant were accused. Only one case,—that of the Second Lieutenant, had been decided at this writing. He was found guilty by the court-martial, but on review of his case by General Headquarters he was acquitted and restored to his command.

Colonel Greer in the letter to Senator McKellar on December 6, writes as follows: "From there we went to the Argonne and in the offensive starting there on September 26, had one regiment in the line, attached to the 38th French Corps. They failed there in all their missions, laid down and sneaked to the rear, until they were withdrawn."

This is what Colonel Durand, the French General who was in command in this action, said in a French General Order: *"L'Honneur de la prise de Binarville doit revenir au 368th R. I. U. S."*

And this is what Colonel Greer himself issued in General Order No. 38, Headquarters 92nd Division, the same day he wrote his infamous letter to this senator: "The Division Commander desires to commend in order the meritorious conduct of Private Charles E. Boykin, Company C, 326th Field Signal Battalion. On the afternoon of September 26, 1918, while the 368th Infantry was in action in the Argonne forest the Regimental Commander moved forward to establish a P. C. and came upon a number of Germans who fled to the woods which were FOUND TO BE ALIVE WITH MACHINE GUNS. The Commanding Officer ordered the woods searched to the top of the hill, the officer in charge of the scouting (2nd Lieutenant C. W. Carpenter) called

for volunteers and Private Boykin, a telephone linesman, offered his services and set out with the rest of the detail. While trying to flank an enemy machine gun another opened fire killing him instantly."

This effort of the 368th Regiment was seized upon by Army gossip and widely heralded as a "failure" of Negro troops, and particularly of Negro officers. Yet the same sort of troops and many Negro officers in the Champagne and afterward in the Argonne under French leadership covered themselves with glory. The real failure in the initial Argonne drive was in American field strategy which was totally unequal to German methods and had to learn by bitter experience. It is worse than unfair to write off the first experience to the discredit of Negro troops and company officers who did all that was humanly possible under the circumstances.

30E-6-42

place in the organization from the beginning and no efficiency boards sat. This was one of the very few units in which Negroes were promoted: four being made Captains, three First Lieutenants, eleven Second Lieutenants, and one a Major.

Near the close of the war thirty-five Lieutenants commissioned at Camp Taylor arrived in France and were sent to school near Nantes. They were subjected to many indignities by the American officers and were compelled to enter the class-room after the whites; they were refused leaves to town; reprimanded for conversing with the women of the city, who were anxious to be kind and sympathetic to the obviously oppressed strangers. Notwithstanding all this the men made good records and joined their command after the Armistice.

The 317th Engineers were assembled at Camp Sherman in December with 1,350

The officers of the Division, November 1st, 191[illegible] were as follows:

3/6/19

Brannon, Clyde R.	1st Lt. Inf.	Asst. to G-2

Headquarters 317th Engineers,
A.P.O. 766 Mobile,
December 3, 1918.

A13-1

M A I N R E P O R T.

Under Order No. 105, Paragraph 13, War Department, October 26, 1917, Colonel Earl I. Brown reported to the Commanding General of Camp Sherman, Chillicothe, Ohio, for assignment to duty with the 317th Engineers.

The following Officers were also on the sameorder.

Lieutenant Colonel, Henry A. Finch.

Captain Frazer A. Hilder
Captain Richard W. Reading
Captain David J. Castleman
Captain Willis R. Tenny
Captain Gordon T. Whelton
Captain Samuel K. Kerns
Captain Edwin R. Quimby
Captain Chester B. Starbird
Captain Sidney P. DeLemos.

The Lieutenant Colonel continued with the regiment till it embarked for over-seas duty but the above Captains were ordered overseas under Order No. 127, W. D., November 21, 1917. This order also included Captain George A. Hunt whose record of reporting was not on file.

Order No. 1 of the regiment dated November 4, 1917, divided up the men taken over from the 158th Depot Brigade into Companies. There were about 2000 men taken over.

The first assignment of Officers was as follows:

Colonel,
Earl I. Brown.

Lieutenant Colonel,
Henry A. Finch.

Adjutant, Capt. Frazer C. Hilder,

Supply Officer Capt. Chester B. Starbird,

Topographical Officer Capt. Geo. A. Hunt.

Special Duty: For Regt. Adjt., 1st Lieut. Geo. J. Austin.
" " Supply Officer, 1st Lieut. Pitman E. Smith.

These Lieutenants had been assigned by the 83rd Division. They were Infantry Officers.

Lieutenant Hugh W. Dicken has been assigned to the Casual Colored Detachment on October 27, 1917, by S.O. 59, Paragraph 8, Hdqrs. 83rd Division, which assignment was changed to the 317th Engineers on November 7th, by S.O. 70, Paragraph 10, Hdqrs. 83rd Division. He accepted a Captain's commission on November 30, 1917.

Under S.O. No. 264, W. D., November 12, 1917, Paragraph 32, Major Arthur E. Wenige was ordered to active duty and assigned to the regiment. Paragraph 48 notes, that the acceptance of the commission as Major in the Engineer Reserve Corps served to automatically vacate his commission as Captain, 15th Infantry, National Guard (New York). Major Wenige was relieved just as the regiment was about to sail.

First Lieutenant Henry H. Duke, Medical Reserve Corps, was ordered from the Medical Officers' Training Camp. Fort Benjamin Harrison, Ind., November 14, 1917. He was made a Captain on December 22, 1917.

The first set of Captains who were ordered over-seas were replaced by Infantry Officers, and the new assignments were made under S.O. No. 4, Paragraph 3, Hdqrs. 317th Engineers, December 5, 1917, asfollows:

Colonel
Earl I. Brown.

Lieutenant Colonel
Henry A. Finch.

Adjutant
Capt. Chas. Ecton

Supply Officer
William W. Thompson.

2nd " Henson A. Person
" Charles M. Hayes.

Hq. Co. and Engr. Train.

1st Lieut. Pitman E. Smith,
2nd " Jesse M. H. Graham.

The above Captains had served as instructors for a short period just after the formation of the regiment. They had been relieved by the Captains noted of the first assignment order from the War Department.

The special order forming the regimental Orchestra was dated January 15, 1918, and Lieut. Thomas E. Green was placed in charge. The list included the names of 39 enlisted men. Further additions were made on April 9.

First Lieutenand Pitman E. Smith, and Secomd Lieutenant Ether Beattie, with eighty-two enlisted men were named in S.O. No. 13, of the regiment, dated January 24, 1918, for duty with the 317th Engineer Trsin. These Officers remained with the Train throughout the operations in France.

On February 21, 1918, 89 enlisted men were received from the 158th Depot Brigade, and assigned to the 2nd Battalion.

Seconf Lieutenant Henry E. Van DerVeen, Veterinary Corps, was ordered for duty with the 317th Engineers., 324th Engineer Train, 92nd Division, under Order No. 35, Paragraph 16, W.D., February 11, 1918. He served with the regiment until September 18, 1918, when he left to take charge of the Division Veterinary Hospital.

Chaplain George A. Singleton's appointment was announced, and he was assigned to the regiment under S.O. No. 48, Paragraph 129, W.D., February 27, 1918. He has served with the regiment to date.

First Lieutenant Leon F. Marsh and Second Lieutenant John A. Turner were ordered for duty with the regiment through Hdqrs. 83rd Division on March 9, 1918.

The largest single addition, of a permanent nature to the Officer Personnel of the regiment prior to embarkation was made under S.O. No. 64 Paragraph 83, W.D., March 18, 1918, when the following Captains were attached.

William H. Thomson Jr.,
Robert H. Reese,
Herbert R. Simonds.
Edgar L. Clemmer
Guy T. Kuntz
James W. Morris
James J. Morgan
Edward M. Turner
Andrew C. Birkland
James H. Hoskins
Frank G. Eason.

They were ~~and~~ sent directly from the Third Engineer Officers' Training Camp, Camp Lee, Va., and were first used as instructors in the regiment.

All sailed with the regiment, Captain Hoskins being relieved at the boat, ans sailing as a Casual. The remainder served with this Unit through the Argonne Offensive.

2/26/62

On April 15, 1918, Capt. Wm. Glass Inf. N.A., was relieved of command of Company "E" and transferred all funds and property to Captain Edgar L. Clemmer. This was the beginning of the replacement of Colored Infantry Officers by White Engineer Officers.

Special Orders No. 96, Paragraph 356, April 24, 1918, announced the promotion of Captain Hugh William Dicken M.R.C. to be Major, and Paragraph 344 of the same order announced the promotion to Captain of Lieutenant Frank Edwin Boston, M.R.C., to be Captain. These Officers had reported for duty with the regiment on November 7, 1917. During the absence of Lieutenant Boston on other duties, Captain Wm. A. Stone, M.R.C., had served with the regiment.

On May 10, 1918, Captain Edward M. Turner was placed in command of Company "B" during the absence of Captain Joseph Lowe. The latter was made assistant to the Regimental Supply Officer, and Captain Turner assigned to the Company on May 17, 1918. The following day saw the permanent assignment of the remainder of the Captains mentioned in the War Department Order of March 18, 1918. The names and duties were as follows:

(Ecton) —	Adjutant,	Capt. Wm. H. Thomson Jr.,
(Thompson) —	Topographical Officer	Capt. James G. Morgan
	Supply Officer	Capt. James W. Morris
	Adjutant, 1st Battn.	Capt. Andrew C. Birkland
	Company "A"	Capt. Frank G. Eason
	Company "C"	Capt. Robert H. Reese
	Company "F"	Capt. Herbert R. Simonds.

Sixty-one enlisted men were transferred from the 158th Depot Brigade on May 28, 1918, and 50 were sent to the same Brigade on May 31, in preparation for over-seas movements.

The remainder of the regimental history is almost entirely covered by the Monthlu Report on Operations. In order to get ~~an~~ a full "Chronological" section for the MAIN REPORT it seems best to smplify the Monthly Reports with the names of places and departments and also officers changed in the personnel. Nothing particularly technical was developed either in the way of equipment or construction. The pick, shovel, axe, and ordinary tools were kept in constant use and the usual types of dug-outs, trenches, roads, amd railroads constructed.

Report Of Operations For The Month Of June 1918.

The first day of the month of June found the regiment on Board Train en route from Camp Sherman, Ohio, to Camp Upton, Long Island. The regiment arrived at the latter place on the 2nd day of June, and went into Camp at that place ~~for~~ for the purpose of awaiting transportation Overseas. The time at Camp Upton was spent in completing the outfitting of the Regiment which had not been completed at Camp Sherman, and in turning in such surplus equipment as was not required for Overseas service. The Regiment left Camp Upton on the 9th day of June, and embarked on Transport on the same date, the Steamer sailing about 6:00 P.M., June 10th.

On Board Transport the usual Transport duties were performed, including Guard duty. The Regiment arrived in France on June 19th disembarking the same date, and went into Camp in the vicinity of Port of ~~Embarkxx~~ Debarkation, awaiting Railway transportation to its final destination.

The Regiment entained on June 25th, and arrived at its present destination on the night of June 27th, detraining the next day, and proceeded to the Billets which it occupies at present. The remainder of the month was occupied in getting settled in Billets and preparing a detailed schedule of instruction in Engineer and Infantry work, which schedule into effect at the end of the month.

While at Camp Upton and during embarkation, Lieut. Col. Finch, Major Wenige, and Capt. Hoskins were relieved from duty and replaced by:

Lieut. Col. James Edward Cassidy,
Major Clay Anderson
Captain Thomas M. Poyner.

There were 50 officers and 1327 men in the regiment.
The transport mentioned was the U. S. Mt. Vernon, and the Port of Debarkation, Brest. The regimental headquarters after being settled in billets were at Blondefontaine, (Haute Saone) with 1st Battalion headquarters at the same place, and 2nd Battalion headquarters at Barges. Thisis called the Bourbonne-les-Bains (Haute Saone) area, from the headquarters town of the division.

While in the training area the Pioneer Platoons of the 365th, 366th, 367th and 368th Infantry Regiments were assigned for instruction with this regiment. Secong Lieut. Alex F. Sachs, 307th Engrs. was assigned by S.O. No. 20, par.4, Hdqrs. 4th Army Corps, as instructor for four weeks.

The Army Engineer School at Lagres, France supplied the greatest number of officers to the regiment. At the general drive all of the lieutenants but two had had at least one of the several courses. Under S.O. No. 189, par. 2, July 12th, 1918, Hdq. Army Schools, the following were ordered for duty with the regiment.

Captain Gale S. Dunbar,
Captain John R. Haswell,
1st Lieutenant Murray S. Hanes
1st Lieutenant James H. Childs
1st Lieutenant Miles E. Clark.

The following 1st Lieutenants were ordered for duty in Paragraph 6 of the above order:

A. W. Barker,
S. W. Booth Jr.,
W. M. Butts,
Ralph W. Clark,
M. B. McDermott,
E. L. Homan,
C. W. Cummings,
H. R. Haar,
J. K. Doe,
J. I. Quinn,
G. A. Collins,
T. G. Townsend.

The first group was taken from the instructor course and the second from the detached officers' school then in operation.

The Army Candidates school supplied the following second lieutenants, Engineer Corps, N.A., under S.O. 195, Hdq. Army Schools, Par. 11, July 18, 1918.

John W. Damon,
Curtis C. Beery,
Lloyd L. Mansfield,
John O. Arrowsmith,
William K. Widger.
Nicholas I. Colamn,
Douglass McKnight,
Jean M. Britt,
Edgar O. Miles,
Howard R. Woodburn,
Ray G. Mills,
Alvin O. Beck.

First Lieutenant William W. Wallace, M.R.C. was transferred to the regiment from the 317th Sanitary Train on July 16, 1918.

The lieutenants who sailed with the regiment and whose duties were taken over by the officers from the Army Schools, noted above, were ordered to other units in the Division by S.O. No. 141, Hdqrs. 92nd Division, July 22, 1918. There were twenty-seven names on the list. The remainder were moved on July 25.

Report of Operations for Month of July 1918.

"During the month of July the Regiment as a whole was engaged in carrying out a four weeks Program of Training prescribed for the entire 92nd Division. The Regiment remained in Billets for the entire month at the same station. Details were furnished by the Regiment for the erection of Adrian Type of Barracks at FRESNES, SENAIDE and AINVILLE: also for laying 1600 feet of new track and making certain alterations in the Railhead at BOURBONNE-LES-BAINS. It also furnished details for unloading freight received for the regiment and the material received for the construction of the Adrian Barracks."

"During the month, the Colonel, three Captains and six 1st Lieutenants were detached from the Regiment and sent to various schools for Courses of Instruction varying from two weeks to four weeks."

A further addition was made to the engineer officer personnel from the Army Schools under S.O. 212. Hdqrs. A.S., Aug. 4, 1918, included the following:
First Lieutenants:

L? H. Hibbard
J. B. Howard
W. J. McGraw
V. J. Flanagan.

Lieutenant Hibbard was relieved from duty by the regimental commander for a short period of special work. Soon after he rejoined the unit, he broke his ankle and wasevacuated.

Report of Operations for Month of August, 1918.

"From August 1st to August 11th the Regiment remained at the same station as during the month of July. On Monday August 5th, in pursuance to General Order, 92nd Division Headquarters, the entire Command went into camps. One camp containing Headquarters Detachment and 1st Battalion, just outside Blondefontaine, (Haute Saone). The 2nd Battalion ~~xxxHeadquartersxDetachmentx~~ moved into a camp a short distance from the town in which they had been billeted, Barges, (Haute Saone)?

"On August 12th, pursuant to secret orders, the entire command broke camp and proceeded by motor trucks to fron area. The journey began at 6:00 A. M. and was completed by 6:00 P. M., the same date. However, the complete journey was not made at this time; the 1st Battalion and Headquarters Detachment resting in a city of about two thousand inhabitants, (Pouxeux, Vosges), while the 2nd Battalion was billeted about three kilometers away, (Archette, Vosges).

"The usual course of training was continued while the regiment remained in this ~~xxxxxxx~~ locality. On August 20th, the regiment again embussed. The movement began at 5:00 A. M., and was completed the same day. The Regimental Headquarters was established a short distance away from our present location, while the remaining companies of the command proceeded to their destination the same day. On August 23rd the Headquarters Detachment, together with the Regimental Headquarters were removed to this station, (St. Die, Vosges).

"Construction work, such as building of dugouts, making such bomb proof, the construction of trenches, and general engineer work such as Sapper Engineer are called upon to do, was pursued the remainder of the month.

"On August 23rd a Platoon of Company E was sent into the recently captured town of FRAPELLE, to make captured dug-outs gas-proof. Lieut. G. H. Collins,

2/24/65

Company E, was in command of the platoon and remained in the town with a detail for the purpose of constructing trenches and dug-outs, until the work was completed. A carrying party of 25 other members of the same company made two trips from Engineer Dump with material, going back and forth under shell fire, from that part of the town which had received intense gas shell bombardment for ~~part~~ five days. Mustard gas was encountered in large quanities, the first day, and Phosgene on the second day. The working party which remained in the town all day and night was constantly under shell fire during the 36 hours and worked continuously. The bahavior of the men under shell fire was excellent. There were no casualties.

"On August 25th and August 26th, Company D, this command was shelled in its billets; some gas was also discovered. At this time after assembling the men in dug-outs and the roll was called, three were found absent, upon investigation by an officer they were found to have taken refuge in another dug-out. There were four casualties from shell fire; the injuries were slight.

"During the nights of August 27th to 31st inclusive, the various companies of this command were shelled in their billets, by both high explosives and gas shells. No casualties."

Lieut. M. B. McDermott was ordered to the 7th Engineers on September 16, 1918, and reported killed in action in the Argonne.

A great reduction in officer personnel occurred under S. O. 270, par. 27, G. H. Q., A. E. F., September 27, 1918, when the following were sent to the 6th Engineers.

Second Lieutenants:

W. R. Woodburn
L. L. Mansfield
R. C. Mills
W. K. Widger
D. McKnight
A. O. Beck

Second Lieutenant E. C. Miles was relieved from assignment and ordered to the Army Engineer School as an instructor by S. O. No. 274, par. 73, G. H. Q., A. E. F., October 1, 1918.

The 116th Engineers supplied the following on S. O. No. 198, par. 6, August 15, 1918.

1st Lieut. J. L. Goldman

and on par. 14, same order

1st Lieut. E. R. Math. Regimental order No. 200, par. 2, August 17, 1918, ordered the following for duty with the 317th Engineers:

1st Lieut. Francis B. Foote.

The officer personnel which continued into the Argonne offensive was as follows:

BROWN, EARL I.	COLONEL, Commanding.
Cassidy, J. Edward	Lieut. Colonel
Ferguson, William H.	Major, 1st Battn.
Anderson, Clay	Major, 2nd Battn.
Thomson, Jr., Wm. H.	Capt. Regt. Adjutant.
Kuntz, Guy T.	Capt. Personnel Adjutant.
Birkland, Andrew C.	Capt. 1st Bn. Adjutant.
Dunbar, Gale S.	Capt. 2nd Bn. Adjutant.
Morgan, James G.	Capt. Topographical Officer
McGraw, W. J.	1st Lieut. Supply Officer
Singleton, George A.	1st Lieut. Chaplain
Haswell, J. R.	Captain (attached)
Morris, James W.	Captain, (Assigned)

2/26/66

COMPANY A:

Eason, Frank G.	Captain
Barker, H. W.	1st Lieut.
Clark, R. W.	1st Lieut.
Howard, G. B.	1st Lieut.
Miles, E. C.	2nd Lieut.

COMPANY B:

Turner, Edward M.	Captain
Booth, S. W.	1st Lieut.
Haar, G. R.	1st Lieut.
Berry, C. C.	2nd Lieut.

COMPANY C:

Reese, Robert H.	Captain
Childs, J. H.	1st Lieut.
Townsend, T. G.	1st Lieut.
Math, E. R.	1st Lieut.
Damon, J. W.	2nd Lieut.

COMPANY D:

Poyner, Thomas M.	Captain
Butts, Wm. M.	1st Lieut.
Doe, J. K.	1st Lieut.
Flanagan, V. T.	1st Lieut.
Britt, J. M.	2nd Lieut.

COMPANY E:

Clemmer, Edgar L.	Captain
Collins, G. H.	1st Lieut.
Homan, E. L.	1st Lieut.
Clark, M. E.	1st Lieut.
Colman, N. I.	2nd Lieut.

COMPANY F:

Simonds, Herbert R.	Captain
Quinn, J. I.	1st Lieut.
Cummings, C. W.	1st Lieut.
J. L. Goldman	1st Lieut.
Foote, Francis B.	1st Lieut.
Arrowsmith, J. O.	2nd Lieut.

HDQRS. DET.

Hanes, M. S.	1st Lieut.

MEDICAL DET.

Dicken, Hugh W.	Major
Boston, Frank E.	Captain
Wallace, Wm. W.	1st Lieut,
Cobb, Edward J.	1st Lieut.
Crawford, James L.	1st Lieut.

VETERINARY DET.

Watson, B. B.	2nd Lieut.

Report of Operations For Month of September, 1918.

"The Regiment remained in the same location, St. Die Sector, as reported in August until the 20th of the month. Trench, wire Entanglement and Dug-out construction was carried on.

"On September 10, Company D, working in the vicinity of Angleterre was called into support of the Infantry and did such work as [illegible]

rendered excellent service, and a Regimental General Order was made announcing same.

"On September 19, the Regiment began to concenstrate the property near Corcieux, and then to Bruyeres where it entrained on Saturday the 21. There were 56 officers and 1499 men on roster.

"The Regiment arrived at Villars-Daucourt (Mayne) the morning of Septemver 22 and marched to Brizeaux. It remained there until the 25, Wednesday night, 8:00 P. M., when the Regiment less three-fourths of Headquarters Detachment marched to Clermont Woods, on Main Roas Les Islettes, Clermont Meuse, arriving there at 3:00 A. M. The march was made easily and all of the men were in good condition.

"The following afternoon the Regiment was sent to the following locations:
A & B to vicinity of Neuvilly under command of Major Ferguson
C & D to vicinity of Le Claon under command of Lieut. Col. Cassidy.
E & F to vicinity of Le Croix de Pierre under command of Major Anderson.

"Each two companies were re-enforced by a Battalion of Infantry from the 92nd Division, and engaged in maintaining, repairing and constructing Roads.

"As the work progressed the location of these companies changed from time to time. The Headquarters Detachment remained with the Regimental Commander, at the P. C., in the Woods near Clermont. While the work engaged in by the Regiment was at all times fraught with danger, yet few casualties were recorded.

"On the morning of September 26, Sgt. Adams and Pvt. Edward Pickering of Company E were wounded by shell fire while working near Croix de Pierre. Sgt. Adams died October 4, from effects of this wound.

Report of Operations For the Month of October, 1918.

"The Regiment was located at various places in the Argonne Forest during the entire month of October. Road and light railway, repair, construction, and maintenance, together with operation of the railway, constituted the work of the regiment during the month. The location of the companies and the regimental headquarters changed from time to time as the work demanded. On the first of the month the regiment was distributed as follows: Company A, Roads south of Cheppy; Company B, Roads south of Cheppy; Company C, Valley Roads Les Islettes Vinenne and near La Four De Paris; Company D, Valley Road Les Islettes Vinenne and near Four De Paris; Company E, south of Varennes and at Pierse Croise; Company F, south of Varennes and at Peirre Croise. All doing work on highways. The Regimental Headquarters was located in the woods one kilimeter west of Clermont, and the Engineer Train one-half kilometer west of Regimental Headquarters.

"On October 4, Headquarters Detachment and Companies C, D, E, and F, broke camp and marched to Camp Cabaud. The following day Companies A and B arrived at Camp Cabaud, about 9:00 A. M. At 1:00 P. M., the day following, October 6, the entire regiment again broke camp and marched to a point on the Ridge Road about one kilometer south of the junction with Four de Paris-Varennes Road.

"Headquarters remained here until October 14; the Companies moving from place to place in the neighborhood best suited to the location of their work. The Companies were assigned as follows: A and C, under Lieut. Col. Cassidy, to work on the Four de Paris-Varennes Road; Company B, to work on 60 C. M. railway, under Major W. H. Ferguson; Company D, to work on Ridge Road and on railway; Company F, was sent to Abin Court Farm to work north and south highways in the neighborhood of Varennes; while Company E, was sent, on October 10, to report back to Headquarters, 92nd Division.

"Reconnaissance of the various bridges on 60 C. M. railway and of the adjacent ter itory led to the adoption of a plan to build a new line south across No Man's Land from a point on the 60 C. M. railway, at co-ordinates 300.7-270.8, which point is nearest the junction of the Ridge Road and Four de Paris-Varennes Road to connect the system previously used by the Germans with the railway then being operated by the French at Maison Forestre. Company B and a part of Headquarters Detachment eere put on this work October 11. Company D assisted from time to time and the connection was finally made on October 22d. The first load of ammunition was hauled over this track on October 26.

"On October 15 Regimental Headquarters was moved to Camp Mahaut which had been recently vacated by the 77th Division. The day following the move the 77th Division returned and Regimental Headquarters went under canvas one-half kilometer further north, at a point on the railroad, co-ordinates 300.0272.0.

"On October 21, Lieut. Maggs, First Army Corps, with a detail of Signal Corps men, assisted by a detail from Headquarters Detachment installed telephone connection along the 60 C. M. railroad.

"Company F moved from Abin Court Farm to Manhattan Junction on October 16 and undertook the work of rehabilitating the road through Montblainville and north, moving forward on October 21 to Lancon.

"On October 21 one platoon of Company D moved into Cornay and completed the repairs on the railway to Grandpre. Lieut. Flanigan of this platoon made trips into Grandpre while still under shell fire of the enemy and brought out tractors and rolling stock for use in operating.

"On October 20 2 gasoline tractors were received from 21 Engineers and put into operation with the assistance of six men from that regiment. On the 25th, 43 men from the111th Engineers also came and assisted in operating railway - more engines and rolling stock had been received.

"Operation of the railway, repairing of extensions of the same to the north and improving new track across "No Man's Land" occupied the balance of the month. The following is a portion of the report of the Commanding Officer:

Headquarters 317th Engineers,
A. P. O. 766 Mobile,
6 November, 1918.

From: Commanding Officer, 317th Engineers.

To: Chief Engineer, 1st Army Corps, American E. F.

Subject: Operations in connection with Light Railways.

"Under your instructions the undersigned began work of repairing the German lines of light railways in the Argonne Forest, and the connections across "No Man's Land" between this system and the French system extending down through the Forest to Les Islettes, about the middle of October.

"It was my understanding at the time that this work was undertaken that the Army Railway Engineers had made reconnaissance of the German Argonne system and had pronounced it impracticable for any use in an army system. Our main consideration therefore, in undertaking the work was to provide a means, as rapidly as possible to assist in the supply of the 1st Army Corps, and to relieve the enormous congestion of traffic on the roads which the continued rains rendered difficult to maintain.

"After a reconnaissance of the various routes availavle for a connecting line it was found desirable to continue the German system down the ridge from near Bas Jardinet to the French system near Dept Fontaines, a distance of almost exactly two miles. Work was immediately begun with two companies of this regiment, building the extension, and repairing the German system. The connection across "No Man's Land" was completed as to grading and laying of rails on October 25, and the operation of trains drawn by light gasoline tractors begun.

"The German system was constructed with rail of various sizes and types. The main lines were of heavy rail varying in weight from 40 to 60 pounds, laid on wooden ties. The secondary distributing lines were of the Decauville type, that is rails bolted to steel ties, ready assembled in sections. These sections were of rail varying in weight from 8 pounds to 20 pounds depending upon whether the line was used for tractor service or horse drawn cars. To secure rail for the extension it was necessary to tear up some of the tracks which it was known would not be needed. As there was available plenty of the 18 and 20 pound rail, it was decided to use only those sizes. However, owing to transportation difficulties, it became necessary to lay 650 feet of the 14.5 pound rail, with the idea that when the line was opened, it would be replaced by the standard rail which would then be hauled to the ground. No rail any lighter than this was used on any

2/4/19

[illegible] part of the lines and any found previously constructed German and French [illegible] were renewed. I may add here that the replacing of the 14.5 pound rail by the 18 to 20 pound rail has also now been completed by this Regiment so that the entire connection is now of the size rail adopted originally.

"Just prior to the completion of this connection two gasoline tractors were provided which were sent in over the temporary line built to the French System near La Harazee by the 302d Engineers. By the time the connection was completed, repairs had been completed to Lancon, Apremont and Montblainville, and there was an immediate demand for freight to be hauled, even before the connecting line could be ballasted.

"An arrangement was made whereby ballast was to be delivered from the Army Quarries over the French lines at the rate of 12 cars per day, although actual deliveries seldom ever exceeded six cars perday. These deliveries ceased October 30, at which time 6200 feet were on ballast and 4500 partly ballasted, the total length being 10,700 feet. Ballasting would have been completed had it not been that preference was given to transporting ammunition to the front, which consumed all our limited capacity.

"During the few days we operated this line we had no difficulty with the track excepting a few places were new fills necessitating slow progress of trains over these spots.

"Three additional gasoline tractors of the 35 H. P., 5 flat cars of American make and one steam locomotive were turned over to us to operate on the line about October 25, and were used from that date until the end of the month, except that the steamer was under repairs for 4 days of this time."

Over 2000 tons of freight were handled to November 1, 1918, when at 7:00 A. M. the Argonne Railroad was turned over to the 21st Engineers.

Of the 1250 men with the regiment at this time 112 were voluntary enlistments and 1138 were drafted; 575 were from Ohio, 322 from Oklahoma, 77 from Pennsylvania; 65 from Kentucky; and the remainder widely scattered. The following are the percentages by occupation previous to the war: Trades 40; agricultural 21; contractors' organizations 17; railways 8; educational institutions and students 4; clerical 2; and the remainder a very miscellaneous collecton of positions.

MEMORANDUM: For Regimental Commanders, 92nd Division:

. The following copies of cables regarding regimental intelligence officers and battalion scout officers will be of interest to you:

"Par. 1-B, Cable 1179-S. With reference to Paragraph 4 your cablegram 1343. Battalion Scout Officers should be additional and not perform company duties. PERSHING.

Par. 1-g, Cable 1084-S. Recommend that one captain be added to Headquarters Infantry Regiment to perform functions of Operations and Intelligence Officer. It has been found in practice that one large regiment requires an additional staff officer to assist as indicated. PERSHING.

Par. 4, Cable 1346-R. Your recommendations requested whether battalion scout officers should be additional and not perform company duties. MARCH

Par. 2, Cable 1452-R. With reference to paragraph 1-G your 1084 and paragraph 1-B your 1179. Your recommendation approved. Tables of Organization amended satisfactorily. MARCH.

Par. 1-C, Cable 1281-S. With reference to paragraph 2 your cablegram 1452, request information of rank authorized for battalion scout officers. Recommend rank of first lieutenants if not already decided. PERSHING.

Par. 3, Cable 1569-R. In reference to paragraph 1-C your 1261. It has already been decided that these officers shall have rank of second lieutenants. In Tables of Organization they are called Battalion Intelligence Officers. MCCAIN."

General Orders)
No.26)

I. The conduct of the following named enlisted men of Company G 365th Infantry, during the bombardment of their position on the morning of September 10, 1918, is considered to be such that it deserves mention and commendation in General Orders:

Sergeant William W. Boyd.
Corporal Charlie Reid.
Private Rufus Cotton.
Private Bennie Blackwell.

II. Orders for gas defense against enemy gases, issued by Corps or Division Commanders, will be strictly obeyed by all Army Troops within the Corps or Division areas. Division and Corps Commanders are responsible that effective measures for protection against enemy gases are taken by Army troops in their respective areas, and will require the gas officers on their staffs to make inspections of such units. Such assistance as is possible will be rendered these odd units in the matter of equipment; and defects in equipment, discipline or training will be brought to the attention of the Chief Gas Officer of the Army, as well as to the Commanding Officer of the unit concerned. This order is not to be construed as limiting the duties of the Chief Gas Officer of the Army, with respect to Army troops. (G.O. 18, c.s., Hq. 1st Army)

2/28/8

III. The following cablegram has been received by the Commander-in-Chief and is published for the information of all concerned:

"Accept my warmest congratulations on the brilliant achievements of the Army under your command. The boys have done what we expected of them and done it in the way we most admire. We are deeply proud of them and of their Chief. Please convey to all concerned my grateful and affectionate thanks.

WOODROW WILSON."

While we are all proud of the splendid success that has come to the Army even in its initial effort, and while we feel that our countrymen are justly exultant, let us fix our minds firmly on the final victory and strive more earnestly than ever to carry out our great purpose. (G.O. 18, c.s., Hq. 1st Army).

By command of Major General Ballou:

ALLEN J. GREER
Lieutenant Colonel, General Staff,
Chief of Staff.

HEADQUARTERS NINETY SECOND DIVISION
OFFICE OF DIVISION SURGEON
USAPO 766 - A. E. F.
4 November, 1918.

MEMO TO UNIT SURGEONS:

1. Circular # 6, c.s. A.E.F., calls attention to all Medical Officers that upon the recognition of so-called "Trench Foot", with or without skin abrasions; also in all cases of Frost Bite, Anti-Tetanic Serum will be administered.

2. Pursuant to instructions from Chief Surgeon, A.E.F., army troops, detached corps troops and all other troops in area occupied by 92nd Division who are not supplied with medical officers, will be furnished medical attention by the sanitary personnel of this division. This includes sick calls and evacuation of sick and wounded.

3. A portable laundry is located in Belleville and will be ready to do work at the rate of 5000 pieces daily, beginning 5 November, 1918.

4. Attention is again called to the frequent occurence of infectious respiratory cases being sent to Triage UNMASKED. This practice will not be tolerated.

2/23/21

5. I would like to call attention to the medical personnel of this division to the fact that a great many favorable comments have been made on the handling of the sick of this division while they are in transit and under treatment. A great deal of this praise is due to the hearty co-operation on the part of the entire Medical Department of this division in instituting and enforcing the measures recommended. The hospital is visited almost daily by French and American medical authorities to observe and comment on the very thorough painstaking care that is being given the sick of this command.

FIELD ORDER NO. 24.

The Order

1. 2nd Army attacks at 7 hours 10 November, 1918.
VI Corps attacks with Western boundary same as at present, extending North - PRENY (exclusive) GORSE (exclusive).
Eastern limit of action - SEILLE RIVER.

2. 92nd Division will attack in the direction of CORNY, advancing from present front at 7 hours 10 November, 1918.
Decisive results will be obtained and all ground taken will be held.

3. (a) DIVISIONAL Artillery will support advance with standing and rolling barrage East of the MOSELLE in initial phase of advance, thereafter following advancing infantry with all mobile elements and supporting further advance as occasion presents.
(b) 183rd Infantry Brigade will attack East of the MOSELLE with elements of two battalions in line maintaining liaison with the 165th Division (Fr.) on the right.
(c) 367th Infantry will attack West of the MOSELLE with two companies in line maintaining close contact with elements of the 7th Division on its left.

(X) Liaison between advancing elements East and West of the MOSELLE will be maintained by all means possible. Strong Combat Liaison between all advancing elements will be maintained and liaison from front to rear will be given particular attention.

(Y) DIVISION reserve will await orders in alert positions.

4. Administrative instructions follow.

5. P. C's later.

By command of Major General BALLOU:

HEADQUARTERS SECOND ARMY
AMERICAN EXPEDITIONARY FORCES
OFFICE OF CHIEF SURGEON

November 15, 1918.

FROM: Chief Surgeon, 2nd Army

TO: Division Surgeon, 92nd Division, A.E.F.

SUBJECT: Field Hospitals at Millery.

1. I desire to express my admiration and appreciation of the splendid hospital organized and administered by the Medical Department of the 92nd Division at Millery.

Your department has received most favorable comments by the Army Commander, the Sanitary Inspector, Second Army, Chief Medical Consultant, Second Army, and the officers in charge of the section in Sanitation in the office of the Chief Surgeon, American Expeditionary Forces, and of all medical officers who have visited the institution.

The transportation and hospitalization of the battle casualties and respiratory diseases have been accomplished in accord with the principles of military surgery and preventive medicine, which reflects the intelligence and training on the part of the officers, nurses and enlisted men of the Medical Department of the 92nd Division, in which pride may be justly felt.

F 1-1

INTELLIGENCE MEMORANDUM: 20 November, 1918.

SECRET

CONTRE - ESPIONAGE ORGANIZATION

1. It is imperative that an effective contre-espionage service be maintained at a high state of efficiency wherever troops are stationed so that nowhere within the Army can the activities of enemy agents or enemy sympathizers be carried on unobserved. Therefore, the service will be continued in those organizations in which it now exists and it will be established immediately in all other units.

2. The contre-espionage service is of a strictly secret nature, and the nature of its functions within the unit is not communicated to any officer thereof save the Commanding Officer, the Intelligence Officers and, to a limited extent, to those officers and men who form a part of the organization.

3. The object of the service is to detect enemy propaganda, espionage, sabotage or other activities tending to destroy military efficiency and also such dissention, disloyalty, and general disturbance of morale by individuals or groups as may or may not be inspired directly by the enemy but, nevertheless, operates directly in his interest.

4. The function of the contre-espionage service is informational and preventative rather than punitive. It collects information upon which proper authorities may act to prevent or suppress disloyalty or sedition and to apprehend enemy agents or sympathizers, but it does not usurp the functions of executive officers in making arrests and directing punishment, nor that of the Judge Advocate in preparing evidence for courts martial.

2/23/23

5. The organization whereby the Intelligence Officer obtains the desired information and keeps in touch at all times with the situation within each group is based upon the selection of a number of men of approved loyalty and discretion throughout the unit who are charged with the duty of observing and reporting such suspicious circumstances as fall within their observation. The proportion of such men in any body of troops varies according to circumstances within the discretion of the Intelligence Officer, but there should be in general, two such operatives, unknown to each other, in each group of men so that there may be counter-check.

6. The operatives so selected are not placed on special duty nor do they require a detailed course of instruction. They should be advised that their duties as observers are important and necessary for the protection of themselves and their comrades against enemy activity and that they are not expected to tell tales on their companions regarding matters not connected with disloyalty and espionage.

7. Each operative will be impressed with the dignity of his position as a man of tried loyalty charged with a duty of grave importance and peculiar value to his country, also with the strictly confidential nature of the service in which he is engaged and the necessity that the existence of his mission be kept inviolably secret.

8. Reports of operatives should be in writing, except in case of great emergency, and each operative should be required to report weekly, even if he has only to report that nothing has been observed.

9. The Regimental Intelligence Officers of all infantry and artillery Regiments and the specially designated Contre-Espionage personnel of other units within the Division (who will be appointed for the purpose by their unit commanders) will appoint two officers or men for each company or separate detachment, charged with the duty:

(a) Of submitting weekly on Saturday of each week to the Regimental or other designated Contre-Espionage Intelligence Officer, a situation report from

counter-espionage point of view containing a report of all happenings which would unfavorably affect the morale of the troops, [illegible] their military efficiency, or sow seeds of discontent or disloyalty [illegible].

(b) Of submitting reports on individual cases as occasion arises.

(c) Of submitting special reports on cases not covered by individual reports which would cover, for instance, the growth of some dangerous tendency within the unit.

10. On Sunday of each week the Regimental Intelligence Officer and the specially designated counter-espionage Intelligence Officer of other units will submit their weekly summary or estimate of the situation direct to G-2 of Division from the facts gathered from their own investigations as those of their duly appointed counter-espionage personnel and will also from time to time as occasion arises make the necessary individual and special reports affecting their units. Brigade Intelligence Officers likewise submit weekly reports on Sunday of each week of all counter-espionage intelligence items coming to their attention.

11. The only effective method of truly gauging the morale status of a unit is through the counter-espionage system. Particular vigilance must be employed to detect insidious propaganda of Bolshevik, I.W.W., Socialistic, Pacifistic and Anti-Ally origin. It is known that strong efforts will be made to promote disaffection in the ranks of the Allied forces after the actual hostilities have ceased, and the operations of our present enemies and the enemies of law and orderly government may take different forms and courses. Consequently extra-ordinary and constant vigilance will be essential during all of the time the troops of the United States are in occupation of European territory.

12. The confidential nature of these instructions render it necessary that they be communicated only to Regimental and other unit commanders and through them to the intelligence officers of the units.

By command of Major General MARTIN:

F. P. Schoonmaker

F. P. SCHOONMAKER,
Major, Inf., U. S. A.,

I. LEAVES OF ABSENCE.

All leaves of absence granted to take effect on or about November 28, 1918 and thereafter, are revoked and will not be taken advantage of, but officers already on leave will not be recalled unless directed by these Headquarters.

II. PVT. BERT WALKER, 367th INFANTRY.

The Division Commander desires to commend in orders the meritorious conduct of Pvt. Bert Walker, 367th Inf. Pvt. Walker, on November 9, 1918, in the vicinity of Villers-sous-Preny, - after it was learned that the road leading to Villers-sous-Preny had been so heavily shelled by gas shells as to make it almost impassable - volunteered to assist in carrying gas masks down this road to organizations in position, and made several trips thru this gassed area, helping to equip and protect against a heavy gas attack which troops were later subjected to.

III. LIEUT. E. B. WILLIAMS, 367th INFANTRY.

The Division Commander desires to call the attention of the entire command to the excellent work and meritorious conduct of Lieut. E.B. Williams, 1st Battalion Gas Officer, 367th Infantry. During the action around Villers-sous-Preny, this officer was gassed but maintained his post until all shell holes were properly covered and his entire area free from gas. Lieut. Williams refused to rest until ordered to do so by his superior officer.

I. 2d LIEUT. NATHAN O. GOODLOE, 368th INFANTRY.

The Division Commander desires to call the attention of the entire command to the excellent work and meritorious conduct of 2d Lieutenant Nathan O. Goodloe, Machine Gun Company, 368th Infantry. During the operations in the Foret D'Argonne, September 26th to 29th, 1918, this officer was attached to the 3d Battalion of his regiment, and on September 28th, during the course of action, it became necessary to reorganize the Battalion and withdraw a part of it to a secondary position, and he rendered valuable assistance. The movement was carried out under a continual machine gun fire from the enemy, and Lieut. Goodloe's calm courage set an example that inspired confidence in his men.

2/28/11

II. WAGONER TOM BROWN, 1725697, HQ. DET., 351st M. G. BN.

The Division Commander desires to commend in orders the meritorious conduct of Wagoner Tom Brown, 1725697, Headquarters Detachment, 351st Machine Gun Battalion, who, as driver with a combat wagon carrying ammunition to organizations going into action near Vienne le Chateau, in the Argonne Forest, on September 27, 1918, displayed marked devotion to duty, exceptional coolness, and great courage under fire. The ammunition was hauled over a shell swept road and Wagoner Brown insisted in completing his work, even after his wagon and horses had been hurled into a ditch; he, dispite a painful injury, worked faithfully until he had extricated his horses, and his conduct was such as to merit having it called to the attention of member of the Division as worthy of imulation.

29 November 1918.

GENERAL COURT-MARTIAL
ORDER NO. 34.

Before a General Court-Martial which convened at Headquarters 92d Division, American Expeditionary Forces, A. P. O. 766, France, pursuant to paragraph 2, Special Orders No. 183, 2d September 1918, these Headquarters, was arraigned and tried:

Private Johnnie Crofford, (805311) 331st U. S. Labor Battalion.

CHARGE: Violation of the 93rd Article of War.

SPECIFICATION: In that Private Johnnie Crofford, 331st U. S. Labor Battalion, did, near Montagne, Arondissement of St. Die, France, on or about the 15th day of August, 1918, feloniously assault, Alice Brignon, a female, with intent to rape the said Alice Brignon.

PLEAS.

To the Charge and the Specification thereunder: "Not Guilty".

FINDINGS.

Of the Specification: "Guilty".

Of the Charge: "Guilty".

SENTENCE.

"To be dishonorably discharged the service, to forfeit all pay and allowances due or to become due, and to be confined at hard labor, at such place as the reviewing authority may direct, for twenty (20) years".

The Office of the Acting Judge Advocate General for the American Expeditionary Forces having determined, under authority of General Order No. 7, War Department, 1918, as amended by General Order No. 84, War Department, 1918, that the redord is legally insufficient to support the sentence adjudged and approved, or any sentence, the said sentence is disapproved. Gross and inexcusable error was committed to the prejudice of the accused, and the legal evidence is not such as substantially to compel a finding of Guilty. (A.J.A.G.O., 201-282.).

American Expeditionary Forces

General Orders,)
: 6th December, 1918.
No. 38.)

I. SERGEANT RUFUS B. ATWOOD, 1974547, 325th FIELD SIGNAL BATTATION:

The Division Commander desires to call the attention of the entire command to the excellent work and meritorious conduct of Sergeant Rufus B. Atwood, 1974547, 325th Field Signal Battalion. On the morning of November 10, 1918, while returning to the switchboard in Pont-a-Mousson, a shell struck the house in which the switchboard was being operated, breaking all the lines. Sergeant Atwood rendered valuable assistance to the officer in charge in reconstructing the switchboard and connecting new lines under heavy shell fire. When the ammunition dump began to explode in the same neighborhood, he remained on the job tapping new connections. After repairs were made from the first explosion, there were two to follow which completely wrecked the switchboard room and tore out all the lines which were newly fixed. Sergeant Atwood was left alone, and he established a new switchboard and the same connections they had at first. The coolness with which he went about his work and the initiative he took inhhandling the situation justifies his being mentioned in orders.

II. PRIVATE CHARLES E. BOYKIN, (DECEASED), CO."C", 325th FIELD SIGNAL BN.:

The Division Commander desires to commend in orders the meritorious conduct of Private Charles E. Boykin, Company "C", 325th Field Signal Battalion. On the afternoon of September 26, 1918, while the 368th Infantry was in action in the Argonne Forest, the Regimental Commander moved forward to establish a P. C. and came upon a number of Germans who fled to the woods which were found to be alive with machine guns. The Commanding Officer ordered the woods searched to the top of the hill, the officer in charge of the scouting called for volunteers and Private Boykin, a telephone linesman, offered his services and set out with the rest of the detail. While trying to flank an enemy machine gun another opened fire killing him instantly.

HEADQUARTERS NINETY SECOND DIVISION
AMERICAN EXPEDITIONARY FORCES
A. P. O. 766.

26 December, 18.

General Orders)
:
No. 40)

1. There will be two general roll calls daily under arms - reveille and retreat - the former at 6:30 a.m., the latter at 4:30 p.m. All officers will attend these calls with their organizations. Call to quarters will be at 9:30 and taps 10:00 p.m. All calls will be sounded. Men out of billets after 10:00 p.m. without written pass will be arrested, confined and punished.

2. Six hours daily, except Saturdays after 12:00 noon and Sundays, will be devoted to drill or other military exercises and ceremonies. All officers will attend with their organizations. Clerical work will not be done during these hours. One practice march with full pack of at least 18 kilometres will be held each Friday.

3. There will be a minute and strict inspection made of each organization on Saturday forenoon. It will include the inspection of the person, clothing, arms, equipment, bedding, billets, kitchens and latrines of the men. After this inspection in any place where two or more companies are billeted, battalion parades, reviews and inspections will be practiced until 12 noon. In billets of one company, company close order drill will be held until noon.

4. Regimental Commanders will submit through Brigade Headquarters schedule of drills based on above requirements, giving subject of drill and time given to subject. This schedule will be for four weeks, will be progressive and embrace the schools of the Soldier, Squad, Platoon, Company and Battalion, bayonet exercise, Combat Groups principally on the offensive, aiming, sighting and position drills and physical exercise intended to develop quickness and snap. A target range will be located and prepared near the billets of organizations. Special report will be made to these Headquarters without any delay from every billet in this Division on the subject of ranges.

5. It is expected that a local military police detachment will be stationed in every town billeted by organizations of this Division, this force will be augmented by the necessary details from the military police of the Division so that there will be sufficient force in each town to maintain the strictest order and discipline at all times, day and night. In addition, the commanding officer of each town will employ the necessary sentinels to prevent men from leaving the town in which billeted without written permission. The especial duties with which the Military Police and Sentinels are charged are:

(a) To insure order and proper behavior by enlisted men at all times.
(b) To prevent them from loitering on streets and congregating in groups.
(c) To enforce proper dress and saluting by enlisted men.
(d) To prevent enlisted men from leaving the town in which billeted without permission.
(e) To prevent enlisted men from addressing or holding conversation with the women inhabitants of the town.
(f) To prevent enlisted men entering any building other than their respective billets with the exception of stores, places of ammusement and cafes.

6. The commanding officer of each town in which troops are billeted will station a military police or N. C. Officer in each cafe whenever they are opened for trade with enlisted men, to enforce order at all times and insure compliance with orders relative to the sale of liquor, etc. No enlisted man will be allowed in any other room of the building except the cafe. In the event of any misbehavior in any cafe in any town the commanding officer will at once close all cafes in that town to soldiers, and will keep them so closed until the conduct of every man of his command is a guarantee of future good order. This is punishing the many for the sins of the few but is a necessary measure until the many will assist the authorities in getting rid of the few who are a menace to the public and to the good name and reputation of this Division.

26 December, 18.

General Orders)
:
No. 40)

1. There will be two general roll calls daily under arms - reveille and retreat - the former at 6:30 a.m., the latter at 4:30 p.m. All officers will attend these calls with their organizations. Call to quarters will be at 9:30 and taps 10:00 p.m. All calls will be sounded. Men out of billets after 10:00 p.m. without written pass will be arrested, confined and punished.

2. Six hours daily, except Saturdays after 12:00 noon and Sundays, will be devoted to drill or other military exercises and ceremonies. All officers will attend with their organizations. Clerical work will not be done during these hours. One practice march with full pack of at least 18 kilometres will be held each Friday.

3. There will be a minute and strict inspection made of each organization on Saturday forenoon. It will include the inspection of the person, clothing, arms, equipment, bedding, billets, kitchens and latrines of the men. After this inspection in any place where two or more companies are billeted, battalion parades, reviews and inspections will be practiced until 12 noon. In billets of one company, company close order drill will be held until noon.

4. Regimental Commanders will submit through Brigade Headquarters schedule of drills based on above requirements, giving subject of drill and time given to subject. This schedule will be for four weeks, will be progressive and embrace the schools of the Soldier, Squad, Platoon, Company and Battalion, bayonet exercise, Combat Groups principally on the offensive, aiming, sighting and position drills and physical exercise intended to develop quickness and snap. A target range will be located and prepared near the billets of organizations. Special report will be made to these Headquarters without any delay from every billet in this Division on the subject of ranges.

5. It is expected that a local military police detachment will be stationed in every town billeted by organizations of this Division, this force will be augmented by the necessary details from the military police of the Division so that there will be sufficient force in each town to maintain the strictest order and discipline at all times, day and night. In addition, the commanding officer of each town will employ the necessary sentinels to prevent men from leaving the town in which billeted without written permission. The especial duties with which the Military Police and Sentinels are charged are:

(a) To insure order and proper behavior by enlisted men at all times.
(b) To prevent them from loitering on streets and congregating in groups.
(c) To enforce proper dress and saluting by enlisted men.
(d) To prevent enlisted men from leaving the town in which billeted without permission.
(e) To prevent enlisted man from addressing or holding conversation with the women inhabitants of the town.
(f) To prevent enlisted men entering any building other than their respective billets with the exception of stores, places of ammusement and cafes.

6. The commanding officer of each town in which troops are billeted will station a military police or N. C. Officer in each cafe whenever they are opened for trade with enlisted men, to enforce order at all times and insure compliance with orders relative to the sale of liquor, etc. No enlisted man will be allowed in any other room of the building except the cafe. In the event of any misbehavior in any cafe in any town the commanding officer will at once close all cafes in that town to soldiers, and will keep them so closed until the conduct of every man of his command is a guarantee of future good order. This is punishing the many for the sins of the few but is a necessary measure until the many will assist the authorities in getting rid of the few who are a menace to the public and to the good name and reputation of this Division.

IV. KEEP OUT OF HOUSES OF PROSTITUTION :

The attention of all members of this command is called to the fact that the number of houses of prostitution in this area is rapidly increasing. All officers will keep their men from visiting these places. All men be informed that those who contract venereal diseases will not be returned to the United States with the Division, but will be placed in a venereal detention camp in France, and then sent to the United States as Casuals.

All officers and enlisted men of this command are forbidden to be on the streets, in Cafes, Theatres, vehicles or other places in company with prostitutes.

This order will be read to all organizations at the first formation after its receipt, and will thereafter be kept posted.

BULLETIN:

For Intelligence Officers -

I. By direction of Memorandum from GHQ the weekly report of Intelligence Officers will not be in the stereotyped form "Nothing to Report", and will be under seven (7) headings covering the items hereinafter enumerated.

1. General impressions of week.
   (a) Activities from C.E. viewpoint.
   (b) Observations of C.E. Officers.

2. Position of unit - general location, and actual location of unit P. C.

3. Condition of troops.
   (a) Morale.
   (b) Health.
   (c) Strength.

4. Activities of troops.
   (a) Military.
   (b) Recreational.

5. Situation survey - Propaganda and other enemy activities.

6. Special cases - Progress made in cases already sent in by special report.

7. Miscellaneous.
   New cases should not be included in summary, but made the subject of special report.

II. All C.E. Officers will state in their next report whether the C.E. system is completely organized, and how it is operating within the unit.

III. C.E. reports will be continued weekly until Division is demobilized.

IV. Attention of Intelligence Officers is directed to the importance of keeping the C.E. secret. No C.E. officers or any operative should ever divulge his connection with any secret service or knowledge of any such service ever existed.

V. The C.E. service has accomplished what it set out to do. The Army may need it again. It has succeeded in its task because it was kept under cover, and must ever remain so. The very fact of its existence, to say nothing of the system by which it operates, must, so far as humanly possible, be kept inviolably secret.

By command of Brigadier General Erwin

F. P. SPRINGER
Major, General Staff,

From: Intelligence Officer 349th M.G.Bn.

To: G-2 92nd Division.

Subject: Intelligence Report.

1. C.E., system well organized in this Unit. There is one trusted Non-commissioned Officer in each company who makes bi-weekly reports. Conferences are held with them separately to discuss and work and it's significance. (2) The C.E., Officer of this Battalion, by pidicous mingling with Officers and men of the Command aims to be in the spirit of all, and to detect anything insidueus.

3/3/3

2. This Unit is located at Lassey, Department of Mayenne. The Battalion Headquarters are at

3. There is intense restlessness among the men due to anxiety to get home, and chaffing due to seeing delay. Their billets are not heated and they feel that there is a feeling higher up of unconsern as to whether they return home alive or not. (b) There are good many colds among the men, and sore feet due to hikes. (c) Strength of the Unit is 332 Men.

65

4. The drills are long and monetoneous and add to the feeling of discontent. There is no compensating variation. Just a daily grind. There are no recreations whatever. Nothing planned for the comfort and pleasure of the men, hence there is nothing to keep their minds off of themselves. The men literally get up drill and then go to bed.

5. I have been unable to detect any enemy propaganda in this Unit. There is a feeling that Army life is dull and irksome and that the time of their discharge be hastened.

6. Some of the orders from the Division Headquarters and elsewhere at times stir up feelings such as G.O.40 paragraph 5, sub-paragraph E & F. Also Memorandum of Dec., 31, 1918 issued by Lieut., Col., Mayo, 350th M.G.Bn.

7. No propaganda follows but it creates a new discontent and feeling of greater desire to get out of it all.

1st Lieut., 349th M.G.Bn.
Intelligence Officer.

MEMORANDUM:

To C. E. Officers - SECRET

3/3/16

There are two great fields that must have the careful attention of all C. E. Officers and Operatives, viz; DISLOYALTY and MORALE. The following outline indicates the points under each main heading that must be covered by all echelons of the C. E. Service. Having covered these points, a careful and detailed report must be rendered to the A. C. of S., G-2. In these reports, mere generalities are not sufficient. Actual incidents must be cited and examples to prove a general statement must be given:

DISLOYALTY

1. Enemy agents in the American E. F.;
2. Enemy agents not in American E. F., but dealing with members of the Military Establishment;
3. Enemy agents among civilians of area;
4. Presence of enemy aliens in ranks of American Army;
5. Treasonable or careless disclosure of government secrets or of military information.;
6. Sabotage:
   (a) Attempts against life or health of troops;
   (b) Damage to government buildings, property or supplies;
7. Presence, repetition and origin of discouraging rumors or of enemy propaganda lies;
8. Pro-enemy attitude or remarks;
9. Advocation of leniency toward Germany, now that the war has been won;
10. Questioning of America's war aims;
11. Unfavorable criticism of the President, of the Commander-in-Chief, of the delegates to the Peace Conference, or of any other high officials;
12. Unfavorable criticism of American E. F. policies or orders;
13. Unfavorable criticism of immediate superior officers;
14. Activity of any military or non-military person to promote relaxation of effort by members of American E. F.;
15. Presence of anarchistic propaganda:
   (a) Bolshevik agitation and literature,
   (b) I.W.W. agitation and literature,
   (c) Tendencies toward rabid Socialism;
16. Presence of pacifistic propaganda;
17. Distribution or appearance of newspapers, books, pamphlets, or form letters of disloyal type among soldiers;
18. Antagonism towards British, French, Italians, or other nations affiliated with the Entente;
19. Presence of suspicious characters among the itinerants or transients;
20. Correspondence between American soldiers and strangers.

MORALE

1. Physical and material conditions affecting morale:
   (a) Food, quarters and clothing,
   (b) Sleeping accommodations,
   (c) Sanitary accommodations and bathing facilities,
   (d) Recreation and entertainment,
   (e) Regularity of pay,
   (f) Treatment received in hospitals and convalescent camps;
2. Moral conditions affecting Morale:
   (a) Availability of intoxicating liquors,
   (b) Excessive use of intoxicating liquors,
   (c) Presence of prostitutes in Area,
   (d) Spread of venereal disease,
   (e) Gambling;
3. Mental conditions affecting morale:
   (a) Anxiety over home and relatives,
   (b) Anxiety over procuring work after the war,
   (c) Mistrust of the industrial situation,
   (d) Feeling that C.O. has no personal interest in men;

4. Discipline;
   (a) Saluting of officers and enlisted men,
   (b) Status of non-commissioned officers,
   (c) Appearance of officers and men,
   (d) Up-keep of arms and equipment,
   (e) Obedience of orders;
5. Feeling between native Americans and foreign-born soldiers;
6. Desire for discharge in France:
   (a) By native American soldiers,
   (b) By foreign-born soldiers;
7. Presence of an reasons for unnatural desire to return to the U. S.;
8. Willingness to continue in service in France, or to become a part of the Army of Occupation;
9. Desire to become a member of the Regular Army;
10. Desire to remain in or return to a foreign country for business reasons;
11. Attitude of French people toward American soldiers;
12. Over-charging of American soldiers by French shop-keepers;
13. Price discrimination between officers and enlisted men;
14. Willingness, or unwillingness, to give the allies of American the credit due them;
15. Interest of officers and men in political and international affairs:
   (a) Attitude toward League of Nations, Freedom of the Seas, the probable demands of Allies at Peace Conference, etc.
16. Attitude of officers and men toward revival of political quarrels in the United States;
17. Attitude toward Germany, now that the armistice has been signed;
18. Services rendered by various volunteer organizations, such as Y.M.C.A., K. of C., Red Cross and Salvation Army;
19. Experiences of enlisted men while on leave, especially in leave areas;
20. Experiences of enlisted men in rest camps;
21. Attitude of casuals toward their lot in the army;
22. Existence of "gangs" or cliques in any organization;
23. Disappointment on the part of private soldiers over not having been rewarded in some way, as by promotion, for services rendered;
24. Over-work;
25. Lack of sufficient work to keep men contented;
26. Lack of news from home, or aggravating delays in delivery of mail;
27. Types of letters written home by enlisted men;
28. Discrediting of official American casualty figures;
29. Activity of any person toward promoting dissatisfaction among soldiers, or in spreading false rumors that prey upon the minds of soldiers.

(F-6)

A6

From : Intelligence Officer 349th M.G.Bn.

To : G-2 Hqrs., 92nd Division.

Subject : Intelligence report.

1. There is an undercurrent of feeling hostile to the Commanding Officer of Lassey, Lieut., Col., Mayo. There is the feeling that he is Prejudiced to the colored men and entirely out of sympathy with them. Some of the Officers in his immediate Battalion have expressed a decision to make a written request to the Commanding Officer of the Division requesting reclassification in the S.O.S. in order to get out from under his Command.

There is again the feeling that the Lieut., Col., has transmitted his feelings and attitudes to the Commanding Officers of the other two Battalions situated here, namely 349th and 351st. That these other Commanding Officers are expressing an attitude toward the men and Officers in their Battalions. The feeling in the 351st M.G.Bn., has been bitter. I learned that a letter was sent by Capt., Spab Dickey, who was recently sent to the S.O.S., for reclassification, directly to General Pershing and not through Military Channels. Although I did not see the letter I learned that it was a masterpiece portraying the alleged sentiments and feelings of the men of that Battalion.

(b) Only Tuesday night of this pass week, a serious condition of affairs did not come to head because of the prompt action of several cooler heads. The white Military Police, of whom there are sixteen stationed here, have been indulging in some practices, the which if continued will surely bring on bitter race strifes. Some of the loose tongued members of this detachment indulged in some remarks to the proprietress of the Red Front Cafe, near the Y.M.C.A., canteen, Rue du Grande. His remarks were degrading and unkind toward the members of Negro Race. The proprietress and the speaker did not recognize a soldier, who was on hand as a negro, because of his fairness. Consequently the Cat was let out of the Bag. a critical condition arose. The provost Marshall was on the job and although a crowd assembled in front of the Cafe, nothing of disorder occured. As a result of the affair, no soldiers have been patronizing the place for the last few days. The feeling of the men toward the white Military Police is bitter. I believe them to be a constant menace to the welfare of this community. There are expressions among men and Officers to the effect that these Police are receiving special favors from the Commanding Officer of the town, who is said to be in rapport with their views. The truth of this is probably difficult to prove.

2. Position of Unit - Unchanged.

3. The morale of Troops is low due to (a) Feeling that their superior Commanders are making life extremely burdensome for them by very severe Local Orders. Wednesday it rained severly, yet all were forced to drill up and down the streets until clothing and shoes were soaking wet.

As a result 103 men in Co.,A went on Sick Report,and after dinner all of Co.,B less 5 men went to the Inifrmary unable to drill because of wet clothing and shoes.(b) The men feel that they are being driven more now than when preparing to come to Europe to fight.They want to get out of the Army and the"tyranny " of it as soon as possible. They will never look kindly toward it in the future. The men do not get the proper medical attention.The Surgeon Capt.,E.H.Jones is a camonflage of the first water.He docters up his reports which are not always true in fact but read well for his superiors.He has neither Epsom Salts nor Castor oil on hand.All cases of ailment from wet feet to ear ache are treated with a dose of compound cathartic pills.I was ill for a week with La grippe and after three days' effort,finally received 3 C.C.pills. There have been times in the immediate past when he did'nt arrive at the Infirmary until 8'Oclock although sick call goes at 7 A.M. Frequently Dr.Black,a dentist formerly assigned to our Battalion,lately transferred answered sick calls at the Infirmary for him.The facts were given me by the men of my Company and the Infirmary clerk,Corpl.,Norman Williams, whom I have known for a number of years,and who was a pupil of mine at one time.Men and Officers of this Battalion would rather go to Beelzebub for treatment than to the Surgeon.The sleeping accommodations here are very poor. The bathing facilities are wretched.The food is good also the clothing.There is good discipline among the troops of this Battalion. If the men felt that remaining in the Army of Occupation,they would receive what they term "fairer treatment,their burden would be lighter. There is a keen desire among the Officers to return to America to escape what they term the "unfairness of the Division". I believe that many letters have already been sent influential persons in the United States conserning their ruffled feelings. I am not conserned withe the justification of these feelings.I do believe that many ugly things will develope from the 92nd Division's sojourn in France.Some of it may be turned into politics. The race feeling in our Division has been and remains high.I,myself have received but the kindest treatment from the two Commanding Officers of my Battalion.Conversation with nine out of every ten which show deep race feeling but no progermanism.Many negroes will never remain the U.S.,Army after this War.Some will go to South America,some will return to France. I believe that there should be a special department of recreational avtivities just as the intelligence or any other department in the Division.More good would then be accomplished.All efforts would then be more conserted,united and intelligent, than those now pursued.I served as athletic Officer in Camp Funston in the States,and also assistant activity Officer,so that I am familiar with what can be accomplished. Many of the efforts at this writing are unorganized,and not well nor thoroughly thought out.

I believe a department of recreational activities with it's ramification thruout the Units of this Division could do much to soften the routine for the men and increase the morale 100%.At present in our Unit and the other two Units,such activity a practically nihil.

1st Lt.,349th M.G.Bn.
Intelligance Officer.

[U.S. Army, 349th]

F'-7

A6

Co., B 349th M.G.Bn.

A.P.O.No., 766 Jan., 24, 1919.

From : Intelligence Officer 349th M.G.Bn.

To : G-2 92nd Division.

Subject : Intelligence Reports.

1. General improvement in general situation.

Relationship between Immediate Superior Officers and their Units much improved. Welfare of the Unit given considerable attention.

2. Location of Battalion same.

3. Morale of the men much improved due to (a) fire in billets. (b), good food and clothing (c) contemplated movement to Le Mans with Brest as a final destination (d) last but not least, improved activity and real service contributed by the Medical Detachment to the men of this Battalion. There has been a big decrease of men on Sick Report.

The drills are not so tiring as formerly. A part of the drill is given over to athletic exercises and games. A half hour is also given over to physical drill. The bathing facilities have been increased and are very good under the circumstances.

The C.E., Officer of the Battalion has been able to render material aid to the authorities here to get at the root of the apread of Venereal disease in this city.
There is little gambling and intoxication, due probably to the fact that the men have no money.

4. The Medical Detachment has increased it's service and has improved 50 % due to the last report. There has been a general house cleaning and a revival of effort.
The Military Police mentioned in the last report are deporting themselves in a more conservative manner. Although the Cafe is still Boycotted, there is very little if any racial feeling now.

HEADQUARTERS, 317TH ENGINEERS,
AMERICAN EXPEDITIONARY FORCES,
A. P. O. 766, MOBILE,

General Orders
No. 7

France, 3 February, 1919.

1. Pursuant to orders from General Headquarters, American Expeditionary Forces, this regiment moves to a port of Embarkation for early return to the United States.

2. On the eve of departure of the regiment from France, it is fitting that the Commanding Officer should address the regiment in orders covering its work overseas. The regiment came overseas on a stern duty and with a trust imposed in it by the people of the United States of America. You have been true to that trust in the fullest sense and you can return home and face the people of our country with a proud consciousness that your work has been of a high and efficient order. For more than a hundred years the Corps of Engineers has maintained a proud record of achievement, whether in peace or war, from the blazing sun of the tropics to the eternal ice and snow of the Arctic regions, and it is a pleasure to the present as well as to the former commanding officer of the regiment to be able to say that your work has been in accordance with the best traditions of the Engineer service.

3. The regiment owes a great debt of gratitude to its former commanding officer, Colonel Earl I. Brown, for the regiment is as it was moulded under his training. The untiring efforts of the officers and men in the training area are deserving of mention, as the work of the regiment at the front demonstrated the effectiveness of this training. You have done well, but you have only done what was expected of you. An Engineer regiment is not merely an aggregation of some seventeen hundred officers and men—it is a team, and it has been the team-work that has enabled you to produce results.

4. It will probably not be many weeks until you will be mustered out of the service, and when your service is terminated you can take back to civil life the knowledge that you have "played the game," without fear or favor and without grumbling. Continue to "play the game" as you played it in the St. Die sector and in the Argonne-Meuse offensive. You are no longer merely men in uniform doing whatever work may come your way, but are soldiers with an excellent record of service of practically three consecutive months in front line work in the Vosges, Argonne and Ardennes, and no officer or man should ever feel that he has the right to do anything that will besmirch that record.

5. Discipline is the foundation of the military service and an organization without discipline is nothing more than a mob. Officers and men will remember at all times that any questionable acts committed by them will reflect on the organization more than on the individual, therefore there must be no relaxation in discipline.

6. The meritorious work of the regiment as a part of the 33rd Corps of the 7th French Army in the VOSGES, at FRAPELLE, LAFONTANELLE, LESSEUX and other points in the ST. DIE SECTOR; and as a Corps regiment of the First Army Corps, First American Army from September 25, 1918, to and after the close of hostilities on November 11 in the ARGONNE FOREST, at NEUVILLY, BOURIELLES, CHEPPY, VARENNES, FOUR DE PARIS, ABRI DE CROCHET, LA BESOGNE, LANCON, GRAND PRE, ST. JUVIN, ST. GEORGES, LE MORT HOMME, BRIQUENAY and BUZANCY, in the ARDENNES—is deserving of the highest commendation.

7. In returning to your homeland, remember the many thousands of your fellow soldiers who played the game to the end and who are sleeping their last sleep in the soil of France—you owe it to them to "carry on," and if you fail to "carry on," you are dishonoring their memory and smirching your own good record. Remember what you have done in the VOSGES, the ARGONNE and the ARDENNES, and play the game to the finish.

BY ORDER OF LIEUT. COLONEL CASSIDY,

G. B. Howard,
1st Lieut. Engineers, U. S. A.,
Adjutant.

C t-2

Feoruary 7, 1919.

From: 2nd Lieut. Chas. U. Turpin.

To: Commanding General, Camp Pontanezen, Base Section No. 5, S. O. S.

Subject: Continuance of Service in France.

3/11/23

1. In accordance with authority contained in Memorandum, January 9, 1919, Headquarters Camp Pontanezen, request to remain in France for period of six months.

2. My Qualifications are —

(a) 3 years, University of Illinois and am qualified to teach in army schools, especially among colored troops.

(b) Director of Varsity Gym. Team, two years, and am qualified to teach physical culture and gymnastics.

(c) Dramatic student. Advance agent for Onaip Company for season 1914-15. Manager and director of various vaudeville acts, Booker Washington Theater, St. Louis, Mo., for four years and can qualify as an amusement director in the A. E. F.

(d) Present duty — Assistant Regimental Intelligence Officer, 365th Infantry.

Chas. U. Turpin

AMERICAN EXPEDITIONARY FORCES

April 24 1919.

MEMORANDUM:
NO. 111.

I. 1. Organization Commandors in forwarding applications for dischargo in Europe to highor authority, will includo in thoir indorsomont a statomont as to the citizonship of the applicant.

II. 1. Tho following extract of a lottor from G.H.Q., transmitting a report from the French Military Mission concorning a rapo committed by an American soldior is quoted for the information and compliance of all concornod:

EXTRACT

"The increasing numbor of assaults of this nature committed by American negro soldiors indicates clearly that the most stringont offorts must bo made to combat them. The Commanding Officors of those organizations must be required to maintain a stricter supervision of thoir men and a more extensive police of the territory occupied by them to the ond that such assaults bo prevented and when committed that the offondor bo rapidly apprehended and brought to justico. The military police department should also cooperate to the fullest possible extent both in preventing such assaults and in apprehending the offondors. A most careful consideration of this subject that such action as you deem proper is directed."

2. It is especially important thay extraordinary vigilance be maintained as troops are withdrawn from the devastated territory in the Departments of Meuse and Meurthe-et-Moselle to more thickly populated regions. Unless Unit Commandors realize their responsibility for the control of their men, the work of Welfare and Entertainment Organizations, in providing suitable diversion and amusement to offset the tendency of the men to crime of this nature, is of no avail. The fact that a man is apprehended and brought to justice does not compensate for the crime committed from the point of view of the victim.

3. Energetic cooperation is directed in carrying out the instructions of the Commander-in-Chief with reference to the prevention of these assaults.

By command of Brigadier General SAMPLE:

JOHN S. SWITZER
Chief of Staff

History of 505th Engineers and Services Over Seas.

The men compsoing the personnel of the 505th Engineers Battalion are from Western Virginia and Pittsburgh and were among the first to respond to the call of their country and to be sent over seas. They left Pittsburgh on October 30th, 1917, for Camp Lee, Petersburg, Va., where they arrived, November 1st. For five weeks they trained strenuously; then came the call for men to go "over seas" immediately to which call the men responded with a will that called forth admiration and praise. On December 11thm 1917 after having been reviewed by Secretary Baker, we quietly entrained for Hoboken, N.J. and embarked on the President Lincoln, December 12th, sailing for France the following night. We arrived at Brest, France, after a long and exciting trip. January 1st, 1918 was a "red letter day", for on that day the battalion was disembarked and proceeded by trained to Camp Genicart, Lormont, France. Forty-eight hours were spent in quarantine, then we started to work on the construction of a dock near Bordeaux at Bassens, which dock is said, by Army Engineers to be one of the most wonderful feats of labor and engineering performed during the war. Day and night, amid all kinds of weather we labored, being aware of the importance of our task, though it was far in the rear of the actual fighting.

3/13/28

When this dock was finished, and this was done in less than the allotted time, we moved on to St. Sulpice, St. Loubes and La Graave. At these places we helped to construct more than two hundred warehouses, sixty miles of railroad, constructed highways and drainage systems. These tasks, while of the utmost importance, were as nothing compared to what we later were called upon to do, to suffer and endure. The labors performed in these French towns and their vicinity was carried on without any let up. We had moved to St. Sulpice (Co. D), Company "A" at St. Loubes, Co. "B" at La Graave and Co. "C" at Bassens on or about March 27th, 1918, and during our stary in and about these towns, the men of this command, endeared themselves to

the inhabitatns, because of their hard work for the cause of Democracy, their gentlemanly conduct, fortitude, in the face of obstacles, kindness and unfailing good nature.

On August 24th the Battalion was ordered to proceed to the "front" because of its wonderful record for work and efficiency and good moral; being the first Colored organization of Engineers to be so honored up to that time. The men of the 505th Engineers were the first Colored engineers in the advance sector, saw more active service, and advanced farther than any other Colored Engineers, having gone as far as the "Zone of Occupation."

We left La Graave, St. Loubes and St. Sulpice, Aug. 24th amid scenes never to be forgotten, tears, handshaking and farewells from the entire population, men, women and little children fairly over riding the station guard in an endeavor to bid us God's speed. Aug. 30th, 1918 saw our arrival at Bellville, the first stop; stayed there four days then advanced to Mannonville where we stayed one night then marched to Novi[illegible], arriving there Sept. 5th. While here the men labored day and night, all hours, repairing roads torn up by shell fire and constructing light railways. All of these things were done under constant gas attacks, shell fire and aeroplace raids. Sunday November 10th orders came to advance to Bauinville, which place we reached after a forced marched on the same day, and on the day that the armistice was signed we were held in reserve, ready to go "over the top" to help put the "hibosh" on the kaiser with cold steel, all the time being under a constant stream of shell fire.

3/3/29

The men of this command were at Noviant, near Pont Mousson, on Sept. 12th, 1918 and took part in the great St. Mihiel Drive of the American Army, were commended by Officers and men alike of other organizations, with which they were engaged, for their labors and tasks performed under fire and for the utter disregard of danger.

The next day, Nov. 12th, we fell back to Flirey, Essey, Pannes

34-4-264

The 349th Field Artillery was trained at Camp Dix. They sailed June 15th and reached Brest June 27, 1918. They received training at the artillery range LaCourtine and their work was commended by French and American officers. October 18 they were sent to the front in the Toul Sector relieving the 155th Field Artillery. They were in the sector east and west of the Mosselle River at Pont-a-Mousson and supported several infantry raids. They were holding the Bois Frehaut and Bouixières when relieved. They participated in the advance of the second army October 10 and 11th toward Metz.

34-4-225

HISTORY OF THE NINETY-SECOND DIVISION'S ENGAGEMENTS IN FRANCE.

The Ninety-second was the only Division in the American Expeditionery Force in which the entire enlisted personnel was composed of colored men. The several auxiliary units comprising this Division were the 183rd Infantry Brigade commanded by Brigadier Malvern Hill Barnum and included the 365th, the 366th Regiments and the 350th Machine Gun Battalion; the 184th Infantry Brigade commanded by Brigadier William H. Hay who was succeeded by Brig. General Albert N. Blanding comprised the 367th, the 368th Regiments and the 351st Machine Gun Battalion. Within each Regiment there was a Medical Detachment a Dental Corps and a Medical Detachment with each Machine Gun Battalion. The 167th Field Artillery Brigade commanded by Brig. General John H. Sherburne and comprising the 349th, 350th and 351st Field Artillery Regiments. With each of these Regiments were a Medical and Veterinary Detachment, also with the Artillery was the 317th Trench Mortar Battery. The 317th Trains and Military Police commanded by Colonel Isaac C. Jenks; the 317th Sanitary Train, commanded by Lieutenant Colonel David B. Downing; the 317th Supply Train commanded by Major John N. Douglas; the 317th Ammunition Train commanded by Major Milton T. Dean for several weeks, then by Lieut. Colonel Bert S. Hyland who assumed command near the close of the war; the 317th Engineers Train commanded by First Lieutenant Pitman E. Smith (white); the 317th Mobile Ordnance Repair Shop commanded by Capt. Robert G. McKinney (white); the Machine Shop Truck Units, Nos. 311 and 388 and a Sales Commissary Unit No. 6.

The officers and enlisted personnel of the Division numbered approximately 30,000 men including 738 colored officers and 372 white. During defensive or offensive operations of the Division in France every unit composing it was actively engaged in the performance of its own specific duties.

34-4-226

IN THE VOSGES SECTOR.

The Ninety-second Division went into a defensive positio
Vosges sector August 20th 1918, with Headquarters established a
In this sector it was not expected that any offensive drives wou
dertaken, it was known as a quiet sector and used largely to acqu
troops occupying it to trench life and in preparing them for the
strenuous life in the active sectors where fighting was continuou
combat unit in the Division held a part of this front during the
nine days the organization was there.

Company "H" of the 365th Infantry commanded by Capt. William W. Green was the first Company to enter the front line trenches in this sector at La Paire, relieving a French unit August 20th 1918. Five days later Pvt. Moses Justice was killed by German shell fire at Ban-De-Sapt on the fr
held by Company H, and was the first casualty of the Divis
soil. The Second Battalion of the 365th Infantry entered and
in this front line position at La Fontinelle almost continuously during the time the Division remained in the Vosges. Company A of the 365th entered the front line at Hurbache Sept. 3rd, and established its P.C. (Post Command) at Pansieux with First Lieutenant Walter Lowe in command. While no casualties resulted in this company from the enemy's fire the sector by this time had become very active and heavy artillery fire and gas shells were frequently exchanged between the opposing forces, and, because they furnished excellent targets for the German big guns. Lieutenant William J. Powell of Company B, 365th Infantry, and Munitions Officer for the First Battalion, while leading an ammunition train up to the front lines occupied by his battalion, was attacked, a large shell exploding about five feet to his right front instantly killing the horse he was riding though the officer himself escaped uninjured. Lieutenant Wm. Prichard, Munitions Officer for the Third Battalion, had several similar experiences and at one time while delivering ammunition to his organ-

the principal roads leading to and from the trenches were

ization was caught in an artillery barrage laid down by the Germans, and escaped death only by crouching in a shell hole not much larger than himself until the firing ceased.

34-4-227

The units of the 366th Infantry first entered the front lines in the Vosges August 21st, ~~1918~~. The 367th Sept. 13 and the 368th August 21 and 28, 1918. The First Battalion of the 366th relieved the 3rd battalion of the same organization August 28th at Raid-De-Robache under heavy shell fire, There were many narrow escapes from bursting shrapnel and gas attacks but no casualties resulted while perfecting this relief. The Third Battalion of the 367th Infantry entered the front line in this sector September 13th at Mere Henry with the Second Battalion in reserve. Patroling and reconnoitering parties were sent out quite frequently to assertain the movements of the enemy and to observe the general conditions of our wire. This regiment did not suffer any casualties from the frequent attacks while in this sector. The 368th Infantry did not fare as well as some of the others. Company K of the 368th entered the trenches at La Haut Cello Plains August 21st but a majority of the remaining companies did not enter until August 28th. A patrol under the leadership of Lieutenant W. E. Simmons and Oscar H. Smith while doing some reconnoitering work in their company front were fired upon by German Machine gunners resulting in five casualties.

The object with which the Division entered the Vosges sector was successfully attained because here the troops had many experiences that were of inestimable value to them when they entered the Argonne and Marbache sectors a few weeks later.

The 350th and 351st Machine Gun Battalions had a few thrilling experiences in the Vosges along with those of the Infantry. On Sept. 19th while defending the village of Frapelle against a German bombardment a large shell struck a tree standing about six feet from the Machine Gun emplacement, tearing away most of the trees and greatly damaging the dugout occupied by the gunners and putting the Machine Gun out of action for

These men were known chiefly as stevedores and labor battalions. Somehow a widely circulated report gained credence that they had been gathered indiscriminately, and had been landed on foreign soil, a mere group of servants for the white soldiers. We do not know who first sought to thus humiliate these soldiers by such unjust and undeserved rating. One might easily believe, of course, because of the constantly unfair attitude of some of their officers toward them, that there was some such assumption to that effect. But the world has learned now, that in spite of all handicaps, there could be found nowhere in the army stouter and braver hearts, or more loyal and self-sacrificing spirits. Subjected to a stern discipline; with discriminations, cruel in their intent and execution; long hours of toil; scant recognition for service or hope of promotion, they still kept their faith. Throughout the war they wrought as weavers who are given to see only the wrong side of the glorious pattern they are weaving.

The first day we entered that busy military port of St. Nazaire, we saw a colored lad standing under the ancient clock in the center of the square. He had M.P. (military police) on his arm band in large red letters, and in his hand a stick with which he quietly directed the tremendous traffic of that town. Auto-trucks, auto-cars of officers from the highest to the lowest rank, auto-busses for welfare workers, sidecars, bicycles, used so constantly by French women as well as men, and the typical French voiture made a constant noisy stream. And this colored lad, who had come from a rural district of the far South, stood there calmly pointing his stick, now left, now right, or holding it up in demand for a pause. Surely he was there by Divine Thought.

The very first group of colored soldiers to leave for France in the autumn of 1917 were stevedores and labor battalions. Another group

reached St. Nazaire, by the way of Brest, Christmas eve of the same year. Time and time again in camp they told us the story of that first winter of hardship. Christmas day found them cold and cheerless, with hard tacks and beans for their rations. All that winter they worked, poorly equipped for their severe task. In the dark hours of the night and the morning, they plunged through the deep mud of the camp and city, without boots. On the dock they handled the cool steel and iron without gloves.

Page 99, 100

2/24/72

All who were at work in France well remember that "Race to Berlin" contest, upon which the last great forward move of our troops so largely depended. The world looked out only toward Metz, where our great combat army was centering, but just as often, anxious eyes were upon the rear where our men were toiling like mad that peace should not be delayed through any failure of theirs. With feverish haste and anxiety they battled with great bulks of ammunition and supplies. For weeks at Marseilles, Bordeaux, St. Nazaire, Brest and other ports they worked with almost superhuman strength.

Page 101

...."Riding along the coast one day, looking out upon the long lines of warehouses, hearing the hum of the thousands of men at work, she said: "I have gained with the years of growing appreciation and love for the colored people, and I have seen nothing in France finer than the work of the stevedores. I have written and dedicated a poem to them." That afternoon, after she had spoken for a few minutes to the thousands of swarthy soldiers, assembled to pay her homage, her companion read the poem as follows:

"We are the army stevedores, lusty and virile and strong.
We are given the hardest work of the war and the hours
are long.
We handle the heavy boxes and shovel the dirty coal;
While soldiers and sailors work in the light, we burrow
below in the hole.

But somebody has to do this work, or the soldiers could not fight

And whatever work is given a man, is good if he does it right.

So often in addition to this "Hardest work of the War," was added treatment accorded no other soldier. While white American soldiers were permitted to go freely about the towns, the great mass of colored American soldiers saw them for the most part, as they marched in line to and from the docks. Passes for them were oftener than otherwise as hard to secure as American gold. Always they were aware of some case of cruel injustice for which there seemed absolutely no redress. We found in our camp a young college student, who, believeing that war spelled opportunity, was among the first to enlist. His education placed him at one in the office of his company, and he went to France a sergeant. He did not find that war meant for him what he had dreamed it would, but he kept loyal; his work commanded respect, and, for a time, all went well. But a company commander came who resented the pride of the colored boy, and then began a series of humiliations that took away rank, sent him to the guard-house and dock. Retribution is rather swift at times, and so this officer's downfall came soon. He never knew, however, that the fond mother back home was the only thing that stood between him and death. The young man has since told us how happy he was to return home with his honor maintained, rank restored. But in camp his face hurt us as often as we looked upon it, so full it was of the endurance of an outraged manhood.

Even a short outing might be robbed of its pleasure. For how well we remember a company that had been granted a week-end leave as a reward for exceptional work. They were going to a neighboring summer resort -- a miniature of Coney Island. It had been arranged for them to tent on the beach. Just like children, they made us listen to all their enthusiastic plans and dreams of this outing. They went, but came back dumb in the despair

of outraged truth and justice. A runner had preceded them, and the French restaurants and places of amusement had been warned not to receive them, since they were but servants of the white soldiers. Later the French knew better, but at that time it required more spirit than this company had, to convince the French people of the injustice of it all.

2/24/38

Always there was the knowledge that for them, loyalty, devotion, and energy, led to no higher rank, no possibility of promotion. Time, orders were often issued that for the moment, seemed to include the colored soldier in their opportunity for advancemtnt, but just as soon as he attempted to make himself a part of these orders, some subterfuge would be used to deny him the privilege of the army of which he was a part. Well for the colored soldier in France, well for all, that he possessed the far-visioned faith and the endurance of his fathers!

Labor battalions were to be found not only at the ports of France , but more than any other class of soldiers, they were spread over all France. Whether near the Belgian or Swiss border, or in "No Man's Land," one would be sure to find these indispensable troops. Oftener than otherwise these battalions would be split, and a company of two would be at Verdun or some other important center, while another company would be found in some woods cutting trees.

There was one special group within this group for whom we had great sympathy and deep respect. They were the regular army men, who had seen real fighting, who were still in their prime, and longing for the opportunity to go "over the top." There were men who had seen service in Russia, the Philippines, Hawaii, heroes of the Spanish American War; men who had known the hideousness of Carrizal, all kept in the S. O. S. But they were soldiers and they knew how to hold their peace and obey. One had to but look at men like Sergeants Blue, Banks, Clark and Dogan, to know that even without the bars on shoulders, they were finer soldiers than many who wore them.

The colored engineers, however, although sometimes trained with arms in the United States were, for the most part, not permitted the use of them in France. A corporal of the 546th Engineers writes, "Although some of us worked quite close behind the lines, within range of shot and shell, we did not see arms except such as lay discarded about the woods and in the fields."

2/24/39

The 37th Engineers served as a part of the French corps and were afterwards with the First American Army and were cited for high efficiency. The 546 Engineers spent many months in various parts of the Argonne Forest and were commended for their meritorious service. The Pioneer Regiments were formed usually out of provisional troops with a few men drawn from the army and specialists from the various schools. The 805 Pioneer Infantry Regiment was formed at Camp Funston out of provisional Brigades together with twenty-five men from the 25th Infantry, brought over from Hawaii; thirty-eight mechanics from Prairie View Normal School, twenty horseshoers and men skilled in the care of horses from Tuskegee and eight carpenters from Howard University.

The 805 sent three men to the University of London during the educational period. The 806th Pioneer Infantry was formed at Camp Funston and made up in much the same way as the 805. The 802the Pioneer Infantry was formed out of 1200 enlisted men of the 158th Depot Brigade and other groups from the army were distributed through the regiment. The Pioneer Regiments were mobilized rapidly and sent to France after from three to six weeks training.

General Orders No. 2.

1. The commanding officer takes pleasure in publishing to the command the following letters received from General Headquarters, American Expeditionary Forces, relative to participations of the 807th Pioneer Infantry in the Meuse-Argonne Offensive. It is desired that this order be published to all troops, and that proper recognition of the same be made on all records pretaining thereto. It is the intention of the Commanding Officer to present this ribbon when the regiment has again assembled. Service ribbons as prescribed, will be forwarded as soon as received.

2/26/40

France, April 19, 1919.

From: The Adjutant General, American E. 1.

To: Commanding Officer 807th, Pioneer Infantry.

Subject: Ribbons.

1. Herewith is a copy of the order issued at these Headquarters on the subject of the award of silver bands to be engraved and placed upon the Pike of Colors of Lance of the standards of the organizations which have prescribed silver bands, it would be impossible to have the engraving done in time to present them to the divisions entitled to them. For that reason each organization is given a ribbon which shows which battle it participated in. This ribbon will be retained until the proper silver band is presented by the War Department.

2. The Commander in Chief directs me to send the ribbons to you, and to ask you to present them with appropriate ceremonies to the units for which they are intended. He regrets that this cannot be done by him in person.

By Command of General Pershing.

J. A. Jones.

From: Commander-in-Chief, American E. F.

To: Commanding Officer 807th, Pioneer Infantry

Subject: Battle Participation.

1. Following is a list of battle engagements of the 807th Pioneer Infantry Regiment, during the War with Germany, including organizations which are entitled to the silver bands awarded under paragraph 244, Army Regulations. The ribbons furnished herewith are in lieu of the bands which will be supplied by the Adjutant General of the Army later.

(1) Meuse-Argonne Offensive, France, October 25 to November 11, 1918. Organization entitled to silver band: 807th Regiment of Pioneer Infantry.

By Command of General Pershing.

J.A. Jones,
Adjutant General.

By Order of Colonel Cary.
Charles W. Rooth,
Captain, 807 Pioneer Infantry
Acting Adjutant.

Most of the regiments when they reached France were sent to the Haute-Marne training area where they were instructed in French warfare. From there they were sent forward and if the war had been prolonged would have probably been used as combat troops in the first line. The 809th Pioneer Infantry Regiment was from the middle west and the northwest and arrived in France early in October 1918. They were immediately ordered to the front. They had been formed September first and had sailed for France September 21. Afterward the order sending them to the front was revoked and most of the regiment was sent to Nantes where they stayed until the summer of 1919. This regiment had a large percent of professional men and skilled artisans among them the runner, Howard Drew. Three of them afterward went to the University of London. The Pioneer Regiments

were called the "8's" and ranged in number from 801 to 816. The 808 Pioneer Regiment landed in Brest September 7, 1918. They had a number of men of intellect and character. These men were called to help the 12th Engineers in contracting a narrow gauge railway at the front.

"As they worked, shot and shell rained over them. In their dugouts they were tortured by rats and "Cooties". Small wonder that an officer who had observed it all should have remarked: "We cannot understand their make-up, for under hardest conditions they hold themselves together and are able to raise a song."

2/26/42

The 813 Pioneer Regiment was used at various fronts and finally reached St. Remy a few miles from Metz. There it was ordered to fight at two o'clock in the morning and at four moved forward. For two days they were under constant fire. They had colored noncommissioned officers including Sergeant-Majors W. W. Tyler and Williams. This regiment was among those chosen for the burial of the dead.

Many of the Pioneer Regiments and some of the Labor Battalions landed at Liverpool and were held there for service. The 802 Pioneer Regiment landed at Liverpool crossed Southampton and landed in France at Harve. These men came generally from West Virginia, Ohio, Pennsylvania. After long and exhausted marches it reached the First Army.

'"Our Regiment was divided about October 1st into three sections. The first battalion was given the task of helping the engineers build a standard gauge railway from Aubreville to a point north, half-way to Varennes - a distance of ten kilometers. The second battalion was to connect up with the first battalion at this point -- thence northward five kilometers beyond Varennes. The third battalion was given the task of furnishing rock from the stone quarries for the repair of the highway. All this work was highly essential in order to keep the firing line supplied with ammunition, rations, etc. The conditions in the sector were at all times most trying. The men were subjected to bombardment from enemy long range

guns and aerial attacks almost daily. But the railroad was completed in a short time, and supplies were speeding up to the front for the final drive."

On November 18, the entire 802 Pioneer Regiment was highly commended in general orders by the Chief Engineer of the First American Army. He declared their service indispensible to the final drive. The 801 and 803 Pioneer Regiments both made hard fights for right treatment.2 At Brest the 801 transformed the Pontanezen Camp from a mudhole to a clean modern camp. These men came from Indiana and Kentucky and the regiment was formed at Camp Taylor mostly out of the 157 and 159 Depot Brigades. The 803 Pioneer Regiment had one thousand men from Chicago. This regiment along with most of the other pioneer regiments had sergeants from the regular army. The 806 Pioneer Regiment noted for its good-looking men helped to build the celebrated Pershing Stadium and served on the front at Montrichard, Orley and near Paris. The 811th and 814th Pioneer Regiments were split up from the beginning and used at many points chiefly in the S. O. S. Some companies of the 814 saw service in England. The 815 Pioneer regiment was composed largely of California men. The 816 came from the central west. The 608th Labor Battalion was stationed at St. Nazaire. The 332 and 349 Labor Battalion helped in the burials as Romagne. The 807 Pioneer Infantry had a celebrated ban under Lieutenant Vodrey. There were also fine bands with the 803, 815, 816 and 802 Pioneer Infantries. The 809th Pioneer Infantry arrived in October at St. Nazaire.

"These men were drafted into the army often without regard to age or physical fitness. One man from Texas, upon delivering a company of men to a lieutenant whom he thought to be white, remarked that he had brought him a good bunch of Negroes, and had plenty more down there if he wanted them. At first, he said, they took all the men who had just purchased little farms, so that the property would soon return to the orignial owners, and then they just went out through the country and gathered them up everywhere, so that they could get their full quota without sending their white

boys. Of course, he said, the Negroes didn't know any better and just thought they had to come."

3/6/75

In the spring of 1919 it was necessary to hasten the burial of the dead. This was a repulsive and unhealthful task taking weeks of hard toil in mid-summer. Burial grounds were necessary far from towns or cities at or near the battle fields. The white soldiers refused to do it and it became the duty of the 813, 815 and 816 and numerous labor battalions to construct the cemeteries at Romagne, Beumont, Thiencourt, Belleau Woods, Fere-en-Tardenois and Soissons.

We watched them as they toiled day and night, week after week, through drenching rain and parching heat. And yet these physical ills were as naught compared with the trials of discriminations and injustices that seared their souls like hot iron, inflicted as they were at a time when these soldiers were rendering the American army and nation a sacred service. Always in those days there was fear of mutiny or rumors of mutiny. We felt most of the time that we were living close to the edge of a smoldering crater. At Belleau Woods the soldiers en-masse banished some who mistreated them.

We had gone from Romagne -- women of fine spirit had taken our place and were lovingly ministering to the needs of these soldiers, when things happened too grievous to be calmly borne. At one stroke down came tents of discrimination and injustice, but the work there went on and the soldiers completed the difficult task assigned them.

For weeks at Romagne we watched these men fare forth with the dawn to find the dead on the 480 square miles of battlefields of the Meuse-Argonne. At eventide we would see them return and reverently remove the boxes from the long lines of trucks and place them on the hillside beside the waiting trenches that other soldiers had been digging all the long busy day. Far into the night we would sit in our darkened tent looking out on the electric-lighted cemetery, watching the men as they lowered the

the boxes into the trenches. Sometimes we could hear only a low murmur, of voices, and sometimes again there would come to us a plaintive melody in keeping with the night hour and its peculiar task.

"As we moved about the battlefield later, we saw in the fields, in groves, on hillsides, and even in the yards of what had been the houses of French villages, groups of Negro soldiers at their worthy but infinitely slow task of calling the roll of our American dead and gathering them together at the hillside rendezvous of Romagne.

"One of the burning pictures of all this war to me was a view of these Negro sexton-soldiers working on a hilltop one rainy evening at dusk. They were outlined against the gloomy sky. Their huge motor-truck stood near by, ready to carry their burden to Romagne. I thought of the home back in the United States where this one doughboy's empty chair held its sacred place; of how the 'home fires,' of which our doughboys had so often sung, had been kept burning for him. I thought of how the heart-love in that home would flask across the Atlantic to this bleak French hilltop faster than any wireless message -- if the homefolk only knew."

HISTORICAL SKETCH OF 546th ENGINEERS

for Dr. W. E. B. Du Bois,

of New York City.

(William Service Bell, Hartford, Conn.

Men mustered into service at Camp Devens August, 1918, transferred to Camp Humphreys, Virginia, August 26, 1918. Formed into Engineer Batallion. Batallion left Humphreys September 18th, reached Camp Merritt 19th, 1918.

Co's A., B., and C. left Merritt 9:30 A.M. September 20th.

Co. D. detained on account of illness.

Sailed morning of the 25th of September, on H.M.S. Scotian for Liverpool, Eng.

Co. D. caught up and shipped in same convoy. Arrived at Liverpool October 7th, at 1:30 P.M.

Entrained for Southhampton, reached there about midnight.

Co. D. reached Southhampton, October 8th.

Arrived at Le Havre October 10th, at an English Rest Camp - left there, reaching Le Mans October 12th.

On arriving at Le Mans, after about two weeks, entrained for Auzeville, reaching there October 27th. Left there October 28th; reached Avacourt that night. Next morning batallion separated.

October 29th to November 12th:

October 29th to November 12th, 1918, the Companies A and B Argonne Woods, near Avacourt.

Co. C at Ainse and Mt. Faucon

Co. D at Malancourt.

November 12th to 16th:

A & B at Verdun

and C. is still at Mt. Faucon

D. at Dombasl.

November 16th to December 28th:

Co. A. at Suilley

B. at Samogneux, sur Meuse

C. at Mt. Faucon. November 24th they moved to Dombasl

D. at Dombasl.

December 28th to April 22d:

Cos. A and B at Pont a Mouss on.

Co. C at Pont a Mousson.. January 4th moved to Rosieres en Hayes

D at Azerailles, and then to Belleville.

April 22d:

Cos. A and B left Pont a Mousson for Is sur Tille, expecting to pick up Cos. C. and B. at Belleville, but through some misunderstanding the engineer of the box car special, having no orders to stop there, passed on through, leaving these companies staring in surprise while the train sped on, as French trains speed, the rations having previously been loaded on by details of their men at Pont a Mousson, arriving at Is sur Tille, Cos. A and B were placed in large warehouses, where Co. C joined the next day, Co. D going on to Dijon where a few days later they were divided for special duty, part going to Mirbeau and part going to Arc sur Tille. A few days after arrival at Is Sur Tille, transfers were made from Cos. B, C and D into Co. A, as Headquarters Company, it having been previously hardly a company at all. Co. B. after a day or two at Is sur Tille moved to Lux.

8/26/111

Co. C to Gemeaux, and then to Liffol le Grande, and to Rie Macourt, Co. D being part at Arc Sur Tille and part at Mirbeau. Co. A remained at Is sur Tille, where it took charge of the motor transportation and gas pump stations, Co. B still continuing its work on road-building and reconstruction, which had been the batallion's work ever since its arrival in France. Co. C also did road work as did Co. D, which had also one detail of motor trucking.
Co. C moving to Rie Macourt, was removed from the department of Cote D'Or, therefore out of the jurisdiction of the batallion commander, which being the case, they made a plunge for home, but by some mischance were delayed at Le Mans, where they had arrived May 24th. On May 28th Cos. C and D reached Le Mans, being followed by B a day later.

After many pack inspections, the batallion, with thousands of other colored troops, tramped out of Le Mans, later separating for many camps, The 813th Labor Batallion and the 546th Engineers being booked together for sailing orders. These two batallions arrived at La Suze, having hiked the distance from Le Mans of about 21.9 kilos.

Both batallions left La Suze on June 11th at about 2:45 A.M. reaching St. Nazaire at 2 P.M. the next day. Camp No. 2 was reached after about a three-mile hike, and the next day they were removed to Camp No. 1. The two batallions left St. Nazaire for the ship on Friday, June 13th, which sailed from port Saturday, the 14th. The U.S.S."Virginian" - an old freighter - reached Newport News after a calm, uneventful voyage on June 25th.

The men were conducted to Camp Alexander for final disposition before mustering out. Most of the men were mustered out

History of the 304th Regt: Band, Engineer Corps, Camp Alexander

Kipling has said that: "A few old band instrument or a fife and drum corps will take many a weary ~~mile~~ from a long hike."

When the site of Camp Alexander was selected to be a concentration point for the men of the Stevedores and labor organizations, in the late fall of 1917; no sooner had the men began ~~to~~ pouring in from all parts of the United States, than the need of a band and proper entertaining force to lighten the morale of the men, was foreseen and the need keenly felt.

I will say briefly that it was seen here as well as ~~the~~ other of the new cantonments that the United States was learning a great lesson in changing from a peaceful nation in the Spring of 1917 to ~~fade~~ wade away against so skilled an enemy as Germany in the fall. And it all

Came like a peal of thunder from a cloudless sky. Few people or rather the mass of the people could fully realize that the war was a serious matter as it really was. [illegible]

drafted from civilian life to the army to be trained as soldiers. Railroads and transportation facilities were congested hauling the many men who were answering the call and moving the many products necessary for the waging of war. Men from all parts of the world were being interminglied and brought together forming an army. Needless to say, there was a confusion. When men from all walks of life were being changed into soldiers, they had various experiences.

Thus the draft of 1917 [illegible] drafted, where as in the Civil War men enlisted in [illegible] Camps. These men had very few comforts and amusements as the camps at that time were only supposed to be concentration

2/24/92

point and probaly not a permanent Camp. Among these enlisted men who came here was Sgt. James Mayers from New York, a native of Barbadoes West Indies, who when he came here in Nov., was made Chief of the Buglers. He is a man with musical talent of note and of organizing genius, with experence all over the Country, in music and other walks of life. At about that time a number of Non-commissioned officers were sent here to help in organizing the men. Among these men was Sgt. William McCauly an old soldier, having seen service in Mexico, Cuba and elsewhere where the 10th U. S. Calvary has campaigned. To Sgt. Mayers with the aid of Sgt. McCauly may be given the honor of having the brain and fore thought of the Military band at Camp Alexander. Sgt. Mayers brought two cornets with him and Sgt. McCauly brought a baritone horn with him: With these three instrument and a trombone and and a set of drums, ~~that one of the boys in~~ purchased by one of the

boys of company "M" - 304 - Stevedore Regt.:
a band of fine peices was gotten together
and was the inspiration of the of the
304 - Engineer band whose record and
fame was destined to be known all over
the country. This band, which could
hardly be called a band made its first
parade on Jan. 1, 1918 with the troops
in a emancipation day programme. The
band at that time was not used in
a military sense at all; but was only
used as self amusment for the men.
Sgt Mayers would often take two or
three dist. and play around the camp
at dances for the Officers. Much credit
can be given to the officers of the camp
at that time especialy Captain Kelly
and Lt. Daily of Co. M., in helping
and encouraging the men. Nothing
was done for the band in a military
sense until Col. O'leary our Commdg
Officer at that time and Capt. Hayes
took the the matter up and it was
found that there probably was no
provision for a band in
that branch of the service. Ju
friends of the Col's donated the

2/24/64

the men a double set of Band Inst. about fifty pieces. About that time Col. Welch became Commdg Officer of this Camp, and Officer upon the Colored troops and people in the part of Embarkation Wee never forget; a great lover of music and interested in the ... Thru Capt. French the Band of 312 Inf. Bat. the Col. gave the instruments to the men to practice for a certain parade about the 15th of Mar. 18. Musicians were called for, but few could be found among the men. So a good many of the brightest boys had to be taken in to fill out for the regiment. That was quite a job to take an inexperience man and make him proficient in an art in a few days. So under the direction of Capt. French the boys were passed in about 35 in number, and given an instrument. If a man could fill an inst. and play any kind of a simple scale, he was considered a very proficient musician. Some of the boys had had some experience and could play simple tunes like "Swanee River", but the

greater percentag could not play a full scale out on the 1st. Under the direction of Sgt. Mayers the band was finaly able to play several familiar airs as; "Good Bye Broadway," "Are you from Dixie," "Over there" etc. These selection being the band's compleat album. Later a few other simple selections were added as the band began to take on somewhat of a Military aspect. The band played the Star-Spangled Banner in front of headquarters at retreat for the first time on the evening of the 21st of Mar. As it were the Officers must have been foreseeing men to support the band to play such music as they were playing at that time. The organization which the boys were drawn from were expected to leave for France at anytime. The band boys naturaly were expecting to leave with their companies. But to the disappointment of Captain Franke and the boys of old 313 313, Bats., the Comdn. Officer had the band transfered and attached to headquarters to remain at this camp indefinitely. After being together about three

Weeks the Col. secured a very competent musician, Prof. Chelli, an Italian, to help Sgt. Mayers in instructing the men in the rudiments of music. Prof. Chelli was very highly paid and taught the band two hours three times per week for a month and a half. After Prof. Chelli left Sgt. Mayers kept working hard bringing out the different sections of the band. Every body began to notice a great change in the band for the better and the band was greatly improved by having several good musicians to join it since being organized. Some of these being James R. Jackson a show and band man of very great experience; Amos Pillard trombone player of wide experience; Jack Russel Cornet player of note; Albert Briner trombone player; Allen Morris, clarinettest; John Carter Saxaphone player. With aids and support of these men the band was brought up to the point where it could begin to play some of the standard marches, overtures and selections. By hard work and practice day and night in the

tent and in the woods the band could begin to compete with other Military bands. The band began to give Worthy open air concerts, mount guards, play retreat and play on other Military occasions. This band was written up as a sort of port-of-embarkation band. It played all troops out of camp and down to the boats that were leaving for France, cheered the boys up and played the last farewell to thousands of the men boarding "over there". The band during the summer months became very popular and greatly in demand and would sometimes have engagements for everyday and every night during the week. It would hardly see the inside of its quarters.

During the summer it played on many occasions of note and was commended as many times by people of note. The band played for a parade in Newport News on the fourth of July in which several thousands troops took part. It had a great parade labor day, the greatest that had ever been in the city. It played on numerous

occasions for high officials and for the great Liberty Loan drive that will be held go down in history and the people of Newport News will never forget. Beginning in Sept. the bands plays every Thursday evening a concert to the wounded soldiers from the Trenches that are in the base hospital at Camp Stewart.

It must be admited that the band plays all the late and standard music.

Some of the best marches are:

"Hall's Famous marches,
"Semper Fidilis" — March — Sousa.
U. S. Field Artillery" — " — "
"The Stars and Stripes Forever" — "
"El Capitan" — " — "
"The Volunteers" — " — "
"Loyal Comrades" — " — Blankenburg
"Carry On" — " — Lake.
"Ni Hamza Triumphal" — " — Favar.
"Spirit of Independence" — " — Kalyman.
"Sons of Uncle Sam" — " — McCoy
"Chicago Tribune" — " — Chambers
"Caesar's Triumphal" — " — Mitchell

Some of the standard overtures and Selec:
"Rigoletto," from Verdi's opera, — Saffroney.
"William Tell," — Overture, — Rossini.
"Tainhauser," — Selec., — — Wagner.
"The Princess of India", Overture, - King
"Poet and Peasant," — " , Meyrelles.
"Zampa," — — " , Herold.
"The Fighting Allies," — Selec., —; Lake.
"The Viking Poet," — " — ; Gottschalk
and all the late songs and dance music.

A Programme: —

"National Emblem, March" — : Bagley
I — "Poet and Peasant," — Overture —: Meyrelles
II — "Iva Thomas Cake," — grotesque two step —: Smith
III — "The Missouri Waltz" — — —: Logan-Eppel.
IV — "Evening Song," — — — — : Schumann.
V — "The Princess of India," — Overture: King
VI — "Smiles," — Fox trot — —: Roberts.
VII — "Romany Waltz," — — —: Kiser.
VIII — "There's a long, long trail," — song —: Elliott.
IX — "Zampa" — Overture, — — —: Herold
X — "N'every thing" — fox-trot, — —: Kahn-Jolson.
XI — "Till we meet again," — song [Cornet solo] —: Whiting.
XII — "The Fighting Allies," — Selec. — —: Lake.
"Star-Spangle-Banner."

The men come from many of the states
as will be seen from the roster:

2514 - Bravier St. New Orleans, La.

James J. Jordan — Drums —
Star Hope, Pl.; Boston, Mass.

2/24/104

Lester G. Hubbard, — Drum
1631 - Ogden St.; Philadelphia,

Alonzo Yoakum — Piano
418 - Pine St.; Bonham, Tex.

On Dec. When Col. Dulin left this Camp to take up duties in Col., he commended each man for the excellent work that the band had been doing. He took leave of each man and said to the men that he had kept the band under his personal care and observation and had noted the fine team work and conduct among the men: that the men of the band had indeed made records for themselves as well as for the race. Before leaving he presented each man with the instrument that he had played to take back to Civilian life when discharged.

92d DIVISION MESSAGE CENTER.

GETTING ACQUAINTED WITH THE PERSONNEL.

G. A. 2

P-3

In charge of the Message Center is Lt. Chas. A. Shaw,
A Negro Officer and expert on Business Law.
A typical Race man, true and tried,
To have him as a leader fills us with pride.
And if of Atlanta you ever heard him chirp,
He'd make you believe it's the only place on God's green earth.

As a first assistant, none better could be found,
Than the Regimental Sergeant Major, O. R. Bourne.
He has proven his ability as a first-class clerk,
A student indeed, on army paper work.
But if you didn't know him, and heard him converse,
You'd think him a capitalist, who had met a reverse.

Another assistant, from the far West he came,
Sgt. L. Turner, a worthy product of the Californian plains.
"Local Distribution", the task to which he was assigned,
Was handled by him in a manner that was extremely fine.
This "Little Sergeant", always seemed quiet but game,
And possessed a marvelous ability, for shifting all blame.

Of course old New York had to be represented,
So with Sgt. Williams in their midst, they were all quite contented.
As an entry and record clerk he was hard to beat,
For his work was so exact; and very neat.
There was nothing that came up, he didn't know something about,
And alas! the boys soon commenced some of his statements to doubt.

Another in our Office, we must not fail to mention,
Is Sgt. Fred Cooper, who to our motorcycles gave his attention,
Although in St. Louis, he claims he was some sport,
The list of St. Louisans who knew him, was extremely short.
In charge of our motorcycle orderlies, who all were speed kings,
When they got him on the road, to him they didn't do a thing.

The pride of the South is Old Virginia,
Whence came Corp. Brown, quite lacking in ginger.
"Unit Distribution", assigned to him, was quite a task,
But he functioned wonderfully, with a great deal of class.
A little old fashioned, yet steady and true,
In civil life, with a ten cent policy, he'll be looking for you.

Howard University has contributed to us, some good talent,
In Pvt. 1st Cl. Oliver, easy going and always contented.
Although, as a clerk, he has not been long in the game,
To our Office, he's been a valuable assistant, just the same.
And whenever to settle our arguments, an almanac we lack,
We just call on Old Oliver, the Human Almanac.

The "Old Army Hobnail", edited by "Buck Everet Lane,
In the "Baltimore Sporting Dailies", often you've seen his name.
E. Henderson, J. Early and F. Keenan, of Washington's best sort,
All four are radio experts, from our Signal Corps.
Hansberry, Brown, and Bivens, who of speed records loved to gloat,
Jefferson and Mays, also were orderlies of some great note.

They were all jolly fellows, with but one point in view,
That complaints, of the Message Center, should always be few.
Their wondrous work, soon gave them the fame,
Of being the best in this A. E. F. war game.
Soon we will disband, and in various pursuits, we will enter,
But none of us can ever forget, the "Old Message Center".

Sgt. Jesse Wilkerson
Message Center.

3/6/17

Additional Note

The regimental band was organized and instructed by Edward Baily, former director of the "States " theatre orcestra, Chicago Ill, they have toured practially all of France and have went "big" so to speak. General Cronkhite, commander of the 6th Div. Army of Occupation, declared that it was the best band that he had heard in France, General Bullard, commander of the 2nd. American Army, stated the same thing; the French-Mission stationed at Brest, declared that it was the best band that had pass through that port; Sgt. Baily has been recomended for a commission by the Regimental commander.

a77-13

N H Evening

TO LIEUT. GEORGE AUSTIN (92nd Division) Property of Sgt. Maj. A. Woodard.

The scene was a quiet village in France, far from the front. It is a beautiful day in June full of the perfume of roses and made more beautiful by the resplendent summer sun which beams down upon the village totally oblivous to the quarrell, the hatred and agitation of the human family.

The village (Wag.), a boy of ten swaggers down the street, beating an improvised drum in imitation of the town cryer who had for several months passed announced from the street corners the coming of the American Soldiers, and that the citizens were expecting to give them a cordial welcome and proclaiming as he goes, (The American are coming) The American soldiers are coming!

Crowds of people gathered in the village square, their curiosity is great for they have heard of the coming of the American and they are anxiously expecting them. While they gather they perceive far off down the white road the first ranks of the approaching Allied soldiers as they march steadly on, nearer and nearer they come.

But Oh! surprise, They Are The Blacks! They are colored soldiers ~~xxxxxxx~~ astonishment spread over the crowd and a few are frighten. The villagers are informed, are familiar with the French colonials blacks of Africa, but these soldiers are from America , the country of the classic type of face and figure, popularized by dark faced troop come from America? They did not believe their eyes.

The poeple questioned each other in excitment some women grew frightened, one tall man mockingly that she is beginning to feel sick at the stomach. With a smile I replied reassuringly to this lady, be quiet, they dont eat human flesh. In two ar three days you will become accustomed to them. But two or three days were not necessary that same evening acquaintances began to be made, Friendly smiles between the new comers and the natives were interchanged, and at once they began to understand each other. The next morning every where in the village small children were clinging to the hands of the strangers or nestling, in their strong arms with pink cheeks cressed against those of ebony while mothers looked on approvingly.

Very quickly a strong sympathy is formed for these men who only yesterday were unknown. Immediately the inhabitants are not only convinced that there is nothing of the savage about these men but on the contrary no soldier could be found who was more correct inhis manners, or more affable and tender than these children of the sun whose ancestors dreamed thru the marvelous nights on the shores of murmuring rivers. The people admired their handsome forms, their loyal and intelligent faces and their great bright eyes often dreamy and at thimes melancholy.

The time is now far distant when some one thought her stomach would fail at the sight of these men. It is now an honor to have them at our tables, Long periods are passed with them in conversation. We help them with their dictionaries their conversation beooks and mimics and show them the picutres of our sons and husbands and brothers at the front. And the eyes of white mothers are filled with tears as they look at the pictures brought by these men across the sea of the dark faced mothers, sisters and sweethearts left at home. The sweethearts of our own soldiers take deep interest in the pictures of the newcomers. They study their faces, the mode of dress, the style of their hair and all those womanly thing that in all countries and in all ages have made all womanly women alike. In the late hours of the evening each day, the toiler from the fields forget their fatigue and the toils and cares of the day as they listen in the quiet summer night to the melancholy songs of these soldiers as their souls goes out to their distant home. and on the road and along the flowery hedges many a fair-headed blonde walks passively by the side of a curly-headed soldier while the twilight makes blue

the faraway hills that softly croons the song of the Night.

And then comes a parting day. These soldiers who have become our friends must leave. Evening come on which farewells are exchanged. Have I said Farewell? My will not have it "Farewell" but Au Revoir. They promised to write and to come again if given permission. On each side some tears are shed, and when on the following day, the heavy command move in the cool early morning, marching towards the front these newcomers who have been our guest, at a true sorrow binds our heart. Soldiers, Friends, our hearts and our wishes accompany you. We pray that God will be good to you and that the bullets of the enemy will spare you. We pray that if some of you must fall in battle and be not permitted to return to your native, land, you will find the soil of our dear France a tender resting place, Soldiers! You who come to our homes on that beautiful day in June full of the scent of roses always you shall live in our hearts.

Sgt. Maj. Ambrose Wiedard,
Hqrs. 92nd Division.

FINANCE AND ACCOUNTING DEPARTMENT OF THE NINETY SECOND DIVISION.

26

34-4-216

The organization of the Ninety-Second Division and its operations as a part of the great American Army in France were productive of many astonishing developments, not because it was thought that sufficient competent colored men could not be found within the Division to handle successfully in due time the various duties common to a fighting organization of such magnitude, but it was doubted by many that the degree of efficiency essential to immediate success in some departments could not be attained without much preparation and study. One of the many surprises was found in the Finance and Accounting Department of the Ninety Second Division, the first of its kind operated by colored men in the history of the American Army.

The functions of this department were to pay the enlisted personnel, the officers and public debts of the Division in the field.

At first there was much opposition to the plan to organize this important department with colored soldiers because it was thought by the heads of the several departments of the Division that colored men lacked experience in the modern methods of finance and accounting. However four of the most promising young men were picked out for the work and received some training in the more important duties of the department at Camp Funston, Kansas, but the department was not organized until after the arrival of the Division in France, June 1918.

At Bourbonne-les-Bains this branch of the work was organized with Major O.H.Sampson in charge and Lieutenant Millard Crane assistant, both white, and four colored men of the enlisted personnel. It was immediately discovered that this force was entirely inadequate to handle the work of paying off an army division. As a result a Division order was issued calling for a dozen or more enlisted men of good education to take instruction in finance and accounting. Shortly thereafter fourteen men were added to this department for instruction. It must

be born in mind, however, that we were in France for the sole purpose of fighting, and it soon became apparent that practically no time could be utilized for special instructions, and, furthermore, these men were needed at once to carry on the ordinary business incidental to the operations of the Division, and so they were compelled to start immediately on actual work instead of being first instructed, as was originally contemplated. At this time preparations were being made to move to the front, and every one was busy with his own individual work. It was at this time that First Lieutenant Clarence B.Curley was assigned to the department as assistant to the disbursing officer. The spirit and zeal with which he entered into his new duties, and the interest he manifested in the young men associated with him in the office, soon made him indispensable to the department, and under his tutorship and supervision the success of the experiment became a reality, and within less than two months the office force in this department of the Ninety-Second Division was acknowledged by the Quarter Master's Department as being one of the best in the American Expeditionary Force.

Major Sampson was relieved of his duties with the Finance Office while the Division was at St. Dié, in the Vosges Sector, and his successor, Captain Delmar D.Douglas, with the assistance of Lieut. Curley and Reginald W.Overman, chief clerk in the office, soon brought the department to its highest degree of efficiency, notwithstanding the Division was constantly on the move and at times were parts of it widely separated.

During the four months that Captain Douglas was disbursing officer and Lieut. Curley and his fourteen enlisted men attending to the details of the office, approximately $4,500,000, or 24,525,000 francs, were handled by this department, and at the time the armistice was signed its books were balanced up to date and not a single dollar of the millions handled was unaccounted for.

~~FUNCTIONS OF THE OFFICE.~~

The more important functions of this office were not numerous but extremely technical and exacting. Accuracy must always be had. These duties consisted in paying the commissioned officers

27 and the enlisted personnel of the Division, the members of the Army Nurse Corps, the French Mission attached to the Division, the public debts and milage claims, and paying enlisted men commutation of rations and liquid coffee money.

The respective duties of the enlisted personnel of the department were as follows: Sergeant First Class, Reginald W.Overton, chief clerk, payment of liquid coffee funds, and charge of abstracts of funds received and of funds transferred and commutation of rations; Sergeant First Class Walker D.Miller, disbursing of accounts amounting sometimes to more than one million dollars per month; Sergeant First Class Wilmot A.Burgess, charge of pay rolls of the enlisted personnel of the Division. This class of work is quite technical and requires an expert to properly perform it. He also computed these pay-rolls, made abstracts of allotments and War Risk Insurance, and made a general check and inspection of pay-rolls before they were officially received in the office. Sergeant Arthur Owens, one of the ablest men in the office, had charge of officers' pay-rolls and public vouchers. Between twelve hundred and fifteen hundred officers were paid each month.

Harry W.Wells was the official office stenographer.

Napoleon B.Ellis and Napoleon B.Kimbrough had charge of abstracts; Elmer A.Carter, McDonald Spencer, Sebastin Crealey, Fred Duncan, Floyd Martin, Charles B. Washington and James D.Wentz charge of general pay-rolls; and Howard W.Beach was assistant to the Chief Accountant.

34-4-218

THE AMERICAN POST OFFICE.

28

The Post Office for the 92nd Division was organized under General Order No. 72, General Headquarters, May 23rd, 1918, and by the same order the Military Postal Express Service of the American Expeditionary Forces was established.

The army post office was one of the greatest sources of contentment the American soldiers found in France. It was their friend and seldom failed them when they were eager for news from home. The people back in America however were not nearly so lavish in their praise as the soldiers in France and their complaints were not entirely without cause.

34-4-219

Upon the arrival of the 92nd Division Headquarters in Bourbonne-les-Bains, France, June 1918, the Post Office was established, but it was not until the Division entered the advance zone of operation that the Postal Code "766" was assigned to it.

The postal detachment was in charge of First Lieutenant Samuel G.Iverson, (white) of the Adjutant General's Department, but all the other members of the detachment were colored and selected from the enlisted personnel of the several organizations composing the Division. Some of the members of the detachment were men of experience in post office work and without their valuable assistance the department would have been a source of annoyance instead of a pleasure.

The enlisted personnel consisted of Sergeant Major Thomas E.Mason; Sergeants Wynn D.McCullouch and William L.Jackson; Corporals Noble G.Penn, Alfred G. Hicklin and Richard B. Randolph; and Privates Charles Minor, James C.Phillips, Lawrence Lomax, James Major, Humphry Bowen and Dune Howard.

This small post office force handled on an average of 13000 pieces of mail daily exclusive of several thousand news papers. This mail usually came to the American Expeditionery Forces through the large distributing office at Paris, then on trains to the Division Post Office or to points nearest to it. From the Division Post Office the mail was sent to the several organizations composing the division in army motor trucks. The way in which the mail was handled caused considerable delay but this was unavoidable under the circumstances and conditions attending the war.

On September 26th, 1918, a Money Order Department was added to the Division Post Office and from that date until December 14th, a period of seventy nine days, money orders in the sum of $44,577.58 were purchased by the Soldiers and sent to the United States. Money Orders were paid out in the sum of $1,838.38 to soldiers and 17767 stamps were sold and used largely on souvenier packages sent to the United States.

The post office was not discontinued until the Division Headquarters reached Brest, February 1st, 1919.

THE 317th SANITARY TRAIN.

19

The personnel of the 317th Sanitary Train was trained for overseas service at Camp Funston, Kansas, beginning in November 1917. After a little more than seven months training in practical and theoritical sanatation, hygiene, anatomy, physiology, litter drills and company ambulance practice, and in First aid and care and treatment of the wounded in the field, the organization moved to Camp Upton, New York to receive overseas equipment and to prepare to sail for France. On June 19th ~~the~~ 1918 the 317th embarked for France and arrived at the port of Brest June 27th.

The training begun at Camp Funston, Kansas was resumed in France but on a much broader scale and was considerably more intensive. As soon as the Division left Bourbonne les Baine and enterd the Vosges sector with Headquarters at St. Die, the 317th organized four Field Hospitals, the 365th, 366th, 367th and the 368th. The functions of these Field Hospitals were to administer to the sick and wounded of the Division. In addition there was a large number of men employed as streatcher bearers and litter carriers. Hospitals were established at Raon l'Etape, St. Dié and at Bruyreres in the Vosges about August 23rd 1918.

3/11/51

The greatest volume of work performed by the 317th Sanitary Train was during the engagements of the Ninety Second Division in the Marbache sector south of the city of Metz where the four Field Hospitals were practically busy all of the timex from October 10th until after the armistice was signed November 11th and for two or three weeks thereafter. At one time there were more than 540 patients in the hospital at Mallory suffering mostly from gas and shrapnel wounds.

The Sanitary Train was the largest of the several trains within the Division and engaged more than sixty officers eighty per cent of which were colored. Those with the Train on December 29th 1918 are as follows:

See attached list of Officers.

July 27, 1918.

From: Commanding Officer, 1st Battalion, 369th U.S. Infantry.

To: Commanding Officer, 369th U.S. Infantry.

Subject: Compliance with Regimental Memorandum re citations for bravery.

411.2/2

1. Pursuant to directions to submit account of acts of officers and men of this battalion of devotion to duty outside of and beyond the strict limits of the requirements of their station, I report as follows:

General Situation prior to, July 14th: The battalion had been under very heavy strain of unusually severe work and anxiety. In common with the units of the entire regiment, the battalion had been continuously in sector and ten days of half rest for each monthly period. The periods of half rest to many and particularly to most of the officers, represented periods of more severe work and strain than the periods of Sector holding, on account of the necessity for such drills and manoeuvres as if was possible to undertake. Very heavy policing necessities of a billeting town which had been frightfully neglected from the sanitary point of view and very heavy provost guard duty caused by the sudden accession of comparative weath upon the part of the enlisted personnel, following a period of practical bankruptcy, when three months of accummulated was distributed. The battalion was relieved from its final tour of sector duty in S/Sector "Afrique", C.R. Melzicourt upon July 1st. Its period of half rest, which normally would have extended to July 10th, became period of alert, owing to report menacing activity upon the part of the enemy. The men were all confined to camp limits, except for working details, under commissioned officers, and all roads surrounding our camps(first, La Charmeresse and secondly, Maffrecourt) were covered by patrols to enforces the confinement to camp limits regulation. From the night of July 4th to the night of July 14th, inclusive, with the omission of two nights upon which occasions late recalls were issued, the battalion stood to every night upon its defense position at C.R. Courtemont from 10;30 in the evening; until 2;45 the morning, After relief from stand to, a march approximately 3 kilometres to Maffrecourt where the personnel was enable to retire to bed at about 5:00 A.M. Routine schedules arranged for complete rest until the noon hour, but duty requirements didn not admit of any such period of rest. Orders had to be received and receipted for, and in some cases put into operation by officers at any and all hours subsequently to 8:00 A.M. and upon at least one occasion it was necessary for the full personnel of the officers of the battalion to make reconnaissance of the Mount Tetu sector La Main de Massiges, at a time of day and in response to a summons which admitted of no time even of a breakfast of coffee and toast before starting, and which brought the officers back to Maffrecourt after many miles of walking and riding, at an hour which admitted of one half hour of eating of their only meal that day before reporting for stand to upon the defense position at C.R. Courtemont that night. Pursuant to Divisional Orders for all but one day of the period, July 5th to July 14th, the enlisted personnel, except when on duty, was required remain in barracks during daylight hours and in order to enfofces this rule the battalion was required to have continuously upon so- called daylight patrol service, two officers. In addi addition to this, the battalion had its required guard with an officer of the Day. During most of this time the battalion had no more than seven officers for duty, owing to a number of incidents of development including sickness and permissions, on top of a fundamental situation of officer shortage, As a result of the conditions enumerated, a strain both physical and mental had brought most of the officers of the battalion to a condition verging upon collapse. Upon July 10th, the day following the return of five of our officers from permission, came down with severe illness for which two had to be evacuated. Two other officers who had returned from permission upon July 11th came down with illness from which one had to be evacuated.

Captain Samuel Shethar, Co. "A",(1st M.G. Co.) 369th U.S. Inf., Early upon the morning of July 14th, Captain Samuel Shethar (after nineteen hours of continuous duty superintending labor assignment of his entire company upo

boyaux in front of C. R. Courtement) was put to bed by the surgeon with a malarial grippe feaver, which upon several occasions during the day and early evening of July 14th caused delirium. Captain Shethar had been on permission from July 3rd to July 11th. During the night of July 14th, all three officers of the Machine Gun Company being very ill, Captain Shethar was included. Captain Shethar heard what was planned for him, and immediately after hearing the opening of the engagement of midnight, July 14th - 15th escaped the notice of the surgeon and walked from Maffrecourt to Courtement and reported to the Battilion Commander for duty at exaerly 10 minutes past one. Captain Shethar was very weak, he perspired freely with cold sweat and vomitted intermittently, but he kept command of his company with full energy and complete control until about 5 A. M. When orders were received from the Commanding Officer of the regiment, assigning him to duty at Regimental Headquarters as Regimental Machine Gun Officer. The night of the 19th, having received orders to prepare for an offensive action to take place upon July 20th, I requested that Captain Shethar be returned to duty with his company which request was granted. The plan for offensive action was cancelled. During thesafternoon of July 20th this battalion received orders to proceed with two rifle companies and its machine gun company to C. R. Calvaire. Reconnaissance had to be made under a difficult situation, (including absence of maps, indifferent guiding and under constant shell fire, of high explosives and gas) which required an unuaual expenditure of time and did not admit of return of officers making reconissance to P. C. Wilson to accompany the movement of troops. During this reconnissance, Captain Shethar became badly sickened from gas, He was under continuseus fire from gas and shrapnel from 4.3) P. M. well into the next morning up to about 5 A.M. Despite Captain Shethar's illness from gas and his general weakened condition, he persisted in attending to his duty and performed inestimble service, in connection with getting battalion into secter for the relief of the French units evacuating and at the same time set a splendid example for the guidance of all concerned. About a month ago, Captain Shethar had been slightly affected by yperite gas, which undoubtedly rendered him more than ordinarily susceptible to the gas of which this battalion was bombarded during the nights of July 21st and 22nd. During the night Captain Shethar received treatment and assistance many times from the Medical Officers, but refused to give up or retire from his command or work.

1st Lieut. Harold M. Landon, Battalion Adjutant. Lieut. Landon was returned from permission, July 11th and was indifatible in his attention to duty during the days, July 15th and 22nd, in addition to his required duties. Lieut. Landon recognizing the difficulties of the general situations of the battalions on account of a great shortage of officers, voluntarily assumed the duties of Supply Officer, Train Master and Liaison Officers all along the line from higher headquarters to lower, in which latter capacity, he was of great service on account of his ability to speak the French language. Upon the night of July 21-22nd, covering the movement of the battalion from P. C. Wilson to C. R. Calvaire, Lieut. Landon was the only line officer to accompany the troops, all other officer of the battalion, having been forced, by the exigencies of time, to make reconnaissance at P.M. Calvaire which continued right up to the moment for the departure of the troops from P. C. Wilson. The enemy must have gained knowledge of the movement of the battalion for relief, as the entire secteur was kept under heavy bombardment from 4.30 P. M. July 21st to 5 A.M. July 22nd and the road approaching the new position was included in the bombardment. The troops forced to go through the bombarded area and receiving the very first serious gas attack suffered to some extent from loss of morale in their ignorance of the various kindes of gasses, the gasing from which they suffered - which was presumably a lachrimose gas were assumed by many of them to be the fore runners of the fatally, and the men upon arriving at the P. C. of the battalion down upon the main road running along the base of the hill, crowded into the abris in the tunnels leading to Post Secours, yielding to many forms of extravagances in expression of distress. Bringing up the rear of the battalion movement was wagon train of three Kitchens and a number of carts. All of the drivers of these vehicles abandoned their stations and sought shelter. This abandonment occurred after the train had crossed the bridge known as Pont de Minaucourt. Lieut. Landon, personnally and aided by one soldier, Acting Mess Sergt. D. W. Lewis led these vehicles to places of

safety. Up the road to where the battalion was stationed, where he secured assistance in having the vehicles parked with a view to such safety as the conditions rendered. Lieut. Landon did not know how to drive horses, he therefore had to lead the horses attached to these vehicles and in number of cases ;eading four horse teams. During the bombardment one horse was destroyed by the fire of the enemy. At the conclusion of thid duty Lieut. Landon returned to P. C. Wilson to gather up all stragglers and to bring in such supplies and vehicles as had bet been brought in the night before, after which he went back over the line and make contact with the regimental Supply Department to insure reasonable continuity of supplies. As a result of LieutL Lamdon's devotion to duty outside of the fine example set the battalion has been enabled to occupy its first line position under almost continuous shell fire, without suffering any hardships. (merely some inconvenience). in connection with hits food supplies.

2/28/16

Captain Chas. W. Fillmore, Company "B", 369th U.S. Infantry: During the scenes of confusion and semi-panic described above in connection with the arrival of the personnel of the battalion at Battalion Headquarters on the at C.R. Calvaire, when the suggestion was heard upon all sides that relief of the French Battalion, under the conditions existing, would be impossible of accomplishment, Captain Fillmore with great calmness and courage and persistency moved among the troops upon the road and seeking shelters in the dugouts, serving as Captain, Lieut., Sergeant and Corporal in the formation of unit, after unit, and forced the troops to leave the road area which was saturated with gas, and proceed with their French Guide up intom the Secter to take their positions. In driving the troops forward, Captain Fillmore, with fine spirit, explained to the troops that as soon as they got upom the heights of the Secterthey would be able to remove their gas masks without danger, and by such means of example, explanation and ordering company "B" sent forward and a successful relief, without casualties, was effected. Captain Fillmore during this period, called many times upon his officersby name, but did not succeed until the very last in locating his officers. Owing to the darkness and confusion, it is impossible to state where his officers were or what they were doing. It is to be hoped that were doing their duty, but of their whereabouts, expected the moment of final moving off of the company. after its formation by Captain Fillmore, the Battalion Commander has no personel Knowledge.

The other company, "D" and "A", (Machine Gun Co) were sent forward by simular efforts upon the part of other officers. (in the case of company D, not their own officers) and the relefs all accomplishedwithout casualtie Lieut. Williamd H. Keenan, Med. Officer##; the service of Dr. Keenan during the entire period July 14th to July 22nd was unique and admireable its exhibition of willingness to serve the cause without drawing technical lines as to departmental proprieties or necessities th of call for duty. Upon the night of July 14th, when the battalion took its stand at C.R. Courtement without officers for the Machine Gun Company, with one 2nd Lieut, alone in command of one company and short of officers in both of the other companies, Dr. Keenan voluntarily inspected and checked the implacement of each Machine Gun section(he having made himself familiar with these implacements by accompanying the Machine Gun Officer upon an inspection tour of mere courtesy courtesy curiosity the day preceeding) after going over the line , he reported to Battalion Commander, that Machine Gun sections were all in proper and then he took his po station at his own Poste de Secours. Upon the movement from P.C.Hey to P.C. Wilson, owning to the confusion of meeting other troops upon road at night, two rolling kitchens became lost and contact was lost for the best part of a day with Regimental Distrubution. Dr. Keenan volunteered, in addition to his other duties, to serve as battalion Supply Officer in reenforceing the efforts of Lieut. Landon, as there was much territory to be covered. As a result, with exception of one day, July 20th, when the battalion resort to reserve rations for food, the battalion was kept fair supply of rations. A considerable part Dr. Keenan work and travel was preformed under heavy shelling of roads. Upon the morning of July 22nd after Lieut. Landon made known the difficulty he was having with his supply train, Dr. Keenan voluntairly went back over the road to assist in that situation and driving some of his litter bearers before him succeeded with their help in pulling out of the mire, th a cart containing valuable supplies, which was later brought into camp in safety. In addition to these duties preformed outside of his regular professional lines, Dr. Keenan preformed exceptibilities

of all his professional duties. He remained under shelter only at such moments as those in which he was sacually treating men/ At other moments he paraded the road and gave assistance to Captain Fillmore, and other officer in placing and holding in order the alarmed troops and getting them started upon their reliefs of French Troops in the sector.

Acting as Mess Sergeant Daniel W. Lewis, Company A, 369th U.S. Infantry; During the night, of July 21st- 22nd, Sgt. Lewis attached himself to Lieut. Landon and assisted in all of the work of bring up the Supply train which had been described in connection with Lieut. Landon's effort of that night, after the drivers abandoned their post. During this work, Sgt. Lewis was struck by a piece of shrapnel upon the arm. Fortunately the blow did not cause a wound in the sense of causing blood or disability. It did cause a bruise, however, bad enough to require medical attention the next day. and the arm was, for several days badly swollened and painful. Sgt. Lewis showed and excellent spirit of devotion to duty.

2/2817

In all of the instances recorded above, it is possible that a conclusion might be reached that the preformances recorded were merely excellent preformances of duty not widely outside of the reasonable calls of duty. My conception of such an analysis is that general situation and standard of the average bearing and preformance of duty forms an important element in the analysis of demarkation between line of duty and line outside of duty. It is upon the basis of such conception for citation of honor, If these officers and men preformed merely their duty, my opinion it must be excepted as the truth that if they had preformed their mere duty in any less degree than they did preform it, in veiw of the situstion existing in general thru the battalionm the relief would not have been accomplished, the roads would have been crowded, for many hours in casualties both from shrapnel and gassing, might well have resulted.

Arthur W. Little,
Major Commanding.

157th Division
Staff

October 8, 1918.

From: Commanding General, 157th Division

To: Commanding Officers, 371st and 372nd Infantries

Your troops have been admirable in their attack. You must be proud of the courage of your officers and men, and I consider it an honor to have them under my command.

The bravery and dash of your regiments won the admiration of the 2nd Morrocan Division, who are themselves versed in warfare. Thanks to you, during those hard days, the Division was at all times in advance of all other Divisions of the Army Corps. I am sending you all my thanks and beg you to transmit them to your subordinates.

I called on your wounded. Their moral is higher than any praise.

GOYBET

(Copy of translation.)

and "C". Company to Base No. 2, C. [illegible]on Blanc and "D". Company to Base No. 1, St. Nazairre, the following day.

Sept. 9th, the morning broke gray and cold with pouring rain and a raw gale from the sea. The intensity ~~from~~ of the storm increased toward nightfall. At 5 o'clock the camp was broken, the wet shelter- halves rolled into packs and the march for the railway was commenced. "A". and "B". Companies, Hqrs. Detachment and a part of the Medical Detachment with Capt. Erskine formed the column under command of Major Christophel. The mud splattered and the rain soaked through the slickers and clothing. The station was reached thirty minutes before entraining time . Although the carriages, it turned out, were standing on adjacent track the orders forbade entering them, or even stowing the baggage and rations until they were marked. The men stood shivering on the unsheltered platform. An hour and a half after entraing time the train was set to the pa platform and a half hour later a 2nd Lieut. of the Quartermaster's Corps showed up, marked the train and issued the rations. The drenched men had stood unnecessarily, exposed to the storm two hours and a half. It had been explained to us that passenger cars instead of goods vans were given colored troops because of their susceptibility to pneumonia and influenza. The baggage and rations were pitched aboard, as but a few minutes were left and the men rapidly entrained a squad to a compartment (third class). A first-class compartment was provided Commanding Officer and Staff, and a second class for the six company officers.

The journey lasted through the following day and night and on the second morning about nine o'clock the trian reached Givres and the two companie and Detachments detrained and pitched ~~tents~~ camp in the rain in pup tents at the Engineer Sub-Post.

Telegraphic word was received soon after that the other two companies had also reached their destinations. The Battalion had arrived at the objec of its labors. Since its organizations no deaths had occured, one compan Co. "A", had had no court-martial, summary or other; with one exception for that of a sergeant for selling passes, no courtmatial higher than summary sat in the Battalion. The letters quoted from Colonel Caples and Colonel Woodward speak for the Battalions past record.

Now to do the work it was created for: Co. "B". went to work at once in the yards loading and unloading cars. "A". Co. to drainage at the Sub-Post, policing and embellishing grounds and repairing the roads. "C". Co. at St. Sulpice to drainage and railway maintenance. "D". Co. at St Nazai to loading and unloading cars.

Barracks being unprocurable although there were many hundreds in storage in the Depot, the men remained in pup-tents under their shelter-halves for a week of cold and rain. The quarter-master was then appealed to for pyramidal tents. In these tents the battalion has convinued to live.

The Engineer was found in a chaotic state. Changes of administration had obscured any original plan. Materials rushed in from Base Ports had been dumped (in order to relieve cars) where ever the cars chanced t be spotted. Urgent requisitions from the front line admitted no delay and the confusion can be abetter imagined than described. Major Christop and his Pioneer Officers were of immediate service. With a spirit of her is a job to-do do-it."

[illegible] they pitched in with vigor.

With Lieut. Berry the Major took charge of sorting the material and packing the pioneer tool and combat wagons. With his special knowledge of topographic equipment and material, Capt. Whitney was of considerable assistance in his spare time.

"B". Co. in the meanwhile went into the yard to load and unload cars, etc. Capt. Purrell was made administrative officer and Lieut. Cunningham transferred to Lyons on special duty.

"A". Company at Major Fyffe's request, under its commander Capt. Whitney (Administrative Officer) and 2nd Lieut. Butts, was put to the neglected work of policing the sub-post, repairing the streets, constructing new paths and roads, improving the drainage and generally bettering the sanitation and appearance of the station. 1st Lieut. Lyford of this company was transferred to Montierchaume x on special duty.

Soon after the Battalion's arrival at Nievres the Depot Officer was again changed. Major Christophel's energy and success in the Pioneer Department compelled recognition. He was called into new councils, where his sense for for organisation and leadership became at once apparent. Realising that some plan must be formed and adhered to that would bring order out of chaos he urged, successfully, the working out of such a plan. He was appointed Yardmaster and thenceforth made it his business to see the plan executed against the myriad objections.

The urgent work of the Sub-post done, half of "A". Co. was detached to to the heavy labor of the steel yard, the loading of structural material of the Barracks and Buildings Department. Details for road work, drainage, bridge and culvert building, and well-digging were formed from the remainder. Work of the Sub-post was continued and commenced in earnest in the Engineer Depot Yard. The drainage work begun by the 15th Engrs was pushed and extended, roads and paths opened up or rebuilt, an infirmary put up where reasonable care and humane treatment could be given to the sick and injured, and a fifty-foot macadam road was built from the Sub-post to the Depot and L.C.I platform.

The 536th band furnished music for guard mount and for such perfunctory military ceremonies as at first, from the crowded hours of incessant labor time was taken. Military formalities at this post consisting afterward of sundry roll calls, bugle calls, and multitudinous infringements of liberty. The fame of the 536th male quartet, the buck and wing dancer, the trap drum artist and the instrumental trio spread through A.E.F. Corporal Ellis organized a church, improvised a building and nightly preached the doctrine of good soldiering. A bank was also started to induce habits of thrift. It may be seen that the 536th Engrs. Service Battalion was a well rounded institution, looking forward both the secular and the spiritual welfare of its men insofar as the exigencies of Nievres would permit.

The yard began to assume an appearance of order. Peace soon after being declared, time was now available for setting the house in order and protecting and conserving the Government's damageable property. Capt. Whitney had, at the instructions of Ours, photographed the Officers of the Subpost for their identification cards; and in compliance with the Chief of Engrs. Bulletin no. 2., had planned a complete photographic record of the Battalion and of . . . . No.1 . The commanding Officer cut a summary quietus on this and subsequently record of value and interest is lost.

A few pictures fortunately were obtained showing the condition of the yard in process of cleaning up (November 10th) as well as at the present writing, (January) showing the results being achieved by Major Christophel's plan. Any separation of the Major from the yards' activities was disastrous as may be surmised from the following letter written to relieve him from the general court.

American Expeditionary Forces
Intermediate Engineer Supply Depot. No. 2.
A. P. O. 713.

January 4, 1919.

From: Depot Engineer Officer, Engr. Sub-Post.

To: Commanding General, Intermediate Section, S.O.S.

Subject: Relief of Major Arthur P. Christophel, 536th Engrs., from General Court Martial.

1. Major Arthur P. Christophel, 536th Engineers, occupies the position of general labor and transportation boss in the Engineer Depot at this post. For their efficient performance his duties require that he personally supervise and very frequently inspect the work being done in the depot, such as loading and unloading cars, storage of materials, work of drainage, road repair and construction, switching of cars, etc.

2. I have been informed that the General Court Martial on which Major Christophel had been recently appointed has a total of more than thirty cases to try. During the last week this court has been in session three whole days and one-half day, during which time Major Christophel was able to give scarcely any attention to his duties in the Engineer Depot. The position in which Major Christophel is working in this depot is one in which it is not easy to make temporary delegation of duties to other officers for any length of time; neither is there any officers of proper rank and experience available for replacement.

3. It is requested that if it is possible to do so Major Christophel be relieved from General Court Martial duty at an early date.

A. R. ERNST,
Colonel, Engineers.

Company "C". had been transferred from Brest to Base Sec. No. 2. at St. Sulpice: Company "D". to Base No. 1. at Montoir. Capt. Gruber took charge of the warehouse drainage at the St. Sulpice project using at first the majority of "C". Company men and then from two to three hundred prisoners.

On Oct. 8th, he took supervision of the railroad details and track raising and ballasting using fifty men of his company, thirty from the Engr. Units, seventy-five infantry men, two switching crews and from one to five hundred prisoners of war. Prior to the end of October some forty miles of track had been put to xxx grade and half of the hump to the classification yard completed. In October both Lieuts. Smith and Dee were put on special duty with the R.D.C., leaving the entire administration to Capt. Gruber. Men of the company not used in railway work and on drainage were employed in the yards and shops. Of this work Major Fitzgerald writes:

ENGINEER IN CHARGE OF CONSTRUCTION
St. Sulpice -- Izon

November 12, 1918.

FROM: Engineer in Charge of Construction.

TO: Major Arthur E. Christoffel, C. O., 56th Engrs., A.P.O. 713.

SUBJECT: Services of Officer and Men of Co. "C". 56th Engrs.

1. Under agreement with the Engineer Depot Officer here, to whom your Company was assigned, I secured the service of fifty men of "C". Company on track laying, and they have done excellent work onntee surfacing of this project.

2. Capt. Gruber was in charge of the surfacing work from Oct. 11th, to November 9th, and he had also, the drainage of the Warehouse District. Lieut. Smith was on ditching work, under Capt. Gruber for a while, and did good work, but was returned to the . . . as he needed his services. Lt. Dee was also working for us on track raising, but was returned to the . . . on Oct. 10th. Sergeant Dieters of "C". Company also ran levels for the ditches and supervising the digging of ditches. Captain Gruber has been taken away from us, and we regret losing his services, as they were a valuable aid on this project, both in the ditching and the surfacing of track.

This ditching work was one where a good deal of common sense and good judgement had to be used, as it was among warehouses and tracks in a very level country, where very little fall could be obtained, and I think very good results were accomplished. It certainly has been a relief to have it done, as heavy storms might ahve caused much damage to this project.

3. I wish you to know of the good work by your officers and men, and want to compliment you on them and their work.

F. C. FITZGERALD,
Major, Engineers, U.S.A.

Inspector's report on Company "C". paper work.

1. The records of Company "C". 56th Engrs.

have this date been inspected and found to be in the following condition:
No inserts, very few masters.

Service Records (85) per cent Mo. and Allot. entries to be initialled.

Pay cards: (90) per cent

Present Company Commander (Captain W. W. Gruber) has been in command of Company from (May 1918)

Remarks Signed (C. C. Boundy) "A TRUE COPY".
Capt. INC.

The Company barber, tailor and order lies in their spare time had taken pride in making a model area. Their success is approved by the following letter:

Camp St. Sulpice-Izon
France.

January 31, 1919.

From: The Sanitary Officer, Camp St. Sulpice.

To: C. O., Co. C. 56th Engrs., A.P.O. 705.

Subject: Camp Sanitation.

(Letter next page)

1. Under date of January 14th, 1919 the Camp Commander has been informed of your untiring and painstaking efforts and co-operation, this office has received from you, in which every recommendation has been carried out, with the result that your grounds, buildings occupied by your men, kitchen and mess hall have an air of individuality which surely is deserving of praise and commendation.

3/6/46

Adolphus Koschler
1st Lt. Sanitary Corps.

At Camp Montoir "D". Company was also giving a good account of itself. The entire Company was used in the Depot, loading and unloading cars. Ten per-cent extra rations were allowed on account of the arduous work which has kept the Company tailor busy, sewing over buttons and letting out waist seams. Owing to the unfortunate location of the barracks in an unsightly hole, the opportunity to instill pride in a model company area was not afforded.

In November Capt. Burrell of Co. "D". was put in charge of the General Department at I. .S. .., No. 1., in addition to his company duties. Lt. Butts of "A". Company was made Assistant Administrative Officer of both A. & B. Companies. Capt. Whitney beside his administration work was Supervisor of roads, drainage, and post maintenance, official photographer, (permission was granted in January to photograph the yard) and police officer of Lines Sent.

Lieut. Berry was detached on Salvage work, Lt. Cardence was put in charge of his(Troop Property) Department and later made Assistant Photographer. Lieut. Butts was made Police Officer.

Capt. Burrell at once threw the spirit of the 556th into the General Department Work. The transformation, not only of this Department but of the whole yard under the "Labor Boss's aggressive system" is indicated by the photographs. Under the most trying, discouraging and unreasonable conditions the 556th officers and men have worked faithfully without reward. They came with high motives and resolution, and had earned the right to be called soldiers.

[illegible] EXPEDITIONARY FORCES
[illegible] SERVICES OF SUPPLY
[illegible]
OFFICE OF CHIEF ENGINEER

Division of Military Engineering & Engineer Supplies.

January 20, 1919.

From: Director of S. S. & E.F.

To: Commanding Officer, 556th Engrs., A.P.O. 713.

Subject: Award of Good Conduct.

3/127

1. In view of your Battalion having been tentatively placed on schedule for early release from this Division, it is appropriate to make commendatory mention of the service performed by it, so that the records of your Battalion will show the proper appreciation of this Division, of the continous and efficient service performed by your Command at the important Engineer Depot at Sievres.

2. Colonel A. S. Ehrnbeck, Engineer Depot Officer at the S.I.S., under date of January 27th, 1919, makes the following acknowledgement of the service rendered by your Battalion.

> " This Battalion has two companiesnon duty here. They are a Colored Service Battalion with white sergeants. The Officers are all Pioneer men of excellent qualifications. These companies here have been the most valuable unskilled labor in the Depot and have at all times worked and faithfully. Their disciplinary record is excellent, there being only one case of General Court Martial."
>
> "In my opinion both officers and men are deserving of very high commendation and credit for their performance of duties and conduct while at the Engineer Depot at Sievres. I have seldom seen better labor even on civil jobs."

3. Further remark may be made of the diligence and effectiveness of your enlisted personnel, especially when during the trying times immediately preceding the cessation of hostilities, your command was called upon for unceasing work in the loading out of Engineer supplies for front line troops.

J. P. McILROE,
Brigadier General, Engrs. USA.

A'3-6

OPERATIONS OF THE 317TH ENGINEERS IN THE ARGONNE FOREST, FRANCE, FROM SEPTEMBER 21ST 1918 TO NOVEMBER 14TH 1918.

Headquarters 92d Division, A. E. F., A. P. O. 766 Mobile,
Fifteenth November 1918.

From: The Commanding Officer 317th Engineers.
(Col. Earl I. Brown.)

To: The Chief of Staff, 92d Division.

Subject: Operations in the Argonne Forest.

ORDERS--92d Division:

1. Directed that you submit the report of the operations of units under your command between 26th September 1918, and November 8, 1918 in the recent offensive conducted by the 1st Army.

ALLEN J. GREER,
Colonel, General Staff,
Chief of Staff.

PREPARATORY

On September 26th the 317th Engineers consisting of 1508 men and 41 officers (1st and 2d Battalions, and Hqrs. Det.) was en--route from St. Die, Vosges, to Bruyeres Sept. 21, 1918. The regiment arrived and entrained at Bruyeres, leaving via railway in two sections. 1st Battalion, and Hqrs. Det. in the first section de--parted at 2 P. M., and section with 2d Bn. following. Next day Sept. 22, 1918 the regiment arrived at Villars Daucourt from Bruyeres at 6 A. M. and unloaded baggage, and marched to Brizeau arriving by companies between the hours of 9:00 P. M., and 2:00 A. M. The weather and health of the men was good.

On Septamber 24th 1918, pursuant to instructions of the Regimental Commander, the regiment with 1500 men and 39 officers broke camp and marched out of Brizeau at 8:00 P. M., wagon train following. A detail from Headquarters Detachment remained at Brizeau to guard regimental property. The regiment marched to and took station in woods west of Clermont.

The situation--in ARGONNE FOREST--at beginning:- According to Field Orders No. 12, Sept. 25. 1918: "1. (a) The enemy holds the front from the Meuse to the Aisne with five (5) divisions. The Allied Armies attack on the front between the Meuse, and the Suippe Rivers. *** The objectives were as shown on the maps. The Forest D'Argonne will be reduced by flanking from the East. 1st Line Divisions will be prepared to advance from the Corps object at H plus 4 1-2 hours. (2) b. The 317th Engineers will be placed at the disposal of the Corps on D minus 2 Day, on which the Commanding Officer 317th Engineers will report to Corps Engineer Office for further instructions.****

One battalion from each regiment will be subject to call of the Division Officer for use in constructing passages across "No Man's Land."

C. C. BALLOU,
Major Gen. Comd'g Div.

2/26/84

1

The attack of the American First Army was made with three Corps in line, and three divisions in line in each Army Corps: the 77th, 28th, and 35th Divisions from left to right, being in the First Army Corps. Two companies of the regiment were assigned to each of the divisional sectors of the 1st Army Corps, Companies "A", and "B" under command of Major William H. Ferguson to the 35th Division sector; Comapnies "E"? and "F" under command of Maj. Clay Anderson to 28th Division sector. and Companies "C", and "D" under command of Lieut.-Col. J. Edward Cassidy. proceeded to vicinity of and took station at La Claon. Companies "E", and "F" to 77th Division sector.

According to Field Order No. 3, 1st Corps, September 25, 1918, Comapnies "A", and "B" under command of Major William H. Fergusaon proceeded at 8 P. M. under cover of darkness to and took station at Neuvilly. Comapnies "C", and "D" under command of Lt.- Col Cassidy proceeded to the vicinity of and took station at La Claon. Companies "E", and "F" under command of Major Clay Anderson proceeded to the area of 28th Division Croix De Pierre. Hqur. Det. remained at woods west of Clermont, less the details still at Brizeau guarding regimental property.

OPERATIONS.

In accordance with Regimental Field Orders No. 3, Sept. 25th 1918, based on opera ions order 1st Army Corps, 1st Army, Lt.-Col. J. Edward Cassidy, assumed command of omapnies "C ", and "D", 317th Engineers, and one battalion of the 365th Infantry, and directed these organizations to proceed to the woods east of La Claon on the afternoon of September 25th 1918 and camp there for the night. After consultation with Colonel Baker of the Corps Engineer Regiment it was arranged that Col. Cassidy take charge of the Corps sector and work in conjunction with the Division Engineer Regiments instead of following up the work of the Corps Regiment. Lt.--Col. Cassidy took charge of a sector over the Les Islettes-Vienne le Chateau Road from La Claon to La Haraze and open the La Four de Paris--Varennes Road, and the road running east to Apremont, and Chatel Chehery. On the afternoon of Sept. 25th 1918 the advance tool dump was establisht at La Claon. Lt.-Col. Cassidy establisht his advance P.C. at La Florent for the night in order to be in touch with the Corps Engineer of the 77th Division. On the night of Sept. 25th, 1918, Major William H. Ferguson conducted a detachment consisting of "A", and "B" Comapnies of this regiment and the 3d Battalion of the 367th Infantry, from the assembly point above Clermont thru the woods to a point about five kilometres southwest of Neuvilly, where men were bivouacked on edge of woods at 12:30 P. M. The trail was followed because of congestion and constant

shell fire on the Neuvilly road. Our artillery put down a barrage, and a general advance was made at an early hour, the 26th, the heavy bombardment lasted three hours, and then was changed to a creeping barrage. The troops of the 77th, 28th, and 35th Divisions went over the top and in spite of highly organized positions protected by masses of barbed wire entanglements, good progress was made.

While the advance line of Infantry was still fighting in and about Boureulles, Major Ferguson made a reconnaisance of the main road as far north as a large crater and a half kilometers So. of Boureulles, and returned to Neuvilly to meet the detachment which had moved under command of Lt.-Col. Minnegerode and which arrived about 10:30 A. M. the 26th

On the morning of September 26th after a heavy bombardment Companies "C", and "D", 317th Engineers, under command of Lt.-Col Cassidy, at 9:30 A. M. and one battalion of the 365th Infantry moved north to the Les Islettes-Vienne la Chateau Road. One company of the 365th Infantry was detached and assigned to repairing the Lew Islettes-Vienne la Chateau Road from La Claon to La Four de Paris. Co. "D", 317th Engineers, Lt. Flannigan commanding, took over work on the Les Islettes- ienne Road from La Four de Paris to la Haraze thru "No Man's Land" at 11:00 A. M. Co. "C", 317th Engineers, Lt. Townsend commanding and three companies of the 365th Infantry, Lt. Rothorst commanding, took over the work of consolidaying "No Man's Land" and opening the La Four de Paris-Varennes Road. From La Four de Paris to a point near the German front line trenches, the road had been blasted out of existence and as the ground was of a swampy nature corduroying and planking was resorted to temporarily. The heavy French barricades and four German barricades had to be removed.

One mine crater about 100fe t across and 40 feet deep was blown back of the second trench line. A road was built around the edge and the wire cutters available not being suited to the task, Lt. Col. Cassidy visited a German Engineer Dump in Meurrison's Valley which was under maching gun fire and salvaged twenty pairs of excellent German wire cutters, which enabled work to be expedited.

Major Clay Anderson in command of Companies "E", and "F", 317th Engineers was camped on the morning of Sept. 26th 1918, at Croix de Pierre, a point six kilometers back of our front line trenches. Major Anderson assigned Co. "F" to reconstruction of the highway running north from Croix de Pierre across "No Man's Land," and Co. "E" to assist in repairing the road at Mine Crater, a point three kilometers north of Neuville on the Neuvilly-Varennes Road. It develppt that the road assigned to Co. E across "No Man's Land" had been so thoroly obliterated that not even a trace of the old road could be found. The road was located and by night a narrow way permitting the passage of wounded men, and amunition carts was opened. Co. "E" commenced the construction of a new road around the shell crater and moved to the immediate sight of the work. This Co. was at intervals subject to shrapnel fire while working. Co. "E" suffered two shrapnel casualties while working at this point. Co. "F", and 22 Bn Hqrs. moved to a former Engineer French camp on Cr Croix de Pierre-Carr des Meurrison Road at a point 1 1-4 south of the American advanceed trenches.

2/26/86

At noon the roads between Neuvilly, and "No Man's Land" were taken over as per Corps Order for sector occupied by the 35th Div. "A" Company, Captain Eason Commanding, worked on Eastern Road to Bourelles. Co. "B", Lt. Booth commanding, worked on the main Road; Co. "M", 365th Infantry was detailed to assist the 111th Engineers at the crater near Bourelles (Boureuilles) and the remaining three companies of the 367th Infantryhaving been proceeded N. E. over Route des Faascines Des Allieux, repairing road, assisting traffic and military police. The reconnaisance had shown this route to be badly blocked by ammunition and truck trains and traffic practically at a stand still. The entire detachment. Engineers and Infantry continued to work with necessary details thru the night.

By 5:30 P. M. Sept. 26, 1918, the La Four De Parisp-Varennes Road was opened for ambulances as far as Pavilion Barricade, and at 6:00 P. M. the same day the Regimental Commander of the 304th F. A. was notified that the artillery could move as far as Pavilion Barricade. In opening this road about 150 land mines (contact) and anti tank mines were removed and destroyed. In the direction of Varennes and Abri de Crochet, the roads were under machine gun fire some two hundred yards from Pavilion Barricade. Detachments from Co. "C" 317th Engineers repaired shell holes in Varennes-Abri de Crochet Roads to within 150 Yards of our front lines, this work being charge of 1st Lt. William M. Butts, senior officer Co. "D" but who was detached from his company as the assistant to Lt.-Col. Cassidy during this period of operations. In the first day's work the command of Lt.-Col. Cassidy passed thru and ahead of the divisional Engineer Troops. The units of his command were shelled intermittently with both gas and shrapnel during the night of Sept. 26th 1918, but no casualties occured.

On September 26th 1918 the work of improving La Four de Paris Varennes Road was continued. Detached two companies of the 365th Infantry under direction of Captain Haswell, and Lt. John Doe, openen approaches to bridge across valley from La Four de Paris and to construct an artillery road to new artillery positions for two battallions of artillery. Then they assisted in constructing gun positions and emplacing one battalion of 304th F. A. Co. "D" 317th Engineers was assigned to advance work on roads leading north from Four de Paris- Varennes Road. Three roads were opened northward for ambulances.

On Sept. 27th 1918 Major Ferguson, accompanied by Lt. Howard made a reconnaisance of all roads in the sector north of Varrennnes and cheppy, the fighting having advanced to Very and Chanpentry, During the night Co. "M", 367th Infantry moved to a cut-off road between Boureuilles and Cheppy. Major Ferguson took over this work at the suggestion of Col. Clark, Divisional Engineer, 35th Div., the work having been started by the 110th Engineers who were this day ordered into the line of advance. Co. "E", and "F" under command of Major Clay Anderson, assisted by other Engineers operated north of Pierrecroisee, Co. "F" developing the new road across "No Man's Land by night. This road was in condition to pass light horse-drawn traffic necessitating building two kilometres of entire new road, and utilizing local material, including concrete blocks mine timbers from the old German trenches; "E" Co. moved to another mine crater on the Neuvilly North Road and suffered one casualty

from a land mine on which the artillery drove a gun.

On September 28th, and 29th 1918 Co. "D" continued working on roads in different directions from Abri de Crochet. This Co. was under machine gun fire on numerous occasions. Lt. Col. Cassidy establisht his advanced P. C. in a German dugout on the La Four De Paris--Varennes Road two hu dred yards west of the Pavilion Barricade; started operations on Sept. 30th on Meurrison's--Croix de Pierre Road; continued there operstions on October 1st 1918 and in addition sent three companies back to Les Islettes--Vienne le Chateau Road.

On September 28th 1918 the detachment P. C. of Major Ferguson and Co. "A" moved into Cheppy, and "B" Co. located at 304.5-272.2. Both companies worked on Cheppy cut-off which work was continued thru the 29th. On the 30th Oct. 1918 the third battalion 367th Infantry was relieved and replaced by the 2d Battalion, 365th Infantry commanded by Capt. Warner A. Ross. The detail of Hqrs. Det left to guard regimental property at Brizeau rejoined the detachemnt at noon Sept. 30th 1918. Platoons from Co. A worked on the Cheppy-Very, Cheppy-Varennes, and Cheppy-Aubreville Road; all of companies being employed on latter. One company of Infantry was put on a cut-off between 307.5270.5 and the Varennes-Aubreville Road. On Oct. 1, 1918, one platoon from Co. B was sent to assist traffic at the same cut-off, the other companies and platoons under Major Ferguson's command continuing their work with exception of one Company of Infantry which was put on Varennes-Aubreville Road. A reconnaisance was made of the Avoucourt branch of this road. The work was continued on the 2d. On the night of the 2d, the Commanding General of the 1st Division ordered all troops to evacuate Cheppy as the town was being shelled daily and was getting overcrowded. On Sept. 28th, Co. "F " brot the new road into condition to pass light artillery and some batteries did pass thru. Co. "E " continued work on detour around Mine Crater. Sept. 29th 1918, heavy rains rendered roads difficult and those companies continued to improve them. (Batteries of 75s passed thru). September 30, 1918, Co. "E" shifted on to maintainance of the Abencourt Road, a road roughly paralleling the Neuvilly-Varennes Road. Work consisted pf replacing rotten corduroy, placing rock from burned buildings in bad mine holes. On Oct. 1, 1918 Co. "E" assisted Artillery in mov - ing from difficult position in woods near Abencourt Farm.

On Oct. 2, 1918, the working forces of Lt.-Col. Cassidy were increast by two battalions of 365th Infantry, one battalion 365th Infantry and Machine Gun Battalion 183d Brigade making a total force of 4,750 men; obtained trucks for hauling stone. This force was distributed over Les Islettes -Vienne le Chateau Road between La Chalade, and La Haraze, and La Four de Paris-Varennes Roads. Roads were built to artillery positions and assistance in emplacing batteries was rendered. Narrow guage railroads was repaired for hauling heavy shells to French artillery positions. These co-operations were continued on Oct. 3, and 4, 1918. On Oct. 4th 1918 all Infantry working parties were ordered back to their organizations and Engineer companies ordered to assemble at Camp Cabaut between ~~Four-de-Paris-and-Les-Islettes~~ Croix de Paris de Paris, and Les Islettes . Headquarters Detachment broke camp and marched to woods west of Clermont at 2:30 P. M. arriving at Camp Cabaut, 5 P. M.

animals, and animal transportation following. Comapnies "C", "D", "E", and "F" broke camp at their last named stations and joined in the concentration of the regiment at Camp Cabaut. Next day, Oct. 5, 1918, Companies "A", and "B" broke camp south of Cheppy, and joined regiment at Camp Cabaut at three P. M. that date, animals and animal transportation following. On Oct. 6, 1918, the re-united regiment (for the first time since we landed in France) broke camp at Cabaut and marched to new stations. Companies "A", and "C" under Lt. Col. Cassidy building road at 300.5-270.8; Co. "D" building 60 C. M. railway at 300.5-270.8 under direction of Major Ferguson, Commanding Officer 1st Battalion; Companies "D", and "E" building road at 300.55-271.1, and C. "F" moved to Abincourt Farm. On Oct. 8, 1918 Capt. Morris, and Capt. Haswell, and all available men from Hqrs. Det. were attached to Major Ferguson's detachment for the construction of light railway connection across "No Man's Land" between the French, and the German light railway system. Capt. J. W. Morris, and Capt. J. R. Haswell were engaged in reconnaisance and surveying within this area. Hqrs. Det., and Band assisted Companies "D", and "E". Oct. 9, 1918, Co. "E", 317th Engineers marched from 300.5-271.1 enroute to rejoin the 92d Division at Jailon. Companies "A", and "C" resumed wo work of building roads; Company "B", and Hqrs. Det. resumed work of building 60 C. M. railroad; Companies resumed work of building roads. On Oct. 15, 1918 Hqrs Det. moved from 300.5-271.1 to 300.0-271.1. On Oct. 16, 1918 Companies "D", and "F" again began rail road construction work. Co. "B" at 300.25-271.1 and Co. "F" from Abincourt Farm to Manhattan Junction, after Oct. 18, 1918 thence forward toward Lancon. On Oct. 21, 1918 Companies "A", and "C" resumed construction work; Companies "B", and Hqrs. resumed construction on 60 C. M. railway. Lt. Maggs of the 1st Army Corps with a detail of Signal men assisted by a detail from Hqrs. Det. installed telephone communications. One platoon from CO. "D" moved to Cornay to repair roads; remainder of Co. "D" worked on salvage. Co. "F" upon arrival at Lancon resumed railway construction there. On Oct. 23, Co. "A" working in Stone Quarry at Apremont, repairing and constructing roads. Co. "C" worked at Varennes Quarry, and constructing and repairing roads. Co. "B", and Hqrs Det. were still engaged in constructin 60 C. M. railway; a detail from Hqrs. Det. was assisting Signal Corps men in the installation of telephone communications; the platoon of Co. "D " returned from Cornay and with Co. "D" resumed work on salvage; Co. "F" resumed railway construction work. On Oct. 26, 1918 Co. "D" moved via 60 C. M. railway at 79.8-95.2 resuming railway construction work upon arrival. On Oct. 26, 1918 the connection of the 60 C. M. railway across "No Man's Land" was completed as to grading and to laying of rails, and the operations drawn by light gasoline tractors began. At the time this work was undertaken the Army Railway Engineer had made a recannaisance of the German Argonne system and had pronounced it impracticable for any use in the Army System. Our main consideration, therefore, in undertaking the work to was to provide a means, as highly as possible to assist in the supply of the 1st Army Corps, and relieve the enormous congestion on the roads which the continuous rains rendered difficult to maintain. By the time the congestion was completed, repairs had been completed to Lancon, Apremont, and Montblanville, and there was an immediate demand for freight to be handled, even before connecting line could be ballasted.

From Oct. 15, 1918 until Nov. 1, 7.00 A. M. when the Ar-- gonne 60 C. M. Railway was turned over to the 21st Engineers, our regiment had handled 2,181 tons of such traffic gravel, ammunition, lumber, ballast, wire and rations, ties, timbers, and salvaging. On the 29th Oct. 1918 Companies "A", and "C" resumed construction of 60 C. M. Railway; Co. "D" was working on grade connections of railway between Lancon-La Besogne, and Marcq branches; Company "F" was repairing Bridge Timber, ballasting La Besogne line and maintainance to Lancon South line.

On Oct. 31, 1918 Co. "A" was repairing roads and craters (1 1-2 platoons) at Apremont Quarry; Co. "C" resumed road construction, one platoon at quarry two kilometers east of Varennes; Co. "B", and Hqrs. Det. resumed construction of 60 C. M. Railway; Co. "D" on railway construction at Lancon-La Besogne, and Marcq branches to a point south of the Marcq defensive position; Co. "F" reconstructed line from Lancon to a point near Grandpre; one platoon had opened La Besogne line to a point near Grandpre and one kilometer beyond La Besogne. No other engineers worked at this point. This platoon worked on a two kilometer stretch at the neighborhood of Summit Junction on ballasting. Co. "F" also had two crews of Boche locomotives transporting material for bridge construction.

On Nov. 1, 1918 Co. "A" marched to and took station at Fleville; Co. "C" marched to and took station at Fleville, worked all night under shell fire repairing roads, and loading stone on trucks. Co. "B", and Hqrs. Det. resumed railway construction work. Co. "D" marched to the above-named station; Co. "F" resumed work in operation of railroad in Argonne Forest turned over to the 21st Eng. On Nov. 2, 1918 Co. "A" worked all night between St. Juvin and St. George on roads and craters. Co. "C" worked on stone pile afternoon and night at St. Juvin; Co. "B", and Hqrs. Det. resumed railway construction work. Co. "D"--two platoons--worked on recon-- naisance of Narrow Guage Bridge at Grandpre. Co. "D" was constructing railway in vicinity of Lancon.

On Nov. 3, 1918, Co. A marched to St. George; Co. "C" moved to St. Juvin arriving at noon, and and unloading stone in afternoon; Co. "B" was doing construction work; Hqrs. Det. moved to Grandpre; this move was made after having operated 60 C. M. railway under Major Ferguson Nov. 1st, when it was turned over to Army Engineers. During this time much ammmition, ffeight and railroad material had been delivered under shell fire, directly to the batteries. Major Ferguson having moved Battalion Headquarters to Grandpre made a reconnaisance of the standard guage railway system to its west and southern connection, and as far north as Harricourt. The connection to the west was found to be unpractical for quick repairs owing to two large bridges being destroyed. Where the damgge done by the enemy to the north and south consisted in blowing up rails, bridges and colverts which were of small span. Co. "D" was doing bridge work and railroad construction; Co. "F"-- one platoon repaired shelled road into Grandpre; the remainder of company in construction work on standard guage in vicinity of Grandpre.

On Nov. 7, 1918 Hqrs. Det. repaired depot building at Grandpre; Co. "A" marched to Briquenay; Co. "D" engaged in railway construction from Grandpre from one kilometer north of La Morthomme; did construction and repairs on the standard guage railway from Grandpre to Apremont, and repairing standard railway bridge near the Aire River near St. Juvin. On.Nov.8th 1918 Hqurs. Det. was engaged in policing area around depot buildings in Grandpre, Cos. "A", and "B" did construction on 60 C. M. railway; Co. "D" did construction on 60 C. M. railway and repaired bridge; Co. "D" engaged in railway construction; Co. "F" engaged in repairs to standsrd guage railway in vicinity of Grandpre station and completed repairs from Grandpre to a point opposite St. Juvin, building one small bridge. On Nov. 9, 1918 Hqrs. Det. policed area around depot building at Grandpre; Cos. "A", "B", and "C" did construction work on 60 C. M. railway; Cos. "D", and "F" engaged in reconstruction of standard guage railway from St. Juvin to Briquenay and thru Grandpre. One platoon from Co. "D" repaired road in Grandpre.

On Nov. 11, 1918 Co. "F " was repairing 60 C. M. Railway from Buzancy to Harricourt, Co. "B"repaired 60 C. M. Railway from Canal de Thenorges to Buzancy; Co. "C" repaired standard guage railway between Briquenay, and Boult; Co. "D"-one platoon was clearing out shelled trestle two kilometers south of Briquenay; Co. "F" resumed railway construction and repairing shelled road at Grandpre.

On Nov. 12, 1918, Hqrs. Det. policed area around Grandpre; Cos. "A", "B", and "C" marched to St. Juvin; Co. "D" used the day for policing and making preparations to move; Co. "F" resumed repairing road-shelled and policing of personnel. On Nov. 13, 1918 Cos. had rifle inspection in the morning and close-order drill in the afternoon. Since Nov. 14th 1918 Companies have had close order drill, and battalion parades and reviews while waiting transportation to rejoin 92d Division at Marbache; Nov. 24th 1918 the 1st Battalion changed its station from St. Juvin to Grandpre thus making the transportation of the regiment complete, Co. "E" having already joined the Division.

LETTERS OF APPRECIATION AND COMMENDATION:

Memorandum from Colonel Hoffman, Chief Engineer, 1st Corps, Nov. 10, 1918.

The Chief Engineer, 1st Army Corps, desires to extend his appreciation to the Corps and Division troops of the 1st Corps, in assisting the rehabilitation of the Standard Guage, and 60 C. M. lines in the area of the 1st Corps.

"ESPECIAL CREDIT IS GIVEN TO THE 317TH ENGINEERS WHICH WERE VERY INSTRUMENTAL IN THE REHABILITATION OF THE LINES IN THE FOREST D'ARGONNE AND ON THE LINES FROM ST. JUVIN TO THE NORTH."

G. H. SPAULDING,
Colonel, Chief Engineer 1st Army.

2/26/90

Hqrs. 1st Army Corps, OPERATION Order No. 9, Nov. 11, 1918:

1. The 317th Engineers now attached to the 1st Army Corps, are relieved from further duty with the 1st Corps.

2. The regiment will be assembled at Grandpre, Chevieres, and St. Juvin for preparation to being embussed and moved to rejoin their (92d Division) Division at Marbache.

oOo

Hqrs. 1st Army Corps, General Order No. 17, Nov. 11th 1918:

"During this pause in the operations of these headquarters the Corps Commander desires that the units which have contributed to the constant success of the 1st U. S. Corps be informed of his full appreciation of the services each has rendered to the common end.

This appreciation must be expended to every element of the Corps and the Divisional units, for it goes without saying that the work of each man, no matter what his station, has contributed powerfully to the accomplishment of the common aim--the DEFEAT OF THE ENEMY.

It is the desire of the Corps Commander that his sincere thanks and best wishes and assurances of his appreciation reach every member of the units which have contributed to the steady and unfailing success of the Corps.

By Command of Major-General DICKMAN;

MALIN CRAIG,
Chief of S t a f f.

The above is an historical sketch of the operations of the 317th Engineers (92nd Division) attached to the 1st Army Corps during the Meuse-Argonne offensive. It is a foregone conslusion that the organization covered itself with glory which is attested by the letters of appreciation from the 1st Corps Commander and, the Corps Engineer.

The regiment was the only regiment of Negro troops with the 1st Army. It was the first Engineer Regiment to be composed of Negro troops in the history of the Army. They rightly earned for themselves the apellation of "BEAVERS."

before July 4th, and were home to celebrate.

The Batallion has been recorded for participation in the Argonne-Meuse offensive, its two weeks of construction work being carried on for the most part under shell-fire. It also, like a great many other colored batallions, was especially commended. Like most army efforts, theirs was aarried on under almost impossible conditions. When stones were required to repair shell-torn or worn roads, there was not a stone within reach, until some good scout would discover a temporary supply, sometimes a detail of men being required to bring them quite a distance in salvaged wheelbarrows, through very soft mud, over ditches and shell-holes.

On the whole, the spirit and humor of the men was splendid, The morale and stamana impeccable, and the conduct as a batallion left nothing to be desired. This was due probably as much to the cheerful spirit and policy of the batallion commander, Capt. R. H. Nichoson, as perhaps anything else.

In December, about Christmas time, the Rev. F. O. Crimminger, (white) of Heath Springs, S. C., joined the batallion; his efforts in behalf of the men were untiring. As a Southern man, being white, and for the first time in his life coming onto close relationship with colored men on a common ground, his spirit was excellent.

He learned much of colored men in this contact, and his appreciation of them became very keen.

(We often talked over the questions relating to the sourhern attitude in his rooms at Pont a Mousson, where he told me how natural his, as well as many southerners, attotudes toward colored men, having been fed with it from childhood and directed to the works of Dixon and Page and others of their type. When he received his appointment to the 546th Engineers, a colored minister

3/6/73

who was attending Chaplain's school with him, advised him not to accept, as the colored engineers, he said, were composed of the very lowest types of colored men, and were comparable with the Chinese Cooley laborer. His desire, however, was to learn and to temper himself to human nature, so he came and learned, and went away gratified.

In a recent letter he referred to our chats in these words: "I, too, recall with happy recollections the evenings we used to spend there at Pont a Mousson. Those were indeed happy days."

E

Although everything was done to bring about a decrease in the morale of the men who were doing hard fighting at the front, and to discredit them for anything that would bring about commendation, there were twenty-one who received the Distinguised Service Cross, and the attached General Orders will show some of the men who received citations for bravery and meritorious action.

HISTORICAL TECHNICAL REPORT.

536TH ENGINEER SERVICE BATTALION.

APPENDIX NO. 1.

During February Major Christophel was appointed Assistant Engineer Depot Officer of I.E.S.D., No. 1., in accordance with Office Memorandum No. 219, Feb. 11/19. This depot was made Co-ordination Center for other depots in the S.O.S. and Montierchaume was merged into it.

Capt. Whitney added the Construction Materials' Department to his other duties. Capt. Durrell was detached to Montierchaume as Depot Officer. 1st Lieut. Perry in the meantime having returned from D. S. assumed command of "B". Co., and took over Capt. Durrell's duties in the General Department. Lt. Cardenao acting as Asst. Administrative Officer of "B". Co., while also continuing in his duties as Battalion Supply Officer and Asst. Photographer.

Work continued in the various companies as heretofore. Both "A. & B" Company drivers brought convoys of trucks from Bordeaux. Drivers for trucks in G.I.S.D. were also detailed to the M.T.C.

The drill and educational orders being finally interpreted to apply in a quasi way to Gievres, a much needed half-hour was allowed daily to disciplinary exercise; and the erection, heretofore refused, was made possible, of a school building which could also serve as a recreation room for the men.
These were two great strides forward in the accomplishment of good discipline.

APPENDIX No. 2. (concluded)

Officers 536th Engineers' Service Battalion.

3/6/95

1st Lt. Alfred W. Smith

1st Lt. Alfred W. Smith was born in the year 1889, of American parents. Following his grammar and high school study, he spent a year at Rennsaelar Polytechnic Institute and then entered Syracuse University graduating in 1916 with degree of Bachelor of Science. His professional experience has been entirely in commercial structures, steel, masonry and reinforced concrete.
Lt. Smith entered first E.O.T.C., at Ft. Benjamin Harrison, and was commissioned 2nd Lt. Aug. 15th, 1917, at Ft. Leavenworth and attached to 310th Engineersat Camp Custer. He was assigned to the same regiment Oct. 29th, 1917, promoted to 1st Lt. July 6th, 1918, and transferred to 536th Engineers July 11th, 1918.

1st Lt. Mathew H. Keefer

1st Lt. Mathew H. Keefer was born in the year 1884. He graduated from Kansas University, Medical Department , in 1907; and served as intern one year. For the past ten years he has been in general practice. Five summers he took post graduate work at Kansas University.
Lt. Keefer was commissioned in M.R.C. July 14th, 1917; attended the M.O.T.C. at Ft. Riley from Aug. 27th to Dec. 20th, and Department Laboratory at Ft. Leavenworth; from then until March 30th, 1918. He was then assigned to the 160 Depot Brigade , Camp Custer, Mich. and June 6th, 1918, was transferred to 536th Engineers.

2nd Lt. Norman C. Butts

2nd Lt.Norman C. Butts was born August 8th, 1888,at Poughkeepsie,N.Y. His ancestry is American for several generations. He was educated in Poughkeepsie grade schools, Riverview Academy and Cornell University, specializing in the latter, in landscape architecture, and graduating as Bachelor of Science in Agriculture in 1911. He spent a year as draughtsmanfor Landscape Architect and then four years as Manager of Landscape Department, Ashford Park Nurseries, Atlanta, Ga. From 1916 to 1917 he managed planting for George Burnap, Landscape Architect, Washington, D.C.
Lt. Butts graduated from Riverview Academy as Cadet 2nd. Lieutenant. He attended Civilians Training Camp at Plattsburg Aug. 16th, was referred admission to first R.O.T.C. and drafted into National Army, was assigned to Co. A. 312th, A.G. Bn. Sept. 25th, 1917; promoted to Corporal Nov. 1st, 1917; transferred as Pvt. to 304th Engineers Nov. 19th; (continued)

2nd Lt. Norman C. Butts. (continued)

On Dec. 5th, 1917, was prmoted to Corporal ; Dec. 27th, 1917, to Sergeant and sent to 4th E.O.T.C. May 5th, 1918, Commissioned 2nd Lt. May 25th 1918, and assigned to 536th Engineers.

3/6/19

2nd Lt. Louis Cardeneo

2nd Lt. Louis Cardeneo was born in Melrose Park, Ill., Aug. 3rd, 1896. Both parents were merican born, his father of erman Italian ancestry and his mother of Scotch. He graduated from Bayonne , N.J. grade schools and spent two years at high school.
he enlisted in U.S. Army, August 1913, and was assigned to Co. I. 18th Infantry. He served his three year enlistment as private and non-commissioned offi cer part of the time being on the border. January 1917 he enlisted in Co. I., 4th, N.J. Infantry, was promoted to Corporal the following March, to Sergeant in May 5th, 1917, and transferred to 104th Engineer Train Oct 29th, 1917. He was assigned to 4th E.R.O.T.C. and commissioned 2nd Lt. May 25th, 1918, and assigned to 536th Engineers.

2nd Lt. William T. Carr

2nd Lt. William T. Carr was born July 13th, 1892 at St. Paul, Minn. of Scotch parentage. He graduated from Des Moines , Ia., grade and high schools and spent one year in "Animal Husbandry" course at Iowa State College 1910-1911. He was then associated with Evans Lloyd Fuel Co. of Chicago as Salesman. (Des Moines as Yard Supt + Salesman + with Plumb-Seymour Co of)
Lt. Carr enlisted in the Iowa Engineers , June 24th, 1918, entered active service July 16th , promoted to Sergeant Sept 21st, Sgt. 1st Class, July 14th, 1918, in 109th Engineers; entered 4th, E.R.O.T.C. at Camp Lee, commissioned 2nd Lt. N.A. May 25th and assigned to 536th Engineers.

2nd Lt. Hal V. Cunningham

2nd Lt. Hal V. Cunningham was born at San Angelo, Texas, Nov 6th, 1890 of Ameri can ancestry. He was educated in public and high schools of San Angelo and attended the University of Texas, one year in Academic work and three in Civil Engineering.
From August 1912 to June 1913 he was rodman and levelman on construction with K.C. M.&O. Railroad ; the next four years as levelman, plane-tableman, draughtsman, instrumentman and chief of party with U.S. Reclamation Service on Rio Grande, New Mexico and Texas project. He was then instrument man with City Engineering Department of El Paso. Was drafted into National Army and a signed to 315th Engineers, promoted to Corporal and Sergeant and assigned to 4th E.R.O.T.C. at Camp Lee. Was commissioned 2nd Lt. May 16th, '18 and assigned to 536th Engineers.

3/6/97

2nd Lt. Oliver Dee

2nd Lt. Oliver Dee was born at Fairchild, Wis., Jan. 19th, 1892. His father was of English and his mother of Scotch birth. He graduated from grade and high schools and was then employed as locomotive fireman and steam engineer.
March 24th, 1914, he enlisted at Angel Island , Cal., was promoted to gun pointer, Feb. 15th, 1915; observer March 23rd, 1915; sent to land fortification school from June 1915 to June 1916; promoted to Corporal June 26th, 1916; to Sergeant Oct. 22nd. 1917; sent to 4th E.O.R.T.C. and commissioned 2nd Lt. May 16th, 1918, and assigned to 53d Engineers

HISTORICAL -- TECHNICAL REPORT.

536TH ENGINEER SERVICE BATTALION.

March 10th, 1st Lieut. Samuel Stein, M. C. was attached to the Battalion as Surgeon under Par. 3. S. O. 114, G.I.S.D. Capt. Erskine having been sent to Hospital Center, Savenay, for disposition as Class "D"., because of chronic bronchial trouble.

March 20th, the following Special Order detached Major Arthur P. Christophel to St. Nazaire as Depot Engineer Officer:

March 20th, 1919.

Special Order
No. 79.

EXTRACT.

154. Major Arthur P. Christophel, 536th Engrs., (SB) is relieved from duty in the Engineer Depot at Gievres. He will proceed from Gievres to Montoir, (Loire-Inf), reporting to the C.G., Base Section No. 1, for duty as Depot Engineer Officer, vice Major D.C. Rhynsburger, Engineers, relieved.

The travel directed is necessary in the military service.

BY COMMAND OF MAJOR GENERAL HARBORD:

Official:
L. H. Bash,
Adjutant General.

W. D. Connor,
Chief of Staff.

Capt. Durrell accompanied the Major, Capt. Kinney E.D.O. at Montier-chaume having returned to his post. Lieut. Lyford remained at Montierchaume as executive officer.

In Major Christophel's absence Capt. Whitney assumed command of the Battalion. Company "B". was transferred from Capt. Durrell to 1st Lieut. Stanley Perry.

10 * On March 23rd, Corporal Love Ellis, of Company "A"., acting mess sergeant and pastor of the colored church, died in the hospital at Aix-les-Baine, having contracted pneumonia while on leave. Corporal Ellis' excellent spirit and leadership, his enthusiasm and good soldierly qualities make his absence a personal loss.to all who knew him and particularly to his own company.

Sergeants Herman Landwehr ("A".Co), John L. Swigert ("B". CO.) and Charles W. Hollman ("B". Co.) secured discharges to return to their civilian duties and were sent to the Replacement Depot at St. Aignan.

3/6/20

Work in the various depots continued as heretofore. Most of the men of the battalion being employed in loading and unloading cars and sorting material, a fair percentage working on technical details for which they were peculiarly fitted.

3/6/91

HISTORICAL TECHNICAL REPORT
Appendix No. 2
536th--ENGINEERS SV. BN.

Major Arthur P. Christophel

Major Arthur P. Christophel was born on August 25th,1881, at New Hampton, Ia. His father was American born, his mother and grand parents coming from Alsace-Lorraine. Major Christophel was educated in the grade and high schools of Milwaukee, Wis., and spent two years at Iowa State College. In 1901, he entered the service of the Allis-Chalmers Co. on construction work. Leaving their employ after three years, he engaged in real estate business for himself and a year later enlisted in the 1st. Battalion of U. S. Engineers. He was honourably discharged at the end of four years as non-commissioned officer, and qualified for commission as Lieutenant in the U. S. Engineers. (Volunteer) He then entered the Civil Service of the U.S. Engineers at Milwaukee, Wis., as Supt. of Construction on River and Harbor Work.
He attended the First Officers' Training Camp at Ft. Sheridan and Ft. Leavenworth, and was commissioned Captain, E.O.R.C. on Aug.10th, and assigned to 310th Regt. of Engineers as Commander of "D".Co. May 1st,1918 he was made Regt'al Supply Officer, and on May 18th, transferred to 536th Engineers as Commanding Officer, being promoted to Major May 24th,1918.

Capt. Alfred C. Whitney

Capt. Alfred C. Whitney was born January 1st, 1881, at Hyde Park, Ill. His ancestry on both sides being American from Pilgrim Times. His early education was in the public schools and Mechanical Arts High Schools of St. Paul, Min. Four years later he was graduated as Bachelor of Science in Engineering from the University of Minnesota. His next six years was spent in Railway and Steamboat Operation, he then became associated with a manufacturing Corporation in the construction of heavy business wagons, motor trucks bodies, railway expresstrucks, etc. He resigned Presidency of this Corporation to enter the 1st. Officers' Training Camp at Ft. Snelling and Ft. Leavenworth. Was commissioned Captain July 2nd. and attached to 310th Engrs. Sept 1st. One month later he was assigned to this Regt. as Topographic Officer; on January 1st, made Battalion Adjutant and May 1st, Commander of "D". Co. While Topographic Officer he mapped out 120 sq. miles adjacent to Camp Custer, for military maneuvres. May 18th, was transferred to 536th Engineers as Commander of "A".Co.

Capt. Royal S. Durrell

Capt. Royal S. Durrell was born March 2nd,1887, at Cheyenne, Wyo. His ancestors were of English, Irish, French and Spanish origin, but long settlement on this continent had the stock typical Yankee. He was educated in the grade and high schools of Chicago, Kansas City and Columbus, O.; at the Preparatory School at Columbus, and four years later was graduated as Civil Engineer from the Ohio State University. Four years experience in Railroad Construction and Maintainance was followed by three years of Municipal Engineering in sewer surveys, construction and design, and then by nine mths of River and Harbor Work with the U. S. Engrs. Cincinnati, Ohio. He was then Ast. Engineer, State Board of Health, for twenty months; specializing in construction, design and operation of sewers and sewerage disposal plants. Capt. Durrell then entered the commercial side of sewerage, as Engineer for the Sewer Pipe Manufacturing Ass'n.

3/6/92

Capt. Royal S. Durrell (contd)

Entering the 1st. Officers' Training School (Camp) at Ft. Benjamin, Harrisson, Ind., and Ft. Leavenworth, he was commissioned as 1st.Lt. Engineer Section, O. R.C. on June 12th,'17., and commissioned as Captain Aug.15th, and assigned to the 308th Engrs as Commander of Co. "F". He entered the Infantry School of Arms and Field Fortification Class at Ft.. Sill, March16th to April 15th, '18.; from then until May 17th, '18., he acted as Battalion Adjutant to the 308th Engrs, and was then transferred to the 536th Engineer Service Battalion and assigned to Co. "B". as Commander. On January 31st, 1918, Capt Durrell was married to Miss Dorothy A. Jones.

Capt. Walter W. Gruber

Capt . Walter W. Gruber was born at Stone Creek, Ohio, December20th, 1884, of American born parentage of German descent. He was educated in the Stone Creek Schools and graduated from Collegeof Engineers at the Ohio Northern University in 1905, with degrees of Civil and Electrical Engineer. In 1905 he was commissioned Cadet Majorand commanded the Ohio Northern Universityin 1st Battalion . In October 1905, he entered the Maintainance of Way Dept.of the Baltimore and Ohio Railroad , leaving this in Aug. 1908 to enter the U.S. Indian- Service on Irrigation Construction. In March 1911, he entered left the Service for Railroad Construction Work with the Kentucky & Indiana Terminal Railroad and two years later returned to the B. & O., being for two years employed with them on preliminary surveys and from June 1915 to May 1917, on railroad valuation, being in charge of surveys and valuationof 460 milesof main line railroad. Capt Gruber was for six years in the Ohio National Guard, being commissioned as 2nd.Lt. in the 4th-Regt January '17. He resigned in 1909 and entered the E.O.T.C. at Ft. Benjamin, Harrisson, May 11th '17, and was commissioned Capt. E.O.R.C. Aug.15th'17, and assigned to ~~to~~ command of "D".Co. 308th Engrs. commanding this until Company until his transfer to the 536th Engrs. Service Battalionon May 24th'18,from which day has commanded "C". Co. of this Battalion.

Capt. John M. Lawler

Capt John M. Lawler was born at Carrlton, Ohio.,Nov 22nd, 1889. His ancestry being Scotch- Irish. He was educated in the grade and high schools at Carrlton, and graduated from the Rose Polytechnic Institute. He was employed as Asst City Engr. at Cuyahoga Falls, and then as Asst City Engineer at Alliance,Ohio in January 1914. He was then for two years Tax Map Draughtsman and then Asst. Highway Supt. of Carrlton County, O., until May 15th,'17, when he was entered the E.O.T.C. Aug. at Fort Benjamin, Harrisson. He was commissioned First Lieutenant E.O.R.C. and assigned to the 308th Engrs. May 16th, was transferred to the 536th Engineer Service Battalion and on July 6th, made commander of "D".Co; and on July 6th, promoted to Captaincy.

Capt. Elsworth D. Erskine

Capt. Elsworth D. Erskine was born at Springfield, Ohio January 29th, 1870. He was of Scotch-Irish ancestry. Attended Mt. Union College and received degree M.D. from the Baltimore Medical College, (now the Maryland University) in 1893, and since that time has practiced Medicine and Surgery. He was commissioned 1st. Lt. M.R.C. April 24th, 1917, and reported at Ft. Benjamin, Harrisson, on Aug. 4th, for course of instruction. Sent to Camp Custer Aug 2nd,,and assigned to the 337th Infantry Med. Det. On June 1st,

'18 was transferred t

Capt. Elsworth D. Hawkins (contd)

On June 1st, 1918, was transferred to the Depot Brigade No 160, and on June 6th, assigned to the Medical Detachment of the 536th Engineer Service Battalion. He was later promoted to Captaincy on July 9th.

1st. Lt. Willard Ray Davis

1st, Lt. Willard Ray Davis was born at Logansport, Ind. Oct 19th, 1890, of Welsh parentage. He was educated in the Logansport public school and high schools and graduated from Purdue University as Mechanical Engineer. After this he spent a year in railroad shop work and six in automobile shop work; then six years as Asst. Engineer in an Artificial Gas Co. At the end of this period he spent three months designing foundries and foundry equipment, and afterward joined the the Faculty of Purdue University as Instructor of Mechanical Draughting and Descriptive Geometry. Lt. Davis drilled two years as Cadet at the University holding commission as 1st. Lt. He entered the E.O.T.C. at Ft. Benjamin, Harrisson May 13th, 1917; was commissioned 2nd. Lt. June 19th, '17 and assigned to the 310th Engineers May 19th, 1918; and was later transferred to the 536th Engineers and on May 24th promoted to 1st. Lt. N.A.

1st. Lt. Darrt H. Lyford

1st. Lt. Darrt H. Lyford was born March 19th, 1888 at Minneapolis, Minn. His father was a New Hampshire Yankee; his mother of Dutch American descent but born in Minnesota., He was educated in the grade and grammar schoolsand high school of Minneapolis and graduated as Electrical Engineer from the University of Minnesota in 1911. He was employed successively in public utilities appraisal for the Westinghouse Electrical and Manufacturing Co., at East Pittsburg, in their apprentice course from Sept1911, to Feb. 1913, and then as Asst. to the Master Mechanic of the Cleveland Railway Co. of Cleveland, O. Feb 1913 to Dec 1913, and Asst. Commercial Engineer of the Great Northern Power Co. Duluth, Minn. from Dec 1913 to April 1914. The next year and six months he spent he spent with the Public Utilities Commission at Washington, D.C. as Engineer of Appraisal Work, and then returned to the Westinghouse Electricake Manf'g Co. this time at ST. Louis Mo. as salesman of Power Plant and Railway Apparatus. He entered the O.R.T.C. at Ft. Riley, Kansas, May 17th, '17 and was commissioned 1st. Lt. E.O.R.C. and assigned to the 310th Engrs, Camp Custer. May 18th, he was transferred to the 536th Engineer Service Battalion and appointed Acting Battalion Supply Officer and later as First Lieutenant of "A".Co.

1st. Lt. Stanley Perry

1st. Lt. Stanley Perry was born at Butler, Ky. of Colonial ancestry of French, English, Irish and German derivation. He was educated in the common and high schoolsof Butler and for a year in the Cincinnati Technical School. In 1908 he joined the Co-operative Electrical Schoolof Cincinnati,O., graduating with the degrees of Electrical Engineer. He spent two years at House Carpentry, and then five years with the Bullock Electrical Co. of Cincinnati in Miscellaneous Foundry and Machine Shop assembling and testing. He was then employed as Construction Engineeroff the Dayton,O. Power and Light Co, and then two years later as Factory and Maintainance Engineer of the Delco Co. at Dayton, Ohio. Hee entered the 1st.

3/6/94

He entered the first R.O.T.C., May 15th 1917 at Ft. Benjamin Harrision. Was commissioned 2d Lt. of Engineers, R.C.R.C. Aug. 27th, and assigned to the 308th Engineers. Transferred to the 536th Engineer Service Battalion on May 15th and promoted to First Lieutenant Engineers N.A. May 23rd, 1918.

THE PHOTOGRAPH

Company 22, 6th Battalion, 163rd Depot Brigade, Camp Dodge, Iowa.

This Company probably enjoys the distinction of being the only organization in the Depot Brigades of the Army of the United States entirely officered by Colored men. It has had an enviable record in the training of recruits and is now being retained as a demobilization unit for discharging overseas troops. Five of the six officers are applying for commissions in the Regular Army and are attending a special school for that purpose.

.....

THE OFFICERS.

Captain C. C. Cooper of Washington, D.C., who is in command of the company, is a product of the Regular Army, having seen over twenty years service in the Spanish-American War, in the Philippines, and in Mexico. He has served in the cavalry, infantry, and medical department; he was the only one to receive a commission from the last named branch of the service at the Fort Des Moines Officers Training camp. He is a native of Indianapolis, Indiana and a product of the schools of that city. He was in command of Co. "M", 368th Inf., from its organization until July, 1918, when he was returned from France on account of ill-health incident of the service. He has been in command of Co. 22 since Oct. 1, 1918 and is the Morale Officer of the 6th Battalion.

.....

1st Lieut. Thomas M. Gregory was also commissioned at Fort Des Moines. He had been Assistant Professor of English at Howard University since 1910. He was a member of the Committee which with the cooperation of the N.A.A.C.P. was instrumental in having the War Department establish the Fort Des Moines Training camp. He was with the 349th Field Artillery from Nov. 1917 to June 1918, when he was transferred to the General Staff, Washington, D.C., in the Bureau of Military Intelligence; in August he was assigned as military instructor at the S.A.T.C. at Howard University, and since Oct. 1st, 1918 has been at Camp Dodge. Iowa.

.....

2nd Lieut. Errol Stanley Horne of Brooklyn, N.Y., has seen five years service in the 24th Inf. and the Quartermaster Corps. He served in the Phillippines, in Mexico, and was Sergeant Major of the 367th Inf. (THE BUFFALOES). He was commissioned August 26th, 1918.

.....

2nd Lieut. Joseph E. Oliver, was 1st Sergeant of Hq, Co. 368th Inf. at Camp Meade, Md. and was commissioned at Camp Meade, June 1st, 1918. He was an instructor at the 4th O.T.C., 92nd Div., Camp Dodge, Iowa, and at the Central O.T.C. Camp Pike, Ark., June 15, 1918 to August 15, 1918.

.....

2nd Lieut. William B. Hall of Washington, D.C., was a senior in the Pharmaceutical College of Howard University, a graduate of the Dunbar High School when assigned to the 368th Inf., Camp Meade, Md., Nov. 18th, 1917, where he was a corporal. Later transferred to the medical detachment where he had charge of the prescription work, and was sent to the 4th O.T.C. at Camp Dodge, Iowa, being commissioned at Camp Pike, Arkansas.

.....

2nd Lieut. Willis C. Dickerson of Philadelphia, Pa., finished Mauchchunk Pa., high school, and attended Howard University, Washington, D. C. Was assigned to 368th Infantry, Camp Meade, Md., ~~Nov.~~ 19 Oct. 1917. Promoted sergeant, Supply Company of that regiment. Attended 3rd Officers' Training Camp, at Camp Meade. Commissioned 2nd Lt., Infantry, June 1/1918, and sent to Camp Pike, Ark., as Instructor, 4th Officers' Training Camp.

HEADQUARTERS NINETY SECOND DIVISION
AMERICAN EXPEDITIONARY FORCES A.P.O. 766
4 January 1919.

2/26/22

From: The Commanding General.

To: The Commanding General, S. O. S.

Subject: Incompetent Officers.

1. Under the provisions of par. 1V, G. O. 131, General Headquarters, c. s. Captain Spahr H. Dickey, 351st Machine Gun Battalion, is relieved of assignment to and duty with this Division and pursuant to Par. 4, S. O. 2, these Headquarters c. s. has been directed to report to the Commanding General at BLOIS.

2. Captain Spahr H. Dickey, 351st Machine Gun Battalion, is unfit for combat duty; he lacks the necessary qualities in that he has not the capacity, does not possess the qualifications of an Officer and is inefficient. To continue him on duty with a combat division would be a detriment to the service.

3. Report from the 351st M. G. BN., in the case of this officer, attached.

J. B. ERWIN,
Brigadier General, U. S. A.
Commanding.

A5-

Operation report of the Medical Department, 368th Infantry, for period Sept. 25-30

1. Organization and equipment. The Sanitary Detachment was divided into four sections, viz., three Battalion Sanitary Detachments, each consisting of one Battalion Surgeon, one junior Medical Officer, one Dental Officer with the first and third battalions, one Sergeant Medical Department and thirteen enlisted men; and one Camp Infirmary party, consisting of one Dental Officer and one Sergeant First Class, Med. Dept., and five enlisted men. Each Battalion Detachment was equipped with one combat equipment, Med. Dept., a supply of new Red, White, and Blue Front Line Dressings, anti-tetanic serum, 100 C.C. Luer Syringes, blankets, Chlorinated Lime Tubes, Thomas, ladder, and chicken wire splints, all of which was carried on Medical Carts, one to each Battalion. The Rifle Companies, Headquarters and Machine Gun Companies were given their supply of litters and these were signed for as follows: five to each Rifle Company, and six to Headquarters Company. The Camp Infirmary Party was equipped with one Camp Infirmary, Med. Dept., and a reserve stock of the articles mentioned above. These were transported on a fourgon supplied by the director of ambulance companies of the 317th Sanitary Train. One of the horses had to be shot later because it developed paralysis. The Surgeon was in supervision of the whole and was not permanently attached to either section. The Medical Department thus went into action fully equipped which was due largely to the foresight of the Division Surgeon, the Sanitary Inspector, and Lieut. Cheney, Med. Corps.

10-6

2. Approach to the ARGONNE. This was accomplished on the 25th and 26th but presented no points of interest. Several men were taken sick and were tagged and left at collecting points to which ambulances were later directed. The straggling was rather marked but was not due in many cases to illness.

10-1-52

3. Action in the ARGONNE, 26th September, 1918.

(a) The Second Battalion went into action on the 26th of September. The Battalion Surgeon, 1st Lieut. William A. Harris, M.C., established his 1st Aid Station in a bomb proof structure on the LA HARAZEE - VIENNE-le-CHATEAU ROAD, 1½ kilometers East of VIENNE-le-CHATEAU, which, in addition to being near the Bn. P.C., had the advantage of being a central point to all the trails and too, the two main roads leading into the Boche or Forward Sector. Two enlisted men of the Medical Department were attached to each company to dress all wounds on the spot and carried into action an ambulance box filled with dressings in addition to their belts. The companies were supposed to take their litters but did not do so very often. The actions of the companies of this battalion were so erratic on this day that it was impossible to develop a logical system of advance for the Bn. Aid Station. However the Bn. Surgeon attempted to maintain touch with the right flank of the Bn. and advanced and retired several times while the Surgeon did the same with the left flank. There was but one casualty on this day- a man in Co. "F", evacuated with difficulty by litter bearers from Co. "F" and the Surgeon through uncut wire.

(b) 27th September, 1918. Throughout this day Lieut. Harris kept his Aid Station mobile always along side the Bn. P.C. The casualties numbered forty-four, of which fifteen were in Company "F", four in Machine Gun Company, four in Company "H", one in Company "G", three in Company "E", six in Company "K", of which four, including 2nd Lieut. Walter Scott were gas suspects and claimants, three in Company "I". One gas suspect was in Company "L"; two other officers, Captain Peeks and Lieut. Young. The 3rd Battalion Aid Post was established ½ kilometer North of VIENNE-le-CHATEAU on the BINARVILLE ROAD. Patients were evacuated from the Battalion Aid Post by ambulances direct to French hospital and by a relay of litter bearers squads from the Bn. Aid Stations to the Regimental Infirmary at SAPPICOURT in intervals when the ambulances were absent. The litter bearer squads came from the band. At the 1st Aid Station each wounded man was given an injection of 1,000 units of anti-tetanic serum under asceptic conditions, his dressing (applied in the trench by the sanitary soldier) inspected and renewed if necessary and given a cup of beef tea. The Surgeon personally inspected the work from the advanced groups to the rear several times during the day.

(c) 28th September 1918. Ninety cases were seen by the Battalion Surgeons, of which twenty-five were gas suspect cases. The Surgeon states gas suspects because he did not see a veritable case of gas suffocation throughout the period. The Bn. Surgeons, however, fulfilled their duty in tagging these cases and sending them back to the Infirmary as they followed instructions. Numbers of these cases were kept

under observation at Infirmary and then returned to duty, but quite a number were picked up by ambulances along the road which they had been directed to proceed to the Infirmary and some were sent from the Infirmary as the result of a scare at SAPINIERE in the absence of the Surgeon. The casualties on that date were as follows:

Company "E"	13 cases	Company "D"	1 case
Company "F"	6 "	M. G. Co.	4 cases.
Company "G"	8 "	351 M.G. Bn.	1 case
Company "H"	5 "	San. Det. 368 th	1 "
Company "I"	5 "	Scouts	1 "
Company "K"	3 "	325th Signal Bn.	1 "
Company "L"	2 "	Co. unknown	2 cases.
Company "M"	7 "		

10-6

1st Lieut. Thomas E. Jones, MC, Bn. Surgeon, 3rd Bn. advanced to Aid Station to the trench occupied by the Bn. and remained there until after the Bn. broke, and rendered cool and efficient service.

(d) 29th Sept. 1918. On this date the 1st Bn. was in advance. The Bn. Surgeon, 1st Lieut. James M. Ponder started with his Aid Station in the Hager Trench. An advance on BINARVILLE was made by Major Merrill. The wounded were cared for at the Bn. Aid Station and evacuated by trench back to the BINARVILLE ROAD. The companies of this Bn. went into action not fully equipped with litters. This is mentione because the Surgeon is in receipt of a complaint from Capt. Marchbanks who, amongst other things, states that the wounded were not evacuated from the field to the Bn. Surgeon. This is the duty of the litter bearers of the company. The Sanitary Soldiers on duty with each company are there to dress the wounds. If they are used for litter bearing long intervals may elapse in which men would remain undressed. It would require a Medical Personnel double its present strength to supply the litter bearers for each company. The Surgeon was with parts of each battalion each day when they went into action. He personally saw that the wounded were being excellently dressed by the Sanitary Soldiers attached to each company, who in many cases stayed at their posts after the companies had fled. The Aid Station of the 1st Bn. remained at its post all this night. On the 29th September 1918 there were 24 cases under observation of which 13 were casualties and 11 gas suspects. The casualties were distributed as follows: Company "E", 1 case; "F", 1 case; "G", 1 case; "I", 2 cases; "L", 3 cases, "M", 1 case; Supply Co., 4 cases.

(e) 30th September 1918. Casualties were 15; gas suspects 4. Casualties were distributed as follows; Company "A", 2 cases; Company "H", 1 case; Company "C", 1 case Company "D", six cases; Company "K", 2 cases; Machine Gun Co., 1 case.

(f) 1st October 1918. One gas suspect.

4. The actions of 1st Lieut. William A. Harris, MC, and 1st Lieut. Thomas E. Jones, MC, were of a nature that calls for special mention, as does that of Pvt. Thomas H. Davis, Med. Dept. It can be noted that the Medical Dept. functioned surprisingly well under the disadvantage of the erratic movements of the companies. This is especially true of the Medical Officers and men of the 2nd Battalion, who on one day to my knowledge changed and formed new stations six times. On one occasion, Lieut. Harris was abandoned and exposed to the fire not only of the enemy but of our own men, but persisted until he had finished his work. Lieut. Jones at his personal risk brought in a wounded man. Private Thomas Davis exposed himself to machine gun fire at BINARVILLE to help bring in a dying man. Special reports will be made of these and other noteworthy actions.

(Signed) Jackson S. Lawrance,
Major Medical Corps,
Surgeon 368th Infantry.

12

34-4-139

IN FRANCE--PERIOD FROM JUNE 19, 1918 to FEBRUARY 1919.

This period may be divided as follows:

At Training Area in Haute-Marne	June 25 to August 12, 1918
In the Vosges	August 15 to Sept. 16, '18
In the Argonne	Sept. 25 to Oct. 6, '18,
Metz Front	Oct. 10 to Nov. 11, '18

The official date of arrival of the Division in France was June 19, 1918. The journey overseas occured without mishap, most of the units sailing from Hoboken, N.J., between June 1 and June 15, 1918. After arriving in France, each outfit remained at Brest for three or four days, after which the Divison moved into its training area, at this time Division Headquarters and the Office of the Division Surgeon were located at Bourbonne-le Bains, while the other units were distributed about in the surrounding towns.

During the training period, apparently, the main end which Division Headquarters desired that the medical department effect was the prevention of association of the colored officers and soldiers with the

French women as shown by repeated instructions to all medical officers.

One of the most insulting outrages, perpetrated on colored officers, through the medical department occured at Corre, France. The acting Battalion Commander of the 3rd Battalion of the 367th Infantry ordered a veneral inspection of just the officers of his battalion one Sunday afternoon, during the latter part of July 1918. Major Robert Conard, M.R.C., white, made the inspection. To order such an inspection was a violation of one of the oldest customs of the service, as well as of an officers commission, that is, that an officer is always a gentleman. It is proper to state that not a single case of veneral disease was found at this inspection. Lieutenant Walter J. Jackson, M.R.C. told me that Major Conard remarked to him that he "made the inspection under protest".

IN THE VOSGES

While the Division was on this front the distribution of the various Hospitals were as follows: The 365th Field Hospital was at Rann L'Etape, the 366th Field Hospital was at St. Die, at which place Division Headquarters was located and the 367th Field Hospital acted as an evacuatting the wounded at the various aid stations was deserving of the greatest commendation; and especially did they do remarkable work relative to the evacuation of the wounded in spite of the mountainous nature of the country. During this period Captain John Q. Taylor was made Acting Consultant on Disease of the Eye, Ear, Nose and Throat, and Lieut. A.H. Wilson was made Assistant Divisional Urologist. A white First Lieut. was made Division Dental Surgeon, although there were several colored dentists with the Division of higher rank and who had been in the service for a greater period of time. Among the colored dentists were graduates of Northwestern University Dental School, University of Pennsylvania Dental School and other Dental Schools of equally as high standing. When the Field Artillery joined the Division a colored Dental Captain was made to serve under this white First Lieutenant

341-4-140

of the Dental Corps, because of his appointment as Division Dental Surgeon, which was contrary to all regulations of the Army. It is however needless to state that the white Dentist was promoted but that did not occur until after the armistice and yet he was ranked by the Colored Captain in the Dental Corps. While in the Vosges a Surgical Team, composed of three white medical officers and two nurses joined the Division as well as a Mobile Field Laboratory, the personnel of which was composed of two white 1st. Lieutenants and three white enlisted men.

34-4-141

On the 15th of August I was sent to the front to make a medical survey of the 61st Infantry prior to the arrival of the 367th Infantry, which organization was to replace the 61st on that front. The Headquarters of the 61st was at Moyenmoutier, and upon my arrival I applied to the Billeting Officer of the 61st Infantry for a billet and he stated that there were no more billets in town although such was not the case. This in ~~after the Division Field Hospital 366 ordered~~ spite of the fact, that I carried a letter from the Division Surgeon of the fifth division to the regimental Surgeon of the 61st Infantry requesting that every facility be given me. I encountered the same difficulty in obtaining food in most places where the 61st Infantry units was stationed.

After the Division left this area, Field Hospital 366 was ordered to remain in operation at St. Die until the Division Surgeon of the incoming Division (81st) said that they were able to look after the sick and wounded of their Division. Therefore Field Hospital 366 remained behind and for ten days took care of the sick and wounded white soldiers of the 81st Division (who were for the most part, from South Carolina). At this time there was an epidemic of influenza among the men of the 81st Division. In St. Die, because of the general coarseness and roughness

of the 81st Division men, the French civilians repeatedly told the colored officers and men of the 366 Field Hospital how they regretted the departure of the 92nd Division and how they disliked the 81st Division. Beeause of the fact that the 81st Divison was composed to a large extent of Southerners there were many alterations between the soldiers of the two divisions. Upon the arrival of the 81st Division Medical Department, which was without medical equipment, the officers of their Field Hospitals wished to take all of the equipment of Field Hospital 366, just because they ordered it. They were however informed that their officers should have seen to it that they were equipped before coming to the front.

34-4-142

During the entrainment of Field Hospitals 365 and 366 at Raon L'Etape, on the night of September 26, 1918, Lieut. Col. David B. Downing, after ordering some colored officers from one of the compartments of the train not only used coarse and abusive language, but kicked the food which they had placed on the ground with his foot.

IN THE ARGONNE

During this period only one of the Field Hospitals was in operation and that was field Hospital 365 which was opened at St. Menehould, and remained in operation while the Division was on this front.

On October 1, 1918, while the Sanitary Train was at Les Islettes Captain John Q. Taylor and myself were appointed the "Shock Team" of the 92nd Division. The duty of the shock team was to treat all of the severely wounded of the Division and were the only officers authorized at any of the hospitals to do blood transfusions in cases that could not be saved otherwise--they were also in similar cases the ones to do infusions with gum acacia solutions, which were used as a substitute for blood.

On the afternoon of October the 1st, 1918, I went up forward to the Triage Hospital of the 77th Division , which was at La Chalade, and there spent the night. The object of my mission was to observe the methods used at that hospital in treating "Shock" cases. This was the only place where I received the courteous treatment, that should be accorded officers under all circumstances, by the officers and enlisted men.

On or about the 6th of October, 1918, Lt.Col. Boyer was transferred from the Division and Major Jonas S. White was made Division Surgeon. This change was one for the better as Lt. Col. Boyer, never praised or commended good work, but was always dissatisfied most of the time with all the work that was done. Major White praised good work at all times and this raised the spirits of the officers and men tremendously. It was under Major White that the colored officers who were promoted in France received their promotions.

34-4-143

METZ FRONT----MARBACHE SECTOR.

During the movement of the Division from the Argonne to the Marbache sector, the Sanitary Train entrained at Givry. Because three colored officers rode in the same compartment with four white officers (1st. Lieutenants), from Givry to Nancy, three of these white Lieutenants, namely, Lts. Atherton, Springer and Greany wrote a letter to the Division Headquarters, complaining that they were forced to ride in the company of Negroes, namely: Capt. John Q. Taylor and Lieuts: English N. McLaughlin and Louis T. Wright.

On this front the Office of the Division Surgeon was at Marbache, Field Hospitals 366 and 368 combined and their personnel conducted the so called "Triage Hospital " of the 92nd Division. A "Triage" Hospital is a hospital where all of the sick and wounded of a Division are concentrated. Serious cases are treated here,, while less serious cases are sent to hospitals farther in the rear for definitive treatment.

The assignments of the Hospital personnel were as follows:

Lieuts.:Arthur M. Curtis and Fred R. Slaughter, Receiving Ward; Lieut. Homer E.Nash,Evacuation; Lieut. James L. Owens,Office and Paperwork,, Lieut. Louis T. Wright, Surgery and Shock; Lieuts: Royal W. Grubbs, English N. McLaughlin and Rufus S. Vass,Medical Wards;Capt. John Q. Taylor,Eye,Ear,Nose and Throat Ward and Shock; Lieut. Clarence M. Gloster,Neurological Ward, and Lieut. A. M. Wilson, Venereal Ward. Lieut. Bailey had charge of all the wards for gassed cases and his work was especially worthy of commendation.

Soon after the hospital opened, a group of white nurses were assigned to the Surgical and Medical wards and they remained with the hospital until it closed; and it is but proper to state that their work was of the highest grade throughout. One of them, Miss Kreps, not only worked over hours but when the hospital caught on fire about the middle of December, the writer found Miss Kreps in one of the Surgical wards by herself trying to drag out beds containing patients so as to save their lives. The heroic efforts of Captain John Q. Taylor saved the hospital from being destroyed. As it was no one was injured.

At first the writer was doing all of the work on the surgical wards and as the wounded began to pour in he was assigned two assistants, one a colored officer , Lieutenant Edgar A. Draper, and the other a white officer, Lieutenant William P. Greany. Soon after his assignment Lieutenant Greany wrote a letter to the Division Commander requesting that he be transferred to another division so that he would not have to come in contact with colored officers. He stated that he was born in Alabama, that he was educated at Georgetown University, and that he was not accustomed to coming in co ntact with colored men on such terms as he was having to do in the 92nd Division. His letter was returned with an endorsement stating that "in cases where friction occures between two officers, the trouble was usually on the part of the complaining officer" and that if he failed to properly perform his duty, that disciplinary action would be taken."

34-4-144

During the writers entire time at the hospital he did not see either General Ballou of Brigadier General May on any of the wards, while Brigadier General Barnum visited the hospital almost daily and personally saw each man of his Brigade that was wounded.

While on this front the Ambulance Companies operated for the first time, as this was the first time that they were supplied with ambulances. During the entire drive the wounded were evacuated by ambulance companies, the Commanding Officers of whom were colored.

34-4-145

The 92nd Division Triage Hospital opened on October 10th 1918 and remained opened until November 24th 1918. It was located at Millery a small French village on the road between Nancy and Pont-a-Mousson, a distance of approximately fifteen kilometers from the front. While in operation over 7000 cases were treated. Over 200 cases of pneumonia were treated here and the mortality was only 8% which is probably the lowest mortality rate of any field hospital that was in France. No cases of tetanus were reported from the Division which is indicative of the thoroughness with which antitetanic serum was used by the medical officers of the regiments as well as those of the hospitals. Approximately sixty cases of trench foot occured-- a disease which in other commands sometimes disabled thousands of soldiers. According to a fairly accurate estimate it is certain that not more than 100 cases of psychoneurosis (shell-shock) occured during the entire stay of the Division at the front which is more than a fair index of the stability of the Negro's central nervous system.

The Chief Surgeon of the American Expeditionary Forces and members of his Staff visited the hospital, and it was their opinion that no Field Hoppital's Shock room surpassed that of the 366th.

Paragraph 5, of a memorandum to "Unit Surgeon, is as follows: "I would like to call attention of the medical personnel of this division to the fact that a great many favorable comments have been made on the handling of the sick of this Division while they are in transit and under treatment. A great deal of this praise

is due to the hearty cooperation on the part of the Medical Department of this Division in instituting and enforcing the measures recommended. The Hospital is visited almost daily by the French and American Medical authorities to observe and comment on the very thorough and painstaking care that is being given the sick of this command". An extract from Weekly Bulletin Number 33, an official publication of the Chief Surgeon's Office, American Expeditionary Forces, dated November 25, 1918, is as follows: "Influenza"--Effective Cubicle Isolation (in italics) Field Hospital 366, 92nd Division, used sheet cubicle system about beds and masks for patients and attendants so consistently and thoroughly that none of the attendants, doctors or orderlies acquired influenza, although the wards were often full of both diseases.

34-4-146

Below is another interesting communication:

HEADQUARTERS NINETY SECOND DIVISION
OFFICE OF DIVISION SURGEON
APO 766 - AEF
18 November, 1918.

MEMO TO ALL MEDICAL OFFICERS, 92ND DIVISION:

1. The following letter is circulated among the medical officers of this Division so that all may realize how thoroughly their good work is appreciated:

****

HEADQUARTERS SECOND ARMY
AMERICAN EXPEDITIONARY FORCES
OFFICE OF THE CHIEF SURGEON

November 15, 1918.

From: Chief Surgeon, 2nd Army

To: Division Surgeon, 92nd Division, AEF

Subject: Field Hospital at Millery.

1. I desire to express my admiration and appreciation of the splendid hospital organized and administered by the Medical Department of the 92nd Division at Millery.

Your Department has received most favorable comment by the Army Commander, the Sanitary Inspector, Second Army, Chief Medical Consultant, Second Army, and the officers in charge of the section in Sanitation in the office of the Chief Surgeon, American Expeditionary Forces, and of all

medical officers who have visited the institution.

The transportation and hospitalization of the battle casualties and respiratory diseases have been accomplished in accord with the principles of military surgery and preventive medicine, which reflects the intelligence and training on the part of the officers and enlisted men of the medical department of the 92nd Division in which pride may be justly felt.

C.R. Reynolds,
Colonel, Medical Corps, USA

CRR/1/jlw

34-4-147

J.S. White,
Major, Medical Corps, USA
Division Surgeon.

Ammunition

Captain Dawson was made Surgeon of the 317th ~~Sanitary~~ Train when Major Howard, White, was transferred from the train. Major Howard was transferred when Major Dean, a colored man, was made Commanding Officer of the Ammunition Train.

Much has been written lately concerning the prevalance of Veneral Disease among Negroes. On this point an extract from the Medical History of the 367th Infantry during the months of July to December inclusive is both interesting and illuminating;

Following tabulation shows that for a command of approximately 4000 men, the veneral problem has been fairly well under control.

MONTH 1918	NEW CASES	NO PER 1000 STRENGTH	VENERAL PROPHYLAXIS GIVEN
July	2	54/100	36
August	8	2-24/100	23
Sept.	1	25/100	10
October	3	7/10	3
Nov.	3	7/10	15
Dec.	2	5/10	16

The same writer also states that when he first joined the regiment that there were about 100 syphilitics under treatment, which is a percentage of approximately 2½ %. Major Frederick F. Russell found the hospital admission rate per thousand in white troops of the American Army to be for the year 1911 approximately 44/30. Morrow estimates that approximately ten per cent of the inhabitants of New York City

to be syphilities, while Gerrish states that fifteen to twenty per cent of the inhabitants are afflicted with ~~xyphilitic~~ ~~xyphilitic~~ syphilis. Major White stated to Mr. Ralph Tyler that the veneral rate for the entire 92nd Division was less than 1/2 of one per cent. This includes not only syphilis but also gonorrhea.

34-4-148

The excellent work of the Dental Officers has well as the enlisted men is worthy of the highest commendation. At the Battalion Aid station the Dentist rendered wonderful aid in administering first aid to the wounded, and occupied positions of danger equal to those occupied by Medical Officers. Major Conard of the 367th Infantry, in the Medical History of the Command, states "they performed ~~the~~ a most useful function and unquestionably prevented much disability from defective teeth and other conditions within their province. The work of the Dental Surgeons with this organization was the subject of much favorable comment at Camp Upton and they have ~~under~~ successfully under Field conditions rendered valuable assistance in the operation of aid stations in forward positions. The same writer, ~~speaking of him~~ concerning the work of the medical officers under him, states: "the plan of organization of the regimental medical personnel which ~~is being~~ has been followed throughout since leaving Camp Upton, has been that of three Battalion groups. Two Medical Officers , one Dental Officer, one Sergeant, and fourteen Privates were charged with the duty of looking after each Battalion. This plan of organization was designed to put the individual medical officer in a position of personal responsibility, and since practically all the professional work of the organization has been done by these officers, it is proper to say that their responsibility has been ~~duuixhyxthexxxaffiaxxxyxixxix~~ well and capably met and that their work has been conscientiously and thoroughly done.

After the Armistice was signed Lieut. Col. David B. Downing, when about to be transferred from the Division, to the S.O.S., requested the colored Commanding Officers of the Ambulance Companies, to furnish him with letters stating that

he had been fair and square in his dealing with every one in the Sanitary Train. This the colored officers refused to do and he was transferred from the Division.

Promotions:

The first medical officers to be promoted in the Division while it was in France were not promoted until the latter part of October ~~1918~~, and the first half of November, 1918, and during this time approximately ten more colored medical officers were promoted from the rank of First Lieutenant to that of Captain. It is proper to state here that others, who would have otherwise been promoted, were not because of their age; it being an A.E.F. rule to promote only men of the medical department who were above the draft age. Only one officer under the draft age was promoted. But this number of promotions did not in any way suffice to give adequate rank to men who were and who had successfully held positions in the Medical Department, which entitled them to higher rank. No Officer in the Division was promoted to a Majority. Captain H. M. Ward, who was transferred from the Division, was after his transfer promoted to the rank of Major while he was back in the S.O.S.

64-4-149

Policy as to Leaves:

The withholding of leaves from officers was one of the worst discriminations in the Medical Department. The A.E.F rule was that an officer was entitled to a leave of seven days following each four months service. Not more than approximately six of all the colored medical officers were granted leaves, although the Division was in France for almost eight months. And after the armistice was signed there was no military exigency that could reasonably excuse the withholding of ~~such~~ leaves. Practically every white officer in the Medical Department of this Division was granted a leave ~~fro~~ when the time for it came.

Distinctions:

Captain T.E. Jones, who was on duty with the 368th Infantry, was awarded the Distinguished Service Cross for extroardinary bravery in action while his regiment was in the Argonne. Captain James A. Kennedy, who was

34-4-150

on duty with the 366th Infantry, was awarded the Distinguished Service Cross, for "conspicous gallantry under fire", while with his regiment during the Metz drive. Lieutenant Edward W. Bates, who was on duty with the 367th Ambulance Company was awarded the Distinguished Service Cross for establishing a Dressing Station under heavy enemy fire near Atton on the Metz front. It is a well known fact that it requires a highest degree of moral courage to serve as a Non-combatant with fighting troops at the front. Several writers have stated that during the recent war, casualties in the medical department have been second in number only to those of the infantry.

Casualties:

The following medical officers were wounded during the Divisions' activities at the front:

Captain	Louis T. Wright	gassed	Vosges
Lieut.	James L. Martin	gassed	Vosges
Lieut.	George C. Booth (Dental Surgeon)	gassed	Vosges
Lieut.	William Strong	gassed	Marbache Sector
Lieut.	John L. Zuber	gassed	Marbache Sector

A.E.F Society:

At Mallory an A.E.F. Society of colored medical and dental officers was formed early in November. The idea was conceived by Lieut. Arthur M. Curtis of Washington. The aims of the organization are as follows:

1. To do everything possible so that colored medical officers will be retained in the army.

2. To investigate and report on subjects relative to sanitation in colored communities.

3. To foster the comradeship that had grown up among the officers while in the service.

The following officers were elected: Lieut. Arthur M. Curtis, President; Captain A.B. McKenzie, Secretary and Treasurer. Executive committee: Captain E.D. Ridgeway, Chairman, Captains Sherman B. Nickman, Charles M. Garvin, Louis T. Wright, and Lieut. Hudson J. Oliver.

Investigations Carried out by Colored Medical Officers:

Slow Intravenous Injection of Antiserum to Prevent Acute Anaphylactic Shock. Julian H. Lewis, * Ph.D.,M.D.,First Lieutenant,M.R.C.,Journal of the American Medical Association, Volume 72,Number 5,Feb.1, 1919,page 329.

Intradermal Vaccination Against Smallpox. Louis T. Wright,M.D.,First Lieutenant,M.C.,Journal of the American Medical Association ,Volume 71, Number 8, August 24, 1918,page 654.

Lieutenant A.D.Browne,M.C., in a letter to the Surgeon General made suggestions relative to the more effective handling of venereal cases, to which he received a favorable reply.

* Lieutenant Lewis was commissioned but never ordered to active duty. It is said that he was slated to go across with a white Chicago Unit, but was not sent because he was colored.

OFFICE OF THE SURGEON, 367TH INFANTRY,
A.P.O. 766 American E.F., December 28, 1918.

A 4

From: The Surgeon, 367th Infantry.

To: Division Surgeon, 92nd Division.

Subject: Medical History of Command.

also B

I. Complying with Memo., Office of the Division Surgeon, 13 November, 1918, submit the following report of the medical history of the 367th Infantry:

1. CAMPS OCCUPIED AND DATES:

Camp Upton, N.Y., Nov. 1, 1917- June 9, 1918.
USS American, June 10, 1918- June 18, 1918.
Pontanezan Barracks (shelter tent camp) near Brest, France, June 19- 21, 1918.
En route to training area, Dept. Haute Saone, by train, June 22-25, 1918.
In billets at Preigny, Montigny, and Vitrey, Haute Saone, June 25- 30, 1918.
In billets at Cerre, Passavant, Martineville and Regneville, July 1- August 12, 1918.
In billets at Lepanges, Fays, Beaumenil, Fimenil, Herpilmont and Laval, Dept. Vosges, August 13- 22, 1918.
On line near Moyenmoutier, Vosges, August 22- Sept. 18, 1918. Reserve battalion billeted at Etival.
In billets at Carelaux, Vosges, Sept. 20- 2, 1918.
In billets at Villers en Argonne, Vieil Dam Pierre and Ante, Dept. Marne, Sept. 23, 1918.
Bivouac, Camp des Roumains, in Forst de Argonne, 3 miles N. of Passavant, Dept. Marne, Sept. 24, 1918.
Bivouac, at La Noue, near les Islettes, Sept. 25- 30, 1918.
Camp Beuniat, 2 miles N. Ste, Menehould, Sept. 30, Oct. 4, 1918.
Camp des Roumains Oct. 4- 6, 1918.
Bivouac near Villers Daucourt, Night of Oct. 6, 1918.
Bivouac at woods South of Saizerais, Dept. Meurthe et Moselle, Oct. 8- 11, 1918.
Billeted at Jaillon, Francheville, Villey St. Etienne, Oct. 12-24, 1918.
On line at Vandieres sector, Oct. 24- Nov. 11, 1918. Reserve battalion at Jezainville. Occupying Montauville, Norrey, Villers sous Preny, Vandieres and line west of Moselle, near Vandieres, to near Preny.
After declaration of armistice, same sector, until Dec. 6, 1st battalion at Novoant, Lorraine. 2nd Battalion at Montauville, 3rd Battalion at Pont a Mousson and on support line west of Norrey.

5. VENEREAL DISEASE AND PROPHYLAXIS.

This problem was an appalling one at the time the writer first joined the organization. There were about 100 active syphilitics under treatment. The number of inactive cases was never determined, but was very large. A plan to survey the regiment with this in view was never carried out, as necessary laboratory facilities were not available in the limited time allowed.

There were at one time 475 chronic gonorrheas under treatment. Effort was made to eliminate all of these, but with only partial success. Replacements, among which were discovered a great many of the same old venereal cases, transferred away only a few days before, were sent to the regiment at the last moment, and as a consequence, there were with the regiment some 46 syphilitics and about 54 cases of chronic gonorrhea on landing in France.

Inspection of the command while on board eliminated from the venereal list a large number of men who at the time examined showed slight discahrge which microscopical examination showed to be non-Specific. Over 200 men were found who had an urethral discharge and 54 only were determined to be specific.

It is of interest to note that practically all of these cases cleared up within a short time of landing, and that the present time chronic gonorrhea is less in evidence than at any time in the history of the command..

It is suggested that there are three factors at least operating to bring about this result.

(a) The very active treatment which these cases were receiving and which some of them had been receiving for months was discontinued on taking the field.

(b) Conditions of field service under which the regiment has been since leaving the US practically enforced continence. While at Camp Upton, week end passes were freely issued to the men with permission to visit New York, and while there was restriction of the acute cases there were continual additions to the list of chronic cases with acute exacerbation while under these conditions.

(c) Alcoholism has been practically negligible during the period since leaving the US.

Following tabulation shows that for a command of approximately 4000 men, the venereal problem has been fairly well under control.

MONTH	NEW CASES	NO PER 1000 STRENGTH	VEN. PROPHYLAXIS GIVEN
July	2	54/100	36
Aug.	8	2-24/100	23
Sept.	1	25/100	10
Oct.	3	7/10	3
Nov.	3	7/10	15
Dec.	2	5/10	16

hauled away daily and burned in an incinerator. The buildings and grounds were kept neatly policed at all times, and daily sanitary inspections made by the Surgeon to see that this was being done, also by the Division Sanitary Inspector. A system of rating - on sanitary conditions - was instituted: and the general average of the Battalion while at Camp Upton was between 90 and 95%.

Water Supply. The water used by the troops was filtered and sterilized before drinking, and laboratory examinations made of it from time to time to determine its portability. There was always sufficient for bathing, cooking and drinking.

Food Supply. The food supply was ample, and well prepared.

Clothing. The clothing was sufficient ~~was*su*~~ at all times to protect the men from the various weather conditions.

Marches. The training in the States was confined mostly to close order drills, theory, and target practice. There were no marches of any consequence, other than to and from target range, or when on gas drill, and then it was without the heavy pack.

IN FRANCE.

The 351st.M.G.Bn. 92nd. N.A. embarked for France June 9,1918 and arrived at Brest,France June 19,1918. The first Camp occupied by this Battalion after its arrival in France was a rest Camp about 3 miles from Brest where the men were bivouaced in tents and allowed to rest up from their trip across the Atlantic. There were no cases of serious illness aboard, no epidemics, and none had to be retained aboard. There were 4 cases of gonorhea to develop aboard, which cases were allowed to land but were kept in confinement and treated at the Infirmary until cured.

2/23/16

Below are the names of the areas and villages occupied by this Battalion since its arrival in France with nothing of especial importance in the Incidence of Disease or Epidemics to note under either:-

Area.	Village.	Dates.
Haute-Marne	Fresnes-sur-Apance	June 27/18----Aug.12/18.
Vosges	La Baffe) Mossoux)	Aug.13/18 -----Aug.22/18.
	Domfaing	Aug. 23/18.
	Clairfontaine	Aug. 24/18 --- Sept.17/18.
	Biffontaine	Sept. 18/18 ---Sept.22/18.
Mouse.	Someilles (In Argonne)	Sept.22/18 --- Sept.23/18.
	La Neufour (In Argonne)	Sept.25/18 --- Sept.29/18.
	La Chalaides	Sept.29/18 ---Sept.~~.~~/18
Mewrthe-Moselle	Ailgeray	Oct.10/18 --- Oct.28/18.
	Pompey	Oct.29/18.---Nov.4/18.
	Griscourt	Nov. 4/18.-----Dec.15/18.
Mayenne	Lassay	Dec. 19/18 --- Dec.31/18.

Incidence of Disease. The sick-rate since the Organization has been in France has been considerably lower than while in the United States. This is due,in the opinion of the writer, mainly to the fact that all of the physically unfit,as was said before , were eliminated before leaving the United States. The living conditions of the troops,due to the exigencies of war,have been far worse than while in the States. The diseases the troops have suffered most from ~~they*have~~ since they have been in the A.E.F. are Influenza and Diarrhoea. The former due to

exposure in dampness and cold, as well as to the epidemic nature of the disease; the later to errors in diet, and long subsistence on field rations.

There has been 6 cases of Pneumonia with 1 death, the only death from disease that has occurred since the Organization has been in France.

Epidemics. There have been no epidemics in the Command since its arrival overseas, other than that of Influenza which has not proved fatal in a single instance.

Venereal Disease and prophylaxis. The Venereal disease rate has been exceedlingly low in France. Only 4 new cases has developed in a command of 785 Officers and men during a period of over 6 months, each of which has been promptly court-martialed. This excellent record is due, in the opinion of the writer, to the following facts:- 1. That punishment of those contracting a venereal disease has been prompt and severe. 2. Sexual intercourse has not been practiced here to the extent it was in the United States. 3. The men have reported more promptly for prophylaxis. 4. Inspections have been made regularly and minute, and the importance of early prophylaxis and cleanliness urged upon the men at every available opportunity.

16

Sanitation. The sanitation has not been ideal in all places occupied by this Organization in France. This is due to the fact that the troops have been billited with natives, in many instances, in towns and villages where sanitation seemed to have been unheard of. Though shortly after arrival the troops have policed these towns and made them as sanitary as existing circumstances would allow. At all times however the following sanitary code has been adhered to:- 1. All drinking water has been sterilized before drinking. 2. All wastes and garbage has been disposed off by burrying the same in covered pits, or in rare cases by giving it to the natives who hauled the same away daily. 3. The latrines used by the troops have been constructed fly-proof and urine soakage pits placed near them. 4. Policing of billets and grounds has been thourough.

2/23/17

Water - Food Supply. All drinking water has been sterilized since arrival in France. The food supply has been ample and well prepared.

Clothing. The clothing has been sufficient at all times, and the men have been able to keep dry and warm at all times.

Marches. The various changes of station made by this Battalion since its advent into France, with the exception of three where the distance has been over 40 kilometers, has been made by marching, and the record of these marches has been exceptionly good. Straggling and falling out has not been permitted and in only one instance has the Surgeon been forced to tag a man for the Hospital, on account of illness. This excellent record is due to a very large extent by the very excellent march discipline maintained in the command, also to the Medical Department whose personnel has made regular inspections of the mens' feet and corrected minor defects in their incipiency.

Action on the Front. This Battalion has seen action action on the 3 fronts that the Division has been assigned to while in combat, with the following results:-

Killed in action	1
" accidently	1
Wounded, slightly	2
Gassed, Slightly	4

There has been only 4 deaths in the Battallion since it has been in France, 2 as stated above,, 1 died of Pneumonia, and 1 was accidently drowned.

1st. Lieut. Douglas B. Johnson, M.C.
Surgeon 351st. M.G. Bn.

(One of the Colored Battalion Surgeons)

HEADQUARTERS NINETY SECOND DIVISION
Army Post Office #766
American Expeditionary Forces

General Orders,)
No. 27.)

11th October, 1918.

The Commanding General desires to call the attention of the entire command to the excellent work and meritorious conduct of Captain R. A. Williams and First Lieut. T. M. Dent, both of the 368th Infantry. During the days of the fight around Vienne le Chateau both of these officers displayed courage and leadership, and their conduct should be an example to the other officers of the Division.

By command of Major General Ballou:

ALLEN J. GREER
Colonel, General Staff,
Chief of Staff.

OFFICIAL:

EDW. J. TURGEON
Major, Infantry, U.S.A.,
Adjutant.

Ce

ARRIVAL OF THE 368th, IN FRANCE

We arrived a Brest, France June 27th. there we disembarked and marched about four four miles to Pontanazen Barracks, know as a rest camp Of courst at that camping ground was limited as the French people was using every inch of their land for farming. We were alloted a very small space and Guards were placed all round, Military Police (White) were at every corner. Orders were issued as usual. that we were not allowed to converse with French Women We were not allowed out outside of our camping ground according to the orders the M.P.s. had. I remember one afternoon a few officers were standing outside talking to some wealthy French people who had come out to the camp to see what the colored soldier looked like. as they had hheard so much talk about them by the White Man. These officers was standing at the automobile, talking in a language that would make a jack ass laugh, but being understood by the French, and was a very pleasent conversertion.during the conversertion I noticed a corporal and a Sergeant of the Military police (White) standing on the corner, moving aimlessly around conversing with each other. Finely the Corporal got up nerve to approach the officers, and he did but in a very polite and military manner, and said. SIR YOU ARE NOT ALLOWED TO CONVERSE WITH FRENCH WOMEN. The officers relizing the corporal was performing his duty. moved to the other side of the street and sat down. again the corporal came up and said SIR YOU ARE NOT ALLOWED TO SIT OUT HERE WITHOUT A PASS. This the Officers resented, as the street was full of enlisted men sitting around. This matter was taken up with the Regimental Adjutant who was a white man. and he said it was orders that the officers and men both had to confine themselves to camp limits, and was not allowed out in the street. This matter was referred to the provost Marshall Marshall. and we asked to be furnished with copies of the order. WERE WE FURNISHED WITH ANY.? NO. WHY. THERE WAS NO SUCH ORDER IN EXISTANCE

So after remaining there for a day or t o The People began to tell us the propa anda that the white man had spread about the Negro. But Our boys over come all that and was the favorate of those people.I forgot to mention there was a cafe just outside a Guard was placed there with orders not to allow any officers or men of the 368th, Infantry to enter. But The Adjutant, supply officer, and other white officers could go in.

This is simply a gist of the happening at the rest Camp, of all my service in great many foreign countries, Never was I told that I could not talk to people.

11/22/2

C E-1

95

TRIP ACROSS THE SEA OF THE 368TH, INFANTRY.

Regiment sailed June 15th, at 11:55 A.M. There our blood began to boil again. Our Officers were assigned 2nd class State rooms on D. Decek. and the other fellow(White) was placed in 1st Class State Rooms on A.& B decks. Why the Non-Commissioned Officers were on the dame deck with us and had better accomodations. And of course I being an old timer a few of the officer from civil life came to me and asked what the custom of the service was on transports. I could give no information, only this. WHEN I WAS A 1ST SGT: I TRAVELED JUST AS SAME AS WE ARE TRAVELING NOW SO THIS IS NOTHING NEW TO ME. We were given the 2nd, class dining room Of course the Service was the same, but I just wist to mention the humiliation our officers had to go through. leaving home to fight for democrady After being at sea for three or four days, our band began concert and we had on board a great many White Officers. And naturally every body wanted to hear the music, so we played the old game. First come first served. and we would be on deck and get comfortable seats, and the other fellow(white officer) as usual would come when he got ready, therefore when he would come there would be no place, or seat for him to stand unless he sit down by a colored officer, of stand by a colored officer. and they put in a complaint. which was followed by an Order as follows.

2/28/1112

THE COLORED OFFICERS ARE COMSUMING ENTIRELY TOO MUCH SPACE ON DECK? YOU MUST CONFINE YOURSELVES TO ONE SIDE OF THE BOAT.

And the results of this order was. the next day when the band began to play, all the colored officers lefet the deck, until the concert was over.

Even the Barbers refused to shave our officers, WAS THAT THE RULES AND REGULATIONS OF THE SHIP.? NO. IT WAS ORDERS OF THE COMMANDING OFFICER OF THE TROOPS ON BOARD.

Gentlemen I have served my country for over 23 years, and have crossed the seas some 5 or 6 times as a N.C.O. and on all kinds of ships, and there was never a time that I could not go any place on the ship I wished too. I even had my meals in the 1st class dining room.

Why this is just a synopsis of the things that happened on that trip

Way the moral of the Officers was distroyed before they ever reached France,

368th

a -3

FIRST TRAINING AREA. IN FRANCE.

July 4th, we moved to the Burbonne La Bain Area for extensive training there the whold Division was assembled for this training. We would have Maneuvers by Battalions, one day, By Regiments another, By Brigades another, and lastly bo the whols Division For these Maneuvers, there would be Officers of all the Allied Forces, to make Criticisms , and correct the faults of different Company Commanders, At that time all Battalion Adjutants were Colored Officers . And the Manuevers would cover an area of about 20 or 25 Kilometers, and some times more. It has been my ecperance, for over 20 years of service, for the Battalion Commander to carry his Adjutant along with him, no matter where he went, and how he went, as the Adjutant simply a secretary. But in the 92nd, especialy the 368th, Infantry. this was not the case, But this is the way it would happen, . The Order would be issued for the Maneuvers, The Battalion Commander. Colonel, and all other officers,(White) would Get in a car and be conveyed to the place of assembly. And the Black Adjutant would receive orders to walk. They never taken him in the Car, and he would have to walk for 20 or 25 Kilometers. And the worst of all after the Manuevers was over, The Battalions would be dismissed, Cars come up and and get all Officers Except Colored, and they would have to hike back to there billets after a hards days work. Of course that was alright for the Company Commanders, but the Adjutant should have been taken in the car with the Battalion Commander. I Remember in the 368th, Infantry. 1st Battalion. We had a 1st; Lieut; a very dark man, and the Battalion Commander decided that he wanted a white man, although this adjutant he had was a very, very efficient man for the job, having had 23 years of service in regular Army. So he the BattalionCommander had this man releived and Detailed a 1st Lieut; that was of a lighter color. well we t ought that was alright, and he would carry him in his car ,DID HE.? NO. HE WAS A NEGRO. Then latter there came to the Regiment about 20 or 30 1st, and 2nd Lieuts. (White) who had just been commisioned, and they were attached to different Companies, And the Company Commanders received Orders that they must obey the 2nd, and first Lieuts,Because they had had some great experiences in the front Line. But when the Company Commanders found out the real truth, these men had just been commisioned, from Non-Commisioned Officers for the Regular Army, and sent there to receive furthur Instructions, But the White Officers of this Regiment and Division was determind that the Negro Officers were not to be the boss. And to our sorrow the Battalion Commander kicked out his Black Adjutant and put in a White Lieut; Now Going back to the Maneuvers. After the Maneuvers are over all Officers assemble at a designated place to receive the critism from the General and the Umpires. Of course we all would go with the feeling that we were to hear something that would be a benifit to us , and to learn something. Well all the Officers and Staff would assemble. And to our supprise instead of the General Ballou and Col; Greer, Correcting,the faults of the different Officers, or complementing them, the Critic would be of this nature.

2/28/113

THE RAPE IN THIS DIVISION HAS GOT TO BE STOPPED. OR I SHALL SEND ALL OF YOU TO THE S.O.S. THIS IS A RAPE DIVISION. WE WHITE PEOPLE MADE THIS DIVISION AND WE CAN BRAKE IT.

This is the kind of stuff we had to listen too in the presence of all Allied officers. If our General Ballou and Col; Greer wanted to speak to his officers on such a subject would(nt it of been proper to have them assemble at some given point and give the lecture on the subject.? No that was not there aim, it appeared to me that it was there full entention to fill the hearts of the French, English, and other officers that the Negro was just what they had represented them to be. But by The help of God We soon proved ourselves far better than the avera e White Man. hy they could or spoke some words of encouragement to their Officers in the presence of the Allied Officers, so as to make them feel proud of there uniforms. No, it was there delight to make us ashame of our uniform, and poison the Hearts of the French against us, and keep the French Women from talking to us. This was a constant thing for this Critic. Why They never once mentioned the good work of there officers Now Gentlemen I will say and feel safe in saying so. That the rape or attempted rape in this division was smaller in 9 months than that of any other division. Take the news papers, read down the causualty list and you will notice, KILLED. IN ACTION. WOUNDED IN ACTION. SEVERALY WOUNDED IN ACTIONS DIED FROM DESEASE. and lastly DIED FROM OTHER CAUSES. Who knows what other causes ment.? How many times have you read such BULSHEVIC.? Why the precentage of Crimes committed by the other fellow (white) in the national Army in France, is one hundred percent grater in nine months than that of the whole Negro population in the National Army and in France togather. Also the U.S. Yes it was the intention of the whole staff of the Division to put in the hearts of the French people what they carried into France in their Hearts. But by the help of the almighty and the Colored officers, and men , that that feeling could not be placed in their hearts, as our gentlemanqualities, put us far beyond the average white man. I remember in this sector, on or about August the 5th, An Order was issued for all the Companies to take the field, And they prepared a Camp Just outside of the Town . Chatlion and moved all the troops out of there comfortable billets, and had them go into shelter tents. And placed a Guard alround the Camp. And No Officer or Soldier was allowed to return to the towns. But the White Officers remained in there Billets in town. They would not even allow visitors in the Camp, But Our Boys had made so many friends , The French Protested against not being allowed to come into the Camp, and ignored the orders and came on just the same, I Remember a very wealthy Woman and her Two Daughters coming out to the Camp to visit some of the officers that had been billeted in her house, and she was refused, and her reply was. IF YOUR PEOPLE BEHAVE HALF AS GOOD AS THE COLORED MEN HAVE, I WOULD BE AS PROUD OF YOU AS I AM THEM. BUT THEY OUR OUR BOYS AND ARE GOING TO SEE THEM. AND THEY CAME IN.

~~Gentlemen WHY WAS ALL THIS.? WERE WE NOT HUMAN.? AS THE OTHER FELLOW.?~~ And upon leaving for the front. The Whole population for miles around were out, and were sheading tears, and it was some sight to see, such hugging and kissing you never seen befors.

This is what we had to content with in this sector.

2/28/14

92, in The Vosges. 368th

A5-28

The Division moved to Reserve position in this sector, August 12th, Arriving there August 13th, and was Brigaded with the 172 Regiment French. We releived the French from the Trenches. August 29th, August 31st we received our first Baptism of shell fire which lasted from 12 midnight until 5:30. A.M. September 1st. Our bous stoof this like heros with a very few causaulties. Sept 4th, there was a German patrol numbering about 16 approaching a position Commanded By Lieut Reese of the 368th, Infantry. This Lieut with 8 men repulsed the German raid, and went over the top and captured 2 of the raiding partie and wounding several and drove the others off. These were the only Prisoners that had been captured in this sector for 4 years. WAS HE DECORATED.? NO. BUT THE FILLOW WHO WAS FAR BEHIND THE LINE WAS. WHY .? HE WAS WHITE. I must say upon going into the trenches we expected to find all mud. but to our supprise, the Dugouts were all electrically lighted. Brass Beds. Large arm chairs. and some of them elaborately funished. A Regular suummer resort. This sector was used to accustom new troops to shell fire, and there had not been any fighting there to amount to any thing for 4 years, but beleive me our boys started the ball to rolling. The weather was cold at nights, and our Boys did not have heavy undercloths. nor Over coats we had to borrow overcoats from the French.

2/28/101

We were not properly equipped, WHOS(S FAULT WAS THAT.? THE COLORED OFFICERS I SUPPOSE. IN SPITE OF ALL THE REQUISITIONS HE SUBMITTED.

Arrival of the 368th, In France

We arrived at Brest, France June 27th, There we disembarked and marched about four miles to Pontanazen Barracks, known as a rest camp. Of course at that camping ground was limited as the French people was using every inch of their land for farming. We were alloted a very small space and Guards were placed allaround, Military Police (white) were at every corner. Orders were issued as usual, that we were not allowed to converse with French women. We were not allowed outside of our camp-in g ground according to the orders the M. P. S. had. I mmember one afternoon a few officers were standing outside talking to some wealthy French people who had come out to the camp to see what the colored soldiers looked like, as they had heard so much talk about them by the white man. These officers were standing at the automobile, talking in a language that would make a jack ass laugh, but being understood by the French and was in a very pleasant conversation. During the conversation I noticed a corporal and a sergeant of the military police (white) standing on the corner, moving aimlessly around conversing with each other. Finally the corporal got up nerve to approach the officers, and he did but in a very polite and military manner, and said, "Sir you are not allowed to converse with French women." The officers realizing the corporal was performing his duty moved to the other side of the street and sat down. Again the corporal came up and said, "Sir you are not allowed to sit out here without a pass." This the officers resented, as the street was full of enlisted men sitting around. This matter was taken up with the Regimental Adjutant who was a white man, and he said it was orders that the Officers and men both had to confine themselves to camp limits, and was not allowed out in the street. This matter was referred to the provost Marshall, and we asked to be furnished with copies of the order. WERE WE FURNISHED WITH ANY? NO. WHY? THERE WAS NO SUCH ORDER IN EXISTANCE.

So after remaining there for a day or two the people began to tell us the propaganda that the white man had spread about the Negro. But our boys

2/28/111 dup

over came all that and was the favorite of those people. I forgot to mention there was a cafe just outside. A guard was placed there with orders not to allow any officers or men of the 368th Infantry to enter. But the Adjutant, supply officer, and other white officers could go in.

This is simply a gist of the happening at the rest camp. Of all my service in great many foreign countries never was I told that I could not talk to people.

TRIP ACROSS THE SEA OF THE 368th, INF.

Regiment sailed June 15th, at 11:55 a.m. There our blood began to boil again. Our officers were assigned 2nd class Staterooms on D Deck and the other fellow (white) was placed in 1st class staterooms on A & B decks. Why the non-commissioned officers were on the same deck with us and had better accomodations. And of course I being an old timer a few of the officers from civil life came to me and asked what the custom of the service was on transports. I could give no information, only this: WHEN I WAS A 1st SGT. I TRAVELED JUST THE SAME AS WE ARE TRAVELING NOW SO THIS IS NOTHING NEW TO ME. We were given the 2nd class dining room. Of course the service was the same, but I just wish to mention the humiliation our officers had to go through. Leaving home to fight for democracy. After being at sea for three or four days, our band began a concert and we had on board a great many white officers, and naturally everybody wanted to hear the music, so we played the old game. First come first served, and we would be on deck and get comfortable seats and the other fellow (white officer) as usual would come when he got ready, therefore when he would come there would be no place, or seat for him to stand unless he sit down by a colored officer, or stand by a colored officer. They put in a complaint which was followed by an order as follows.

THE COLORED OFFICERS ARE CONSUMING ENTIRELY TOO MUCH SPACE ON DECK. YOU MUST CONFINE YOURSELVES TO ONE SIDE OF THE BOAT.

And the results of this order were: the next day when the band began to play, all the colored officers left the deck, until the concert was over.

2/28/111dup

Even the barbers refused to shave our officers. Was that the rules and regulations of the ship? No. It was the order of the commanding officer of the troops on board.

Gentlemen I have served my country for over 23 years, and have crossed the sea some 5 or 6 times as a N. C. O. and on all kinds of ships, and there was never a time that I could not go any place on the ship I wished to. I even had my meals in the 1st class dining room.

Why this is just a synopsis of the things that happened on that trip.

Why the moral of the officers was distroyed before they ever reached France.

FIRST TRAINING AREA IN FRANCE.

July 4th, we moved to the Burbonne La Bain Area for extensive training. There the whole division was assembled for this training. We would have maneuvers by battalions, one day, by regiments, another, by brigades another and lastly by the whole division. For these maneuvers there would be officers of all the Allied Forces, to make criticisms, and correct the faults of different Company Commanders, At that time all Battalion Adjutants were colored officers. And the maneuvers would cover an area of about 20 or 25 kilometers and sometimes more. It has been my expefience for over 20 years of service, for the Battalion Commander to carry his Adjutant along with him, no matter where he went, and how he went, as the Adjutant is simply a secretary. But in the 92nd, especially the 368th, Infantry, this was not the case, but this is the way it would happen. The order would be issued for the maneuvers, the Battalion Commander, Colonel, and all other officers, (white) would get inna car and be conveyed to the place of assembly. And the Black Adjutant would receive orders to walk. They never took him in the car, and he would have to walk for 20 or 25 kilometers. And the worst of all after the maneuvers was over, the Battalion would be dismissed, cars come up and get all officers except colored, and they would have to hike back to their billets after a hards days work. Of

course that was all right for the Company Commanders, but the Adjutant should have been taken in the car with the Battalion Commander. I remember in the 368th, Infantry, 1st Battalion, we had a 1st. Lieut. a very dark man, and the Battalion Commander decided that he wanted a white man, although this adjutant he had was a very, very, efficient man for the job, having had 23 years of service in regular army. So he, the Battalion Commander, had this man relieved and detailed a 1st Lieut. that was of a lighter color. Well we thought that was all right, and he would carry him in his car, DID HE? NO. HE WAS A NEGRO. Then later there came to the regiment about 20 or 30 1st and 2nd Lieuts. (white) who had just been commissioned, and they were attached to different companies, and the Company Commanders received orders that they must obey the 2nd, and 1st lieuts. because they had had some great experiences in the front line. But when the Company Commanders found out the real truth, these men had just been commissioned, from non-commissioned officers for the Regular Army, and sent there to receive further instructions, but the white officers of this Regiment and division was determined that the Negro Officers were not to be the boss. And to our sorrow the Battalion Commander kicked out his Black Adjutant and put in a white lieut. Now going back to the maneuvers. After the maneuvers are over all officers assembled at a designated place to receive the criticism from the General and the umpires. Of course we all would go with the feeling that we were to hear something that would be a benefit to us, and to learn something. Well all the officers and staff would assemble, and to our surprise instead of General Ballou and Col. Greer, correcting the faults of the different officers, or complimenting them, the critic would be of this nature:

THE RAPE IN THIS DIVISION HAS GOT TO BE STOPPED OR I SHALL SEND ALL OF YOU TO THE S.O.S. THIS IS A RAPE DIVISION. WE WHITE PEOPLE MADE THIS DIVISION AND WE CAN BREAK IT.

This is the kind of stuff we had to listen to in the presence of all Allied Officers. If our General Ballou and Col. Greer wanted to speak to

2/28/11 dup

his officers on such a subject wouldn't it have been proper to have them assembhà at some given point and give the lecture on the subject? No, that was not their aim. It appeared to me that it was their full intention to fill the hearts of the French, English, and other officers with the idea that the Negro was just what they had represented them to be. But by the help of God we soon proved ourselves far better than the average white man. Why they could have spoken some words of encouragement to their officers in the presence of the Allied Officers, so as to make them feel proud of their uniforms. No, it was their delight to make us ashamed of our uniform and poison the hearts of the French against us, and keep the French women from talking to us. This was a constant thing for this Critic. They never once mentioned the good work of their officers. Now Gentlemen I will say and feel safe in saying so, that the rape or attempted rape in this division was smaller in 9 months than that of any other division. Take the newspaper read down the casualty list and you will notice, Killed in Action, Wounded in Action, Severely Wounded in Action, Died from Disease, and lastly Died from Other Causes. Who knows what other causes meant? How many times have you read such Bolshevik? Why the precentage of Crimes committed by the other fellow (white) in the national army in France, is one hundred per-cent greater in nine months than that of the whole Negro population in the national army and in France together. Also the U. S. Yes it was the intention of the whole staff of the Division to put in the hearts of the French people what they carried into France in their hearts. But by the help of the Almighty and the colored officers, and men, that that feeling could not be placed in their hearts, as our gentlemanly qualities, put us far beyond the aver-age white man. I remember in this sector, on or about August the 5th, an order was issued for all the companies to take the field, and they prepared a camp just outside of the town, Chatlion and moved all the troops out of their comfortable billets, and had them go into shelter tents. And placed a guard all around the camp, and no officer or soldier was allowed to return

S9/82/2

to the towns. But the white officers remained in their billets in town. They would not even allow visitors in the Camp, but our boys had made so many friends, the French protested against notbeing allowed to come into the camp, and ignored the orders and came on just the same. I remember a very wealthy woman and her two daughters coming out to the camp to visit some of the officers that had been billeted in her house and she was refused, and her reply was, "If your people behave half as good as the colored men here, I would be as proud of you as I am of them. But they are our boys and we are going to see them," and they came in.

And upon leaving for the front the whole population for miles around were out, and were sheding tears, and it was some sight to see, such hugging and kissing you never seen before.

This is what we had to contend with in this sector.

Company C,
September 14,1918., A.E.F.A.P.O.766.

Memo to Batt Commander :

Following is report on shelling of my position on the night of Sept 13,1918-

1- Shelling began at about 21:oo o'clock,Sept 13th-lasted about one and one half hours.

POSITIONS SHELLED:

Bennemix-	443.85- 183.75-	Six shells fired near this position.
La Rouse-	444.05- 184.38-	Three " " over this position-a few hand grenades was thrown by the enemy out in fornt of our wire-No shots fired by our men.
Grand Rouse-	443.95-185.05-	Seven shells exploded near this position,one shell wound Donkey-near Co.PC.
Hill 445-	443.09-184.01	Reported that about eight shells fell in rear of this position-cutting down several trees.

The firing-or shells came from the East of PC Grand Rouse.

Captain Reynolds

To Capt Burns:- This confirms my previous statements that the P.C. of this position should be at rear as nearly every time they are bombarded the Co.C.O. has to crawl underground - and a procedure conducive to calm thinking.

? 368th ?

Munitions Officer , 368th Infantry.
A.P.O. # 766, 15th October 1918.

G5-4

From : Regimental Munitions Officer, 368th Infantry,

To : Commanding Officer, 368th Infantry.

Subject : Report on operations from Sept. 25th to Sept. 30th 1918.

1. In compliance with Secret O.& I. Memo.# 11 Headquarters 368th Infantry, 14th October 1918, I submit the following report on operations from Sept. 25th to Sept. 30th 1918:-

Sept. 25th * Before the regiment left CAMP SOUHAIT the following was made in order that all soldiers carried their prescribed amount of cal. 30 ammunition :-

1st Bn.-------- 105,600 rounds cal. 30
2nd Bn.-------- 105,600 " "
3rd Bn.------ - 94,800 " "

On the night of Sept. 25th the regimental munitions dump was established at VIENNE LE CHATEAU. The combat train was also moved to that point , seven of the combat wagons were unloaded and sent back to the LA RENARDE FARMS to get French Munitions.

Sept. 26th - On the afternoon of this date 532,800 rounds of cal. 30 ammunition was received from the French and placed in the dump at VIENNE LE CHATEAU.

Sept. 27th - Four of the combat wagons returned from the LA RENARDE FARMS with - 20,000 rounds of chauchat ammunition and 2,000 V.B. grenades. The Regimental Munitions Officer along with a French guide made a visit to the Farms to locate pryotechnics that were claimed to be there but was unable to find any at that time after a through search with the guide. The following issue was made that date:- 200 rounds of Stokes Mortar Shells to the Stokes Mortar Platoon. 500 of Cal. 45 to the Signal Platoon.

Sept. 28th - On the morning of this date 3 combat wagons loaded with - 30 boxes of cal. 30 ammunition
10 boxes of chauchat ammunition
4 boxes of cal. 45 ammunition
were moved up the VIENNE LE CHATEAU - BINARVILLE ROAD as far as TR. DES BALEINES and an advance distributing point was established in the FOSSE A TANKS along the side of the road. The combat wagons were unloaded and returned to VIENNE LE CHAUTEAU. This ammunition was taken over by the 3rd Br The following issue was made - 2000 rds. Cal.45 to Hqrs Co.

Sept. 29th -The Regimental Munitions Officer returned to the LA RENARDE FARMS and was able to locate with the assistance of the French Officer stationed there and obtain the following pryotechnics:-

Flag rockets ------- 10
Yellow Smoke R.---- 12
Illuminating R.---- 12
V.B. Green --------- 20
V.B. Red ----------- 30

V.B. 1star White ---------- 10
V.B. 3 star- " ---------- 15
V.B. 6 star " ---------- 15
Pistol Cart. Green--------- 10
" " Red ------- 20
" " 1 satr ------- 20
" " 3 star ------- 10
And some miscellaneous pryotechnics.

These pryotechnis were carried to the regimental dump and distributed from there to the different battalions on Sept. 30th.

Sept. 30th - 1000 V.B. grenades were issued to the 2nd Bn.
1000 V.B. grenades were issued to the 1st Bn.
500 F-1 grenades were issued to the 2nd Bn.
24000 rounds cal. 30 issued to 2nd Bn.
On this date there was recieved from the D.M.O. 52 boxes of cal. 45 ammunition.

During the operations there was no damage done to any of the combat wagons or to any of the ammunition dumps.

Joseph E. Trigg
Capt. 368th Infantry,
Munitions Officer.

RAPE.

34-4-220

I have written to Maj. Adam E. Patterson, Division Judge Advocate, 92nd Division asking that he forward to this office a complete record, with all data, relative to rape committed by members of the 92nd Division while in France, where actual convictions were brought in against the defendant.

24

The 368th Regiment of Infantry, 92nd Division was stationed at Pompey and Liverdun during the early part of October, together with some white troops. These troops constituted the reserve forces to supplement the regiments then holding the trenches in the Marbache sector, which sector was directly in front of Metz. After the regiment had been in this area a few days areport was sent into Division Headquarters stating that a rape had been committed upon a 65 year old woman in a field inthe vicinity of Pompey. The Division Inspector, together with an interpreter from the French Mission, hastened to the home of the woman involved and interviewed her. The woman stated that she was working in her field when she was approached by a white soldier and offered money. That she refused the money and told him to go away and leave her alone. The soldier then took her forcibly into his arms and kissed her, after which he threw her on the ground, lifted her clothes, and proceeded to rape her. She fought the soldier in an attempt to free herself, but was unsuccessful until penetration had been madeand the rape committed. This interview was translated by the French interpreter and forwarded in writing to the office of the Chief of Staff. After reading the report of the interview the Chief of Staff ordered it sent back to the Division Inspector with the instructions that a further investigation be made, and to see if the woman did not intend to say that the rape was committed by a Colored soldier. This investigation was made, and the woman stated that it was not a Colored soldier who had committed the crime, but was a white soldier, as she had stated at first. When the second report was made to the Chief of Staff no action was taken, and thematter dropped.

There is a [illegible] more legible

I have made a separate report on the behavior of certain officers of the regiment.

8. During the afternoon of the 28th September, upon learning that the 2nd Battalion was not progressing, I ordered forward the 1st Bn. (which had been until then withheld as Division Reserve) to support the 3rd Battalion. It had reached my P.C. en route to the front when the 3rd Battalion broke. As it was then too late in the day to renew the attack, I put the 1st Battalion back in the reserve position for the night and on the following day put them in the [illegible] ready to renew the attack. The 3rd Battalion was placed in support in the [illegible] (by order of Brigade Commander) and the 2nd Battalion was placed in reserve in the old French first line trenches. The 9th Cuirassiers made a raid on the [illegible] on 29th September after intense artillery bombardment, and on the 30th September they moved forward. The 308th Infantry was ordered to hold their positions but Major Merrill (commanding the 1st Battalion) in the belief that an order to advance had miscarried, decided to push forward with the French, covering their right flank. The 1st Battalion advanced with the French and the orders for their withdrawal did not reach Major Merrill till after the line had reached [illegible].

9. RECORD OF EVENTS AND OPERATIONS OF THE 308th INFANTRY, U.S.A.

From 15th September to 8th October (incl.) 1918.

15th September 1918. Regiment holding lines in Sub-sector [illegible] in ST. [illegible] DESERTS.

15 - 19 Night. 2nd Battalion relieved from C.R. [illegible] by 3 companies of French Regiment and 1 company of 301st Infantry, 91st Division, U.S.A., rendezvous [illegible].
3rd Battalion relieved from C.R. [illegible] by a battalion of French Regiment, rendezvous [illegible].

19 - 20 Night. 1st Battalion relieved from C.R. [illegible] by 1 battalion of French Regiment. 2nd Battalion embussed at [illegible] at 23 H 30 for [illegible] and LA [illegible].
3rd Battalion embussed at La [illegible] at 20 H 30 for [illegible].

20th Sept. At 10.00 H command of Sub-sector [illegible] passed to Colonel Zopff, French Regiment. 2nd Battalion arrived at [illegible] and LA [illegible]. 2nd Battalion entrained at [illegible] entraining area for [illegible].

21st Sept. 1st Battalion, Headquarters Company, Machine Gun Company, and Supply Company arrived in [illegible] entraining area at 5.00 H. 3rd Battalion, Headquarters Company, Machine Gun Company, and a portion of the Supply Company entrained at [illegible] for [illegible].

22nd Sept. 2nd Battalion arrived at [illegible] and marched to [illegible]. At 1 H 30 the 1st Battalion, the remainder of the Supply Company, a detachment of the 308th Field Signal Battalion, and "pickups" entrained at [illegible] for [illegible]. 3rd Battalion, Headquarters Company, Machine Gun Company, and a portion of the Supply Company arrived at [illegible] and marched to LA [illegible].

23rd Sept. The 1st Battalion, aportion of the Supply Company, detachment of the Field Signal Battalion, and pickups arrived at [illegible] and marched to LA [illegible] and then later in the day to [illegible]. The entire regiment marched from [illegible] at 20 H 30 for Camp [illegible].

3/14/5

26th Sept. The Regiment arrived at CAMP BOURAIT at 8.00 H and went into billets. The regiment was reported to 1st D.C.P. French in accordance with instructions contained in letter from the 1st Army Corps Headquarters to the Commanding General, 92nd Division, dated 23rd September, 1918, and was assigned to the Brigade commanded by Colonel Durand. At 21.00 H the regiment marched from CAMP BOURAIT to the front assigned to it on the RIGHT BANK OF THE AISNE, NORTH of VIENNE-le-CHATEAU and LA HARAZEE, and on the following day took the following positions:

X

27th Sept.

P.C. of the Regiment- LA CAPITELLE
2nd Battalion P.C.- LA POMMERAIE
3rd Battalion P.C.- LA PLAGNOLETTE
1st Battalion P.C.- LA HAUTE BATIE

The zone of action of the Regiment: Left boundary- Boyau 13, western edge of BOYAU CHAMP-DOUX de la COTE 176 (exclusive)-500 metres west of BINARVILLE. Right boundary- LA MARAZEE (exclusive) Cross road of the road MARVOS-CHAMPIGNEUL-PAVILLON and the way N.E. LA HARAZEE-CHAMPIGNEUL-sur-CHARNE-BINARVILLE-LAMOUR.

Disposition of the regiment:

(a) 2nd Battalion in the front line, 3 companies in the front and 1 in support.

(b) 3rd Battalion in close support with 2 companies on NORTH bank of BIESNES RIVER, and 1 company on SOUTH bank BIESNES RIVER.

(c) 1st Battalion at CAMP DE HAUTE BATIE as Reserve 1st D.C.P.

28th Sept. 2nd Battalion at 5 H 05, which was H hour, reconnoitred the enemy trench position opposite it and progressed at a slow pace, because of the abundance of wire, until the right half had made an advance of 5 kilometers, where it met with strong opposition of machine gun nests. It then withdrew to the rear, without orders, to trenches of the French system, in rear of the trenches from which it had departed in the morning.

3/14/6

3rd Battalion, in accordance with plan, supported the advance of the 2nd Battalion and occupied the trench system vacated by the latter battalion when it moved forward at H hour, which position it continued to hold after the 2nd Battalion had passed through it on its withdrawal. 1st Battalion (Divisional Reserve) moved forward into the day from HAUTE BATIE to P.C. CAPITELLE.

29th Sept. At 4 H 30 orders were received from Colonel Durand, commanding the Brigade, for an attack to be made at 5 H 15 by the 2nd and 3rd Battalions, side by side, the objective being beneath de MONTAUBERT. 2nd Battalion was assigned to zone East of BOYAU CHAMPAGNE (exclusive). It was brought up from the rear and launched its attack from RAVIN DE DEUX ARBRES at about 11 H 30, progressing to the front about 2 kilometers against M.G. fire. Elements of this battalion held this advanced position until 9.00 H the following day.

3rd Battalion advanced in its zone from BOYAU CHAMPAGNE-inclusive- on the east to boundary of Regiment on the west at 7 H 30, until it had reached the enemy trench line HURTEBISE.

(over)

I have made a separate report on the behavior of certain officers of the regiment.

8. During the afternoon of the 28th September, upon learning that the 2nd Battalion was not progressing, I ordered forward the 1st Bn. (which had been until then withheld as Division Reserve) to support the 3rd Bn. It had reached my P.C. en route to the front when the 3rd Bn. broke. As it was then too late in the day to renew the attack, I put the 1st Battalion back in the reserve position for the night and on the following day put them in the TIRPITZ trench ready to renew the attack. The 3rd Battalion was placed in support in the BRESLAU TRENCH (by order of Brigade Commander) and the 2nd Bn. was placed in reserve in the old French first line trenches. The 9th Cuirassiers made a raid on the CLOTILDE-DROMADAIRE TRENCHES on 29th September after intense artillery bombardment, and on the 30th September they moved forward. The 368th Infantry was ordered to hold their but Major Merrill (commanding the 1st Battalion) in the belief that an order to advance had miscarried, decided to push forward with the French, covering their right flank. The 1st Battalion advanced with the French and the orders for their withdrawal did not reach Major Merrill till after the line had passed BINARVILLE.

Feb. 26. 1919. (Thurs) CE

The following morning after the arrival of the 368th Inf. at Camp Meade for demobilization several officers of this unit, among whom were Capt, Grastty, Lt. Clifford and Lt. Lewis, went to the Hostess House near the area in which they were stationed andasked if breakfast was being served. The white Y. W. C. A. worker informed them that it was, whereupon the officers made their way toward the dining room. The worker hastened after them and informed them that there was a Hostess House at Midway where the Colored officers and men could be served. Midway was quite some distance away. Capt, Grastty informed her that they were just from the trenches in France where they had endured the same conditions as the white troops, and that he did not care which Hostess House was designated for Colored Troops, but that all he desired was to secure something to eat, and if breakfast was being served there he intended to eat there. The Y. W. C. A. worker then called the Colonel of the camp. He came to this House and informed the officers that they could not be served there. Capt, Grastty stated that he did not desir to be insubordinate, but that he intended to stay where he was. The Colonel then asked for each of the officers names, which were given, and the officers, in turn, asked that they be furnished with his name. After considerable argument the Colonel instructed the Y. W. C. A. worker to serve the officers present, but instructed her that no other Colored officers or men were to be served. The next day an order was issued to this effect.

8/4/3

(Prisoners taken)- cont'd.

Sept. 27th. 1 (from 11th Co., 3rd Bn., 354th Infantry) taken by Company "K", 3rd Bn., 308th Infantry.

(c) Material captured.

1 machine gun by Company "F".
1 machine gun by Company "H".
2 machine guns by Colonel's Regimental P.C. party.
1 machine gun by 2nd Battalion.

(d) Casualties.

	Officers.	Enlisted Men.
Killed	1	36
Severely Wounded	2	84
Slightly Wounded	1	87
Gassed	5	45
Missing	0	7

Total casualties: Officers 9; enlisted men 269.

(e) Employment of infantry weapons.

(1). Insufficient use of the infantry rifle.

(2). But little use was made of machine guns owing to the character of the terrain. They were with each Battalion seeking opportunity and ready.

(3). The character of the terrain and the movements of the companies prevented much use of the Stokes Mortars. They were in position on the morning of Sept. 26th, but the enemy was found to have withdrawn beyond range. It was not till Sept. 30th that it became possible to transport them and ammunition to the front. They were used slightly on that day.

(4). Though repeatedly asked for, the French rifles, trombloms, and V.B's. were not furnished the companies till Sept. 30th - and then but 100 for the entire regiment were received, through special appeal to General Hay.

(f) No tanks, gas troops, nor other specialties assisted.

(g) No artillery preparation took place on our front. We had to cut our way through by the use of our small and useless wire-cutters and the few large ones borrowed from the French. Where it was impossible to cut the wire, the men climbed through it or over it. There was slight artillery assistance on the 28th September.

2/26/37

I have made a separate report on the behavior of certain officers of the regiment.

8. During the afternoon of the 28th September, upon learning that the 2nd Battalion was not progressing, I ordered forward the 1st Bn. (which had been until then withheld as Division Reserve) to support the 3rd Bn. It had reached my P.C. en route to the front when the 3rd Bn. broke. As it was then too late in the day to renew the attack, I put the 1st Battalion back in the reserve position for the night and on the following day put them in the TIRPITZ trench ready to renew the attack. The 3rd Battalion was placed in support in the BRESLAU TRENCH (by order of Brigade Commander) and the 2nd Bn. was placed in reserve in the old French first line trenches. The 9th Cuirassiers made a raid on the CLOTILDE-DROMADAIRE TRENCHES on 29th September after intense artillery bombardment, and on the 30th September they moved forward. The 368th Infantry was ordered to hold their but Major Merrill (commanding the 1st Battalion) in the belief that an order to advance had miscarried, decided to push forward with the French, covering their right flank. The 1st Battalion advanced with the French and the orders for their withdrawal did not reach Major Merrill till after the line had passed BINARVILLE.

9. RECORD OF EVENTS AND OPERATIONS OF THE 368th INFANTRY, U. S. A.
From 19th September to 5th October (incl.) 1918.

18th September 1918. Regiment holding lines in Sub-sector Ravines in ST. DIE District.

19 - 19 Night. 2nd Battalion relieved from C. R. COIROTS by 3 companies of French Regiment and 1 company 321 Infantry 91st Difision, U. S. A., Rendezvous STIVAL. 3rd Battalion relieved by C. R. COLXNS by a battalion of French Regiment, rendezvous RAGE L'STAPE.

19 - 20 Night. 1st Battalion relieved from C. R. COLXNS by a battalion of French Regiment. 2nd Battalion embussed at PAJAILS at 20 H 30 for VANEMONT and LA COTE. 3rd Battalion embussed at La Haute-NOUVIVILLE at 20 H 30 for CONCIZUK.

20th Sept. At 10.00 H command of Sub-sector RAVINES passed to Colonel Zopff, Prench Regiment. 2nd Battalion arrived at VARIMONT and LA COTE. 2nd Battalion entrained at CORCIKOL entraining area for CIVAY-on-ARGONNE. 1st

21st Sept. Battalion, Headquarters Company, Machine Gun Company, and the Supply Company arrived in CONCIEUK entraining area at 5.00 H 3 Battalion, Headquarters Company, Machine Gun Company, and a portion of the Supply Company entrained at CONCIEUK for CIVRY-on-ARGONNE.

22nd Sept. 2nd Battalion arrived at CIVRY-on-ARGONNE and marched to BOURNONVILLE. At 1 H 30 the 1st Battalion, the remainder of the Supply Company, a detachment of the 365th Field Signal Battalion, and "pickins" entrained at CONCIEUK for CIVRY-on-ARGONNE and marched to LA NEUVILLE.

Sept. 23 The 1st Battalion a portion of the Supply Company detachment of the Field Signal Battalion, and pickups

arrived at CIVRY ARGONNE and marched to LA NEUVXILIE and then later in the day to SOURRONVILLE. The entire regiment marched from BOURRONVILLE at 20 H 30 for CAMP SOUNAIT.

The Regiment arrived at CAMP SOUNAIT at 9.00 H and went into billets. The regiment was ~~re~~ported to 1st D. C. P. French in accordance with instructions contained in letter from the 1st Army Corps Headquarters to the Commanding General, 92nd Division, dated 23rd September, 1918, and was assigned to the Brigade commanded by Colonel Durand. At 21.00 H the regiment marched from CAMP SOUNAIT to the front assigned to it on the RIGHT BANK OF THE AISNE, NORTH of VIENNE-le-CHATEAU and La HARAIRE, and on the following day took the following positions:

2/26/140

P. C. of the Regiment-LaCAPINIERE
2nd Battalion P. C. - La PONNTIERE
3rd Battalion P. C. - La PLACARDEKKE
1st Battalion P. C. - La HAUTE BATIS

The zone of action of the Regiment: Left boundary - Boyau 10, eastern Edge of BOYAU-CARNE-BOYAU de la COPE 176 (exclusive)- 500 meters west of BINARVILLE. Right boundary - LA SURALLE (exclusive) Cross road of the road SREVOT-DAGATELLE-PAVIELON and the way ~~and the way~~ N. S. LA HARALES FORTALIE-aux-CHARMES-BINARVILLE-LAISON.

Dispositions of the regiment:

(a) 2nd Battalion in the front line,3 companies in the front and 1 in suppport.

(b) 3rd Battalion in close support with 3 companies on NORTH BANK of BIESNES RIVER, and 1 company on RIGHT bank BIESNES RIVER.

(c) 1st Battalion at CAMP DIE HAUTS BATIS as reserve 1st D. C. P.

26 Sept. 2nd Battalion at 5 H 23, which was H hour, reconnoitered the enemy trench postion opposite it and progressed at a slow pace, because of the abundance of wire, until the right half had made

an advance of 3 kilometers, where it met with strong opposition of machine gun nests. It then withdrew to the rear, without orders, to trenches of the French system, in rear of the trenches from which it had departed in the morning.

2rd Battalion, in accordance with plan, supported the advance of the 2nd Battalion and occupied the trench system vacated by the latter battalion when it moved forward at H hour, which position it continued to hold after the 2nd Battalion had passed through it on its withdrawal. 1st Battalion (Divisional Reserve) moved forward late in the day from HAUTE BATIS to P. C. CAPINERE.

2/26/141

27 Sept. At 4 H 30 prders were received from Colonel Durand, commanding the Brigade, for an attack to be made at 5 H 18 by the 2nd and 3rd Battalions, side by side, the objective being trench LEOMADTHE, 2nd Battalion was assigned to zone East of BOYAU STUTIMET (exclusive). It was brought up from the rear and launched its attack from RAVIN DE DEL ADRI at about 11 H 30, progressing to the front about 2 kilometers against M. G. fire. Elements of this battalion held this advanced position until 9.00 H the following day.

3rd Battalion advanced in its zone from BOYAU STUTTSANT- inclusive-on the east boundary of Regiment on the west at 7 H 30, until it had reached the enemy trench line EUPIRATES.

1st Battalion was moved up to the front line trenches of the original French system. A reconnoissance party under Colonel Brown, commanding the regiment, and including Captain Burns, Lieut. De Soulancey (French Army) and Lieut. Carpenter, made 9 prisoners and took 2 machine guns at enemy position in the Lager? Line at 203.56-272.85.

28 Sept. The task of taking the trench du DROMMATHE was consigned to the 2nd and 3rd Battalions with the zones unchanged.

2nd Battalion left from Trench Pinlado about 12 H 30 with Companies "H", "F", and "N" in the advance and "G" in support. These units advanced some 800 meters when they were subjected to fire from M. G. nests, whereupon they withdrew to the first mentioned positions.

2/24/42

Another attack was organized and launched from RAVIN DE DEL ADRI at about 15.00 H. The battalion was unable to advance against the M. G. nests in the woods and retired, without orders, to the ravine in the rear of the trench FINLAIES-COURLAIDN. By V. O. of the C. O. 268th Infantry, Captain Burns was placed in command of the 2nd Battalion at this point at about 17.00 H because of the physical exhaustion of Major Elser. Before another attack could be organized, the battalion was attacked in the above position by 1 machine gun and rifles estimated at about 30, and when dusk fell the remnants of the battalion were placed in a trench system parallelling East and West coordinate 272 to the East of BINARVILLE ROAD.

Detachments of the battalions which were straggling to the rear were stopped by Colonel Brown in person and disposed of in trench system. Company officers were not exercising the duties of their officex and could not be distinguished from their men. 3re Battalion advanced along the BINARVILLE ROAD. Strong machine gun opposition developed at BOREAU LAGER, but the advance was continued until the battalion had crossed the LAGER LINE and was within 200 merers of the objective (Trench du Drommathe) at about 16.00 H. Under a heavy enemy fire its advanced companies withdrew, without orders, to the trench system DUPHRATES to BOYAU STUTTANT, with the exception of Company "H" which maintained its position during the night and until it was relieved the following morning. 1st Bn, no change.

29 Sept. 2nd Battalion relieved from position in trench by 1st Battalion and went to reserve position on North bank VUSGSE-le-CHATEAU - LA NARATHE ROAD. 3rd Battalion remained in trenches DAMAS-BRESIAU. 1st Battalion relieved 3nd Battalion at 11 H 30, Sept 30, at 14 H 30 the 1st Battalion (on the initiative of Major Merrill, who feared that orders to advance had failed to reach him) joined the 9th Cuiressiers (French) in the advance on DINARVILLE, and progressed until the leading company was 206 meters N. E. of BINAHVILLE. At 23.00 H the Battalion was ordered to the rear in compoiance with orders of Colonel Durand, commanding the Brigade. The position of the regiment on this date was:

2/26/143

Oct. 1st.

P. C. Regiment - TOUR D'AUVERGIE.

1st Battalion - Rear BIRANVILLE, under orders to return to Trench DAMAS, 203.56 272.85.

2nd Battalion - RAVINE DES PONNERESS.

3rd Battalion - COTE 188.

Headquarters Company, Supply Company } North bank Vienie-le-LA NARATHE ROAD.

Machine Gun Company - LA SAPNIERE.

During the operations described above, the Machine Gun Company, 309th Infantry, acted with the 2nd and 3rd Battalions. Company "B", 381st N. G. Battalion, acted with 3rd and 2nd Bns. Company "A", 351st N. G. Battalion acted with 1st and 3rd Bns.

Oct 2-3. Regiment in reserve trenches in ARGONNE with P. C. at TOUR D'AUVRNONE.

Oct. 4-6 On the night of the 4th, the regiment moved by marching from the trenches to Camp LA NEUVE, remaining in this position until the afternoon of the 5th October, when it moved to entraining point.

RESUME

On September 26, the mission of the 2nd Battalion (in front postitios) was:

"(a)n To maintain contest with the enemy.

(b) To insure liaison between the 11th Cuirassiers on our left and the 305th U. S. Infantry on our right.

(c) To follow the enemy in his retreat; to send out strong patrols which were to take and occupy enemy positions not not strongly held. From these positions further patrols to be sent forward to proceed in like manner."

Company "G" and the Scout Platoon carried out the mission stated above but did not progress far. Casualties: 1 killed, 2 wounded, 1 gassed (doubtful). Company "F" made an excellent advance, two platoons reaching the TIRPITZ TRENCH, killing 3 Boches, capturing 1 prisoner and 1 machine gun, but withdrew to their ~~te~~ original departure position in first German trench. The other platoons advanced only to the RAVIN DES NEIRAILIEUSES from which they claim they were driven back to the original departure trench. The losses of Company "F" on the 26th Sept. were only 4 men wounded 1 gassed (doubtful). They did not "take and occupy enemy positions not strongly held" as ordered.

Companies "H" and"E" and 4 machine guns on the 26th September, under Major Elser (who had pushed through the Boche wire and joined them) advanced to a point near the Zeppelin trench but further to the east than the line of advance of Company "F". Here 3 Boches were killed and 1 captured, and 1 machine gun captured. Instead of holding the advanced position reached, the entire force withdrew and all but three platoons came entirely back to rear of the 3rd Battalion then occupying the front line in the former French position. The claim was that were out of water. Arrangements had been made to send it to them that night. The losses of these two companies on the

26th Sept. were Company "E" 6 men wounded; Company "H" no casualties; Machine Guns Company, 7 wounded; Company (how many of these were with the four guns with Major Elser is not known).

The net result of the work of this battalion on the 26th was the withdrawl of half of it to a point within our own lines and the consequent disorganization of Companies "H","F", "E", which it took the greater part of the 27th to drive into a renewal of the advance on BINARVILLE. They thus on the 27th simply retraced their steps over the ground abandoned by them on the 26th.

2/24/145

On the 27th September the mission of the 2nd and 3rd Battalions in the first line was;- "At daybreak to push reconnaissances towards the trenches CLOTILDE and DROMANAIRE and to advance their line maintaining liaison to right and left." On this day (27th), Company "E" reached a position in support of Company "H" at 12 Noon and remained there until 3.00 H on the morning of the 28th when it moved to the rear, to the DAMAS trench to get rations and water- (for which carrying parties should have served). Losses, 1 killed; 1 wounded.

Company "F" - Advanced to PINLANDE TRENCH thence to TIRPITE and then nearly to FAIKENHAYN trench and remained there till 5.00 22.00 H, and then withdrew to the ZEPPELIN trench and remained there till 5.00 H on the 28th. Losses on the 27th- 1 killed; 5 wounded.

Company "G"- moved forward and to the eastward from its position of the 26th to trench PINLANDE and from there advanced with Company "F" to the TIRPITZ TRENCH, but there lost touch with Company "F" and remained there till 4 o'clock on the morning of the 28th, when it withdrew "under artillery and machine gun fire" to the PINLANDE TRENCH. Losses(on the 27th)12 wounded.

Company "H" - Advanced one platoon to TRIANGLE TRENCH, followed by two platoons to the COURIANDE TRENCH and remained there till 3.00 o'clock on the morning of the 28th, when it moved to the left and rear to get rations and water. Losses on 27th 3 killed; 4 gassed(doubtful)

Net result was the patrolling accomplished and the advance of the battalion to the general line of the PINLANDE TRENCH (by parts only of the battalion).

On the 27th the Third Battalion advanced in its zone, just east of the 2nd Battalion, from its original position in occupation of the old French front line, to include the taking and holding of the MOREAU VALIES and line of BOCHE LAGERS near ZEPPLIN TRENCH and BINARVILLE ROAD, bu its advance elements.

On the 28th the 2nd Battalion attempted an orderly advance with Companies "E", "F", and "H"(from right to left) in front line and Company "G" in support. The advance was necessarily made by boyous and tramway lines as the intervining torrain was a jungle of wire entanglements, cheveaux de frise, and ruined forest. Again the officers failed to hold the ground gained, and also failed to hold their companies and platoons together. I stopped the disorganized mass of men when they reached the line of trenches near which my P. C. was located.

On the 29th September a rearrangement of the Brigade Sector was made, the western half of it being occupied by the 9th Cuirasciers.

On the 30th September the 1st Battalion, then in front line, advanced on the right of the 9th Cuirassiers, maintaining liaison with the 308th Infantry on the right. This Battalion reached the town of DINESVILLE. Orders to withdraw and assemble the regiment in positions in German and French trenches in support were then received. This change took place on September 30 and October 1st.

11. The enemy units engaged were the 23rd Regiment and the 384th Infantry Reserve Regiment.

12. Summary-

(a) Depth of advance- 4½ kilometers.

(b) Prisoners taken-

Sept. 26th. 1 (from 7th Co., 2nd Bn., 83rd Regt.), taken by 2nd Battalion, 365th Infantry.

Sept. 27th. 9 (from 11th Co., 3rd Bn., 284th Infantry Reserve Regiment) taken by Regimental P. C. personnel, led by the C. O. 368th Infantry.

Sept. 27th 1 (from 11th Co., 3rd Bn., 284th Infantry) taken by Company "E", 3rd Bn., 368th Inf.

(c) Material captured.

1 machine gun by Company "F".

1 machine gun by Company "H"

1 machine gun by Colonel's Regimental P. O. party.

1 machine gun by 2nd Battalion.

(d) Casualties.

	Officers.	Enlisted Men.
Killed	1	36
Severely Wounded	2	94
Slightly Wounded	1	87
Gassed	5	45
Missing	0	7

Total casualties: Officers 9; enlisted men 269.

(e) Employment of infantry weapons.

(1). Insufficient use of the infantry rifle.

(2). But little use was made of machine guns owing to the character of the terrain. They were with each Battalion seeking opportunity and ready.

(3). The character of the terrain and the movements of the companies prevented much use of the Stokes Mortars. They were in position on the morning of Sept. 26th, but the enemy was found to have withdrawn beyond range. It was not till Sept. 30th that it became possible to transport them and ammunition to the front. They were used slightly on that day.

2/24/43

(4). Though repeatedly asked for, the French rifles, trombloms, and V. B's. were not furnished the companies till Sept. 30th - and then but 100 for the entire regiment were received, through special appeal to General Hay.

(f) No tanks, gas troops, nor other specialties assisted.

(g) No artillery preparation took place on our front. We had to cut our way through by the use of our small and useless wire-cutters and the few large ones borrowed from the French. Where it was impossible to cut the wire, the men climbed through it or over it. There was slight artillery assistance on the 28th September.

(h) Terrain. The position had been held by bothFrench and Germans for the entire war and had been constantly improved. It consisted of a rolling country cut up by ravines and covered with the ruined debris of the ARGONNE FOREST, blasted by four years of shell fire, and interlaced by solid wire defenses of all kinds.

Numerous lines of well built trenches, boyaus, dugouts, shelters and tramways made this one of the strong parts of the Hindenburg line.

(i) Conclusions.

The regiment deserves commendation for its successful performance of the move from the St. Die Sector, constant night marches with half its allowance of animals, short rations for men and animals due to failure of the 92nd Division to supply us as directed.

It deserves commendation for successfully performing its original mission of liaison between the 38th (French) Corps and the 77th Division(U. S.).

It deserves commendation on a whole for successfully advancing as rapidly as did the French units on our left, in spite of the many difficulties encountered.

I am far from satisfied with the actions of many individual officers and men and the lack of the aggressive spirit and the will to advance and conquer displayed by the great majority of the officers and men.

The resultant inertia was too great for the 3rd Battalion Commanders and the Regimental Commander alone to overcome. I have taken the necessary disciplinary measures to rid the service of the worse cases but without the leadership of efficient officers, who are not in constant fear for their own personal safety, it is worse than useless to expect aggressive, determined work on the part of the enlisted men.

2/26/149

I have asked for white officers because I knew that sufficient efficient colored officers were not available. There are a number of efficient colored officers and I have given commendation where deserved, but I have also condemned where it seemed to be necessary.

I regret that the loss of two Field Message Books, during one of our many changes of station, prevents giving in full all orders given by us.

As all maps of the VIENNE-le-CHATEAU sector were turned in by Division order, the only ones available are the two attached, thus leaving the Regiment without a file copy. Four airplanex views of parts of the trench system are also attached.

Appended will be found the detailed reports of Battalion and Company Commanders. The latter are not accurate in statements as to results accomplished nor as to some other details.

As this report was practically completed when called for, it does not follow exactly the form indicated.

F. R. Brown,

Colonel 308th Infantry.

(h) Terrain. The position had been held by both French and Germans for the entire war and had been constantly improved. It consisted of a rolling country cut up by ravines and covered with the ruined debris of the ARGONNE FOREST, blasted by four years of shell fire, and interlaced by solid wire defenses of all kinds.

Numerous lines of well built trenches, boyaux, dugouts, shelters and tramways made this one of the strong parts of the Hindenburg line.

2/26/178

(i) Conclusions.

The regiment deserves commendation for its successful performance of the move from the St. Mihiel sector, constant night marches with half its allowance of animals, short rations for men and animals due to failure of the 90th Division to supply us as directed.

It deserves commendation for successfully performing its original mission of liaison between the 38th(French) Corps and the 77th Division (U. S.).

It deserves commendation as a whole for successfully advancing as rapidly as did the French units on our left, in spite of the many difficulties encountered.

I am far from satisfied with the actions of many individual officers and men and the lack of the aggressive spirit and the will to advance and conquer displayed by the great majority of officers and men.

The resultant inertia was too great for the 3rd Battalion Commanders and the Regimental Commander alone to overcome. I have taken the necessary disciplinary measures to rid the service of the worst cases but without the leadership of efficient officers, who are not in constant fear for their own personal safety, it is worse than useless to expect aggressive, determined work on the part of the enlisted men.

I have asked for white officers because I knew that sufficient efficient colored officers were not available. There are a number of efficient colored officers and I have given commendation where deserved, but I have also condemned where it seemed to be necessary.

I regret that the loss of two Field Message Books, during one of our many changes of station, prevents giving in full all orders given by me.

As all maps of the VIENNE-le-CHATEAU sector were turned in by Division order, the only ones available are the two attached, thus leaving the Regiment without a file copy. Four airplane views of parts of the trench system are also attached.

Appended will be found the detailed reports of Battalion and Company Commanders. The latter are not accurate in statements as to results accomplished nor as to some other details.

As this report was practically completed when called for, it does not follow exactly the form indicated.

J. N. Brooks,
Colonel 368th Infantry.

American Expeditionary Forces, France,

P. C. Sapiniers, 27th September, 1918.

From: Captain Louis R. Mehlinger, 368th Infantry. U. S. Army.

To: The Commanding Officer, 368th Infantry.

Subject: Conduct of Regimental Surgeon toward wounded officers and enlisted men.

2/26/50

1. Believing that the conduct of the Regimental Surgeon, 368th Infantry, in his treatment of wounded officers and enlisted men in the presence of officers and men, when sent to this aid station for his disposition, to be prejudicial to good order and discipline in in the military service and such as brings discredit upon the same, and that if the same is permitted to be continued the morale of the personnel of the regiment will be shattered if the officers and men are made to feel that they may at any day be subjected to the same treatment by the Regimental Surgeon, the following observations are made for the consideration of the Commanding Officer:

(a) Case of 1st Lieut. James C. Pinckston: This officer was wounded sometime during the night of 26th September. He arrived at the aid station about noon Sept. 27th in a very weakened condition, being borne on a litter by soldiers from his company. The Surgeon ordered him to get up from the liter and walk to the ambulance. When the officer was slow in moving the Surgeon asked "Are you able?" On replying that he did not know, the Surgeon remarked indignatly "Well I dont care. If you dont want to go, stay!" and turned away from him. He then would not permit the officer to recline on a liter, but made him sit up unassisted. He then fell over but was placed on an unoccupied liter by some officers. After this one of the medical officers gave him medicine hypodermically, at least three times, as he seemed to

be in a dying condition. The liter could have been used for the comfort of this officer as they were unoccupied during this time. The officer left the aid station at 3.37 p.m., in the ambulance with Lt. Banks.

(b) Case of 1st Lieut. James C. Banks: This officer was disabled by gas about 3. p.m., 26 Sept., and owing to his being cut off from his unit remained out in No man's land during the entire night. After having his case diagnosed he walked to the Regimental aid station, arriving at about 11.30 a.m., 27th September. When he was conducted to an ambulance he was refused admittance by the Surgeon and directed to wait for the next trip. When the next ambulance came he was assisted upon the front seat. While the ambulance was waiting its load the Surgeon came out and ordered him to dismount the second time, saying sharply "Who told you to get on this ambulance? Get off that ambulance." The officer crawled down and hobbled over to a liter, there being nothing else available to sit on. The Surgeon followed him and ordered him te in a rebuking manner "Get off that liter." This required him to stand up beside the fence until some one provided a box for him. There are instructions to the effect that all persons gassed or even suspected of being gassed are not to be permitted to exert themselves even if the desire to do so, not to say anything about being held up at an aid station. This officer did not get away from this aid station until 3.37 p.m., and not then until an officer made efforts to secure an ambulance for his removal.

(c) Case of Private Joseph (2105887) Lamell, Company E. This soldier was brought here after being shot in both legs and feet. The Surgeon made him get off the liter and walk to the ambulance and ordered him to get in unassisted and would not permit him to recline. Before going to the ambulance he ordered another soldier to put shoes on the soldier's feet although they were both bandaged and caused him considerable pain.

(d) Case of Corporal George (1800366) Allen, Company E: This

soldier had penetrating gun shot wounds in the right and left hips. The Surgeon made him sit up during the time he was waiting his turn to get in the ambulance. When the soldier attempted to lie down to relieve his suffering the Surgeon remarked to him: "If I catch you lying down, I will throw you in the mud."

2. This conduct of the Surgeon toward these wounded officers and men caused such a gathering in the vicinity of the aid station and the ambulances it was necessary to clear the road and the space in front of the aid station. This was done at the request of one of the junior medical officers. A guard was then placed to keep the men moving. At one time the Surgeon remarked: "If you don 't get away from around here I will take a gun and shoot every damned one of you."

2/26/32

3. The following officers and men can furnish information that will substantiate the above in the event the Colonel thinks an investigation worthwhile:

Captain Harry O. Atwood
Captain Milton A. McCrimmon
Lieut. Lucius Butler
Lieut. John H. Williams
Private James Butler
Lieut. Edgar L. Love, Chaplain
Lieut. Edward Harris
Lieut. Percy Stelle
Lieut. James Ponder
Sgt. Robert S. Boyd
Sergeant Robert L. Harrison.

Subject: Efficiency.

2/24/128

1. The following memorandum of the Division Commander, dated 1st November 1918, is quoted for your information:-

"1. The Division Commander, desiring to give to every officer the fullest opportunity to demonstrate his worth, and regarding efficient service in the face of the enemy as the supreme test, presents the following opportunity to all concerned:

If any officer who is, or has been, before an efficiency Board, and whose case has not yet received final action, believes that he possesses the qualities of leadership that will enable him to rehabilitate himself, and desires to do so, such officer will, upon application to the Commanding General, 92nd Division, be given a further opportunity to demonstrate his fitness by being assigned to front line duty with the special mission of taking prisoners. Undertaking this duty will demonstrate courage-succeeding in it will demonstrate efficiency and courage."

By command of Major General Ballow:

2/26/128

and Bernecourt, with Headquarters at Trimblecourt; stayed until December 1st then advanced to Conflans, Labry, Jarny and Droitomant. Company "A" then advanced to Hatrize; Co. "C" to Avril and Aumetz and Co. "D" to Briey, France, near the border of Germany; Company "B" remaining at Droitomant. Co. "D" moved to Briey Jan. 4th, 1919 where we remained until ordered back to the U.S.A. The town of Briey situated in Loraine in the centre of the "Briey Basin" and the heart of the coal and iron towns which Germany demanded from France in 1914 as a guarantee to remain neutral. When this was refused Germany occupied this town and held it for fifty-one months. It was evacuated the day after the armistice was signed. We stayed there until April 25th, meantime, having allotted to us the task of maintaining all main roads in advance sector District "J".

We marched out of Briey April 25th for Confaus, where we entrained and began the first leg of our return journey to America. Arrived at Marseilles, France, May 28th and proceeded to Camp Covington; stayed nine days and on May 7th embarked on Steamer "Roma" sailing at 1 p.m., reached Oran on the north coast of Africa on May 10th, stopped for twleve hours and reached Gilbraltar next day. After staying there for five days and taking on coal and provisions, we started on last part of return trip, May 15th, arrived off New York May 26th disembarked next day having been seventeen months in foreign service.

After the armistice was signed, there was organized in our battalion a band of twenty-five pieces, led by Bugler James Peck. This Band furnished music for the entertainment of them men. But the pride of the Battalion is a "Jazz Band" led by Bugler Buddy Meyers. This "Jazz Band" has played before thousands of soldiers and civilians in France, Belgium and Germany and is accredited by the vast majority to be the finest of its kind and size in the A.E.F. There was also organized a vaudeville and minstrel troupe and the three "shining" lights of this outfit were Cpl. Stanhope ("Hopie") Burford, Charles Carpenter and Samuel M...

Murray. As a comdeian, dancer and end man Cpl. "Hopie" is in a class by himself and he has been the delight of many audiences. Prvt. Chas. Carpenter, as a finale impersonator, was said to be one of the best ever seen in France. Together with Cpl. Burford they formed a vaudeville team that was hard to beat. Bugler Myers', Jazz Band and a theatrical troupe of fourteen comprising twenty-six men in all, formed a bunch of entertainers that was hard to beat and that was in great demand. They played in some of the largest theatres in France, to capacity houses. The entire outfit was under the personal direction of Cpl. David Robinson, Co. "D".

2/26/27

The officer in command of the Pittsburgh boys, 1st. Lieut. J.H. Storar of Ambridge, Pa., is one of the most dearly beloved and respected and honored officers of our Battalion. Always he has been one of the first to seek to promote the happiness, welfare and work of his men. The men fairly idolized him, for it was he, who led the men of Co. "D" when we went to the front and on that never-to-be-forgotten march to Bouinville. He is an officer and a gentlemen, deatly beloved and honored by his men and they are proud to have him return to Pittsburgh with them.

The men of this command, 368 in all are at Camp Dix, N.J. waiting to be discharged.

Written by Corp. David Robinson of Pittsburgh.

Headquarters 368th Infantry, A.P.O.766,
5th November, 1918. 17.55 H.

Memorandum for the Commanding Officer:

1. As per orders given direct by the Commanding Officer, I billeted the Supply, Headquarters and Machine Gun Companies, officers and men, in the town, using the available rooms for the officers; and billeted the 3rd Battalion as directed in the wooden barracks and in the dugout, reserving the small barracks building for the officers as directed by the Commanding Officers after his consultation with the Lieutenant of the 64th Infantry as to how many officers the barrack would accommodate and the condition of the same.

2. After the assignments had been made as best as possible, the Adjutant of the 3rd Battalion came to me and stated that he had been put out of his room and demanded that it be reassigned to him. I asked him how he had obtained the room and he stated that he secured it himself and came to arrange the matter with the Town Major, referring to the Sergeant of the 64th Infantry, who was preparing the list of the rooms by direction of the Lieutenant with whom you had been talking in regard to the town's accommodation. I called Lt. Campbell's attention to the fact that he had no right to obtain a room except through the Town Major and in obtaining it otherwise he had violated all orders on the matter of billeting including those of G.H.Q., A.E.F., Hq.92nd Div., and those of his commanding officer. I also explained to him that I could not give him the room as I was carrying out the orders of the Commanding Officer that the officers of the 3rd Battalion would be billeted in the small barrack which was as good if not better than the rooms in the village.

2/28/18, 99, 100 dup

3. About 16.45 H the Commanding Officer of the 3rd Battalion sent for me and stated that I had put his Adjutant out of his room and he wanted him to have it delivered to him. I explained to the Major that I had not done such as Lt. Campbell had not been assigned a room and had violated orders in attempting to obtain one from the civilians without authority from the Town Major. I also attempted to explain to the Major that I had simply obeyed the orders the Commanding Officer gave me personally to billet the officers of his Battalion in the small barrack and the men in the others and the dug out which was a repetion of what I had told him when he arrived in the town a few minutes after the Commanding Officer had departed. He stated that did not matter and ordered me to put out a 2nd Lieutenant from any one of the other companies and give the room to his adjutant. I called the Major's attention to the fact that his order for me to billet his adjutant in the village would be in disobedience of the orders I had already received from my Commanding Officer. He replied that "You are a captain and capable of deciding for yourself and this is a matter for your own opinion. The question is whether you are going to obey my order." I said to the Major "I stand to the orders of the Commanding Officer" and consequently in doing so I have not removed any officer from the other companies, and the Commanding Officers orders are being obeyed. I have always tried to the very limit of my ability to obey all lawful orders given me by my superior officers but this does seem that an advantage is being taken of me and I appeal to the Commanding Officer for that protection due an officer when he attempts to obey lawful orders in the performance of the duties assigned to him, particularly when it does not call for anyconstruction as to what the Commanding Officer meant.

4. As to the matter of billeting the officers I have endeavored to distribute them so that the largest number can have the greatest comfort possible out what is assigned, and in this respect report the following: To Lt.Col.Terrel, Regtl Surgeon and the C.O.3rd Bn: To.ColTerrell, No.6 Rue de Remaillo; to Major Norris and Major Lawrence No. 1 Rue de Mamey. This distribution would have given Col.Terrel the next best room on the list and made it possible for the Surgeon and the Bn.C.O. to occupy a large room with 2 separate beds in it, and provide 2 additional rooms with 1 bed in each which would have accommodated 4 officers from the other 3 companies. Col.Terrel took the room with 2 beds, Major Norris took the room intended for the Colonel and Maj.Lawrence took a communicating room in another place. They are located now as shown on [illegible] ting list of officers attached hereto. The result is this [illegible] gre[illegible] to oth[illegible] officers who, because of the fact that it has not [illegible] ey of [illegible] and co[illegible] officers to share rooms in comm[illegible] [illegible] beds in the meantime [illegible]

Headquarters 368th Infantry, A. P. O. 766,

WRITTEN STATEMENT OF CAPTAIN DANIEL SMITH.
OCTOBER 23rd. 1918.

Mr. President, Judge Advocate and Members of the court. I submit to a written statement of operation since 25th, September, and my behavior before the Enemy, for your information, and consideration.

1. I being attached to Company "K" just prior to going into the front line. I being in arrest and no duties to perform, I did not know anything about the Company. Never the less I were brought along with Company, I were placed in arrest Sept; 17th, 1918. On 25th of September Orders were received that the Bn. would attack on morning of 26th. I being in arrest the Company Commander then (Captain Peaks) Asked the Bn: C.O. what disposition he should make of me. He the (Bn; C.O.) gave orders. You can do as you like, carry him with you are leave him where he is. This the Company Commander related to me. So He (Captain Peaks) decided to carry me along, and assigned me a platoon. Which is contrary to Regulations, but anxious to be in the fight I said nothing.

2. At about 12:midnight, I received orders to proceed with one platoon, from Company "E" one platoon from Company "K" and a section of Machine Gun Company, and establish a combat liason between the 308 Infantry and the 368th, Infantry. There caught between our own Barrage and the Enemies. but maintained control.

3. On morning of 27th Sept; I received orders to withdraw my detachment and report at Bn; Headquarters, upon reporting I was given orders to have all other platoon report to there respective companies and me with my platoon report to Captain Peaks. I gathered up all straggling men of the company numbering in all 104 and reported at the place ordered. Had no map but was given a guide. upon reporting the Captain was not there, Lieut; Koger had command of about 29 men, not seeing the Captain I asked the Lieut; What was the order for the attack. All he knew was that the Bn; would attack at 5:30. P.M. I asked what was the objective, the direction, Have you a map, Have you recornnorted the ground, have you any patrols out, Have you connections with any one on your right or left. He the Lieut; did not know anything about any of the above questions. I not being satisfied taking a new company to the attack and not having anything as a mission. I decided to go and report to the Bn; Commander the circumstances, and accertain his plan for attack. I arrived at Bn; Hdqrs about 4;30. reported. and asked what was the hour for the attack, I were told the Bn; would attack at 5:30. I asked the objective, my directions, and for a map. I were given no objective, no direction nor map. all the information I received was that Company M" is on your left, and the 2nd Bn; is on your right. And that was given haphassard. He thru his map at me, and said find yourself, then snatched it from me. It getting late and the attack was to start at 5:30 I moved back to Company as fast as I could.

I arrived about 5:20. I formed Company, having only three platoons and one Officer, I at once begin to inspect for Grenades, and rifle grenades, there were none in company. I then sent a patrol to the right to get liason with the 2nd Bn: it being dark the patrol lost there way. At 5;30. Company moved out, Two platoon in the front line and one in support less two squads, which I detached and sent to the right flank as a combat patrol, as I had no connections with any one on the right. As I had only one officer I established my P.C. any place along the front line and there I remained, keeping my platoons connected, as the country was very thick with undergrowth it was very easy for one to loose there way. After advancing about 100 yards, I received a message from the rear that Company "I" was moving directly in my rear. I halted and had a conference with the Captain of thatCompany. Who said that he had been assigned to that sector, but after I had explained what had happened to me, and had no sector assigned to me, he decided to take the right. as soon as he had moved into position we started the advance. At about 9:00 P.M. Runner brought a Verbel order from Bn: Headquarters, Halt until further orders By order of Bn: Commander. And the Bn; Co had issued orders that all of his orders would be in writing signed by him, still he sent thatorder. At that time we had come under fire from Machine Guns. Having no Grenades , we opened fired with rifles I thought of my flanks and sent one platoon to the right flank, from Company I" and then sent for my other platoon in support and placed them on the left flank. and held that position all night under heavy boombardment of the Enemies Gas and Shrapnels, no cover. I sent runner to Bn; Hdqrs stating as near as possible my position and what was going on. this message was verbel, as it was raining and dark and I could not write a message. This runner never returned I since lerned that he was gassed and in Hospt; At 4:30 in all there were 14 men reported to me saying that they were sick, and felt liked they had been gassed, all of them N.C.O.s. and one Officer. I sent them ~~fifo~~ to the aid station. I then taken the advantage of darkness and withdrew to cover. and reformed Company. I then sent a message to Bn; Commander stating what I had did. I received a message that the Bn; will attack at 7:30. I with no officers and only a few N.C.O.s formed Company still had no connection with companies on my right, I reconnorted the flank myself for about 2 Kilo's and could not locate any one. I then thought that the gap that was betwee mycompany and the 2nd Bn; was going to be unobserved, I strung my company out as far as I could, far beyond control, but the situation called for it. I was to take the right, and "I Company was on my left. I moved out at the appointed time, keeping close to my line not having any officers I tried to control the whole line. all went well until we came under fire, of course the platoon that I was close too I had under control, Maching Guns was playing all along the line, I pushed the platoon forward, and arrived at a revene where Enemy had a supply depot, I did not know where I was or where I were going, only keep going. I halted at the revene, and taken observation, I thought the enemy might shell the position that I hel so I rushed the platoon across to the crest on north side of revene. and taken up position,

2/28/105

It then About 9:40 A.M. My other platoon had lost there way and being under the command of Sgt; and under fire had dispersed, I sent runner to locate them with orders for them to join me at double time, runner returned reporting that he saw nothing of them. I then sent a message to the Regimental Commander, and one to the Bn; Commander stating my position as near as I could not having a map, these messages was by a French Liason officer. I ask for support, and Art; preparation as I was under Machine gun fire and the enemies Barrage. At about 12:00 I had received no message from the Bn; Commander, and "Company "I had not yet come up in position, and men was coming to me claiming they was gassed, numbering in all 12. I decided to withdraw to another position out of the gas area, I withdrew and taken up position along side of road, about 75 yards. and Went to the Bn: commander to explain my actions, and my conditions as I not received any message from those headquarters, and all runners that I had sent had been wounded or gassed, that is why I went myself. upon reporting to the Bn; Commander. Why: he would not allow me to say ~~anything~~ thing. I reported to him that I did not have any officers and could not control my whole line, Why he then went ~~into~~ up in the air. and said I did have officers, I again said I did not have any. He then showed me a message from a Lieut; Reed whom I had never seen. althou this officer was just reporting from school, and had not yet joined the company. The officer Lieut Reed had sent a message to the Bn; Commander, stating have just reported to company, but have not seen Captain Smith, have two Platoons, and on way to join Captain Smith. The Bn; Commander sent the following message to Lieut Reed; Hold Captain Smith has just reported and is coming to your support. He Lieut: Reed about a Kilo in rear of the line, with the platoon that had got lost from the company that morning. And another thing the Bn; Commander sent a Verbel Order to the companies in the front line, about 1200noon to move back as he had asked for a Barrage, of course that did not concern me as I had taken the steps and moved company from the gassed area. This was not a retreat it was a complete movement and well organized with what men I had, no running except when crossing the revene, as the maching guns was playing in revene, then that was not a run a double time, under my command. I considered that the best thing to do, to save men and I think any other man with common sense would do the same thing. If he thought ~~into~~ and knew the ground that he occupied was all full of gassed shell holes, and the enemy had been shelling ~~into~~ with gass shell and, Bn commander flank fire had the position well filled with gass, and had lost a great many men gassed, and did not move back, I dont think he would be using common sense, regardless to orders. After reporting to the BN; C.O. I was ordered back into the position that I had previously occupied, I had not more than occupied the position when my 1st; Sgt Came to me and Captain I have been Gassed, Then the last runner I had reported, Gassed. Leaving me with about 10 men, as my other platoons had not yet arrived, although I sent for them again to report at the double time. The Bn; Commander had issued orders that all of his orders would be in writing and signed by him. and no Verbel orders would be issued. At 6:00 P.M. verbel orders came from his headquarters. The Bn; will move to the attack at once, this order came to me by runner. Althou Verbel orders were not to by obeyed but he still sent them, We had advanced about 100 Yds, when some Runners came to me and wanted me let them know where My P.C. was, and where it would be for the night. I told runners that My P.C. would be anywhere along this line as I had no officers, I would remain with the line. The runners left, and returned saying the Bn; Commander wanted me to establish a P.C. at ~~once, just at that time I was~~

once. Just at that time some one shouted out Halt. Ihad started to locate a P.C. as ordered, still had in mind that verbel orders were not to be obeyed, but by the second order coming I thought best to make some effort to carry it out, Then I heard some one sa move back in a hurry. I assumed command of both companies and commanded Halt; WHERE IN THE HELL ARE SUCH ORDERS COMING FROM.? HOLD THAT LINE UNTIL I CAN SEE WHO IN THE GOD DAM IS GIVING SUCH O ORDERS, This in presents of Lieut; Cross. Lieut; Cheers; the whole of Company "I". I then started to see and try and accertain as to who was giving such orders, and also establish my P.C. as ordered the second time verbelly, Just as I arrived in the Revene the Enemy began to boombard, and machine Guns was playing in the Revine, I with two runners from Bn; Hqrs, Halted and taken cover . I looked back and saw all of the men coming of the hill, I halted Company "K" and placed them under cover, and while so doing . another verbel order came for all Company officers to report to the B Bn: commander, then the second one come. I then reported , He the Bn; commander wanted to know what I were doing there, as I started to say that he ordered me there,/#/#/ he said you all are the biggist bunch of cowards #/ I ever saw. of course he may have had a reason for saying that, but I dont think he should have said that about me . I remained there for orders and never received any from him, and the Adjutant ordered me back into position althou my company hadn never been out of position only where I had assembled them to await my return. I returned to company and taken up position, remained. About 10: 00 P.M. Another Verbel order came from the Bn; Headquarters, THE BN: WILL RETIRE AT ONCE.I did not give runner time to say where the Bn; would retire,as the order was verbel. About 2:30 I sent runner to see if the Bn; had moved, he returned reporting that the Bn; had moved, I then left Company in Trenches and went to see for myself. and when I got to where Bn; headquarters had been I found nothing, I heard men talking some distance off. I made my way to them, and there I found bunches of men standing in the rain, with no officers, I asked where the Bn; Had;moved to. they knew nothing, only they heard some one say move back and every body left in a hurry, I then went to where I thought they may have moved, I found nothing there, it raining I returned to company about 5:00A.M. the 29th, I sent a message to Bn; C.O. I received a message in writing. YOU WILL BE RELEIVED FRENCH TROOPS. upon being releived I reported to the Bn; Co; and asked why he sent verbel message about the Bn; moving back,? Hasked me if I received it. I said yes; but as it was verbel I did bother ##### with it. He said WELL THAT IS THE FIRST ONE I EVER SENT YOU DID NOT CARRY OUT. THIS IN RESENT OF C PTAIN DICKIE.

WRITTEN STATEMENT OF CAPTAIN DANIEL SMITH.

OCTOBER 23rd. 1918.

Mr. President, Judge Advocate and members of the court.
I submit to a written statement of operation since 25th September, and my behavior before the Enemy, for your information, and consideration.

1. I being attached to Company "K" just prior to going into the front line. I being in arrest and no duties to perform, I did not know anything about the Company. Never the less I were brought along with Company, I were placed in arrest Sept: 17th, 1918. On 25th of September orders were received that the Bn. would attack on morning of 26th. I being in arrest the Company Commander then (Captain Peaks) asked the Bn: C. O. what disposition he should make of me. He the (Bn; C. O.) gave orders. You can do as you like, carry him with you or leave him where he is. This the Company Commander related to me. So he (Captain Peaks) decided to carry me along, and assigned me a platoon. Which is contrary to Regulations, but anxious to be in the fight I said nothing.
2. At about 12: midnight, I received orders to proceed with one platoon, from Company "E" one platoon from Company "K" and a section of Machine Gun Company, and establish a combat liason between the 308 Infantry and the 368th, Infantry. There caught between our own barrage and the enemies, but maintained control.
3. On morning of 27th Sept; I received orders to withdraw my detachment and report at Bn. Headquarters, upon reporting I was given orders to have all other platoon report to their respective companies and me with my platoon report to Captain Peaks. I gathered up all straggling men of the company numbering in all 104 and reported at the place ordered. Had no map but was given a guide. Upon reporting the captain was not there. Lieut. Koger had command of about 20 men, not seeing the captain I asked the Lieut. "What was the order for the attack. All he knew was ~~g~~ that

the Bn. would attack at 5.30 p.m. I asked what was the objective, the direction, have you a map, have you reconnoitered the ground, have you any patrols out, have you connections with any one on your right or left? He the Lieut. did not know anything about any of the above questions. I not being satisfied taking a new company to the attack and not having anything as a mission. I decided to go and report to the Bn. Commander the circumstances, and ascertain his plan for attack. I arrived at Bn. Hdqes about 4.30 reported and asked what was the hour for the attack. I were told the Bn. would attack at 5.30 I asked the objective, my directions, and for a map. I were given no objective, no directions nor map. All the information I received was that Company "M" is on your left, and the 2nd Bn. is on your right. And that was given haphassard. He threw his map at me, and said find yourself, then snatched it from me. It getting late and the attack was to start at 5.30 I moved back to company as fast as I could. I arrived about 5.20. I formed company, having only three platoons and one officer, I at once began to inspect for grenades, and rifle grenades, there were none in company. I then sent a patrol to the right to get liason with the 2nd Bn. it being dark the patrol lost it's way. At 5.30 company moved out, two platoons in the front line and one in support less two squads, which I detached and sent to the right flank as a combat patrol, as I had no connections with any one on the right. As I had only one officer I established my P. C. any place along the front line and there I remained, keeping my platoons connected, as the country was very thick with undergrowth it was very easy for one to loose his way. After advancing about 100 yards, I received a message from the rear that Company "I" was moving directly in my rear. I halted and had a conference with the Captain of that Company, Who said that he had been assigned to that

2/28/104 dup

sector, but after I had explained what had happened to me, and had no sector assigned to me, he decided to take the right, as soon as he had moved into position we started the advance. At about 9.00 P. M. runner brought a verbal order from Bn. Headquarters, Halt until further orders by order of Bn. Commander. And the Bn C. O. had issued orders that all of his orders would be in writing signed by him, still he sent that order. At that time we had come under fire from Machine Guns. Having no grenades, we opened fire with rifles. I thought of my flanks and sent one platoon to the right flank, from company "I" and then sent for my other platoon in support and placed them on the left flank, and held that position all night under heavy bombardment of the enemies gas and shrapnels, no cover. I sent runner to Bn. Hdqrs stating as near as possible my position and what was going on. This message was verbal, as it was raining and dark and I could not write a message. This runner never returned. I since learned that he was gassed and in hospital. At 4.30 in all there were 14 men reported to me saying that they were sick, and felt like they had been gassed. All of them were non-commissioned officers and one officer. I sent them to the aid station. I then taken the advantage of darkness and withdrew to cover, and reformed company. I then sent a message to Bn. commander stating what I had done. I received a messagh that the Bn. will attack at 7.30. I with no officers and only a few N. C. O's formed company still had no connection with companies on my right, I reconnoitered the flank myself for about two kilometers and could not locate any one. I then thought that the gap that was between omy company and the second Bn. was going to be unobserved. I strung my company out as far as I could, far beyond control, but the situation called for it. I was to take the right, and "I" company was on my left. I moved out at the appointed time, keeping close to my line and not having any officers I tried to control the whole line

2/28/104 dup

all went well until we came under fire, of course the platoon that I was close to I had under control, machine guns were playing all around the line, I pushed the platoon forward, and arrived at a ravine where the enemy had a supply depot. I did not know where I was or where I was going only keep going. I halted at the ravine, and took observation. I thought the enemy might shell the position that I held so I rushed the platoon across to the crest on the north side of the ravine and took up position. It was then about 9:40 a.m. My other platoon had lost it's way and being under the command of a sergeant and under fire had dispersed. I sent a runner to locate them with orders for them to join me at double time, the runner returned reporting that he saw nothing of them. I then sent a message to the Regimental Commander, and one to the Bn. Commander stating my position as near as I could, not having a map. These messages were by a French Liaison officer. I asked for support, and artillery preparation as I was under machine gun fire and the enemy's barrage. At about 12.00 I had received no message from the Bn. Commander and company "I" had not yet come in position and men were coming to me claiming they were gassed, numbering in all 12. I decided to withdraw to another position out of the gas area. I withdrew and took up a position along side of the road about 75 yards, and went to the Bn. Commander to explain my actions, and my condition as I had not received any message from those headquarters, and all runners that I had sent had been wounded or gassed, that is why I went myself. Upon reporting to the Bn. Commander why, he would not allow me to say a thing. I reported to him that I did not have any officers and could not control my whole line. Why he then went up in the air and said I did have officers. I again said I did not have any. He then showed me a message from a Lieutenant Reed whom I had never seen, although this officer was just reporting from school, and had not yet joined the company. The officer Lieutenant Reed had sent a message to the Bn. Commander, stating have just reported to company

2/28/1944 dup

but have not seen Captain Smith, have two platoons, and on way to join Captain Smith. The Bn. Commander sent the following message to Lieut. Reed: "Hold, Captain Smith has just reported and is coming to your support." He Lieut. Reed about a kilometer in rear of the line with the platoon that had got lost from the company that morning. And another thing the Bn. Commander sent a verbal order to the companies in the front line about 12 noon to move back as he had asked for a barrage. Of course that did not concern me as I had taken the steps and moved company from the gassed area. This was not a retreat. It was a complete movement and well organized with what men I had, no running except when crossing a ravine as the machine guns were playing in the ravine, then that was not a run a double time, under my command. I considered that the best thing to do to save men, and I think any other man with common sense would do the same thing, if he thought and knew the ground that he occupied was all full of gassed shelled holes, and the enemy had been shelling with gas shell and, being under flank fire had the position well filled with gas, and had lost a great many men gassed, and did not move back, I don't think he would be using common sense regardless of orders. After reporting to the Bn. C. O. I was ordered back into the position that I had previously occupied. I had not more than occupied the position when my first sergeant came to me and, "Captain I have been gassed." Then the last runner I had reported gassed. Leaving me with about 10 men, as my other platoons had not yet arrived, although I sent for them again to report at the double time. The Bn. Commander had issued orders that all of his orders would be in writing and signed by him, and no verbal orders would be issued. At 6:00 p.m. verbal orders came from his headquarters. The Bn. Will move to the attack at once, this order came to me by runner. Although verbal orders were not to be obeyed but he still sent them. We had advanced about 100 yards when some runners came to me and wanted me to let them know where my P.C. was and where it would be for the night. I told the runners the

2/28/1042 dup

P. C. would be anywhere along this line as I had no officers, I would ~~not~~ remain with the line. The runners left, and returned saying the Bn. Commander wanted me to establish a P. C. at once. Just at that time some one shouted out Halt. I had started to locate a P. C. as ordered, still had in mind that verbal orders were not to be obeyed, but by the second order coming I thought best to make some effort to carry it out, then I heard some one say, "Move back in a hurry." I assumed command of both companies and commanded, "Halt." "Where in the hell are such orders coming from? Hold that line until I can see who in the God dam is giving such orders." This in presents of Lieuts. Cross and Cheers and the whole of Company "I". I then started to see and try and ascertain as to who was giving such orders and also establish my P. C. as ordered the second time verbally. Just as I arrived in the ravine the enemy began to bombard, and machine guns were playing in the ravine, I with two runners from Bn. Hdqrs. halted and took cover. I looked back and saw all the men coming off the hill. I halted company "K" and placed them under cover, and while so doing another verbal order came for all company officers to report to the Bn. commander, then the second one came. I then reported. He, the Bn. Commander wanted to know what I was doing there, as I started to say that he ordered me there he said you all are the biggest bunch of cowards I ever saw. Of course he may have had a reason for saying that but I don't think he should have said that about me. I remained there for orders and never received any from him, and the Adjutant ordered me back into position although my company had never been out of position only where I had assembled them to await my return. I returned to company and took up position, remained. About 10.00 p.m. another verbal order came from the Bn. Headquarters, "The Bn. will retire at once." I did not give runner time to say where the Bn. would retire, as the order was verbal. About 2.30 I sent a runner to see if the Bn.

2/28/1041 dup

had moved. He returned reporting that the battalion had moved. I then left company in trenches and went to see for myself, and when I got to where Bn. Headquarters had been I found nothing. I heard men talking some distance off. I made my way to them, and there I found bunches of men standing in the rain, with no officers. I asked where the battalion had moved to. They knew nothing, only they heard some one say "Move back," and every body left in a hurray. I then went to where I thought they may have moved. I found nothing there, it raining I returned to company about 5.00 a.m. the 29th, I sent a message to Bn. C. O. I received a message in writing, "You will be relieved French Troops"." Upon being relieved I reported to the Bn. C. O. and asked why he sent verbal messages about the Bn. moving back? He asked me if I redeived it. I said, "Yes," but as it was verbal I did not bother with it. He said, "Well that is the first one I ever sent you did not carry out." This in presents of Captain Dickie.

(Separate Regt. by Lt. Koger)

Report of Operations, Company "K", 368th Infantry, for period September 25-30, 1918.

Company "K", 368th Infantry, received orders from Major Elser at 11:50 a.m. to go over the top immediately with Captain Jones of 2nd Battalion. Complied with orders as soon as possible. Left Vienne-le-Chateau about 12 Noon. Reached Captain Jones about 1:30 p.m. Captain Jones told us our first objective and mission, and the third platoon, Lieut. Koger commanding, went over with Capt. Jones andtwo platoons of Company "F" at 1:46 p.m. We employed the assault formation and advanced about 1500 meters to our first objective, the trench where we joined Lieuts. Colman and Henderson, both of Company "F", with their platoons. They had been halted by machine guns. We were followed by the rest of "K" Company, Captain Peeks commanding, as support and later they joined us in the same trench. After consultation between the two Captains it was agreed that Co. "F" would leave this trench for their next objective, Stuttgart Trench at 3:15 p.m. with Company "K" following in support. This was executed. The third platoon of Company "K" under Lieut. Koger, was left to "mop up" the trenches just left. The next objective was reached and the Stuttgart was cleared. One prisoner was taken, Co. "K" joining Co. "F" before this was done. After the 3rd Platoon, Co. "K" had mopped up the trenches Lieut. Koger proceeded to follow in rear of the assaulting waves, when they met Capt. Jones with Co. "F" and Capt. Peeks with the remainder of Co. "K". After consultation Capt. Peeks and Lieut. Koger decided that it was better to push forward and find competent dugouts for the night. We came upon a network of trenches which branched off in various directions for reconnaissance and he, Lieut. Koger, and thirty six men continued the advance up in the main trench. We came upon a trench, presumably a communication trench, which ran perpendicular to the Stuttgart, but seemed to have been frequented quite often and here we found a large dugout which seemed to have been used for a kitchen.

2128/102, 103 dupl

We sent 5 men back to the Battalion P.C. with a message of our location. All the rest of us stayed in the large dug-out the night of September 26th with the exception of eight men who formed four double sentry posts. Just before daybreak we all took posts to prepare for a counter-attack. There was none. During the night sentries heard machine gun fire on our flanks, so patrols were dispatched after daybreak to our flanks to locate them. One on our left was located. Finding that the rest of our company was missing we sent back a small patrol to either find them, for we knew the general direction of the trenches just mentioned above threw them somewhere behind us, or to return to the Battalion P.C. with a message as to our location and our being cut off without food or water. This was about 6:30 a.m. The message had not returned by 10:00 a.m. and Captain Peeks himself said that he was going back and get help of some kind, leaving Lieut. Koger in command. About 2:30 p.m. the rest of the company returned under the command of Captain Smith then attached to the company. Lieut. Koger then informed Captain Smith of his surroundings as had been discovered by patrols and observation. Captain Smith directed the Lieut. to send out patrols and to establish liaison with friendly units on our right and left. This was done, but at 4:30 p.m. Capt. Smith left Lieut. Koger in command and said he was going out to find out who was on our right and left, but he returned about 5:00 p.m. and told the Lieut. that Co. "I" was advancing on our left and that he had orders from the Major to advance when Co. "I" had gotten up, but let him know when this time had come. It was about 5:30 p.m. when we went over the top again, and this time ttwo platoons were in the assaulting waves, the 2nd and 3rd, and the 1st was in support under Captain Smith. The Platoon Sergeant who was commanding the 2nd Platoon seemed to have difficulty in keeping his lines straight or regular, so Lieut. Koger who was still commanding the 3rd Platoon placed himself at the junction of the two platoons and directed the assault.

2/28/103, 103 dup

After going about 75 meters a runner brought a message to Lieut. Koger, verbally, that Captain Peeks had sent an order, at which time Lieut. Koger asked the messenger, "Did you say Captain Peeks or Capt. Smith said do etc." He said Capt. Peeks. Lieut. Koger complied. After we advanced about 400 meters Lieut. Koger who had reached a trench about 2½ to 3 feet in depth directed the first wave to halt there until the line was straightened out again. The little trench had somewhat of a crescent shape and just before all the men had entered the trench a nest of machine guns opened up fire fromvarious directions.

2/28 1102, 103 dup

The reports of seven distinct machine guns were heard from the flanks and front. Our men opened heavy firing and kept it up for 20 minutes or half an hour. They pushed the enemy back just a little and silenced his machine guns. It was then 7:30 or 8:00 p.m., and well dark. Runners were sent in various directions to look for both Capt. Peeks and Capt. Smith but neither was found. Later a message came from Capt. Smith to withdraw to a better position some distance to the rear if you can. This was done by having the men come out of the trenches by the infiltration method at 2 or 3 minute intervals, and sneak up a road which had machine guns trained on it, but the wire behind us was too dense to withdraw through and the machine guns swept it at frequent intervals. We succeeded in withdrawing to the designated positionabout 1:15 a.m. While in trench many large shells exploded in its vicinity. We put on our gas masks for nearly one hour, but later we removed them after a test for gas by our Gas N.C.O. We retired without a casualty, except Lieut. Koger, who said he felt slightly gassed.

(signed) Lindwood C. Koger,

1st Lieut., 368th Infantry.

(Separate Report of Lt. Koger)

95-7

Report of Operations, Company "K", 368th Infantry, for period September 25 - 30, 1918.

Company "K", 368th Infantry, received orders from Major Elser at 11:50 a.m. to go over the top immediately with Captain Jones of 2nd Battalion. Complied with orders as soon as possible. Left VIENNE-le-CHATEAU about 12 Noon. Reached Captain Jones about 1:30 p.m. Captain Jones told us our first objective and mission, and the third platoon, Lieut. Koger commanding, went over with Capt. Jones and two platoons of Company "F" at 1:46 p.m. We employed the assault formation and advanced about 1500 meters to our first objective, the trench where we joined Lieuts. Coleman and Henderson, both of Company "F", with their platoons. They had been halted by machine guns. We were followed by the rest of "K" Company, Captain Peeks commanding, as support and later they joined us in the same trench. After consultation between the two Captains it was agreed that Co. "F" would leave this trench for their next objective, STUTTGART TRENCH at 3:15 p.m. with Company "K" following in support. This was executed. The third paltoon of Company "K", under Lieut. Koger, was left to "mop up" the trenches just left. The next objective was reached and the STUTTGART was cleared. One prisoner was taken, Co. "K" joining Co. "F" before this was done. After the 3rd platoon, Co. "K" had mopped up the trenches Lieut. Koger proceeded to follow in rear of the assaulting waves, when they met Capt. Jones with Co. "F" and Capt. Peeks with the remainder of Co. "K". After consultation Capt. Peeks and Lieut. Koger decided that it was better to push forward and find competent dug-outs for the night. We came upon a network of trenches which branched off in various directions for reconnaissance and he, Lieut. Koger, and thirty six men continued the advance up in the main trench. We came upon a trench, presumably a communication trench, which ran perpendicular to the STUTTGART, but seemed to have been frequented quite often and here we found a large dugout which seemed to have been used for a kitchen. We sent 5 men back to the Battalion P.C. with a message of our location. All the rest of us stayed in the large dug-out the night of September 26th with the exception of eight men who formed four double sentry posts. Just before daybreak we all took posts to prepare for a counter-attack. There was none. During the night sentries heard machine gun fire on our flanks, so patrols were dispatched after daybreak to our flanks to locate them. One on our left was located. Finding that the rest of our company was missing we sent back a small patrol to either find them, for we knew the general direction of the trenches es just mentioned above threw them somewhere behind us, or to return to the Battalion P.C. with a message as to our location and our being cut off without fod or water. This was about 6:30 a.m. The message had not returned by 10:00 a.m. and Captain Peeks himself said that he was going back and get help of some kind, leaving Lieut. Koger in command. About 2:30 p.m. the rest of the company returned under the command of Captain Smith then attached to the company. Lieut. Koger then informed Captain Smith of his surroundings as had been discovered by patrols and observation. Captain Smith directed the Lieut. to send out patrols and to establish liaison with friendly units on our right and left. This was done, but at 4:30 p.m. Capt. Smith left Lieut. Koger in command and said he was going out to find out who was on our right and left, but he returned about 5:00 p.m. and told the Lieut. that Co. "I" was advancing on our left and that he had orders from the Major to advance when Co. "I" had gotten up, but let him know when this time had come. It was about 5:30 p.m. when we went over the top again, and this time two platoons were in the assaulting waves, the2nd and 3rd, and the 1st was in support under Captain Smith. The Platoon Sergeant who was commanding the 2nd Platoon seemed to have difficulty in keeping his lines straight or regular, so Lieut. Koger who was still commanding the 3rd Platoon placed himself at the junction of the two platoons and directed the assault.

2/28/102

After going about 75 meters a runner brought a message to Lieut. Koger, verbally, that Captain Pecks had sent an order, at which time Lieut. Koger asked the messenger, "Did you say Captain Pecks or Capt. Smith said do etc." He said Capt. Pecks . Lieut. Koger complied. After we advanced about 400 meters Lieut. Koger who had reached a trench about 2½ to 3 feet in depth directed the first wave to halt there until the line was straightened out again. The little trench had somewhat of a crescent shape and just before all the men had entered the trench a nest of machine guns opened up fire from various directions.

The reports of seven distinct machine guns were heard from the flanks and front. Our men opened heavy firing and kept it up for 20 minutes or half an hour. They pushed the enemy back just a little and silenced his machine guns. It was then 7:30 or 8:00 p.m., and well dark. Runners were sent in various directions to look for both Capt. Pecks and Capt. Smith but neither was found. Later a message came from Capt. Smith to withdraw to a better position some distance to the rear if you can. This was done by having the men come out of the trenches by the infiltration method at 2 or 3 minute intervals, and sneak up a road which had machine guns trained on it, but the wire behind us was too dense to withdraw through and the machine guns swept it at frequent intervals. We succeeded in withdrawing to the designated position about 1:15 a.m. While in trench many large shells exploded in its vicinity. We put on our gas masks for nearly one hour, but later we removed them after a test for gas by our Gas N.C.O. We retired without a casualty, except Lieut. Koger, who said he felt slightly gassed.

(Signed) Linwood G. Koger,
1st Lieut., 308th Infantry.

10-P

95-3

Report of operations of 1st Battalion, 368th Inf., for period Sept. 25 - 30, 1918.

(In addition to previous information supplied about the battalion while in the ARGONNE FOREST Sector, the following is submitted).

September 26, the battalion was moved up as reserves for the French First Division and took station at HAUT BATIS about 3½ miles south of VIENNE-le-CHATEAU on the VIENNE-le-CHATEAU - BINARVILLE ROAD, and some ¼ of a mile east of that road in the forest. The night of the 26th the battalion was rather heavily shelled, but had no casualties.

September 27 we moved up to take station in the dugouts at [illegible] about ½ mile west of VIENNE-le-CHATEAU where we were again shelled. One sentry was wounded by shrapnel.

At 6:00 o'clock on the morning of Sept. 28 the battalion still as reserves was moved forward to occupy an old line of French trenches on the plateau north of VIENNE-le-CHATEAU some 1½ kilometers north of VIENNE-le-CHATEAU. Remained in the trenches for the night under shell fire. No casualties. About 6:00 p.m. the night of Sept. 28, the Colonel directed the battalion to proceed to relieve the 3rd Bn. but after a conference with the C.O. of the 3rd Bn. and upon his and my recommendations, the attempt was not made because of the uncertainty as to the location in the forest of the units to be relieved and it was decided to wait until daylight.

September 29th, at 11 a.m. the battalion advanced to the FLAPITZ line of trenches occupying the line formerly held by the 2nd and 3rd Bns. who were relieved the same day and returned to the rear. Companies "A","B", and "C" were put in the front lines with Company "D" in support about 1000 yards in rear of the FLAPITZ trenches. My P.C. was located in the rear of the center of my front line in the FLAPITZ trench. During the night the company in support was shelled and had eight men wounded by shell fire. Going into position the front line companies came under shell fire which at one time amounted to a barrage but the main part of which fell about 100 yards in front of our position.

September 30 I made a reconnaissance about 1000 yards north of my front line and across the front. Finding the ground clear of the enemy I moved the companies in the front line forward to occupy a line of German dugouts at this point, at the same time moving Company "D" up as a support to the FLAPITZ trenches. From the German or dug out line I at once sent forward three patrols of a platoon each in charge of the three Captains of the front line companies to push on up to the front and take possession of the BAUMADAM trenches. They were instructed to hold them, and while contact patrols were being sent out from that advanced point, to send back guides and bring up the remainder of their companies. Hearing about this time that the 3rd Battalion of the 9th Cuirassiers (French) on my left were advancing and that on my right the 308th Infantry of the 77th Division (U.S.) were far north of us, and although my last orders were to remain where I was, I nevertheless decided to order advances made by all three front line companies. Orders were given to push on hard to the front and attempt to occupy BINARVILLE before the French could get there. In the mean time Company "D" was moved up to the line we had just left. The companies were sent forward in lozenge formation, the battalion also being in lozenge formation. We encountered more or less M.G. fire and rather heavy shelling, especially "A" Company on the right, but they successfully passed by the M.G. nests after having opened up on them with the 37 M.M guns. The advance was begun at 2:00 p.m. and at about 4:00 p.m. the Battalion, except "D" Company, entered BINARVILLE close upon the heels of the French whose right flank was slightly overlapped by my left flank. At BINARVILLE itself we were met with heavy shell fire and the fire of several M.G. nests. Upon the advice of French officers present the advance was halted while the French sent for guns to reduce the M.G. nests. By the time this was done it had grown dark and all operations were halted for the night by the French and Americans alike.

At 10:00 p.m. I received orders to retire my battalion to VIENNE-le-CHATEAU but was unable to do so because of the large field of barbed wire and the darkness. The battalion was withdrawn at daylight on October 1, and went back to occupy the DAMAS line of trenches about 2 kilometers North of VIENNE-le-CHATEAU.

Having entered BINARVILLE with Companies "A", "B", and "C", the support company "M", was halted about 1000 yards south of the town and remained there the night of September 30-October 1, until relieved with the rest of the Battalion on the morning of October 1. "M" Company got some lively shelling from heavy guns while in this position. BINARVILLE itself got so hot at about 5:30 p.m. that the French and Americans withdrew to a point about 400 yards south of the town. "M" Company was at in liaison with a French Company of the 3rd Battalion of the 9th Cuirassiers and went north and to the left of the town according to their report to a point over 2 kilometers beyond the town. On the right the shell crashers at a point about [illegible] yards north of the right of the town were held all night under M.G. fire by approximately 100 of our men. While the battalion was in BINARVILLE itself, seven 8 inch shells came over dropped but did not result in any casualties.

(Signed) J.F. Morris,
Major, Commanding.

26

Report of Operations of 3rd Bn., 368th Infantry, for period Sept. 25-30, 1918.

1. Battalion less Co. "L" moved from support position at PLACARDELLE to Support position north of BIESME RIVER, extreme right- Co. "I", resting on LA HARAZEE, Co. "K" center, extreme left- Co. "M" resting on VIENNE-le-CHATEAU. Move completed between 20 and 22 o'clock Sept. 25. Co. "L" took position in trench, ridge south of BIESME RIVER at 292.50-269.85 to 294.50-269.75.
2. Co. "I" moved at 13 o'clock to support Co. "M", 2nd Bn., moved north along gener line 270.05 bounded east by 294.80, west by 294. Co. "K" 3 platoons moved to support Co. "F" along line bounded east by 294, west by 293.80, Co. "M" moved to line 270.60 bounded east by 292.70, west by 293.80. Movement forward by Co. "K" halted at TIRPITZ Trench 273.60. Co. "L" moved in position vacated by Co. "K".
3. 1 platoon Co. "K" constituted Co mixed post to maintain liaison along line 295, 1 platoon Co. "M" moved to Ravine d'Artillerie for liaison.
4. Battalion less Co. "K" and 1 platoon Co. "M" moved to position East of BINARVILLE ROAD on line 271 in order designated "M", "I", and "L", thence north along line bounded east by 292.70, west 292.40 (had 2 platoons M.G. Co.).
5. Advance began at 9 o'clock and continued north along this line until stopped by M.G. fire south of MOREAU VALLEY, line 273 north of MOREAU VALLEY bounded east by BINARVILLE ROAD, west by 292.30 was reached by 1 platoon Co. "M" at 19:00 H. Co. "I" moved forward east of BINARVILLE ROAD to point on line 272.50 running east and west from BINARVILLE ROAD to STUTTGART trench. P.C. on BINARVILLE ROAD at 292.70-272.40. Co. "K" in prolongation of line held by Co. "I" extending to 293.15, Co. "L" and M.G. Co. 2 platoons at 292.40-272.40, 292.70-272.40.
6. 1 platoon Co. "M" advanced at 7:30 to line North of MOREAU VALLEY 293.50-273.00, 292.80-273.00. 2 platoons occupied trench TARTARIN 292.50-272.80, 292.80-272.80. Cos. "I" and "K" in position east of BINARVILLE ROAD 292.80-272.50 to 293.15. Company "L" and two platoons M.G. Co., 368th Inf., in reserve trench RONCES. Company "L" moved into position vicinity 293.00-273.00 to attack on left flank of 2nd Bn. at 16.00 H.
7. On Sept. 29th, battalion withdrew to trench BRESLAU and MADGEBOURG trench, 293.40-271.50 to 294.00-271.50. Two platoons M.G. Co., 368th Inf. relieved by Co. "B", 351st M.G. Battalion.
8. Special report of conduct of individual officers and men previously made, report of casualties made in company reports already submitted.

(Signed) B.F.Morris,
Major 368th Infantry,
Commanding.

Operations Report, "A" Company, 368th Infantry, for period Sept.26-30, 1918, in

At 1:30 p.m. September 26, 1918, the company left HAUT BATIS on route to VIENNE-le-CHATEAU, arriving there at 5:15 p.m. The men were billeted there.

On September 27th, 1918, the company left VIENNE-le-CHATEAU at 9:30 a.m. and moved to the front line trenches, 1 kilometer North of VIENNE-le-CHATEAU, and arrived there the same day. They remained there until September 29th.

On September 29, 1918, the company proceeded to the FINLANDE trench, 1½ kilometers due North, at 1:00 p.m.

On September 30, 1918, the company advanced to the TIRPITZ trenches, from which place an attack was started in the direction of BINARVILLE. The attack was successful and resulted in the evacuation of BINARVILLE by the enemy. In the above attack one enlisted man was killed and eight were wounded. On the night of September 30, the company advanced 1½ kilometers Northwest of BINARVILLE and took position on the right of the 9th Cuirassiers (French Army) where it remained in the front lines until 7:00 a.m. on the morning of October 1, 1918. The company then withdrew, under orders, to VIENNE le-CHATEAU.

(Signed) Henry O. Atwood,
Captain 368th Infantry.

2/28/90

Operations Report, "B" Company, 368th Inf., for period Sept. 26 - 30, inclusive.

September 26, 1918. Moved from French camp HAUT BATIS to VIENNE-le-CHATEAU.

" 27 Company in billets at VIENNE-le-CHATEAU.

" 28 Moved from VIENNE-le-CHATEAU to the KEHL trench, a distance of about 1 kilometer, at 6:30 o'clock.

" 29 At about 13:30 o'clock, the company moved from the KEHL trench to the TIRPITZ trench, about 3 kilometers Northeast of VIENNE-le-CHATEAU.

" 30 At about 14:00 o'clock, under both M.G. and artillery fire, moved from the TIRPITZ trench and advanced upon the enemy at BINARVILLE. Remained within about 200 yards of the enemy until about 4:00 o'clock, at which time we were withdrawn to VIENNE-le-CHATEAU. (On October 1st, we moved from VIENNE-le-CHATEAU to the DAMAS trench, about 2 kilometers North of VIENNE-le-CHATEAU).

(Signed) L.A. Stafford,
Captain 368th Infantry,
Commanding Company.
(Per 1st Lieut. C. George).

.....

Operations Report "C" Company, 368th Inf., for period Sept.26 - 30, 1918, inclusive.

September 26, 1918. Moved from French Camp BOIS DES HAUT BATIS to VIENNE-le-CHATEAU.

" 27 Camped at VIENNE-le-CHATEAU.

" 28 Moved from VIENNE-le-CHATEAU to the KEHL trench about 6:30 a.m.

" 29 About 13:30 H moved from KEHL trench to TIRPITZ trench, about 2 kilometers N.E. of KEHL trench.

" 30 On this date, under both M.G. and artillery fire, moved from TIRPITZ trench and advanced upon enemy at BINARVILLE. Remained within 200 yards of and in contact with the enemy until 4 a.m. at which time we were withdrawn to VIENNE -le - CHATEAU.

(Signed) Elijah Reynolds,
Captain 368th Infantry,
Comdg. Co.

Operations Report, "D" Company 368th Inf., for period Sept. 26 - 30, incl.

September 26, 1918. In Battalion support at HAUT BATIS.

" 27 In Battalion support at HAUT BATIS.

" 28 In reserve at SAPINIERE.

" 29 In support in TIRPITZ trench.

" 30 Left the TIRPITZ trench in support of the Battalion upon its advance. The advance was halted in an orchard about 1 kilometer east of BINARVILLE.

On September 28, 1918, Company "D" was in an old first line trench (French) with two platoons East and two platoons West of the VIENNE-le-CHATEAU - BINARVILLE ROAD. On Sept. 29, I sent 2nd Lieut. Hawkins with the second platoon (this company) to carry water and rations to the 3rd Battalion in the front lines. On the night of the 29th I sent 75 men from the TIRPITZ trench to bring ammunition for the Stokes Mortar. Two men were wounded by shell fire while on this trip. Ten additional men were sent for M.G. ammunition. At about 7:00 p.m. six of the men in support in the TIRPITZ trench were wounded by shell fire and were sent to the rear. On the same morning, September 29, I received an order from the Battalion Commander to send an officer. I sent 2nd Lieut. Hawkins with 20 men from each of the 1st Battalion Companies (total 80 men) to find the location of the 3rd Battalion, and to reconnoiter the TIRPITZ trench and send back guides to conduct the 1st Battalion to its position. On the 30th we went in to the attack with Company "D" in support. At 4:00 p.m. the advance was halted in an orchard about 1 kilometer east of BINARVILLE. During the night we remained in support, along with Company "B", 351st M.G. Bn. The total number of casualties during the operation was 1 man killed, 10 wounded by shell fire, and 2 missing.

2/28/91

(Signed) V. H. Marchbanks,
Captain 368th Infantry,
Commanding Co. "D".

.....

Operations Report, "E" Company, 368th Inf., for period Sept. 26 - 30, 1918, inc.

After the bombardment of the night September 25 - 26, the company, minus 1 platoon and 28 men left behind for liaison, made an advance. On reaching the German 2nd line we were joined by Company "H" and from there continued until very near their 3rd line. About 5:30 p.m. we were attacked by the enemy and on account of heavy M.G. fire, grenades, and bombs dropped from aircraft, were forced to withdraw. In this slight action the company suffered nine men wounded, and in the effort to bring all of them safely in, became separated from the head of the column. We were compelled to remain the night of September 26-27 in No Man's Land, reaching our original position about 9:30 a.m. Sept. 27. The day was spent in reorganising the company and awaiting orders. Received orders on the evening of Sept. 27th to detach one platoon to form a connection between the right of Company "H" and a mixed post further to the right. The remainder of the company was in support. On account of heavy machine gun and gas shell fire we were unable to send out this platoon. Neither were the two companies able to advance. This situation was made known to the Battalion Commander and orders were received to enter the front line trenches of the Germans at 5:00 a.m. the morning of the 28th. About 9:30 a.m. this company, in conjunction with Company "F", 368th Infantry, started an advance from the front line trenches of the Germans. In our advance through the underbrush we were constantly exposed to sniper's and isolated M.G. fire. Finally, on entering a very heavy growth of underbrush and trees, we were exposed to such terrific fire from machine guns and grenades that we could not advance. We were forced to retire to our original position in the front line trenches where we reorganized and remained for the night. In this last encounter, 2nd Lieut. Norwood C. Fairfax was killed while attempting to advance his platoon together with four of his men. The company also suffered nine wounded and two missing in this same encounter. The 29th and 30th of September were occupied in reorganising the company, giving them equipment, clothes, etc.

(Signed) Richard Simmons,
Captain 368th Infantry.

Operations Report, "F" Company, 368th Infantry, for period Sept. 26 - 30, 1918.

On the morning of the 26th of September the Company, with two platoons in assault and two platoons in support went "Over the Top" from the company front line sector. The two platoons on the left were driven in by shrapnel fire . The two platoons on the right, in charge of Lieuts. Coleman and Hendersen, advanced about two kilometers , and their advance was stopped by M.G. nests. I received a message to this effect and secured one platoon from "K" Company and in support joined the two platoons on the right. I advanced about 1½ kilometers further North, driving out four M.G. positions, killing four, and capturing one of the enemy. I remained there until dark trying to establish liaison with units on my right and left. I was unable to do so and as the trench which we were occupying was being shelled, I was forced to withdraw.

On the 27th of September the company formed in attack in RAVIN DE BEL ABRI with Company "G" on my right. We advanced about three kilometers when our advance was stopped by M.G. nests. We engaged the enemy in fire fight for about one hour. During the fighting liaison communication with "G" Company was lost. We held our position until the next morning (Sept. 28) at 9:00 o'clock.

Our position was shelled with Stokes and 77's and having no dug-outs for protection wewithdrew to the ZEPPELIN trench and remained there until 10 o'clock when we were again shelled and we withdrew to the FINLANDE trench. On the afternoon of the 28th we again formed in RAVIN DE BEL ABRI with "E" Company on our right. We advanced about 2 kilometers when we again ran into intensive M.G. fire. The advance was made in two waves and when attacked, I immediately reinforced my first wave with the second wave in both platoons. The two platoons on my right were in advance of the two platoons on the left. Thw two platoons on the left were pushed forward until we finally came to an abandoned trench. Realizing this was a good place to make a stand I immediately sent a message to the two platoons on my right to withdraw and join me. Through faulty liaison the message they received was "To withdraw". We defended our position in the trench and at the same time endeavored to get the two platoons on my right to join me , when the report came to me that the enemy had closed in on my right flank and that we were completely surrounded. We drove the enemy back from our flank and our position was shelled with stick bombs. We withdrew to the ZEPPELIN trench where we were again shelled with Stokes and 77's. We remained until daylight when we withdrew to the FINLANDE trench, where we remained until we received orders to withdraw to the Comay P.C. On the 29th and 30th of September, 1918, Company "F", 368th Infantry, was in reserve.

Casualties. On the 26th- 2 killed, 6 wounded; 27th- 1 killed, 10 wounded; 28th- 2 killed, 15 wounded; missing- 1 Corp. and 2 Privates (since Sept. 26).

(Signed) J.W.Jones,
Captain 368th Infantry.

.....

Operations report, "G" Company, 368th Inf., for period Sept. 26 - 30, 1918, inc.

On Sept. 26 the company took up position in the front line trenches at the point 71.5, 92.5 (FORET D'ARGONNE MAP) in the BOIS DE LONG Woods. The day and a part of the night were spent in reconnoitering and wire cutting in front of front line trenches under machine gun fire. Patrolling and wire cutting were successful.

On the morning of the 27th of September the company was ordered by the Commanding Officer to move forward and take up position on knoll of Hill 176. The Company went forward at 4:30 a.m. across 3 lines of enemy trenches and encountered M.G. fire and snipers, who were driven off with the loss of one man. After entering the 3rd line trenches of the enemy, the company was fited upon by artillery, which killed two, wounded one officer, and eleven men. Lieut. J.C.Binkston gallantly led the men to the 3rd line trenches and held them until the Commanding Officer arrived. The company organized and formed a skirmish line along the points 71.50-93.00 and marched to knoll of Hill 176. OBJECTIVE REACHED. The company met with machine gun fire on Hill 176 and sent back for light artillery. While waitingoon Hill 176, the company received an order to withdraw down to the railroad and take up position in line of trenches of BOIS STUTTGART WHERE THE company went over abreast of Co. "F", about 4:00 p.m.

The Company marched North in two waves with two platoons in support to trench DU DROMADAIRE where it was checked by M.G. fire and shelling of artillery. The Company moved back about 400 yards to position where it remained until day, thereafter reporting to the Commanding Officer for instructions.

On Sept. 28, the company was ordered to take up position in front of Battalion P.C. as reserves to Company "H" at the line of trenches at BOIS DE FINLANDE. At 3:00 p.m. the company was called up to support Company "H". The company marched in rear of Company "H" on the railroad and remained there until ordered to remove by the Commanding Officer and take up line of resistance on railroad. The company took up line of resistance and remained at alert the entire night and was relieved the next day (29th) at 10:00 a.m. by a French Colonel.

(Signed) Leon M. Anderson,
1st Lieut., 368th Infantry.

.....

Operations Report, "H" Company, 368th Inf., for period Sept. 26 - 30, inclusive.

On September 26, 1918, I received orders to advance Northward with Company "H". We advanced and gained contact with the enemy at TRIANGLE trenches 272.04-294.03. The advance was continued North to FALKENHAYN trenches 273.01-294.04. At this point an engagement took place. We captured one man, killed two, and took 1 M.G. Lost 1 man. At night we returned to the Company P.C. On September 27 we took up position in rear of ZEPPELIN trenches, and on September 28 advanced up railroad track to cemetery at 272.09-293.06. We gained contact with the enemy at this point but were held up by a nest of M.Gs. Was unable to get in connection with company on my right. It was while at this point that I received orders from the C.O. 368th Inf. that I had been relieved of command of the company.

2/28/93

(Signed) Bob Thomas,
Captain 368th Infantry.

.....

Operations Report, "I" Company, 368th Inf., for period Sept. 26 - 30, inclusive.

On September 25, left support position at PLACARDELLE, at 9:00 p.m. and took position in support of Company "H", 368th Infantry, along the VIENNE-le-CHATEAU - LA HARAZEE ROAD, North of BIESME RIVER.

On Sept. 26 the company moved forward and occupied position occupied by Co. "H". Three platoons occupied support position and one platoon maintained liaison with Cos. "E" and "H" as they moved forward.

On Sept. 27 the company took position in support of Co. M at 11:00 a.m. and found that we were too far west. The company followed Co. M to the right of BINARVILLE ROAD and at 5:00 p.m. the company moved forward in assault formation, with the left resting on the BINARVILLE ROAD. The enemy was encountered at about 7:30 p.m. and the line halted at about 200 yards south of VALLEE MOREAU. Company maintained this position during the night. 1 man was wounded.

On Sept. 28 the company moved forward at 7:30 a.m. with Co. "M" on their left and Co. "K" on their right. We encountered the enemy at about 200 yards N.E. of the position that the company occupied during the night. The company crossed the VALLEE MOREAU and encountered heavy M.G. fire from the North, East, and West, and also enemy artillery fire. At 2:30.p.m. the company withdrew under cover in VALLEE MOREAU. At 5:30 p.m. the company again moved forward and encountered the enemy and heavy M.G. and artillery fire forced a withdrawal to a position to a position 200 yards south of VALLEE MOREAU. During the attack 5 men were killed, 14 wounded, and 2 were gassed.

On Sept. 29th Captain Walter Green was fatally wounded by shrapnel at 5:00 a.m. in trench along the BINARVILLE ROAD 200 yards south of VALLEE NOREAU. Company was relieved at 1:30 p.m. by the French and took up position in TRENCH MAGDEBOURG in ravine DE ABRI. (Sept. 30, same position as Sept. 2). I took command of the company Sept. 29, 1918.

(Signed) Judge Cross,
1st Lieut., 368th Inf.

Operations Report, "K" Company, 368th Inf., for period Sept. 26 - 30,1918, inclusive.

One platoon under command of Captain Smith was detached to establish combat liaison between the front line of the 2nd Bn., 308th Infantry, and Headquarters Of the 368th Inf. The platoon marched to position arriving at 12:00 Midnight and was caught under a barrage of enemy gas shells and remained in skirmish line until 5:30 a.m. On the 26th at 5:55 a.m. the 308th Inf. went over the top. Liaison was established with the front line.

On September 26th, liaison with the first line was maintained, keeping the 368th Infantry informed of the advance of the 308th. On September 27th the platoon was withdrawn in order to join the company under the command of Captain Peeks at Trench TAGGETT. The platoon was marched under the command of Captain Smith with all men that were lost from the company on Sept. 25th, numbering in all 189. Reported at Trench BRESLAU at 4:00 p.m. and found the company under the command of 1st Lieut. Koger, with only 30 men. He did not know where the Captain was. I took command, and found that he had none except that company would advance at 5:30 with no objective. The company was formes and scouts sent out. I followed my first line. Two platoons were in first line and one in support. They advanced about 1 kilometer. The Scouts drew fire from the enemy and the first line opened fire. No cover was available for our men. The company was under a barrage of gas from 9:40 p.m. to 11:00 p.m. We remained in skirmish line until 4:30 a.m. the 28th, and withdrew to cover under cover of darkness to reform. Casualties: 1 killed, 1 officer and 2 enlisted men gassed.

2/28/94

On September 28, the company moved forward at 7:30 a.m. with 2½ platoons, no officer The Sergeant commanding platoon reached RAVINE DE MITRALLEUSES at 9:30 a.m. Caught under enemy barrage, the line halted on south side of Ravine. After barrage lifted, we crossed ravine, putting the enemy to flight and killing one. One platoon took up a position on a crest on north side of ravine at (9:40 a.m. Another enemy barrage of gas was launched. Two platoons, under command of a Sergeant, lost direction and were lost. I held position with one platoon until 2: 00 p.m. Being fired on from both flanks, the platoon withdrew to cover, and were held there until 5:00 p.m. Co. "I" came up.on the left, and the order came to mobw forward. The line moved about 200 yards forward when the order came to halt. Another order came- to move to the rear. I, being Senior, assumed command of both companies, and ordered a halt until I found out where the order came from to move to the rear, and on my way to Battalion Headquarters was caught under a barrage of the enemy. I looked back and all companies were coming off the hill. I halted Co. "K", and assembled them, placed them in position and then an order came that all Company Commanders should report to Bn. Commander. I reported and was ordered back to position. I remained in position until 3:30 a.m. Sept. 29th, then withdrew to cover, and found that the Battalion had moved back to BRESLAU trenches. Casualties: 2 killed, 3 wounded, 16 gassed. On Sept. 29th we were relieved by French troops. The Company marched to support trench BRESLAU, where it arrived at 6:00 p.m. Septe mber 30- Issue of equipment and inspection.

Captain 368th Infantry,
Comdg. Co.

.....

Operations Report of "L" Company, 368th Infantry, for period Sept. 25 - 30,1918, inc.

Sept. 25 the company, as Battalion reserve, moved into position at crest of hill 1 kilometer East of VIENNE-le-CHATEAU. At 10:00 a.m. Sept. 26 the company moved to position along the VIENNE-le-CHATEAU - LA HARAZEE ROAD. On Sept. 27th 2 officers and 40 men were ordered to relieve Company "F", 368th Infantry, on outpost duty 1 kilometer North of the VIENNE-le-CHATEAU - LA HARAZEE ROAD; this detachment was relieved at 9:00 a.m.; in accordance with orders, the company began, at 11:00 a.m. to follow Co. "I", 368th Inf., as Battalion Reserve at 800 meters North on right of VIENNE-le-CHATEAU - BINARVILLE ROAD. At 7:00 p.m. we halted 400 meters south of the Moreau Ravine, where we remained until 5:30 p.m. Sept. 28. At 5:30 p.m. Sept. 28 the company was ordered to attack east to relieve the pressure on the 2nd Bn. The company moved East to STUTTGART trench. At 6:15 our patrols were driven back by enemy machine guns. At 6:20 p.m. a heavy barrage was opened on the company with V.B. Grenades, M.Gs., and field artil.ery which caused the company to break and retreat. Casualties; 3 dead, 9 wounded, 2 missing. At 11:00 a .m. September 29, the company was ordered into support at trench de MADGEBOURG.

Captain 368th Inf.,
Commanding Co. "L".

-2-

Operations Report, "M" Company, 368th Inf.,for period 25 - 30 September, 1918.

I submit the following report of operations of this company for the period 25-30 September 1918. During the day of the 25th of September the company was with 3rd Bn. in support position at LA PLACARDELLE, 2 kilometers south east of VIENNE-le-CHATEAU. At 9:30 p.m. on the 25th the company moved into shelters along the VIENNE-le-CHATEAU - LA HARAZEE ROAD, west of RAVIN DES POMMIERES. At 10:00 a.m. Sept. 26 the company move forward in support of Company "G" to a position in trenches near the BOIS LONG, Here the first casualty occurred, one man being killed by shell fire. At 5 p.m. the company was posted at road fork at 92.7-70.6. At 6:30 p.m. Lieut. Kincaid, with the 4th platoon, was detached in order to join a French unit on our left. This platoon did not rejoin the Company until the 30th of September. On the morning of the 27th Sept. the company was ordered to join up with Co. "K" on the right and Lieut. Kincaid's platoon on the left and to move to the attack. The Company Commander had no map and was unable to find the limits named, but moved the company forward until contacr was gained with Co. "G" which was moving forward to attack. This company supported Co. "G" until about 1:00 p.m. when Captain of "I" Co. was met. He showed from a map in his possession that Co. "M" was too far to the left so Co. was moved to the right of BINARVILLE ROAD, where the Bn. and Regtl. P.C. were found.

At about 3 p.m. this company, with Co. "I" on the right moved forward from German R.R. against Trench EUPHRATES. This trench was occupied, junction made with trench on left, and at 5:30 p.m. the line moved forward again with right of company on BINARVILLE VIENNE-le-CHATEAU ROAD. During this advance two men of the company were slightly wounded. At dark the attack halted with the first line of Co. "M" under Lieut. T.M.Dent on the southern bank of the VALLEE MOREAU. Company maintained this position during the night. At 7:30 a.m. on the 28th, pursuant to orders from Bn. Hdqrs. the company moved forward. By 9 a.m. Lieut. Dent had crossed the VALLEE MOREAU and passed into open field north of woods on side of ravine. During this operation a German automatic covering crossing of the valley was captured. Just after this heavy M.G. fire was encountered and it was found difficult to advance. Lt. Dent reached the wire in front of trench CLOTILDE at 92.5-73.5. It was decided to call for artillery assistance. Up to this time on the28th one man was killed and two wounded. At 5 p.m. company moved to attack through woods on left of BINARVILLE ROAD. While moving through thick woods there was some confusion due to losing direction in the woods . Heavy M.G. fire was met from 3 sides. The company became scattered in woods and attack halted. Company remained at 2 92.7-72.7 during the night. In the attack in the woods and the hostile shelling that followed 1 officer and 12 men were wounded and gassed. Three men have been missing since the night of the 28th. At noon on the 29th the company moved back into the BRESLAU trench 1200 yards east of bridge on BINARVILLE ROAD, where they remained until the close of the period covered by this report.

2/28/95

(Signed) R.A.Williams,
Captain 368th Infantry.

.....

Operations Report, Machine Gun Co., 368th Inf.,for period Sept. 25 - 30, 1918.

Second platoon left VIENNE-le-CHATEAU under Lieut. Goodloe on night of Sept. 25, 1918, attached to 2nd Bn., 368th Inf., and went out under Captain Smith, composing a mixed post which was on our right flank. This platoon rejoined the company Sept. 27, 1918. On Sept. 26, 1918, 1st platoon left VIENNE-le-CHATEAU attached to 2nd Bn., and advanced to TIRPITZ trench, and had two engagements, and returned to VIENNE-le-CHATEAU THE SAME NIGHT. On Sept. 26, 1918, 3rd platoon advanced with Co. "G", returning to VIENNE-le-CHATEAU on morning of Sept. 27, 1918.

On Sept. 27, 1918, ½ company joined 2nd Bn. and ½ joined 3rd Bn. both parts of company advancing beyond BRESLAU trenches. On Sept. 30, 1918, all units of company returned to VIENNE-le-CHATEAU and reformed.

Total casualties 17 (wounded); killed, none.

(Signed) Joe Dabney,
Captain, 368th Infantry.

Report of part taken by the 37 M.M. Platoon, 368th Infantry, in operations of the Regiment from September 25 - 30, 1918.

1. From September 25th to 9 a.m. September 28th, the 37 M.M. Platoon was commanded by 1st Lieut. Joseph E. Martin, 368th Infantry.

2. Reported to the regiment at 2 a.m. September 28th for duty, having come from 1st Corps School at Gondrecourt. On order of the C.O., took command of the 37 M.M. Platoon at 9:00 a.m. September 28. At that date and hour two guns were in position on the VIENNE-le-CHATEAU- BINARVILLE ROAD, 200 meters beyond the new bridge over the MOREAU VALLEY, supporting the 3rd Battalion in attack. Targets were numerous M.G. nests about 600 meters distant on the left of road. We were partially successful in silencing machine guns. Uncertain information as to exact location of our own troops and a detachment of French Cavalry restricted use of the guns. The guns remained in this position until the withdrawal of the 3rd Battalion.

3. During this period one gun was operating with the 2nd Battalion. With this gun I advanced with Company "H" and two plateons of Company "G" north along the narrow gauge railroad leading toward BINARVILLE. During the advance we operated against snipers' nests and from 4:00 to 6:00 p.m. did extensive firing against machine guns holding up the advance of these troops, being successful until nightfall and heavy enemy artillery bombardment forced the withdrawal of the troops and the gun. (This was on Sept. 28th).

2/28/19

4. After this withdrawal we placed and held our guns in position in the sector of the trench held by Company "G", under Lieut. Leon M. Anderson, by command of Capt. Burns (then commanding 2nd Bn.) as defense against a possible counter-attack. The night was very rainy and cold, and Corporals Theophilus Jackson and Herman Murray displayed unusual devtion to duty in remaining at their posts despite their hardships and hunger.

5. On Sunday morning, September 29th, by order of Major Norris, the platoon was detached from the 2nd and 3rd Battalions, and proceeded with the 1st Battalion in its operations. On Sunday night, Sept. 29, when the 1st Battalion was occupying the TIRPITZ trench, we took a position between the front line and supporting companies, affording good field of fire, in support of the Battalion against attack. From about 5:00 p.m. until dusk, we fired against an observation post and machine guns on the crest of a ridge in front of the Battalion. On Monday, Sept. 30, we advanced with the 1st Battalion to the DROMADAIRE trenches and across thewoods to the opening beyond, in the vicinity of BINARVILLE. During this advance, we fired on and rendered untenable a well constructed observation and M.G. post in the woods S.E. of BINARVILLE. Owing to the torn up condition of trails by artillery fire, and the denseness of the woods, transportation of guns and material was very difficult. The denseness of the woods also rendered it difficult to find positions affording practical fields of fire. During these operations the personnel of the platoon, particularly Corporal Theophilus Jackson, and Pvts 1/c George A.Wood, Frank Randolph, and Thomas Holly(killed in action), and Pvts. Raleigh Foster and James W. Gilbert displayed steady and unflinching devotion to duty.

6. In its operation the platoon lost one man killed and four wounded. While I was attached to the 1st and 2nd Battalions, in addition to commanding the operations of my platoon, I rendered whatever assistance I could toward maintaining the discipline and morale of other organizations.

(Signed) Levi Anderson,
1st Lieut., 368th Inf.,
Comdg. 37 M.M. Platoon.

.....

Report of Trench Mortar Platoon, 368th Infantry, for period Sept. 25-30, 1918.

Sept. 25th	Platoon reached VIENNE-le-CHATEAU.
Sept. 26th	Took over sector property and went over support position. Moved Trench Mortar to 2nd Battalion P.C.
Sept. 27th	Took position on BINARVILLE ROAD to blow up wire.

Sept. 28th Put 37 M.M. gun in action at BINARVILLE ROAD, driving away several M.Gs.

Sept. 29th Turned over 37 M.M. guns to Lieut. Anderson and brought up Trench Mortars, joining the 1st Battalion.

Sept. 30th Took position in trench with 1st Battalion.

(Signed) Joseph H. Martin,
1st Lieut.,368th Inf.,
Comdg. T.M. Platoon.

.....

Report of part taken by the Supply Company in operations which extended from Sept. 25th to 30th.

Sept. 25th- Company in barracks at CAMP SOUNAIT. Supplies delivered at night to each of the 3 battalions of the regiment.

Sept. 26th- Company in barracks at CAMP SOUNAIT. Supplies delivered at night to each of the 3 battalions of the regiment.

Sept. 27th- Company in barracks at CAMP SOUNAIT. Supplies dumped at Regimental Dump at VIENNE-le-CHATEAU. Dump in charge of Lieut. Grover Harden and Regtl. Supply Sgt. E.T. Taylor. Companies supplied from this point by wagon train at night.

Sept. 28th- Company moved to VIENNE-le-CHATEAU. Supplies delivered to companies by ration cart in daylight. Four horses killed by shell fire at this point.

Sept. 29th- Company in dugouts at VIENNE-le-CHATEAU. Supplies delivered as usual to Regimental P.C. at the new bridge on the VIENNE-le-CHATEAU- BINARVILLE ROAD in daylight.

Sept. 30th- Five men of company wounded at VIENNE-le-CHATEAU by shell fire and 13 horses killed same day. Company moved in afternoon to Camp LA HARAZEE. Wounded men evacuated to hospital.

(Signed) P.S.Grant,
Captain 368th Infantry, S.O.

.....

Report of Regimental Munitions Officer, 368th Infantry, for period Sept. 25-30,1918.

In compliance with Secret O. & I. Memo. #11, Headquarters 368th Infantry, 14 Oct. 1918, I submit the following report on operations from Sept. 25th to Sept. 30th, 1918.

On the night of Sept. 25, I established the Regimental Ammunition Dump and distributing point at VIENNE-le-CHATEAU. The combat train was also moved to that point. Seven combat wagons were sent back to LA RENARDE FARMS for some French munitions. On the morning of Sept. 26th we received twelve trucks of cal. .30 ammunition from the French. This was placed in the Regimental Dump at VIENNE-le-CHATEAU. That afternoon four of the combat wagons returned from the LA RENARDE FARMS with V-B Grenades and Chauchat amm unition. On the 27th of Sept., about 8 a.m., we carried our combat wagons up the BINARVILLE-VIENNE-le-CHATEAU ROAD as far as Trench DES BALEINES and established an advance distributing point in the FOSSE A TANKS along the side of the road. The combat wagons were returned to VIENNE-le-CHATEAU and refilled with pyrotechnics.

On Sept. 28, 29, and 30, issues were made to all troops calling for munitions. During the operations there was no damage caused by enemy fire to any of the combat wagons or to any of the ammunition dumps.

(Signed) Joseph E. Trigg,
Captain 368th Infantry,
Munitions Officer.

...ptember 1918. 95-15

ORDER.

According to the general instructions given by the General Com. the 38th A.C., a section (2 guns) of field artillery will be kept ready to accompany the attacking Battalions, as soon as the progression and the recovery of communication roads will allow it.

This section will very likely follow the left Battalion of the 11th Cuir., and his mission will be: to destroy nests of machine guns which would be located, either before or on the right side of the groupment. This section will be designed beforehand by the Colonel Com. the Artillery of the groupment so that it may go on when receiving the order.

By order of Colonel Brown.

09/212/60

368 D

Secret 25 September 1918

ORDER

According to the general instructions given by the General Com. the 38th A.C., a section (2 guns) of Field Artillery will be kept ready to accompany the attacking Battalions, as soon as the progression and the recovery of communicationx roads will allow it.

This section will very likely follow the left Battalion or the 11th Cuir., and his mission will be: to destroy nests of machine guns which would be located, either before or on the right side of the groupement. This section will be designed before hand by the Colonel Com. the Artillery of the groupement so that it may go on when receiving the order.

By order of Colonel Brown.

368th Inf.

2/28/67

Report of operations of 1st Battalion, 368th Inf., for period Sept. 25-30, 1918.

(In addition to previous information supplied about the battalion while in the Argonne Forest Sector, the following is submitted).

September 26, the battalion was moved up as reserves for the French First Division and took station at Haut Batis about 2½ miles south of Vienne-le-Chateau on the Vienne-le-Chateau - Binarville Road, and some ¼ of a mile east of that road in the forest. The night of the 26th the battalion was rather heavily shelled, but had no casualties.

September 27 we moved up to take station in the dugouts at Sapiniere about ½ mile west of Vienne-le-Chateau where we were again shelled, One sentry was wounded by shrapnel.

At 6:00 o'clock on the morning of Sept. 28 the battalion still as reserves was moved forward to occupy an old line of French trenches on the plateau north of Vienne-le-Chateau some 1½ kilometers north of Vienne-le-Chateau. Remained in the trenches for the night under shell fire. No casualties. About 8:00 p.m. the night of Sept, 28, the Colonel directed

the battalion to proceed to relieve the 3rd Bn. but after a conference with the C.O. of the 3rd Bn. and upon his and my recommendations, the attempt was not made because of the uncertainty as to the location in the forest of the units to be relieved and it was decided to wait until daylight.

September 29th, at 11 a.m. the battalion advanced to the Tirpitz line of trenches occupying the line formerly held by the 2nd and 3rd Bns, who were relieved the same day and returned to the rear. Companies "A", "B", and "C" were put in the front lines with Company "D" in support about 1000 yards in rear of the Tirpitz trenches. My P.C. was located in the rear of the center of my front line in the Finlande trench . During the night the company in support was shelled and had eight men wounded by shell fire. Going into position the front line companies came under shell fire which at one time amounted to a barrage but the main part of which fell about 100 yards in front of our position.

2/28/68

September 30 I made a reconnaissance about 1000 yards north of my front line and across the front. Finding the ground clear of the enemy I moved the companies in the front line forward to occupy a line of German dugouts at this point, at the same time moving Company "D" up as a support to the Tirpitz trenches. From the Lager or dug out line I at once sent forward three patrols of a platoon each in charge of the three Captains of the front line companies to push on up to the front and take possession of the Dromadaire trenches. They were instructed to hold them, and while contact patrols were being sent out from that advanced point, to send back guides and bring up the remainder of their companies . Hearing about this time that the 3rd Battalion of the 9th Cuirassiers (French) on my left were advancing and that on my right the 308th Infantry of the 77th Division (U.S.) were far north of us, and although my last orders were to remain where I was, I nevertheless decided to order advances made by all three front line companies. Orders were given

to push on hard to the front and attempt to occupy Binarville before the French could get there. In the mean time Company "D" was moved up to the line we had just left. The Companies were sent forward in lozenge formation the battalion also being in lozenge formation. We encountered more or less M.G. fire and rather heavy shelling, especially "A" Company on the right, but they successfully passed by the M.G. nests after having opened up on them with the 37 M. M. guns. The advance was begun at 2:00 p.m. and at about 4:00 p.m. the Battalion, except "D" Company, entered Binarville close upon the heels of the French whose right flank was slightly overlapped by my left flank. At Binarville itself we were met with heavy shell fire and the fire of several M.G. nests. Upon the advice of French officers present the advance was halted while the French sent for guns to reduce the M.G. nests. By the time this was done it had grown dark and all operations were halted for the night by the French and Americans alike.

2/28/19

At 10:00 p.m. I received orders to retire my battalion to Vienne-le-Chateau but was unable to do so because of the large field of barbed wire and the darkness. The battalion was withdrawn at daylight on October 1, and went back to occupy the Damas line of trenches about 2 kilometers North of Vienne-le- Chateau.

Having entered Binarville with Companies "A", "B" and "C", the support company "D", was halted about 1000 yards south of the town and remained there the night of September 30-October 1, until relieved with the rest of the Battalion on the morning of October 1, "D" Company got some lively shelling from heavy guns while in this position. Binarville itself got so hot about 5:30 p.m. that both French and Americans withdrew to a point about 300 yards south of the town. "A" Company was put in liaison with a French Company of the 3rd Battalion of the 9th Cuirassiers and went north past the left of the town according to their report to a point over 3 kilometers beyond the town. On the right the

shell craters at a point about 300 yards northof the right of the town were held all night under M.G. fire by approximately 100 of our men. While the battalion was in Binarville itself, several large aeroplane bombs were dropped but did not result in any casualties.

Report of Operations of 3rd Bn., 368th Infantry, for period Sept. 25-30,1918

1. Battalion less Co. "L" moved from support positionqat Placardelle to support position north of Biesme River, extreme right- Co. "I", resting on La Harazee, Co. "K" center, extreme left- Co. "M" resting on Vienne-le-Chateau. Move completed between 20 and 22 o'clock Sept. 25 Co."L" took position in trench, ridge south of Biesme River at 292.50-269.85 to 294.50-269,75.

2. Co. "I" moved at 13 o'clock to support Co. "H" 2nd Bn., moved north along general line 270.05 bounded east by 294.80, west by 294. Co "K" 3 platoons moved to support Co. "F" along line bounded east by 294, west by 293.80, Co. "M" moved to line 270.60 bounded east by 292.70, west by 293,80. Movement forward by Co. "K" halted at Tirpitz Trench 273.60. Co. "L" moved in position vacated by Co. "K".

3. 1 platoon Co. "K" constituted Co mixed post to maintain liaison along line 295, 1 platoon Co. "M" moved to Ravine d'Artillerie for liaison.

4. Battalion less Co. "K" and 1 platoon Co. "M" moved to position East of Binarville Road on line 271 in order designated "M", "I", and "L", thence north along line bounded east by 292.70, west 292.40 (had 2 platoons M.G. Co.)

5. Advance began at 9 o'clock and continued north along this line until stopped by M.G. fire south of Moreau Valley, line 273 north of Moreau Valley bounded east by Binarville Road, west by 292.50 was reached by 1 platoon

Co. "M" at 19:00 H. Co. "I" moved forward east of Binarville Road to point on line 272.50 running east and west from Binarville Road to Stuttgart trench.P.C. on Binarville Road at 292.70-272.40. Co. "K" in prolongation of line held by Co. "I" extending to 293.15, Co. "L" and M.G. Co. 2 platoons at 292.40-272.40, 292.70-272.40.

6. 1 platoon Co. "M" advanced at 7:30 to line North of Moreau Valley 293.50-273.00, 292.80-273.00. 2 platoons occupied trench Tartarie 292.50-272.80, 292.80-272.80. Cos. "I" and "K" in position east of Binarville Road 292.80-272.50 to 293.15. Company "L" moved and two platoons M.G. Co., 368th Inf., in reserve trench Ronges. Company "L" moved into position vicinity 293.00-273.00 to attack on left flank of 2nd Bn. at 16:00 H.

7. On Sept. 29th, Battalion withdrew to trench Breslau and Madgebourg trench, 293.40-271.50 to 294.00-271.50. Two platoons M.G. Co., 368th Inf. relieved by Co. "B", 351st M.G. Battalion.

8. Special report of conduct of individual officers and men previously made, report of casualties made in company reports already submitted.

(signed) B.F. Norris,
Major 368th Infantry,
Commanding.

Operations Report, "A" Company, 368th Infantry, for period Sept. 26-30, 1918, inc.

At 1:30 p.m. September 26, 1918, the company left Haut Batis en route to Vienne-le-Chateau, arriving there at 5:15 p.m. The men were billeted there.

On September 27th, 1918 the company left Vienne-le-Chateau at 9:30 a.m. and moved to the front line trenches, 1 kilometer North of Vienne-le-Chateau, and arrived there the same day. They remained there until September 29th.

On September 29th, 1918, the company ~~left Vienne-le-Chateau~~

proceeded to the Finlande trench, 1½ kilometers due North, at 1:00 p.m.

On September 30, 1918, the company advanced to the Tirpitz trenches, from which place an attack was started in the direction of Binarville. The attack was successful and resulted in the evacuation of Binarville by the enemy. In the above attack one enlisted manwwas killed and eight were wounded. On the night of September 30, the company advanced 1½ kilometers Northwest of Binarville and took position on the right of the 9th Cuirassiers (French Army) where it remained in the front lines until 7:00 a.m. on the morning of October 1, 1918. The company then withdrew, under orders, to Vienne-le-Chateau.

Captain 368th Infantry,
Comdg. Co.

Operations Report, "D" Company 368th Inf., for period Sept. 26 - 30, inclusive.

September 26, 1918.		In Battalion support at Haut Batis.
"	27	In Battalion support at Haut Batis.
"	28	In reserve at Sapiniere.
"	29	In support in Tirpitz trench.
"	30	Left the Tirpitz trench in support of the Battalion

upon its advance. The advance was halted in an orchard about 1 kilometer east of Binarville.

On September 28, 1918, Company "D" was in an old first line trench (French) with two platoons East and two platoons West of the Vienne-le Chateau - Binarville Road. On Sept. 29, I sent 2nd Lieut. Hawkins with the second platoon (this company) to carry water and rations to the 3rd Battalion in the front lines. On the night of the 29th I sent 75 men from the Tirpitz trench to bring ammunition for the Stokes Mortar. Two men were wounded by shell fire while on this trip. Ten additional men were sent for M.G. ammunition. At about 7:00 p.m. six of the men in support in the Tirpitz trench were wounded by shell fire and were sent to the rear. On the same morning, September 29, I received an order from the Battalion Commander to send an officer. I sent 2nd Lieut. Hawkins with 20 men from each of the 1st Battalions Companies (total 80 men) to find the location of the 3rd Battalion, and to reconnoiter the Tirpitz trench and send back guides to conduct the 1st Battalion to its position. On the 30th we went into the attack with Company "D" in support. At 4:00 p.m. the advance was halted in an orchard about 1 kilometer east of Binarville. During the night we remained in support, along with Company "B", 351st M.G. Bn. The total number of casualties during the operation was 1 man killed, 10 wounded by shell fire, and 2 missing.

(Signed) V.H. Marchbanks,
Captain 368th Infantry.
Commanding Co. "D".

Operations Report, "E" Company, 368th Inf., for period Sept. 26 - 30, 1918, inc.

After the bombardment of the night September 25-26, the company, minus 1 platoon and 28 men left behind for liaison, made an advance. On reaching the German 2nd line we were joined by Company "H" and from there continued until very near their 3rd line. About 5:30 p.m. we were attacked

2/28/74

by the enemy and on account of heavy M.G. fire, grenades, and bombs dropped from aircraft, were forced to withdraw. In this slight action the company suffered nine men wounded, and in the effort to bring all of them safely in, became separated from the head of the column. We were compelled to remain the night of September 26-27 in No Man's Land, reaching our original position about 9:30 a.m. Sept. 27. The day was spent in reorganizing the company and awaiting orders. Received orders on the evening of Sept. 27th to detach one platoon to form a connection between the right of Company "H" and a mixed post further to the right. The remainder of the company was in support. On account of heavy machine gun and gas shell fire we were unable to send out this platoon. Neither were the two companies able to advance. This situation was made known to the Battalion Commander and orders were received to enter the front line trenches of the Germans at 5:00 a.m. the morning of the 28th. About 9:30 a.m. this company, in conjunction with Company "F", 368th Infantry, started an advance from the front line trenches of the Germans. In our advance through the underbrush we were constantly exposed to sniper's and isolated M.G. fire. Finally, on entering a very heavy growth of underbrush and trees, we were exposed to such terrific fire from machine guns and grenades that we could not advance. We were forced to retire to our original position in the front line trenches where we reorganized and remained for the night. In this last encounter, 2nd Lieut. Norwood C. Fairfax was killed while attempting to advance his platoon together with four of his men. The company also suffered nine wounded and two missing in this same encounter. The 29th and 30th of September were occupied in reorganizing the company, giving them equipment, clothes, etc.

(Signed) Richard Simmons,

Captain 368th Infantry.

Operations Report, "F" Company, 368th Infantry, for period Sept. 26 -30,1918

On the morning of the 26th of September the Company, with two platoons

in assault and two platoons in support went "Over the Top" from the company front line sector. The two platoons on the left were driven in by shrapnel fire. The two platoons on the right, in charge of Lieuts. Colman and Henderson, advanced about two kilometers and their advance was stopped by M.G. nests. I received a message to this effect and secured one platoon from "K" Company and in support joined the two platoons on the right. I advanced about 1½ kilometers further North, driving out four M.G. positions, killing four, and capturing one of the enemy. I remained there until dark trying to establish liaison with units on my right and left. I was unable to do so and as the trench which we were occupying was being shelled, I was forced to withdraw.

2/28/76

On the 27th of September the company formed in attack in Ravin de Bel Abri with Company "G" on my right. We advanced about three kilometers when our advance was stopped by M.G. nests. We engaged the enemy in fire fight for about one hour. During the fighting liaison communication with "G" Company was lost. We held our position until the next morning (Sept. 28) at 9:00 o'clock.

Our position was shelled with Stokes and 77's and having no dug-outs for protection we withdrew to the Zeppelin trench and remained there until 10 o'clock when we were again shelled and we withdrew to the Finlande trench. On the afternoon of the 28th we agained formed in Ravin De Bel Abri and with "E" Company on our right. We advanced about 2 kilometers when we again ran into intensive M.G. fire. The advance was made in two waves and when attacked, I immediately reinforced my first wave with the second wave in both platoons. The two platoons on my right were in advance of the two platoons on the left. The two platoons on the left were pushed forward until we finally came to an abandoned trench. Realizing this was a good place to make a stand I immediately sent a message to the two platoons on my right to withdraw and join me. Through faulty liaison the message they received was "To withdraw".

We defended our position in the trench and at the same time endeavored to get the two platoons on my right to join me, when the report came to me that the enemy had closed in on my right flank and that we were completely surrounded. We drove the enemy back from our flank and our position was shelled with Stokes stick bombs. We withdrew to the Zeppelin trench where we were again shelled with Stokes and 77's. We remained until daylight when we withdrew to the Finlande trench, where we remained until we received orders to withdraw to the Company P.C. On the 29th and 30th of September, 1918, Company "F", 368th Infantry, was in reserve.

Casualties. On the 26th- 2 killed, 6 wounded; 27th- 1 killed, 10 wounded; 28th- 2 killed, 15 wounded; missing- 1 Corp. and 2 Privates (since Sept. 26).

11/82/2

Captain 368th Infantry.

. . . . . .

Operations report, "G" Company, 368th Inf., for period Sept. 26 - 30, 1918, inc.

On Sept. 26 the company took up position in the front line trenches at the point 71.5, 92.5 (Foret D'Argonne Map) in the Bois de Long Woods. The day and a part of the night were spent in reconnoitering and wire cutting in front of front line trenches under machine gun fire. Patrolling and wire cutting were successful.

On the morning of the 27th of September the company was ordered by the Commanding Officer to move forward and take up position on knoll of Hill 176. The Company went forward at 4:30 a.m. across 3 lines of enemy trenches and encountered M.G. fire and snipers, who were driven off with the loss of one man. After entering the 3rd line trenches of the enemy, the company was fited upon by artillery, which killed two, wounded one officer, and eleven men. Lieut. J.C. Pinkston gallantly led the men to the 3rd line trenches and held them until the Commanding Officer arrived. The company organized and formed a skirmish line along the points 71.50-

93.00 and marched to knoll of Hill 176. Objective Reached. The company met with machine gun fire on Hill 176 and sent back for light artillery. While waiting on Hill 176, the company received an order to withdraw down to the railroad and take up position in line of trenches of Bois Stuttgart where the company went over abreast of Co. "F", about 4:00 p.m.

The Company marched North in two waves with two platoons in support to trench Du Dromadaire where it was checked by M.G. fire and shelling of artillery. The Company moved back about 400 yards to position where it remained until day, thereafter reporting to the Commanding Officer for instructions.

2/28/18

On Sept. 28, the company was ordered to take up position in front of Battalion P.C. as reserves to Company "H" at the line of trenches at Bois De Finlande. At 3:00 p.m. the company was called up to support Company "H". The company marched in rear of Company "H" on the railroad and remained there until ordered to remove by the Commanding Officer and take up line of resistance on railroad. The company took up line of resistance and remained at alert the entire night and was relieved the next day (29th) at 10:00 a.m. by a French Colonel.

(Signed) Leon M. Anderson,
1st Lieut., 368th, Infantry

. . . . . .

Operations Report, "H" Company, 368th Inf., for period Sept. 26 - 30, inclusive.

On September 26, 1918, I received orders to advance Northward with Company "H". We advanced and gained contact with the enemy at Triangle trenches 272.04-294.03. The advance was continued North to Falkenhayn trenches 273.01-294.04. At this point an engagement took place. We captured one man, killed two, and took 1 M.G. Lost 1 man. At night we returned to the Company P.C. On September 27 we took up position in rear of Zeppelin trenches, and on September 28 advanced up railroad track to

cemetery at 272.09-293.06. We gained contact with the enemy at this point but were held up by a nest of M.Gs. Was unable to get in connection with company on my right. It was while at this point that I received orders from the C.O. 368th Inf. that I had been relieved of command of the company.

(Signed) Bob Thomas,

Captain 368th Infantry.

. . . . . .

Operations Report, "I" Company, 368th Inf., for period Sept. 26 - 30, inc.

On September 25, left support position at Placardelle, at 9:00 p.m. and took position in support of Company "H" 368th Infantry, along the Vienne-le-Chateau - La Harazee Road, North of Biesme River.

64/32/2

On Sept. 26 the company moved forward and occupied position occupied by Co. "H". Three platoons occupied support position and one platoon maintained liaison with Cos. "E" and "H" as they moved forward.

On Sept. 27 the company took position in support of Co. M at 11:00 a.m. and found that we were too far west. The company followed Co. M. to the right of Binarville Road and at 5:00 p.m. the company moved forward in assault formation, with the left resting on the Binarville Road. The enemy was encountered at about 7:30 p.m. and the line halted at about 200 yards south of Valled Moreau. Company maintained this position during the night. 1 man was wounded.

On Sept. 28 the company moved forward at 7:30 a.m. with Co. "M" on their left and Co. "K" on their right. We encountered the enemy at about 200 yards N.E. of the position that the company occupied during the night. The company crossed the Vallee Moreau and encountered heavy M.G. fire from the North, East, and West, and also enemy artillery fire. At 2:30 p.m. the company withdrew under cover in Vallee Moreau. At 5:30 p.m. the company again moved forward and encountered the enemy and heavy M.G. and artillery fire forced a withdrawal to a position ~~in~~ 200 yards south

of Vallee Moreau. During the attack 5 men were killed, 14 wounded, and 2 were gassed.

On Sept. 29th Catpain Walter Green was fatally wounded by shrapnel at 5:00 a.m. in trench along the Binarville Road 200 yards south of Vallee Moreau. Company was relieved at 1:30 p.m. b y the French and took up position in Trench Madgebourg in Ravine De Rbri. (Sept. 30, same position as Sept. 2). I took command of the company Sept. 29, 1918.

(Signed) Judge Cross,

1st Lieut., 368th Inf.

Operations Report, "K" 368th Inf., for period Sept. 26 - 30, 1918, inc.

2/28/20

One platoon under command of Captain Smith was detached to establish combat lisison between the front line of the 2nd Bn., 308th Infantry, and Headquarters of the 368th Inf. The platoon marched to position arriving at 12:00 Midnight and was caught under a barrage of enemy gas shells and remained in skirmish line until 5:30 a.m. On the 26th at 5:55 a.m. the 308th Inf. went over the top. Liaison was established with the front line.

On September 26th, liaison with the first line was maintained, keeping the 368th Infantry informed of the advance of the 308th. On September 27th the platoon was withdrawn in order to join the company under the command of Captain Peeks at Trench Taggett. The platoon was marched under the command of Captain Smith with all men that were lost from the company on Sept. 25th, numbering in all 189. Reported at Trench Breslau at 4:00p.m. and found the company under the command of 1st Lieut. Koger, with only 30 men. He did not know where the Captain was. I took command, and found that he had none except that company would advance at 5:30 with no objective The company was formed and scouts sent out. I followed my first line. Two platoons were in first line and one in support. They advanced about 1 kilometer. The Scouts drew fire from the enemy and the first line opened fire. No cover was available for our men. The company was under a

barrage of gas from 9:40 p.m. to 11:00 p.m. We remained in skirmish line until 4:30 a.m. the 28th, and withdrew to cover under cover of darkness to reform. Casualties: 1 killed, 1 officer and 2 enlisted men gassed.

On September 28, the company moved forward at 7:30 a.m. with 2½ platoons, no officer. The Sergeant commanding platoon reached Ravine de Mitrailleuses at 9:30 a.m. Caught under enemy barrage, the line halted on south side of Ravine. After barrage lifted, we crossed ravine putting the enemy to flight and killing one. One platoon took up a position on a crest on north side of ravine at (9:40 a.m. Another enemy barrage of gas was launched. Two platoons, under command of a Sergeant, lost direction and were lost. I held position with one platoon until 2:00 p.m. Being fired on from both flanks, the platoon withdrew to cover, and were held there until 5:00 p.m. Co. "I" came up on the left, and the order came to move forward. The line moved about 200 yards forward when the order came to halt. Another order came -- to move to the rear. I, being Senior, assumed command of both companies, and ordered a halt until I found out where the order came from to move to the rear, and on my way to Battalion Headquarters was caught under a barrage of the enemy. I looked back and all companies were coming off the hill. I halted Co. "K" and assembled them, placed them in position and then an order came that all Company Commanders should report to Bn. Commander. I reported and was ordered back to position. I remained in position until 3:30 a.m. Sept. 29th, then withdrew to cover, and found that the Battalion had moved back to Breslau trenches. Casualties: 2 killed, 3 wounded, 16 gassed. On Sept. 29th we were relieved by French troops. The Company marched to support trench Breslau, where it arrived at 6:00 p.m. September 30- Issue of equipment and inspection.

Daniel Smith
Captain 368th Infantry,
Comdg. Co.

18/82/2

Operations Report of "L" Company, 368th Infantry, for period Sept. 25-30, 1918, inc.

Sept. 25 the company, as Battallion reserve, moved into position at crest of hill 1 kilometer East of Vienne-le-Chateau. At 10:00 a.m. Sept. 26 the company moved to position along the Vienne-le-Chateau - La Harazee Road. On Sept. 27th 2 officers and 40 men were ordered to relieve Company "F", 368th Infantry, on outpost duty 1 kilometer North of the Vienne-le-Chateau - La Harazee Road; this detachment was relieved at 9:00 a.m.; in accordance with orders, the company began, at 11:00 a.m. to follow Co. "I", 368th Inf., at Battalion Reserve at 800 meters North on right of Vienne-le-Chateau - Binarville Road. At 7:00 p.m. we halted 400 maters south of the Moreau Ravine, where we remained until 5:30 p.m. Sept. 28. At 5:30 p.m. Sept. 28 the company was ordered to attack east to relieve the pressure on the 2nd Bn. The company moved East to Stuttgart trench. At 6:15 our patrols were driven back by enemy machine guns. At 6:20 p.m. a heavy barrage was opened on the company with V.B. Grenades; M.Gs., and field artillery which caused the company to break and retreat. Casualties; 3 dead, 9 wounded, 2 missing. At 11:00 a.m. September 29, the company was ordered into support to trench de Madgebourg.

(Signed) E.A. Sandridge,
Captain 368th Inf.,
Commanding Co. "L".

Operations Report, "M" Company, 368th Inf., for period 25 -30 September, 1918.

I submit the following report of operations of this company for the period 25-30 September 1918. During the day of the 25th of September the company was with 3rd Bn. in support position at La Placardelle, 2 kilometers south east of Vienne-le-Chateau. At 9:30 p.m. on the 25th the company moved into shelters along the Vienne-le-Chateau -La Harazee Road, west of Ravin Des Pommieres. At 10:00 a.m. Sept. 26 the company moved forward in

2/28/82

in support of Company "G" to a position in trenches near Bois Long. Here the first casualty occured, one man being killed by shell fire. At 5 p.m. the company was posted ~~on~~ at road fork at 92.7-70.6. At 6:30 p.m. Lieut. Kincaid, with the 4th platoon, was detached in order to join a French unit on our left. This platoon did not rejoin the Company until the 30th of September. On the morning of the 27th Sept. the company was ordered to join up with Co. "K" on the right and Lieut. Kincaid'S platoon on the left and to move to the attack. The Company Commander had no map and was unable to find the limits named, but moved the company forward until contact was gained with Co. "G" which was moving forward to attack. This company supported Co. "G" until about 1:00 p.m. when Captain of "I" Co. was met. He showed from a map in his possession that Co. Co. "M" was too far to the left so Co. was moved to the right of Binarville Road, where the Bn. and Regtl. P.C. were found.

2/32/2

At about 3 p.m. this company, with Co. "I" on the right moved forward from German R.R. against Trench Euphrates. This trench was occupied, junction made with trench on left, and at 5:30 p.m. the line moved forward again with right of company on Binarville Vienne-le-Chateau Road. During this advance two men of the company were slightly wounded. At dark the attack halted with the first line of Co. "M" under Lieut. T.M. Dent on the souther n bank of the Valle Moreau. Company maintained this position during the night. At 7:30 a.m. on the 28th, pursuant to orders from Bn. Hdqrs. the company moved forward. By 9 a.m. Lieut. Dent had crossed the Valle Moreau and passed into open field north of woods on side of ravine. During this operation a German automatic covering crossing of the valley was captured. Just after this heavy M.G. fire was encountered and it was found difficult to advance. Lt. Dent reached the wire in front of trench Clotilde at 92.5-73.5. It was decided to call for artillery assistance. Up to this time on the 28th one man was killed and two wounded. At 5 p.m. company moved to attack through woods on left of Binarville

Road. While moving through thick woods there was some confusion due to losing direction in the woods. Heavy M.G. fire was met from 3 sides. The company became scattered in woods and attack halted. Company remained at 2 92.7-72.7 during the night. In the attack in the woods and the hostile shelling that followed 1 officer and 12 men were wounded and gassed. Three men have been missing since the night of the 28th. At noon on the 29th the company moved back into the Breslau trench 1200 yards east of bridge on Binarville Road, where they remained until the close of the period covered by this report.

(Signed) R.A. Williams,

Captain 368th Infantry.

Operations Report, Machine Gun Co.,368th Inf.,for period Sept.25-30,1918.

2/28/84

Second platoon left Vienne-le-Chateau under Lieut. Good loe on night of Sept. 25, 1918, attached to 2nd Bn., 368th Inf., and went out under Captain Smith, composing a mixed post which was on our right flank. This platoon rejoined the company Sept. 27, 1918. On Sept. 26, 1918, 1st platoon left Vienne-le-Chateau attached to 2nd Bn., and advanced to Tirpitz trench, and had two engagements, and returned to Vienne-le-Chateau the same night. On Sept. 26, 1918, 3rd platoon advanced with Co. "G", returning to Vienne-le-Chateau on morning of Sept. 27, 1918.

On Sept. 27, 1918, ½ company joined 2nd Bn. and ½ joined 3rd Bn. both parts of company advancing beyond Breslau trenches. On Sept. 30, 1918, all units of company returned to Vienne-le-Chateau and reformed.

Total casualties 17 (wounded); killed, none.

(Signed) Joe Dabney,

Captain, 368th Infantry.

Report of part taken by the 37 M.M. Platoon, 368th Infantry, in operations of the Regiment from September 25 - 30, 1918.

1. From September 25th to 9 a.m. September 28th, the 37 M.M. Platoon was commanded by 1st Lieut. Joseph E. Martin, 368th Infantry.

2. Reported to the regiment at 2 a.m. September 28th for duty, having come from 1st Corps School at Gondrecourt. On order of the C.O., took command of the 37 M.M. Platoon at 9:00 a.m. September 28. At that date and hour two guns were in position on the Vienne-le-Chateau - Binarville Road, 200 meters beyond the new bridge over the Moreau Valley, supporting the 3rd Battalion in attack. Targets were numberous M.G. nests about 600 meters distant on the left of road. We were partially successful in silencing machine guns. Uncertain information as to exact location of our own troops and a detachment of French Cavalry restricted use of the guns. The guns remained in this position until the withdrawal of the 3rd Battalion.

3. During this period one gun was operating with the 2nd Battalion. With this gun I advanced with Company "H" and two platoons of Company "G" north along the narrow gauge railroad leading toward Binarville. During the advance we operated against snipers' nests and from 4:00 to 6:00 p.m. did extensive firing against machine guns holding up the advance of these troops, being successful until nightfall and heavy enemy artillery bombardment forced the withdrawal of the troops and the gun. (This was on Sept. 28th).

4. After this withdrawal we placed and held our guns in position in the sector of the trench held by Company "G", under Lieut. Leon M. Anderson, by command of Capt. Burns (then commanding 2nd Bn.) as defense against a possible counter-attack. The night was very rainy and cold, and Corporals Theophilus Jackson and Herman Murray displayed unusual devotion to duty in remaining at their posts despite their hardships and hunger.

5. On Sunday morning, September 29th, by order of Major Norris, the platoon was detached from the 2nd and 3rd Battalions, and proceeded with 1st Battalion in its operations. On Sunday night, Sept. 29, when the 1st Battalion was occupying the Tirpitz trench, we took a position between the front line and supporting companies, affording good field of fire, in support of the Battalion against attack. From about 5:00 p.m. until dusk, we

2/28/25

fired against an observation post and machine guns on the crest of a ridge in front of the Battalion. On Monday, Sept. 30, we advanced with the 1st Battalion to the Promadaire trenches and across the woods to the opening beyond, in the vicinity of Binarville. During this advance, we fired on and rendered untenable a well constructed observation and M.G. post in the woods S.E. of Binarville. Owing to the torn up condition of trails by artillery fire, and the denseness of the woods, transportation of guns and material was very difficult. The denseness of the woods also rendered it difficult to find positions affording practical fields of fire. During these operations the personnel of the platoon, particularly Corporal Theophilus Jackson, and Pvts 1/c George A. Wood, Frank Randolph, and Thomas Holly (killed in action), and Pvts. Raleigh Foster and James W. Gilbert displayed steady and unflinching devotion to duty.

2/28/86

6. In its operations the platoon lost one man killed and four wounded. While I was attached to the 1st and 2nd Battalions, in addition to commanding the operations of my platoon, I rendered whatever assistance I could toward maintaining the discipline and morale of other organizations.

(Signed) Levi Anderson,
1st Lieut., 368th Inf.,
Comdg. 37 M.M. Platoon.

. . . . . .

Report of Trench Mortar Platoon, 368th Infantry, for period Sept. 25-30, 1918

Sept. 25th Platoon reached Vienne-le-Chateau.

Sept. 26th Took over sector property and went over support position. Moved Trench Mortar to 2nd Battalion P.C.

Sept. 27th Took position on Binarville Road to blow up wire.

Sept. 28th Put 37 M.M. gun in action at Binarville Road, driving away several M.Gs.

Sept. 29th Turned over 37 M.M. guns to Lieut. Anderson and brought up Trench Mortars, joining the 1st Battalion.

Sept. 30th Took position in trench with 1st Battalion.

(Signed) Joseph H. Martin,
1st Lieut., 368th Inf.,
Comdg. T.M. Platoon.

. . . . . .

Report of part taken by the Supply Company in operations which extended from Sept. 25th to 30th.

Sept. 25th- Company in barracks at Camp Sounait. Supplies delivered at night to each of the 3 battalions of the regiment.

Sept. 26th- Company in barracks at Camp Sounait. Supplies delivered at night to each of the 3 battalions of the regiment.

Sept. 27th- Company in barracks at Camp Sounait. Supplies dumped at Regimental Dump at Vienne-le-Chateau. Dump in charge of Lieut. Grover Harden and Regtl. Supply Sgt. E.T. Taylor. Companies supplied from this point by wagon train at night.

Sept. 28th- Company moved to Vienne-le-Chateau. Supplies delivered to companies by ration cart in daylight. Four horses killed by shell fire at this point.

Sept. 29th- Company in dugouts at Vienne-le-Chateau. Supplies delivered as usual to Regimental P.C. at the new bridge on the Vienne-le-Chateau - Binarville Road in daylight.

Sept. 30th- Five men of company wounded at Vienne-le-Chateau by shell fire and 13 horses killed same day. Company moved in afternoon to Camp La Harazee. Wounded men evacuated to hospital.

Subject: Operation Report for 2nd. Bn. 368th. Infantry for Period September 25th. to 30th. 1918

Second Battalion

1. September 25th. 1918 Companies "G". "F". and "H". occupied the French Trenches in the Sector North of the Vienne le Chateau - La Harazee Road, in the order named from left to right, with Company "E" in reserve behind Company "G". The Scout Platoon was sent to a Position immediately in rear of Company "G" the night of the 25th. A mixed post was on my left flank connecting with the French Troops and another was on my right flank connecting with the 308th. Regiment of the 77th. Division.

2/20/62

2. The order of the attack for the morning of the 26th. was issued to all organization commanders the evening of the 25th., Speecial instructions being given for opening gaps in our wires during the night. On advancing from the French Trenches the Morning of the 26th. much wire was met with by all organizations and owing to the fact that none had wire cutters considerable disorganization resulted in the companies, especially in the matter of liaison. "E" Company was directed on the morning of the 26th. to follow and support Company "H".

x

3. In attempting to advance my Battalion P.C. the morning of the 26th. to a position in the rear of companies "G and "F" I was unable to get liaison with either company; neither was I able to get liaison with my advance post, or company "H" latterally on account of wire and other obstacles. I then returned to the rear of the lines and moved up in behind of companies "H". and "E", on the right, of my line to a position Co. "H" had reached in the first German trench. As much time has been consumed I decided to push these companies out into the Bosche trenches and to make a reconnaissance to determine the situation in front ofthe right of my line. I placed these two companies in the Bosche trenches near 294.3--272.1. Patrols sent to the front and flanks reported no sight of the enemy and no contact with Infantry Regiment 308th on the right.

4. The advance from this point started about 13:15 o'clock, following the general route of the tramway running north from near this point. The advance was covered by patrols and no enemy was met with until a position near 294.4--272.9 was reached; here the leading patrol killed 3 of the enemy and captured 1, also took a light machine gun. The companies halted here and there was active patrolling and reconnoitering. On request of our avion (by signal) our position was indicated to him. One of our patrols picked up near the rear of Co. "E" ,(which was in support,) 2 privates of the 308th Infantry who had

gotten lost in the woods. A message had been sent to the Commanding Officer of the 368th Infantry when the advance began about 13:15 o' clock. The wounded prisoner captured was sent back with a special detail accompanied by the 2 privates from the 308th Infantry with a message to their battalion commander of the 308th Infantry on my right, requesting his location by coordinates and informing him of my location by coordinates. I also requested him to inform the special detail of a route to return to Viennex le Chateau with the prisoner. No reply was received from this message to the 308th Infantry. Later in our advance one of our patrols was fired on by an enemy machine gun, killing one man and creating considerable confusion in addition. A Boche plane flew very low over our position and dropped 2 or 3 bombs about this tme but no one was injured.

5. As it was almost dark at this time and having no liaison with any of the other units, I decided to withdraw until I could get in touch with the Commanding Officer, 368th Infantry. Theenemy searched along the trails with their artillery during our withdrawal but none of the shells fell near us; it was pitch dark by this time and we had just reached the German's first trench. There was much confusion owing to the masses of wire we had to contend with in the dark, before the companies reached the French trenches. Two platoons of Co. "H" and one of Co."E" remained in the Boche trenches that night near 294.25--271.8. I met Lieut. Cross from the support battalion near this point about 19 o'clock with liaison men from the support battalion.

2/20/63

6. Co. "G" spent theentire day of the 26th working its way thru the wire entanglements. Great difficulty was experienced in this work because of the lack of wirecutters; the Co. succeeded in reaching the first German trench, Des Balines 292.5--271.47 about dusk, contact with French troops on the left was maintained thruout the day. I issued instructions to the Commander of the Scout Platoon to move forward and join "G" Co. and help them push thru. I had received verbal instructions to push the advance with all of my companies previous to my joining Cos. E & H on the morning of the 26th.

27th September.

1. Co. "G" moved forward the morning of the 27th., took position just south of trench DeUphrate being held up at 292.25--27.0 by machine gun. Connection with the French on the left was established at this point about 9:00 a.m. The Co. being to the left of its correct position withdrew under instructions by way of the Ravine de Mitrailleuses, took a position in trench de Finlande at point 293.75--272.1 about 4 p.m. At 4:30 p.m. Cos. F & G began an advance to the Fripitz trench, G Co. was on the right. This trench was reached near 294.0--272.7, liaison with Bn. P.C. and with Co. F could not be maintained. During the night there was heavy artillery and machine gun firing xxd on this position and at 4 a.m. Co. G withdrew to the Finlande trench but was unable to get liaison with Co. F.

2. Co. F moved out on the 26th at 5:25 a.m. two platoons in asault and 2 in support. One assault platoon and one support platoon went out at 293.5--271.4 the other entered the Bresleu trench at 292.7--271.6. The left assault and support platoon advanced to Ravine des Mitrailleuses. From this position they were driven in by artillery fire back to the departure trench about 100 meters south of the Bresleu trench. The two right platoons advanced to the Finlande trench near the point where it crosses Boy de Stuttgart, about 11 a.m., here they were held up by maching gun fire. From this point leaving one platoon to come up in support, in the Finlande trench these two platoons advanced along Boy de Stutt-

gart, took a position in Tirpitz trench where it crosses Boy de Stuttgart. At this point six Boche were killed and one captured, one machine gun was also taken. About fifteen men and one officer of the enemy escaped thru the Boy de Stuttgart in the direction of Pferdestal lager. About 17:30 o'clock this position was under heavy artillery fire and these two platoons withdrew to Ravine des Mitrailleuses near 293.0--271.75. Here they were again shelled by artillery (155) and withdrew up Ravine de Bel Abri. This ravine being also heavily shelled the platoons withdrew to the original trench of departure near 293.5--271.3.

3. On the morning of the 27th F Co. took the position in the Finlande trench between Boy de Kehl and Boy von Mudre. From this position advanced along the general line of Boy de Mudre to the Tirpitz trench reconnoitering the ravine of the Charlottenta; advancing later to a position directly in front of the Falkenhayn trench and astride Boyer de Manioc. This position was occupied until about 21 o'clock being subjected to stick bombs, Stokes mortar and machine gun fire during the entire period. About 22 o'clock the company withdrew to the Zeppelin trench near the point where it meets Boyer de Manioc and remained in this position until about 5 a.m.

4. The Scout Platoon moved forward with Co. G on the morning of the 27th to a position just south of trench de Euphrate about 9 am. About 12:30 p.m. message was received from the Commanding Officer directing the platoon commander with his unit to report to the Bn. P.C., which was at this time near 294.05--271.95, this point was reached about 2:30 p.m. From this position the platoon moved forward pass the Finlande trench to the Karl trench about 294.20--272.5. It was just about dark at this time and since liaisons with Cos. G & F could not be established, by order of the Commanding Officer, they returned by way of Boy de Kehl to the tramway and from thence to the Damas trench where they remained during the night.

5. Co. H with two platoons in trench Suede sent forward another platoon to trench Tringle near 294.6--272.3. The two platoons in trench Suede moved forward to trench Courland near 294.4--272.1 at 12 noon. There was some artillery and machine gun fire on this position; no liaison could be established with units on the right or left. Co. E was in support and this position wasoccupied until 3 o'clock the morning of the 28th when both companies E and H moved to the Damas trench in a position near 293.1--271.6, being resupplied here with rations and water.

6. E Co. was in a position in support of H near 294.5--272.1, reaching this position about 12 o'clock. There was some artillery fire and heavy machine gun fire, one platoon of E Co. working east thru the Courland trench endeavored to get liaison with the 308th Infantry to the right but without success. This Co. remained in support of H Co. until about 3 o'clock the morning of the 28th when it moved to a position in the Damask trench near 293.1--271.6, here they too, were resupplied with rations and water.

28th September

1. On the morning of the 28th Co. G was resupplied with rations and water and placed temporarily in reserve. About 14:30 o'clock 2 platoons were sent forward to support Co. H near 294.6--272.5; the remaining 2 platoons were sent forward later to the same point and remained in position until evening when the line of resistance was established in the Ravine de Mitrailleuses for the night of the 28th.

2. About 5 a.m the morning of the 28th Co. F withdrew to the Lager south of Zeppelin trench. Some confusion had ensued during the night and approached to the Tirpitz trench thru the woods on the 27th, a large portion of the Co. had become separated, advancing with Col G, as was discovered later. Owing to this fact and being without liaison to the Bn. P.C. a position was taken up in Finlande trench near the point where it crosses Boyer von Mudra. Arriving here about 11 a.m. the Co. was reorganized. After this reorganization the Co. advance in thesame general direction as the preceding day and occupied practically the same position astride Boyer de Manioc about 100 meters south of Falkenhayn trench about 17:30 o'clock. Owing to faulty liaison in the Co. in misinterpreting order given during combat at this point, the two right platoons withdrew to the rear. Machine gun fire and fire from stick bombs was so severe that they were unable to maintain this advanced position, suffered 20 casualties on this occasion (where they had suffered 18 casualties in almost the same place the day before.) These two platoons were withdrawn to the Zeppelin trench near a point where it meets the Boyer de Manioc; which position was held until ~~xxxxx~~. 21 o'clock, the remainder of the night was spent in German shelters, Charlottenta. There was heavy artillery fire along Boyer de Manioc and on high ground between Boyer von Mudra and Boyer de TurGuie south of the Tirpitz trench.

3. On the morning of the 28th ~~xxx~~ a part of the Scout Platoon was kept at Bn. P.C. while the other was used to maintain liaison between the advanced Cos. and Bn. P.C. They were also used as guides in the advance and for units coming up in support. About 3 p.m. a strong patrol was formed ~~xxxx~~ to secure liaison between our right flank and the left flank of the 308th Inf. Information was received thru liaison about this time that some of the advanced units were retiring, therefore the patrol was abandoned and a strong skirmish line was formed to prevent a possible flanking of the withdrawing unit. Finally they retired to the Damas trench, by direction of the Commanding Officer, where they remained in position on the tramway just in front of the trench during the night.

4. Co. H. left the Damas trench the morning of the 28th in the Ravine de Mitrailleuse to point 293.6--272.0, thence along general direction of tramway to Tirpitz trench. From this point they moved along Boyau de Fribourg, to the Zeppelin trench reaching this point about 12 o'clock. Heavy machine gun fire was met also rifle grenade fire was encountered. An attempt was made to ~~xxxxxxxx~~ proceed west thru the Pferdestal lager to position in Zeppelin trench with left resting on Boyau de Stuttgart. Machine gun fire and trench mortar fire from near 293.5--273.0 prevented this. Co. H maintained this position near 294.6--272.7. About 18 o'clock owing to the demoralized condition this Co. withdrew and part of it formed in the Damas trench and later sent to the rear.

5. Co. E with the other Cos. of the Bn. was formed in the Finlande, and in the Ravin de Mitrailleuse, in conjunction with the other Cos. With H and F Co. in line and G Co. in support the advance toward the Tirpitz trench was begun, E Co. being the right flank Co. with instructions to follow the tramway from 294.4--272.0. Co. E moved forward with left flank resting on tramway to positon in the ravine just south of Zeppelin trench near 294.5--272.9 about 16 o'clock, with Co. F. in position on its left. After a consultation of theofficers of Cos. E & F the 2 Cos. began an advance to a line about 125 meters south of the Falkenhayn trench. Here the advance was held up by heavy machine gun and rifle grenade fire, although (also) stick bombs were thrown by the enemy. About 17:30 o'clock the Co.

becoming greatly disorganized, 1 officer and 5 men being killed and about 7 wounded, withdrew to Ravin de Mitrailleuse, the last platoon under command of Lieut. Smith. As far as possible theCo. was reorganized in this ravine with the men who could be assembled and the Co. was later moved to the rear and stationed along theVienne le Chateau and La Harazee road.

29th September

1. Co. G was relieved on the morning of the29th and returned to the positions along the Vienne le Chateau and La Harazee road.

2. Two platoons of F Co. which withdrew on the evening ofthe 28th moved along tramway running south to 294.2--272.0 occupied trench Du Cimetiere near this point and held this position until relieved on the 29th about 11 o'clock.

3. Scout Platoon moved out of the Bn. sector on the morning of the 29th about 11:30 a.m. after that unit had been relieved by the 1st Bn. of this regiment.

4. Cos. E & H had already been sent to the rear, the remainder of the day of the 29th and the day of the 30th was spent in reorganizing and equipping the several units.

2/20/16

THIS REPORT WAS COMPILED FROM PERSONAL OBSERVATIONS, AFTER CONSULTING THE DIFFERENT ORGANIZATION COMMANDERS AND CHECKING ON REPORTS RENDERED BY THEM.

Max A. Elser
Commanding Bn.

Camp Meyette, France,

23rd, October, 1918.

From: Max A. Elser, Major 368th, Infantry

To: Commanding Officer, 368th, Infantry.

Subject: Operation Report for 2nd Bn. 368th, Infantry for period September 25th, to 30th, 1918.

Second Battalion.

1. September 25th, 1918 companies "G", "F" and "H" occupied the French Trenches in the sector north of the Vienne Le Chateau - La Harazee Road, in the order named from left to right, with Company "E" in reserve behind Company "G". The Scout Platoon was sent to a position immediately in rear of Company "G" the night of the 25th. A mixed post was on my left flank connecting with the French Troops and another was on my right flank connecting with the 308th Regiment of the 77th Division.

2. The order of the attack for the morning of the 26th was issued to all organization commanders the evening of the 25th. Special instructions being given for opening gaps in our wires during the night. On advancing from the French Trenches the morning of the 26th much wire was met with by all organizations, and owing to the fact that none had wire cutters considerable disorganization resulted in the companies, especially in the matter of liaison. "E" Company was directed on the morning of the 26th to follow and support Company "H".

3. In attempting to advance my Battalion P. C. the morning of the 26th to a position in the rear of companies "G" and "F" I was unable to get lisison with either company; neither was I able to get liaison with my advance post, or company "H" laterally on account of wire and other obstacles. I then returned to the rear of the lines and moved up in behind of companies "H" and "E", on the right, of my line to a position Co. "H" had reached in the first German trench. As much time had been consumed I decided to push these companies out into the Bosche trenches and to make a reconnaissance to determine the situation in front of the right of my

line. I placed these two companies in the Bosche trenches near 294.3--272.1. Patrols sent to the front and flanks reported no sight of the enemy and no contact with Infantry Regiment 308th on the right.

4. The advance from this point started about 13.15 o'clock, following the general route of the tramway running north from near this point. The advance was covered by patrols and no enemy was met with until a position near 294.4--272.9 was reached; here the leading patrol killed 3 of the enemy and captured 1, also took a light machine gun. The companies halted here and there was active patrolling and reconnoitering On request of our avion (by signal) our position was indicated to him. One of our patrols picked up near the rear of Co. "E", (which was in support,) 2 privates of the 308th Infantry who had gotten lost in the woods. A message had been sent to the Commanding Officer of the 368th Infantry when the advance began about 13.15 o'clock. The wounded prisoner captured was sent back with a special detail accompanied by the 2 privates from the 308th Infantry with a message to their battalion commander of the 308th Infantry on my right, requesting his location by coordinates and informing him of my location by coordinates. I also requested him to inform the special detail of a route to return to Vienne le Chateau with the prisoner. No reply was received from this message to the 308th Infantry. Later in our advance one of our patrols was fired on by an enemy machine gun, killing one man and creating considerable confusion in addition. A Boche plane flew very low over our position and dropped 2 or 3 bombs about this time but no one was injured.

5. As it was almost dark at this time and having no liaison with any of the other units, I decided to withdraw until I could get in touch with the Commanding Officer, 368th Infantry. The enemy searched along the trails with their artillery during our withdrawal but none of the shells fell near us; it was pitch dark by this time and we had just reached

the German's first trench. There was much confusion owing to the masses of wire we had to contend with in the dark before the companies reached the French trenches. Two platoons of Co. "H" and one of Co. "E" remained in the Boche trenches that night near 294.25--271.8. I met Lieut. Cross from the support battalion near this point about 19 o'clock with liaison men from the support battalion.

6. Co. "G" spent the entire day of the 26th working its way through the wire entanglements. Great difficulty was experienced in this work because of the lack of wirecutters; the Co. succeeded in reaching the first German trench, Des Balines 292.5--271.47 about dusk, contact with French troops on the left was maintained throughout the day. I issued instructions to the Commander of the Scout Platoon to move forward and join "E" Co. and help them push through. I had received verbal instructions to push and advance with all of my companies previous to my joining Cos. E& H on the morning of the 26th.

2/20/61

27th September.

1. Co. "G" moved forward the morning of the 27th, took position just south of trench De Euphrate being held up at 292.25--27.0 by machine gun. Connection with the French on the left was established at this point about 9.00 a.m. The Co. being to the left of its correct position withdrew under instructions by way of the Ravin de Mitrailleuses, took a position in trench de Finlande at point 293.75--272.1 about 4 p.m. At 4.30 p.m Cos. F.& G began an advance to the Fripitz trench, G Co. was on the right. This trench was reached near 294.0--272.7, liaison with Bn. P. C. and with Co. F could not be maintained. During the night there was heavy artillery and machine gun firing on this position and at 4 a.m. Co. G withdrew to the Finlande trench but was unable to get liaison with Co. F.

2. Co. F moved out on the 26th at 5.25 a.m. two platoons in assault

25/82/2

And this is what Col. Greer himself issued in General Order No. 38, Hq. 92d Div. the same day that he wrote his infamous letter to this senator, "The Division Commander desires to commend in orders the meritorious conduct of Private Charles E. Boykin, Company "C" 325th Field Signal Battalion. On the afternoon of September 26, 1918, while the 368th Infantry was in action in the Argonne Forest the Regimental Commander moved forward to establish a P/C. and came upon a number of Germans who fled to the woods which were FOUND TO BE ALIVE WITH MACHINE GUNS. The C. O. ordered the woods searched to the top of the hill, the officer in charge of the scouting (2nd Lt. C. W. Carpenter) called for volunteers and Private Boykin, a telephone linesman, offered his services and set out with the rest of the detail. While trying to flank an enemy machine gun another opened fire killing him instantly."

2/28/53

Referring again to Col. Greer's letter in which he says

> "One of our majors commanding a battalion said "The men are rank cowards there is no other words for it."

I was the only colored person present when this was uttered: It was on the 27th of last September in the second line trenches of Vienne le Chateau in our attack in the Argonne and was uttered by Major B. F. Norris, commanding the 3rd Battalion. Major Norris, himself, was probably the biggest coward because he left his Battalion out in the front lines and came back to the Colonel's dugout a nervous wreck: I was there in a bunk along side of the wall and this major came and laid down beside me and he moaned and groaned so terribly all night that I couldn't hardly close my eyes -he jumped and twisted worse than anything I have ever seen in my life. HE was a rank coward himself and left his unit on some trifling pretext and remained back all night.

Sept. 27th - Four of the combat wagons returned from the La Renarde Farms with - 20,000 rounds of chauchat ammunition and 2,000 V.B. grenades. The Regimental Munitions Officer along with a French guide made a visit to the Farms to locate pryotechnics that were claimed to be there but was

unable to find any at that time after a through search with the guide. The following issue was made that date:- 200 rounds of Stokes Mortar Shells to the Stokes Mortar Platoon. 500 of Cal. 45 to the Signal Platoon.

Sept. 29th -The Regimental Munitions Officer returned to the La Renarde Farms and was able to locate with the assistance of the French Officer stationed there and obtained the following pryotechnics:-

Flag rockets -----10
Yellow Smoke R. --12
Illuminating R. ---12
V.B. Green---------20
V.B. Red----------30
VB. 1star White 10
V.B. 3 star- "---15
V.B. 6 star " - ---15
Pistol Cart. Green-10
" " " Red 20
" " 1 ~~star~~ star---20
" " 3 star--10

And some miscellaneous pryotechnics.

These pryotechnis were carried to the regimental dump and distributed fromthere to the different battalions of Sept. 30.th.

Sept. 30th - 1000 V. B. grenades were issued to the 2nd Bn.
1000 V. B. grenades were issued to the 1st Bn.
500 F-1 grenades were issued to the 2nd Bn.
2400 rounds cal. 30 issued to 2nd Bn.

To: Commanding Officer -th Infantry

Subject: Commendation of -th Infantry

1. Before the separation which will follow the arrival of this ship at the Port of Disembarkation, the undersigned desires to express his appreciation of the gentlemanly conduct and soldierly bearing which has characterized the officers and men of the ---Infantry during the past two trying weeks.

Brigadier General, N. A.

As for the singing regiment, the good old -, we shall watch you with special interest. We've enjoyed your music and your jokes, and we thank you for them. Your soldier-like qualities, also, have not gone unnoted. It's not the color of the skin that counts but the hearts underneath. These we know are brave and loyal.

2178/52

(insert 2a)

Executive Officer.

1. On the 28 of September being in temporary command of Co. H for the attack of the line of the "Lager" having given 1st Lieutenant Koger directions for the attack he reported to me a few minutes after stating that he was physically unfit for handling his platoon. Without further argument I told him to report to Col. Brown and also to Major Lawrence the medical officer to be visited.

1st Lt. de Boulancy.

Following is report on shelling of my position on the night of Sept. 12, 1918 -

1- Shelling began at about 21:00 o'clock, Sept. 12th-lasted about one and one half hours.

POSITIONS SHELLED: (?)

To Capt. Burns:-

This confirms my previous statements that the P. C. of this position should be at Novion - nearly every time they are bombarded the Co. C. O. has to crawl underground - not a procedure conducive to calm

thinking.

J. N. Merrill

Major, Sept. 14/18

Considerable dissatisfaction observed throughout the command owing to the removal of small stoves from the tents of the enlisted men the second day after they were quartered here. This change has caused many of the men to contract serious colds and the natural consequence is their rest is very poor during the night. In addition to this the men have not yet been deloused, although they have been here eight days today, and nothing difinite as when they will be deloused is obtainable; the shoe condition has grown from bad to worse and added to this large details are out at work with no protection from weather conditions for their feet.

7. Miscellaneous: There are only two things now against which we have to keep on the alert to prevent dissatisfaction creeping in: Delousing and PAYING the troops. The men have become reconciled to the delay in going home, but it is impossible to have them understand why it is their Government continues to withhold their pay. I find there are a number of men in all units of the regiment who actually believe it is nessessary for the Government to have another bond issue to obtain money enough to pay the troops.

in support and this position was occupied until 3 o'clock the mo
the 28th when both companies E and H moved to the Damas trench in a
sition near 293.1--272.6, being resupplied here with rations andwater.

19/32/2

6. E Co. was in a position in support of H near 294.5--272.1, reaching this position about 12 o'clock. There was some artillery fire and heavy machine gun fire, one platoon of E Co. working east through the Courland trench endeavored to get liaison with the 308th Infantry to the right but without success. This Co. remained in support of H Co. until about 3 o'clock the morning of the 28th when it moved to a position in the Damas trench near 293.1--271.6, here they too, were resupplied with rations and water.

28th September

1. On the morning of the 28th Co. G was resupplied with rations and water and placed temporarily in reserve. About 14.30 o'clock 2 platoons were sent forward to support Co. H near 294.6--272.5; the remaining 2 platoons were sent forward later to the same point and remained in position

until evening when the line of resistance was established in the Ravin Mitrailleuses for the night of the 28th.

2. About 5 a. m. the morning of the 28th Co. F withdrew to the Lager south of Zeppelin trench. Some confusion had ensued during the night and approached to the Tirpitz trench through the woods on the 27th, a large portion of the Co. had become separated, advancing with Co. G, as was discovered later. Owing to this fact and being without liaison to the Bn. P. C. a position was taken up in Finlande trench near the point where it crosses Boy von Mudra. Arriving here about 11 a. m. the Co. was reorganized. After this reorganization the Co. advance in the same general direction as the preceding day and occupied practically the same position astride Boy de Manioc about 100 meters south of Falkenhayn trench about 17,30 o'clock. Owing to faulty liaison in the Co. in misinterpreting order given during combat at this point, the two right platoons withdrew to the rear. Machine gun fire and fire from stick bombs was so severe that theywere unable to maintain this advanced position, suffered 20 casualties on this occasion (where they had suffered 18 casualties in almost the same place the day before.) These two platoons were withdrawn to the Zeppelin trench near a point where it meets the Boy de Manioc; which position was held until 21 o'clock, the remainder of the night was spent in German shelters, Charlottenta. There was heavy artillery fire along Boy de Manioc and on high ground between Boy von Mudre and Boy de Turcuie south of the Tirpitz trench.

3. On the morning of the 28th a part of the Scout Platoon was kept at Bn. P. C. while the other was used to maintain liaison between the advanced Cos. and Bn. P. C. They were also used as guides in the advance and for units coming up in support. About 3 p.m. a strong patrol was formed to secure liaison between our right flank and the left flank of 308th Infantry. Information was received through liaison about this

2/28/62

time that some of the advanced units were retiring, therefore the pa was abandoned and a strong skirmish line was formed to prevent a possible flanking of the withdrawing unit. Finally they retired to the Damas trench, by direction of the Commanding Officer, where they remained in position on the tramway just in front of the trench during the night.

4. Co. H left the Damas trench the morning of the 28th in the Ravin de Mitrailleuse to point 293.6--272.0, thence along general direction of tramway to Tirpitz trench. From this point they moved along Boyau de Fribourg, to the Zeppelin trench reaching this point about 12 o'clock. Heavy machine gun fire was met also rifle grenade fire was encountered. An attempt was made to proceed west through the Pferdestal lager to position in Zeppelin trench with left resting on Boyau de Stuttgart. Machine gun fire and trench mortar fire from near 293.5--273.0 prevented this. Co. H maintained this position near 293.6--272.7. About 18 o'clock owing to the demoralized condition this Co. withdrew and part of it formed in the Damas trench and was later sent to the rear.

5. Co. E with the other Cos. of the Bn. was formed in the Finkmde trench and in the Ravin de Mitrailleuse, in conjunction with the other Cos. With H and F Co. in the line and G Co in support the advance toward the Tirpitz trench was begun, E Co. being the right flank Co. with instructions to follow the tramway from 294.4--272.0. Co E moved forward with left flank resting on tramway to position in the Ravine just south of Zeppelin trench near 294.5--272.0 about 16 o'clock, with Co. F in position on its left. After a consultation of the officers of Cos E & F the 2 Cos. began an advance to a line about 125 meters south of the Falkenhayn trench. Here the advance was held up by heavy machine gun and rifle grenade fire, also stick bombs were thrown by the enemy. About 17.30 o'clock the Co. becoming greatly disorganized, 1 officer and 5 men being killed and about 7 wounded, withdrew to Ravin de Mitrailleuse, the last platoon under command of Lieut. Smith. As far as possible the Co. was

ganized in this ravine with the men who could be assembled and the was later moved to the rear and stationed along the Viene le Chateau La Harazee road.

29th September.

1. Co. G was relieved on the morning of the 29th and returned to the ositions along the Vienne le Chateau and La Harazee road.

2. Two platoons of F Co. which withdrew on the evening of the 28th moved along tramway running south to 294.2--272.0 occupied trench Du Cimetiere near this point and held this position until relieved on the 29th about 11 o'clock.

3. Scout Platoon moved out of the Bn. sector on the morning of the 29th about 11.30 a. m. after that unit had been relieved by the 1st Bn. of this regiment.

4. Cos E & H had already been sent to the rear, the remainder of the day of the 29th and the day of the 30th was spent in reorganizing and equipping the several units.

THIS REPORT WAS COMPILED FROM PERSONAL OBSERVATIONS, AFTER CONSULTING THE DIFFERENT ORGANIZATION COMMANDERS AND CHECKING ON REPORTS RENDERED BY THEM.

General Orders)
)
No.....2)

1. The following history of the 805th Pioneer Infantry by Captain Paul S. Bliss, Adjutant, is approved and will be placed on file with the Historical Section, General Staff, General Headquarters, American Expeditionary Forces, pursuant to G.O. 31, Par. 4, Section IV, G. H. Q., A.E.F. cs.

2. It is desired to make mention of and to pay tribute here to the excellent spirit which had prevailed in this regiment between the officers (white) and the enlisted men (colored). It has been one of co-operation throughout and that this has been so without exception is very gratifying to me.

Chauncey B. Humphrey,
Colonel, Infantry, U.S.A.
Commanding.

FOREWORD

This brief history of the 805th Pioneer Infantry, American Expeditionary Forces, is written as an official document to be filed with the records of units in the A.E.F. It will perpetuate, in its way, the work of an organization which contains the best colored blood of America-- an organization which earned for itself the unsolicited remark of many officers who visited or inspected it: "The best disciplined colored organization in France." It is undertaken to afford some immediate protection against the ravages which time works so quickly upon the stonework of facts and records.

Chapter 1.

Acting under authority conferred by Sections 2, 8, and 9 of the Act of Congress, "To authorize the President to increase temporarily the Military Establishment of the United States", approved May 18, 1917, President Wilson directed May 23, 1918, the organization of eight colored infantry regiments. Two of these were ordered to be raised and equipped at Camp Funston, Kansas, in a War Department letter dated June 27, 1918, which follows:

WAR DEPARTMENT
The Adjutant General's Office,

Washington, June 27, 1918.

From: The Adjutant General of the Army,

To: The Commanding General, Camp Funston, Kansas

Subject: Numerical designations and location of eight colored infantry Regiments directed organized at National Army Camps.

1. You are informed that the Colored Infantry Regiments directed organized at the following Camps, in a letter from the Adjutant General dated May 23rd, 1918, are numerically designated as listed below:

Camp Funston, 805th Infantry,
National Army, (Colored)
Camp Funston, 806th Infantry,
National Army, (Colored)

By order of the Secretary of War.

(Sgd) ROY A. HILL
Adjutant General.

General Leonard Wood, commanding at Camp Funston lost no time in getting at his task. He named Lieutenant Colonel Lawrence P. Butler, of the 164th Depot Brigade as commanding officer of the 805th Infantry, and the Depot Brigade under Par. 8, S.O. 165, dated July 5, ordered five captains, four first lieutenants and 31 second lieutenants to raport to Colonel Butler for duty.

Three officers from the Regular Army were assigned under separate special orders and on July 8 the first written order that passed over the Adjutant's desk made its appearance. It was issued at "Headquarters, Detention Camp No. 2, Camp Funston, Kansas", a military camp of which Colonel Butler had not yet been advised of command, and made the following assignments:

FIELD OFFICERS

Lieut. Col. L.P. Butler, Comd'g.
Major A.C. Evans 1st. Bn.
Major J.E. Creed 2nd. Bn.
Major A.D. Cowley 3rd. Bn.

2nd. Lt. Charles Y. Martin
2nd. Lt. Henry H. Middleton

The order also stated that the work to be taken up during the remainder of the regiment's stay at Detention Camp would be target practice- Special course C, W.D. changes No. 20, which would be completed by Saturday night July 13. This, in itself, was a seemingly impossible task. Already, however, it was known that the 805th Infantry, and its sister, the 806th, would be "rushed out" with all possible dispatch.

The officers named were engaged with colored provisional companies from which the enlisted men of the new regiment were to be drawn. They were to remain with those organizations but were to turn over company funds to other officers who were to relieve them.

It was a tremendous task they had to do. It involved the preparation of innumerable lists and constant checking of records. The heat, winds and rain, not to mention the dust, made work in pyramidal tent orderly rooms difficult. Many candle lights flickered until far into the night. But no one complained: it was a furious pace, but the need was great.

3/6/48 D.

Meanwhile, barracks in Camp Funston, itself, at the eastern end of cantonment, fomerly occupied by the 92nd. Division had been assigned and the Adjutant had arranged for the re-modeling of one of the office buildings, and had assigned barracks to the various companies. This was not without its difficulties, for an Engineer Service Battalion, under orders to move which were delayed in coming, was in place.

1.

On July 12th, the following memorandum was issued "The 805th Infantry will march to its quarters in 18th and 19th Units, Camp Funston, Kansas, Monday, July 15th, at 6:30 A.M. Order of march: 1st. Bn. 3rd. Bn., 2nd. Bn., The Headquarters company will be attached to the 1st. Bn; M.G.Co. to 3rd. Bn.; Supply Co. to 2nd. Bn.

The leading company will set a pace of 2½ miles per 50 minutes. First halt end of first 30 minutes for 15 minutes; thereafter every 50 minutes for 10 minutes.

All officers of the 805th Infantry, who are now in the 2nd. Prov. Regt. have been ordered to report at Hdq., 1st. Prov. Regt. at 5:30 A.M., Monday, July 15th.

* * * * * * *

Officers' messes will be by battalion, and Headquarters. 1st. Bn. Mess, bldg. 1806; 2nd. battalion mess, bldg. 1805; 3rd. Bn. mess, bldg. 1904; Headquarters mess, in which officers of the Headquarters Co., M.G. Co., and Supply Co., will participate, bldg. 1902.

Officers receiving service records will examine them prior to Sunday night and see that they contain all the information necessary.

By order of Lieutenant Colonel Butler.

Paul S. Bliss,
Captain, Infantry, R.C.
Adjutant."

Headed by Colonel Butler and his Adjutant, both horsed, the column moved out as scheduled and reached Funston in time for dinner which had been prepared by cooks from each company sent in two days ahead. There were 1100 enlisted men in the organization at the time. They came in under Par. 3, S.O. 169 Hq. 164th Depot Brigade, dated July 9. Three hundred of these were attached and were transferred late in July to an organization called the "August Automatic Replacement Draft."

The Replacement organization was an incubus. It was built up to a strength of 1250 men (five provisional companies); new officers were assigned to take it overseas and it finally went its way, much to the relief of mess sergeants and keepers of morning reports, for its members "boarded out".

Looking back upon the situation the plan seems simple yet the matters of administration and adjustment it made necessary caused endless worry. It was a regiment within a regiment. The assignment of troops was timed by Camp Funston headquarters, however, so that no real inconven-

Colonel Butler immediately inaugurated an intensive program I.D.R., which kept his officers and men well occupied. He began an equitation class which all officers entitled to mounts gladly attended. Once a cavalry officer, and always a polo player, his methods of instruction were careful yet sure and rapid progress was made.

Meantime copies of an extract of Par. 205, S.O. 148, War Department, dated June 25, had been received. They read as follows:

> " Col. Chauncey B. Humphrey, Infantry, is relieved from his present assignment at the Panama Canal Zone and will proceed to Camp Funston Fort Riley, Kans., reporting upon his arrival for duty with a colored infantry regiment."

Chapter 2.

Col. Humphrey had been assigned to the 805th Infantry by General Wood. The regiment awaited his coming with interest. He arrived, July 23, tanned with his three years in the tropics, a tall powerfully built officer, light on his feet as a cat, giving the impression of tremendous nervous energy.

All that he asked of his officers and men was --perfection. His expression, "Why not Excellent?", which often appeared on his memoranda to company officers was the hammer with which he drove home his points. He asked bricks to be made--and somehow the straw was found.

In his first talk to his men he told them he wanted them to be "Bearcats". It was a name that stuck. The regiment was known in Funston as the "Bearcat".

A white dog, woolly, well-bred, a fighter from the drop of the hat, strayed into camp--"Bearcat", that was his name from the start. He looked the part. Pvt. Parks, later Corporal, the Colonel's orderly, took charge of him. "Bearcat" was and is the regimental mascot, but he did not come to the A.E.F. He was left with Mrs. Humphrey on Long Island later when the regiment went to Camp Upton.

Headquarters was a busy place. The myriad detalis, connected with insurance, allotments, service records, equipment, training, rationing, layed their now forgotten part.

A telegram from the War Department called for the names of officers to be promoted. A board sat, at Colonel Humphrey's order. The rumors flew--rumors, without which the machine could hardly go on. Rumor-- it salves the machinery, somehow, no matter how little believed.

The Depot Brigade was under orders to turn over 1500 more men. It was preparing to fill the officer personnel to requirements. Telephones rang continually.

The "Daily Bulletin" which was published at 11 A.M. each day meant work in every paragraph. Men were being examined continually by the Medical authorities. Daily, men who might have won the fame of participation in the Great War, in the A.E.F., went back to a Developement Battalion marked "venereal". Some did not care; there was sorrow and remorse in the eyes of others. Some had their fathers to blame, some themselves--often both.

The heat was teriffic. Dust storms came up in three minutes and buried papers , books, filled eyes and noses with scorching particles.

There came the following telegram:

"Pioneer"-- the word was fraught with meaning. Conversation was plentiful. It meant immediate change. The tables referred to showed no Machine Gun company. Special Order 34 Par. 1 and 2 , Hq. 805th Pioneer Infantry was the result: it transferred the officers and men of this company, of which Capt. F.D. Moses was commander, to other organizations within the regiment.

3/6/52

Rumors flew again: that eight more Pioneer Infantry regiments were to be organized--two, the 815th and 816, at Camp Funston. It was true. A letter from the Adjutant General of the Army so ordered.

Promotions, changes followed in due course. The eagles replaced the silver leaf on Col. Butler's shoulders, and he was informed that he would command the 815th, Major Evans was transferred to the same organization, under a War Department order dated Aug. 12.

The Depot Brigade assigned 50 officers; revoked the order and on Aug. 8, under Par. 17, S.O. 217, Hq. Camp Funston, Kans, 8 captains 36 first lieutenants and 7 second lieutenants, came to share the fortunes of the "Bearcat" Pioneers. The 806th was similarly provided. The Captains were: Henry B. Abbett, J.W. Finley, James R. McCabe, George B. Otte, Ewart W. Dick, Thomas A. Innell, Thomas R. Lindsey and Herbert M. Nelson.

Col. Humphrey drew up a concise weekly program of instruction which was issued on the regimental mimeograph machine. This machine was a little late in arriving, but made up for that. It had been ordered by telegraph and was shipped out from Chicago to "Camp" Paul S. Bliss."

The enlisted strength of the command was constantly being augmented. A Depot Brigade order of July 30 added 1256. Approximately the same number were added under an order dated Aug. 15.

From the 25th Infantry, then in Hawaii, came 25 enlisted Regulars.

Specialists came in as follows:

38 mechanics and motor drivers from Training Detachment Prairie View, Texas.
20 horse shoers and men chiefly skilled in care of horses, from Training Detachment, Tuskegee, Alabama.
8 carpenters from Training Detachment, Howard University, Washington, D.C.

The Regulars and Specialists were distributed among the companie except that the Supply company drew all but one from the Tuskegee Detachment and that the Headquarters and Supply companies absorbed most of the mechanics and motor men.

Five days before leaving Camp Funston the Depot Brigade added 123 more.

These orders totalled 3526 men, but the regiment entrained with an enlisted strength of 3226 and 99 officers. The tables called for 3450 men and 101 officers.

The losses are accounted for chiefly by transfers of enlisted men because of chronic venereal disease which was aggravated by the hard drilling.

Colonel Humphrey was interested in Tennis. Games were frequent. A tournament was started but was not concluded.

Several quartets were organized . The men sang in their barrack rooms. Bugler Sam Cobb from the 25th Infantry took the buglers in hand. Cobb was a true artist of the bugle. He rendered taps in notes that were liquid music. The men took pride in it. It made for discipline.

Musical instruments had been requisitioned but never came. An effort later to be recounted, was made to enlist an entire band but was fruitless. Private Billy Higgins, formerly a professional actor was transferred to the organization, from the Depot Brigade and became famous over night.

The entire regiment attended a Vaudeville Show at the Liberty theatre, given by Higgins and a large assemblage of assistants. It was a great success and established the Regimental Fund.

The Y.M.C.A. and Knights of Columbus secretaries did notably acceptable work among the men.

A regimental exchange had been opened with Lt. M. P. Lewis in charge. It was a success. One week of August brought a wind so scorching that to face it was like standing before a smelter door. It shriveled Kansas corn, turning it from green to brown over night. Lt. Lewis' soft drink emporium prospered.

Work at regimental, battalion and company headquarters rarely stopped before midnight.

Drilling went on daily and Colonel Humphrey usually conducted a tactical march Saturday morning. One of the last weeks was spent at the range "firing" those who had not yet sent bullet to target with the new "Enfield".

And then it happened!

Chapter 3.

At 9 P.M., Saturday, Aug 25, 1918, it was learned from the transportation department of the Union Pacific that trains for the movement was set for Monday, the 27, Camp Funston issued the following:

" HEADQUARTERS
CAMP FUNSTON
KANSAS

August 25,1918
HLB-AJM

Special Orders)
)
No.....234) E X T R A C T

Par. 14. Pursuant to telegraphic instructions from the Adjutant General of the Army, dated August 24 1918, 805th Pioneer Infantry,(colored) consisting of approximately ninety-four (94) officers and three thousand three hundred eighteen men, Colonel Chauncey B. Humphrey, Infantry, National Army Commanding, will proceed without delay to Camp Upton, New York, upon arrival reporting to Commanding Officer at that place.

3/6/57

ing Officer at that place.

The Quartermaster Corps will furnish the necessary transportation and travel rations at the prescribed rate for the necessary number of days; also funds for the purchase of liquid coffee at the rate of 21 cents per man per day for the necessary number of days.

The travel directed is necessary . the military service.

By command of Major General Wood:

S.M.Williams,
Major,General Staff,
Executive Officer.

Early movement had been expected in view of a coded telegram received at Camp Funston Headquarters Aug. 6, signed "McCain" which ordered the 805th and 806th Pioneer Infantry prepare "at the earliest practicable".

But it must be admitted that the following telegram which precipitated matters was sudden:

"1HD GE 220 Govt Rush 1 ex 5PM Hq. Port of Embarkation

Hoboken Aug. 24
CMDG GENERAL, CAMP FUNSTON
T445 Request you send to Camp Upton earliest possible moment and not later than noon, Aug. 29th, if possible 805th Pioneer Inf. colored ..... It is absolutely essential that this organization be in Camp Upton Aug. 29..... SHANKS"

The Camp Funston order of Sunday, Aug. 25, ordering the regiment to move was actually obeyed within 36 hours of its receipt.

The immediate steps taken following the advance "tip" from the railroad authorities were to wire the few officers on leave: "Return at once", and to notify officers by telephone who were in Junction City and Manhatton. All through the night of Aug. 24-25 they came hurrying back.

There lay ahead 48 hours with only snatches of sleep. Accounts of companies with grocers and the quartermaster had to be settled, clearances obtained, goods packed, travel rations issued.....

The Army Bank of Camp Funston came to the aid of the officers and cashed their August pay vouchers.

And it was done!

The first train pulled out at 9:30 Monday night and the other sections followed as soon as train equipment could be brought up. The last train left Thursday.

It is not desired to be boastful; yet the statements of the Red Cross and workers at stations where the trains stopped are to the effect that no better disciplined troops had passed through their hands.

Camp Upton!

Draw the curtain upon the toil and moil there. It was confusion, it could not help but be when it was necessary in two days' time to equip an entire regiment with clothing, shoes, caps, underwear and puttees, and so much other quartermaster and ordnance property, that it was bewildering.

It was expected that the port of embarkation would be Hoboken but certain ships were in Canadian ports ready to steam out and the following orders were received:

Headquarters,
Camp Upton, New York,
August 30, 1918.

Confidential Orders

No. 361.

Pursuant to instructions contained in Confidential Letter L-526, Headquarters, Port of Embarkation, Hoboken, N.J., August 28, 1918,

On Ship 450.

1st. Battalion, 805th Pioneer Infantry, consisting of twenty-six (26) officers, and one thousand (1000) men, Item Q-208, Phase 2.

Attached Medical Personnel, consisting of three (3) officers and twenty-four (24) men

will proceed so as to arrive at Montreal, Canada, on Monday, September 2nd, 1918.

* * * * * *

The travel directed is necessary in the military service.

By order of Colonel Mallory:

P.L.Thomas
Major, Cavalry,
Executive Officer.

Official:
Frank S. Booth
Captain, Infantry
Acting Adjutant.

The First Battalion, under Capt. O.C. Adkins, entrained at Camp Upton, pursuant to the foregoing orders, Sunday, Sept. 1, Itentered Canada and boarded "The Haverford" at Montreal Sept.2.

The remainder of the regiment was included in the following order:

Headquarters,
Camp Upton, New York,
August 31, 1918.

Confidential Orders

No. 364.

Pursuant to instructions contained in Confidential Letter L-526, Headquarters, Port of Embarkation, Hoboken, N.J., August 28, 1918,

On Ship No. 639

3rd Battalion, 805th Pioneer Infantry, consisting of twenty-six (26) officers and one thousand (1000) men, Item Q-208 Phase 2,
Attached Medical Personnel, consisting of two (2) officers and twelve (12) men
will proceed so as to arrive at Quebec, Canada, on Tuesday, September 3rd. 1918.

On Ship No. 360

3/6/58.

On Ship No. 360

The Headquarters, Headquarters Company, Supply Company, and 2nd. Battalion 805th Pioneer Infantry, consisting of forty (40) officers and fourteen hundred and fifteen (1415) men, Item Q-208, Phase 2,
Attached Medical Personnel consisting of three (3) officers and twelve (12) men
will proceed so as to arrive at Quebec, Canada, on Tuesday, September 3rd. 1918.

Acting Adjutant.

Troops moving under the foregoing order crossed the Canadian line also on Sept. 2. The entire regiment thus dates its foreign service from Sept. 2.

The First Battalion sailed Sept. 2 on the Haverford. After being out several days this vessel put back, and went to Quebec. The reason for turning back was never made known. The troops were transferred to the H.M.S. Novara and the journey began again Sept. 12. The vessel came to an anchor at Tilbury docks, near London, Sept. 25, but owing to a railroadstrike, disembarkation was delayed until Sept. 27.

The Battalion went to Romsey, and sailed from Southampton to Cherbourg, France, continuing on to Rolampont (haute Marne) after five days of slow and painful railroad travel. It remained there for a few daysto complete its equipment, then entrained for Clermont-en-Argonne (Meuse) where it arrived at 7 A.M. of Oct. 10.

The remainder of the regiment reached Quebec before noon Sept. 2, and the Third Battalion boarded H.M.T. Orita, where Major A.D. Cowley, commanding the Battalion, was senior officer and hence in charge of all the American troops aboard.

Colonel Humphrey was placed in command of all U.S. troops and units aboard the R.M.S. Saxonia of which Capt. W.H. Hossack was skipper.

The First Battalion of the 335th Infantry (white troops) under Major Hefner, and two Nurse Units (No. 56 under Miss Kathryn Morgan, and No. 67 under Miss Cecilia Brennan) each 100 strong, were also on the passenger lists, so that with the 805th contingent, the staunch old Gunarder carried slightly more than 2700 U.S. subjects.

In the early night hours of Sept. 3 the Orita and the Saxonia weighed anchor and began dropping down the St. Lawrence. From many ports there now gathered a great convoy of camouflage shipping. The number reached 22 during the night of Sept. 9-10 and a four-funnelled British destroyer took post at the same time out the left corner. Ahead a stocky British cruiser which came on duty at the mouth of the St. Lawrence, showed the way.

The ships rode so steadily in their assigned places that seemed as though they were all united by some powerful sub-

surface framework. Now and again, in instant obedience to some signal from the man-o'-war one noticed a momentary dis-alignment as the convoy wheeled to right or left in perfectly executed and timed movement and set off upon a new course. As Europe was neared and a fleet of U.S. Destroyers joined, the course was changed with great frequency.

Aboard the Saxonic all went well. The most rigid discipline was maintained; yet there was always time for play when work was done. Daily at 4:30 P.M. a dance was in progress, usually on B deck, and it continued, after dinner, in the salon.

Col. Humphrey made an inspection daily, deck by deck. The ship's first officer, Mr. Robinson, and Mr. Bedford the Chief Steward always went on these trips and one day, early in the voyage Capt. Hossack did also.

"She looked cleaner the second day out than she ever did before a week from shore", he said, "and she is cleaner now than in all her 20 years".

Every company was held responsible for its section and officers were told off to areas the common property of all.

With the assistance of the mimeograph machine, a Daily Bulletin was issued and posted on all decks and in the companion ways, each morning. It announced the guard, rules regarding lights, messing, set the time for the daily dances, in short served as the ship's newspaper.

At least once daily and often three times the bugle sounded Boat Call and thereupon every one hurried to his assigned place. Fire drill often accompanied boat drill.

Each vessel bore a heavy gun astern and howitzers forward for firing depth bombs. Details were told off to help serve the guns. During the last four days officers were posted alternately with enlisted men on submarine lookout posts, so that there were five officers and five enlisted men continually on this duty, in addition to the regular guard.

Portholes were closed at dusk throughout the entire voyage and no smoking outside was permitted after dark. Silence on decks was also prescribed after dark during the last four days. No bugle calls were permitted in foggy weather.

Fortunately all these precautions were unnecessary.

Good ships, however had gone down in the same area and there were times when there was anxiety. At 1:06 P.M. of Sept. 14, Colonel Humphrey and Capt. Hossack sighted a mine which the ship passed by about 60 feet. The matter was flashed to the destroyers who went to the spot and dropped depth bombs. Two days out word was received that a submarine had been sighted by a destroyer guard dead ahead.

At the same time the cruiser signaled and she and the entire convoy literally "went by the left flank". From that time on the course was changed every few minutes.

Land was in sight on the 16th and the convoy soon entered the Mersey and headed for Liverpool.

The date is important for, although it was not known until some days later, it marked the day on which the 805th Pioneer Infantry began its service in the A.E.F.

General Order 110, G.H.Q., A.E.F., dated July 7,1918 prescribed a War Service Chevron to be worn upon completion of six months' service and time was to be computed from the date of quitting an American seaport for the "theatre of operations".

This was amended, however, by Sec. 3, G.O. 147, dated Sept. 2 which contained the following:

"For the purpose of computing time for these chevrons,

3/6/57

service will be counted from the day the officer, soldier or other authorized person arrived at seaport of England, France or other European country".

Upon the signing of the Armistice the chance to wear the coveted chevron did not seem great-- for March 16 and March 25, respectively, looked at that time a long way ahead.

Europe was now ringing with cheers for the Americans. They had proved their mettleat Chateau Thierry and the straightening out of the St. Mihiel salient on a 35 kilometer front, with the capture of many thousands of prisoners and 400 canon Sept. 12-13, was news only three days old.

These successes were probably reflected in the cordial reception in all towns and villages accorded the passers-by from the 805th. Major Cowley's battalion which disembarked the moment the ship docked at Liverpool reported being received cordially everywhere. Troops off the Saxonia had the same experience.

The arrival of the convoy had been greeted with the noisy blasts of whistles in the harbor. The news was carried in brief dispatches. The Manchester Guardian in its Sept. 17 issue reported the following:

"Further large numbers of American troops have arrived in the Mersey".

It is probable that about 20,000 American troops were carried. The majority of the craft, however, were freighters.

For the time being the Third Battalion took the lead. It was shipped to the American Rest Camp, Southampton, and then took a channel boat for Le Havre. It reached Rolampont Sept. 20.

Following in the same course the Saxonia troops arrived at Rolampont Sept. 22. One Dodge limousine, two Harley-Davidson motorcycles with side cars, and three Nash-Quads were awaiting the regiment there.

Rolampont, a small town between Chaumont and Langres, Dept. Haute Marne, will live long in the memories of troops of this regiment.

It was necessary to camp in Pup tents rather than spread the men out in small villages for billeting, in order that issuance of complete battlefield equipment and gas training might be expedited.

There was considerable rain and the camping ground soon became muddy beyond belief. The men kept dry with difficulty. Through it all, however, the best spirit was maintained. Strict sanitary rules were enforced and the camp had a well-kept appearance.

The men suffered from influenza, but the regiment had much less trouble from this epidemic than was expected.

Daily drill at first cadence was ordered and on one occasion a Regimental Parade was held, with the assistance of the 802nd Pioneer Infantry Band.

The burden lay upon Capt. T.R. Lindsey, Regimental Supply Officer and his assistance and they responded nobly. Long night trips to Is-Sur-Tille had to be made in the Quads and arrangements made for supplying helmets and gas masks, bolos, trench knives and for filling shortages of every nature.

"Putting the regiment through gas" was rapidly and thoroughly done by Lieut. (later Capt.) A.W. Gauger of the Army Gas School, Ft. St. Mange, and his officers.

On one occasion all marched to the Fort and were given an exhibition of gas warfare. One shell was ejected by a faulty charge and dropped only a few yards from the muzzle of the motar. Every one "flopped" and in so doing Lt. Hubbard of Co. "E" cut his leg so severely that he was in the hospital for several weeks.

Rolampont was also the scene of the first funeral of an 805th Pioneer in Europe. Pvt. Everett Johnson of Company "M" died at the hospital at Humes of spinal meningitis. He was given military honors, and buried in the American cemetery at Rolampont where French women covered his grave with flowers and wept during the service.

Telegraphic orders were received as follows:

"Hq. Adv. Sec.
Nogent-en-Bassigny, Sept. 30 1918. On instruction from G.H.Q. C.G. directs 805th Pioneer Infantry proceed at once by rail to Clermont-en-Argonne (Dept. Mouse) reporting upon arrival thereat to Chief Engineer First Army for duty. Advance billeting party should precede regiment. Wire Troop Movement Bureau G-4 G.H.Q. number officers, men animals, tons baggage so that rail transportation can be arranged. Notify G.H.Q. and these headquarters by wire upon arrival new station. This movement should be expedited. Acknowledge receipt advising date of departure. Sork".

Col. Humphrey and his staff, the Third Battalion, Headquarters and Supply Companies and Companies "E" and "F" entrained and left Rolampont at 3:12 P.M. Oct. 2.

Before night fell the train had come so near the front that artillery could be heard and the roar was plain and continuous when it drew into Clermont shortly before midnight. Detrainment was postponed until the following morning.

Companies "F" and "G" entrained also on Oct. 2 but did not arrive until the following night and detrained Oct. 4.

Chapter 4.

Clermont-en-Argonne, near the southern end of the famous Argonne forest, and directly upon its eastern edge, played a considerable part in the Argonne -Meuse campaigns. It was occupied by German troops for a few days in September, 1914, when the line of farthest advance passed from Verdun to Clermont to Revigny and thence west to Meaux, only 28 miles from Paris.

But when the over-wash rolled or was swept back and the opposing forces settled down to entrenched positions, the line passed east and west through Vauquois and Boureuilles, just south of Varennes and westward through the Argonne. Here it remained for four years. The forest, ravined, densely wooded and underbrushed offered everything to the offender, nothing to the attacker Apparently the French had given it up as a hopless or not worth the cost.

During all this time Clermont was occasionally shelled for the Germans well knew that at the top of Butte St. Anne, the steep, pine-crowned escarpment against which the city nestles, the French were keeping ceaseless watch over the valley of the Aire.

For the most part, though, the sector was "quiet".

The mining of Vauquois hill, a French operation, seems to have been the most important act of offense attempted and this proved of little military value.

But shortly after the St. Mihiel drive, American troops were brought up secretly and Clermont was to be shaken into activity. The "jump-off" came Sept. 26 when General Pershing's men began the offensive which was to break the deadlock and end in the winning of the war.

3/6/60

There was no stopping the Americans. The line was forced north of Varennes and the Boche was soon out of range. The last shell fell upon Clermont about Sept. 28, and except for air raiders, the city was comparatively safe.

Its railhead was soon to ration more than 80,000 American troops and its ruins shook with the thunder of Allied trucks. Clermont is located at the junction of the main road from St. Menehould and Les Islettes to Verdun, and the straight road running north to Neuvilly and Varennes. The French used the former in shifting troops from the Champagne to the Verdun sector and up and down the latter plied an endless double line of staunch American camions, carrying food and supplies and bringing Divisions up to and back from the front.

This was the situation when the 805th Pioneer Infantry arrived and established headquarters which it was to maintain there, as it turned out, for many months.

Oct. 3 was spent in establishing the troops under canvas at the top of Butte St. Anne, in Camp Bondet. There were buildings but occupancy was delayed for fear of vermin. Pup tents were arranged beneath trees, and, in addition, were well camouflaged against the eye of the aviator.

Overhead, the men watched allied airplanes darting now low, now high, occasionally grouped in "V" formation for battle and in that case usually so far up that they appeared like slowly swimming minnows of the air.

From their high Butte they saw the white roads of France winding among low green hills to battered villages and to the north the straight way to Neuvilly and Varennes swarming with scurrying black insects (for so they appeared from the height) which were camions, plying to and from the front.

Colonel Humphrey and his Adjutant went to Souilly, which was Advance Headquarters of the American Army at the time, and the regiment was reported to Brigadier General Jay J. Morrow, Chief Engineer.

The following order was received:

Headquarters, First Army
American Expeditionary Forces
Office of the Chief Engineer

Oct. 3, 1918.

Orders
No. 3.

2. The 805th Pioneer Infantry is assigned to duty under the Department of Light Railways and Roads (office of the Chief Engineer, First Army) reporting upon arrival to Col. E.D.Peck for duty.

By direction of Brigadier General Morrow:

T.H. Dillon,
Col. Eng. U.S.A.

The headquarters of the Department of Light Railways and Roads was at Vraincourt, 2 kilometers east of Clermont, and Oct. 5 orders were issued which enabled the 805th Pioneer Infantry to put its shoulder to the wheel and do its part in The Great War.

The morning had been spent in giving Clermont a thorough clean up, in which troops of the 219th French Field Artillery, the headquarters of which regiment was there, heartily co-operated.

In the afternoon movement began. Companies "E" and "F", under Major H.F.Chinner who reported at Clermont, set out for

Auzeville there to work upon the railhead. Company "I", late in th afternoon marched to Neuvilly there to build an ammunition Dump and work on the railroad, while companies "K" and "L" under Major Cowley set out for Aubreville where they were joined by company "M" the next day, for the purpose of making and repair roads and working the railhead.

On Oct. 6 companies "G" and "H" under Major J.E.Creed took the road to Avocourt where some time they had the honor of being farthest toward the front. Roadmaking was also their task.

The Headquarters and Supply companies remained at Clermont performing their regimental functions, but also rendering great assistance to the railhead and all other work in the vicinity which tended to advance the general cause.

The First Battalion as soon as it arrived was put at work upon the Clermont-Neuvilly road, a stretch which was frequently called "A"-"B"-"C"-"D" Boulevard thereafter.

The work on the road consisted largely of patching, surfacing, shouldering, widening and scraping. The men took the attitude that every stone pounded into a hole to smooth the way meant as much as the discharge of a shell or a clip of cartridges, and worked faithfully and without complaining in all weathers.

Their business was to put the traffic through and they disregarded their own comfort. If a truck slid off the road they lifted it on, night or day, that food and ammunition might be hastened to the front.

The work of the companies to Nov. 18 when the First Army turned the regiment over to its Salvage Service, is summarized as follows:

A---First 2000 meters of Clermont-Neuvilly road from Clermont; road past Apremont;
B---Second 2000 meters of Clermont-Neuvilly road; Charpentry cut-off road.
C---Locheres crossroad on Clermont-Neuvilly road north 2000 meters; Roads at Very.
D---Clermont-Neuvilly road from point 1000 south of Neuvilly bridge to Neuvilly; ammunition detour road at Neuvilly; Charpentry roads.
E---Auzeville railhead; Varennes railhead; railhead work at St. Juvin and Briquenay.
F---Auzeville railhead; Varennes railhead; roads at Montblainville; roads at Lan[illegible]res-St. George.
G---Roads at Avocourt; roads at Sommerance.
H---Roads at Avocourt; roads at [illegible]-St.-George.Floville.
I---Construction of ammunition dump Neuvilly and railhead construction between Neuvilly and Varennes and Apremont; railroad repair work March and St. Juvin; construction of Verdun-Etain railroad from Nov.11.
K---Railhead details and road work Aubreville; road work Varennes and Charpentry.
L---Road and railhead work Aubreville; road work Varennes.

The outlying companies were continually in immediate sight of the sausage balloons and witnessed many an air battle. Raids were frequent.

Clermont itself was bombed on three nights (on one occasion twice in one night). Its converging traffic streams, its railhead and the aviation field of the 50th U.S. Observation Unit were Boche targets.

No slackening of work was permitted, despite the signing of the Armistice Nov. 11. Sunday was no holiday.

A concentration had been ordered at Varennes Nov. 18 and several companies had taken up their aboade there or at Camp Mahout but to carry out the salvage program outlined by Lt. Col.

3/6/61

Jeremiah Beall, Chief Salvage Officer, Battle Area, First Army, a re-distribution over the Argonne-Meuse area had to be effected immediately.

The area assigned the 805th Pioneer Infantry extended from Boult-aux-Bois almost due south to a point one kilometer west of Les Islettes; thence to Clermont; thence to Aubreville and Avocourt and Esnes; thence to Montfaucon via Bethincourt and Cuisy; thence north through Nantillois and Cunel to Bantheville; thence southwest through Romagne, Gesnes and Exermont to the main road just south of Fleville; and then north to Boult-aux-Bois through Fleville, St. Juvin. Grand Pre and Briquenay.

The area comprised all of the Argonne Forest from Clermont north and the Varennes-Malancourt-Montfaucon-Romagne sections. More than 500 square miles of battlefield was included.

A list of the articles to be salvaged would require a page. Chiefly they were Allied and enemy weapons and cannon, web and leather equipment, clothing and blankets, rolling stock, aviation electrical and engineer equipment. It was a gigantic task and did not near completion until the first week in March when more than 3,000 French carloads had been shipped.

The immediate assignment to stations Nov. 20, was as follows:
A--Briquenay; B--Chevieres; C--La Forge; D--Chatel, Hq. 1st. Bn. Chatel.
E--Binarville; F--La Chalade; G--Florent; H--3 kilometers north of Aubreville. Hq. 2nd. Bn. Camp Mahout, later Varenn
I--Malancourt; K--Very; L--Barracks near Cunel, later Cunel.
M--Varennes, later near Eclisfontains Hq. 3rd. Bn. Very.

For some weeks truck transportation was scarce and work was slow, and consisted largely in getting material to roadsides.

Capt. George E. Thompson, Q.M.C. was given charge of the Salvage work in the First Army Battle Area and on Jan. 1, 1919, the following units were placed by him at the disposal of Col. Humphrey for the purpose of expediting the work; 339th Labor Battalion, Truck companies A, B, C and F of 3rd. Corps Artillery Park, 313th, 305th, 309th and 317th Salvage Units.

The regiment had remained in the First Army one month after the signing of the Armistice and all troops were wearing the insignia of that Army--the black letter "A"-but on Dec.11 it was transferred to the S.O.S. and was shortly to wear the red Lorraine cross and the "A.S." of the Advance Section.

This assignment was made by Par. 1, S.O. 702, Hq. First Army at the direction of General Hunter Liggett, who succeeded General Pershing in command early in October.

No change in technical work resulted. Administrative matters, however, now were referred to Brigadier General William R. Sample and his staff, whose headquarters had been moved from Nogent to Neufchateau (Vosges).

Representations were immediately made of the need of more transportation and the Advance Section responded by adding 100 trucks to the Third Corps Artillery Park strength and by turning over a considerable number to the "Salvage Officer, Battle Area, First Army" (Capt. Thompson). This was to result later in the formation of a Motor Truck Detachment in the 805th Pioneer Infantry of which Capt. H.B. Abbett, of company "I" was placed in command.

As companies of the 805th neared the completion of their areas they were put to work at the railheads where they helped load the salvage they had gathered and that which many other organizations of the area had brought, and sent it on its way to designated depots.

Company "A" was thus brought to Senuc and then to Dun-sur-Meuse. "B" worked at the Marcq dump and then at Grand Pre and Senuc. "C" was employed with "D" at Chatel Chehery railhead. Both were later sent to Brieulles-sur-Meuse from which place "D" moved to Mouzon.

At the same time, Major J.D. Patch, commanding the First Battalion since Dec. 31, also took up his headquarters at Dun. The battalion was commanded by Capt. Adkins from Oct. 26 to Dec. 31, he having been again placed in command when Major Chinner was relieved.

Company "E" came in from the wilds of the "Lost Battalion" at Charlevaux (near Binarville), to Chatel-Chehery; "F" and "H" were brought to Varennes and "G" to Clermont--all for railhead shipping work.

The Second Battalion was commanded from Nov. 14, when Major Creed was relieved, by Capt. Thomas A. Innell. He continued in command to Dec. 31 when Major Erastus H. Williams was assigned. Major Williams in turn was transferred from the regiment March 9, and on the following day a new officer, Capt. John A. Ditto was placed in command.

The Third Battalion, occupied with a large and difficult area, did no railhead work. It lent its share of assistance to the Ordnance department for demolition work and company "L" had rather more of this kind of service than any other company of the regiment.

Major Archibald D. Cowley remained in command of the Third Battalion throughout, and was stationed at Very.

The staff of the regiment was augmented Dec. 16, when Lt. Colonel Willis Bacon, who had been with the 51st Pioneers reported for duty.

With the slackening of the salvage work, the regiment found a few days when it was possible to devote time to drilling, athletics and study. School and agricultural books were obtained in large numbers and each company organized classes which, though compulsory, were eagerly attended by the men.

Curtailment of this work was necessitated by instructions from Advance Section headquarters to assist in every way possible the restoration of French farm lands to a point where they could be cultivated.

This meant principally the filling of trenches across fields and upon this work the regiment entered March 15 with all its strength except what was required for the functioning of railheads not yet closed.

Chapter 5.

This history would be incomplete without reference to Chateau de Chehery. Regimental Headquarters was for a few days at Billet 28 at Clermont and was moved across the street when the French 219th Artillery departed. This building was large and commodious and in an excellent state of repair. No shell had touched it.

Palatial as it seemed among its battered neighbors, this building was not to be compared with Chateau de Chehery.

The Chateau is located at Chatel-Chehery, between Apremont and Fleville, and one kilometer west of the main Grand Pre road. It is the property of Captain Emile Longuet La Marche of the 243rd French Artillery, and his brother, Lieutenant Charles Longuet La Marche, of the same regiment.

Regimental Headquarters was moved to the Chateau Nov. 25, and the Headquarters company took quarters in its outlying buildings the following day. Capt. T.H. Gleason, Personnel Adjutant, remained at Clermont headquarters with his assistants, as did Capt. Lindsey and the Supply company.

To the Chateau came many officers of high rank when their duties called them into the area. Col. Humphrey and his officers

3/6/62

were hosts to 300 members of the General Staff College, students and instructors on their final Staff Ride over the First Army battle Area during the first week of February.

Representatives of several Divisions, especially the 82nd which occupied the Chateau as Headquarters in October, returned as guests while looking over their battle grounds. The [illegible] Corps U.S.A. headquarters used the Chateau at one time.

With the 82nd Division groups came Major G.E.Buxton of the Providence Journal, who was Divisional Historian-- and also Corporal York (later Sergeant) who distinguished himself by capturing some 154 Germans near Cornay, single handed.

To write Corporal York's story came also George Pattullo of the Saturday Evening Post. The ground over which Corporal York's coup took place was carefully gone over with York as guide.

Chatel Chehery was stormed and taken by the 28th Division Oct. 6, 1918. This Division (which also had captured Apremont) was relieved by the 82nd Division which took Cornay and the heights beyond Oct. 8. At Cornay the Germans held their heavy machine guns to the last and very stubborn fighting occurred.

On the left the 77th Division, which had been in the attack since Sept. 26, fought its way slowly up through the Argonne Forest, until on the night of Oct. 14 it had entered the town of Grand Pre and Chevieres and was in partial possession of St. Juvin. It was relieved, still fighting, by the 78th Division, on the morning of Oct. 16th. The German line now ran through Grand Pre, Bois desLoge , Champigneulle, north of St. Juvin and Landres-et-St. George, which line coincides with the main Kriemhilde position, the counter part of the famous south Hindenburg line.

The 78th Division and the 82nd Division now made a series of attempts to advance, which constituted the second phase of the battle, continuing through the month of October. On Oct. 23rd the 78th Division captured the citadel, or walled Chateau at Grand Pre, which was in reality a fortress of some strength.

On Oct. 25th the entire possession of Grand Pre, extending from the Talma Hill to the so called Bourgogne Woods, north of Grand Pre, was taken by a flanking attack. Consolidation in the face of German counter attacks was not completed until Oct. 27th. The Bois des Loge was four times taken and re-taken. It was filled with machine gun nests and was protected on the flank by the strong enemy position at Champigneulle. At the end of Oct. it still remained in the enemy's hands.

The 82nd Division encountered equal difficulty in advancing northeast of St. Juvin, due to the terrain, which was crossed by numerous ravines and enfiladed by fire from the east. The 77th Division relieved the 82nd at this place.

On Nov. 1 the next phase of the battle began by an attack on the entire First Army, along the whole front, preceded by an intense artillery preparation. On the right, two fresh Divisions, the 80th and 2nd, which had taken the place of the 42nd before Landres-et-St. George, made rapid progress and soon out ran their objectives. The enemy still held out in the Bois des loge and Champigneulle until the morning of Nov. 2nd, when it was discovered that he had commenced his retreat during the night, protected by strong rear guards. The battle now became a foot race for Sedan, with no definite objects until Brieulles and Buzancy had been passed and Tannay and Sy reached.

At this point the 78th Division was held up long enough to be overtaken by the 42nd Division, relieving them on November 5th. The Americans had been vainly trying to catch up by leapfrogging.

Far to the northeast along both banks of the Meuse a bitter resistance was again encountered, but the advance continued without pause until Nov. 11th, the day the Armistice was signed, when the 42nd, 77th and 1st Divisions, in conjunction with the French, were looking down in Sedan, and the final phase of the Argonne-Meuse Battle was concluded.

About these operations, the conversation at the regimental headquarters' mess table, in the beautiful library at Chateau de Chehery, often centered.

A notable occasion was the arrival of Ambassador John Davis, American envoy to England, who brought with him March 11several high ranking British and American officers among whom were:

Lord Peel, Under Secretary for War, England.
Lord Burnham, Owner of London Daily Telegram.
Lieut. Gen. Sir. A.J.Godley,22nd Corps, Brithish Army.
Major Gen. H.K.Bethell, British Army.
Major Gen. C.F.Boyd, British Army.
Brig. Gen. C.M.Wagstaff, Chief of British Mission, at American Headquarters, Chaumont.
Brig, Gen. R.J. Burt, U.S.A., General Staff.
Brig. Gen. D.F.Nolan, U.S.A., General Staff.
Lieut. Col. A. Moreno, U.S.A. General Staff.
Lieut. Col. Lloyd Griscom, U.S.A., General Staff.
Capt. H.F.S. Law,British Army Aide to Gen. Godley.
Capt. J.G.O.Marriott, British Army.

Unlike most French chateaux, Chateau de Chehery is situated beneath, rather than on top a hill, and was undoubtedly afforded considerable protection thereby. What is more, it is so hidden as to escape being a target, It was used by the Germans as a hospital; there are graveyards on either side.

The marks of high explosives and shrapnel shell are many and the roof was punctured here and there(and required some repairing) but beyond that little damage was done.

In the chapel was found a large copy (8 x 6ft.) of Reuben's "Descent from the Cross". Rain was reaching it, and it was moved and placed over the fireplace in the library where, although too large for its surroundings, it added much by its brilliant yet dignified coloring, and theme, to the impressiveness of the room.

Reference to Chateau de Chehery brings also memories of the Regimental Band,which Lt. Leonce R. Legendre is director. At Camp Funston instruments had been requisitioned but had not arrive before the regiment left. Efforts were made to enlist a colored band at Kansas City whose members wished to enter the Army as a band, and be assigned to the 805th Pioneer Infantry. General Wood approved and took the matter up with the War Department.

Qualified assent was obtained but subsequent rulings prevented taking advantage of it, in view of the early date anticipated for an overseas move.

The rush of events when the regiment reached Europe precluded immediate attention being given the matter and meanwhile general orders had been issued against equipping bands not in the Regular Army.

Left to itself, without divisional connections, the regiment had to rely upon its own resources for diversion. The men needed music, after the hard work they were doing, and Col. Humphrey sent his adjutant to Paris to present the matter to the Y.M.C.A., Knights of Columbus and Red Cross.

The Red Cross was able to respond immediately and Capt. Bliss returned Jan. 1, 1919 with seven cornets, six clarinets, five saxophones, four slide trombones, four alto horns, two bass tubas, two baritones and a picollo and also some"jazz band effects!"

The band was organized on the spot and as more instruments and music were obtained eventually reached almost its tabular strength while it reached proficiency almost over night.

Finis.

History of the Chateau where

April 17, 1919. A77-4

CHATEAU DE CHEHERY

Chateau de Chehery, situated on the eastern edge of the Argonne Forest, just across the Aire river from Chatel, and some 12 kilometers southeast of Grand Pre (Ardennes) France, owes its origin to an abbey founded in 1147 by the Chapter of Our Lady of Rheims.

According to tradition, it was erected by monks of the order "Citeaux" who came from the Abbey of La Chalade in the center of the Argonne.

The abbey became one of the most important in the dioces and so continued until it was ruined in 1657 during the "Guerres de Religion--la Fronde", in which Louis XIII sought to impose his will on the feudal lords of northern France.

The chateau at present (April 17, 1919) is only a part of the Abbey, which the monks rebuilt about the middle of the 18th century.

The French revolution made the chateau a private residence. It was sold as national property to the "de Melcy" family from the last members of which it was purchased shortly before the present war, by Messrs. Charles Longuet la Marche and Emile Longuet la Marche, who, during the war were officers in the 243rd French Fielf Artillery.

In 1914-'15 the chateau was used by the Germans as a hospital. Small cemeteries were laid out in the yards where German soldiers of all ranks are interred. From 1916 to 1918 it was occupied by many German staffs as headquarters. The building was left in good condition although most of the furniture and works of art had been moved.

The library, done in oak wainscoating with tapestries above and paneled ceiling, retains much of its original splendor. The fireplace is of oak with four carved caryatids. A carved oak chandelier of large dimensions, hangs over the table. In one corner there remains a huge carved sideboard in which the Germans placed some of the books of the formerly impressive collections. Over the mantle is a good copy of Rubens' "Descent from the Cross" 6 ft. x 8 ft., which was removed from the chapel in December 1918, to preserve it from rain.

The building bears everywhere the scars of explosive shell. The roof was much pierced but was repaired by troops of the 805th Pioneer Infantry, U.S.Army. Unlike most French chateaux this one is situated under rather than a-top a hill and hence escaped being used as an artillery target.

(Continued on reverse side).

The 28th and 82nd Divisions, U.S.Army, captured the village of Chatel, which lies on the western side of the Aire, October 6, 1918 and troops of the 82nd Division captured the chateau and outlying buildings.

For a few days early in November the chateau was used as headquarters by the First Corps, U.S.Army, and from November 25, 1918 to date was occupied by Col. C.B.Humphrey and staff, 805th Pioneer Infantry. The outlying buildings were occupied by the Headquarters Company of the 805th Pioneer Infantry during the same period.

Col. Humphrey, during this time, was in command of all troops in the area from Sedan to Clermont-en-Argonne and from the Meuse to the Aisne. This area includes the famous Argonne Forest and almost all of the territory over which the First Army fought in the Argonne-Meuse campaign September 26 -- November 11, in which the 805th Pioneer Infantry participated.

Captain and Lieutenat Longuet la Marche visited the chateau in December, 1918. Captain Longuet la Marche brought his wife to the chateau for a brief visit in the winter and they spent the month of April 1919 there laying plans for its restitution and refurnishing, and for the rehabilitation of the surrounding country, in which work the 805th Pioneer Infantry rendered considerable assistance.

The chateau has been visited by many officers of high rank. General Pershing has been within its walls. American officers connected with Divisions in the Argonne-Meuse campaign flocked back to their fields of battle and were guests of Col. Humphrey and his staff.

Between January 5 and January 11, 1919, the Army General Staff College, American E.F., at Langres sent 211 officers on a "Staff ride" over the area. They made their headquarters, and were entertained at Chateau de Chehery.

The American Ambassador to England, Mr. Davis, with Lord Reid, Lord Burnham, Lieut. General Sir A.J.Godley and Major Generals H.K. Bethell and C.F. Boyd, British Army, and several British and American brigadier generals were guests at luncheon March 11,1919.

Members of the Red Cross, Y.M.C.A., Knights of Columbus, Society of Friends and welfare workers of several nations stopped at the chateau for shelter.

HEADQUARTERS
805th Pioneer Infantry
Camp Pontanezen, Brest

4 June 1919.

INSPECTION BY GENERAL PERSHING.

MEMORANDUM:

1. The 805th Pioneer Infantry had the honor of being inspected today by General John J. Pershing, Commander-in-Chief of the American Expeditionary Forces. In honor of this occasion and in order that it may never be forgotten by officers and men of this regiment, this memorandum is issued. A copy will be given to every officer and man.

2. The inspection took place upon a level field east of Camp Pontanezen, and the troops were lined up and gridironed across this field, front ranks facing the rear ranks. Colonel C.B.Humphrey, 805th Pioneer Infantry, acted as commander of Troops Present, with Major Paul S. Bliss, 805th Pioneer Infantry, acting as his Adjutant.

3. General Pershing appeared upon the field at 1:30 p.m. and was greeted by Colonel Humphrey. Field music of the 803rd, 804th, 805th and 808th Pioneer Infantry Regiments, which had signalled "Assembly" when the Commander-in-Chief appeared, now signalled "Attention", followed by a long blast, whereupon all troops were brought to "Present Arms". The field music then delivered four flourishes in honor of the Commander-in-Chief and played the "General's March". Troops were brought to the "Order" upon a second blowing of "Attention", and the Commander-in-Chief then began his march through the ranks.

4. As he approached each organization commander, the organization commander reported and then the company or detachment commander fell in beside the Commander-in-Chief and accompanied him past his troops. The Commander-in-Chief asked many questions of each company commander, usually touching upon appearance of men, the rate of venereal disease, and urging that they be sent back to the States better men, physically and morally, and stating if this were not the case, the company commander must be blamed.

5. In order to review the troops General Pershing marched a total of five and one-half miles at top speed. The sun was unusually hot. All hedges and view points were crowded with spectators.

6. After the inspection General Pershing repaired to the north end of the field where a platform had been erected and delivered an address, after which he went to another field, where the First Battalion, 805th Pioneer Infantry, was assembled, and decorated with Distinguished Service Medals, Major General Eli A. Helmick, in command of Base Section #5, S.O.S., and Brigadier General Smedley D. Butler, in command of Camp Pontanezen. The officers to be decorated were reported "Present" following the formation, by Colonel Humphrey, and after the decoration the First Battalion passed in review.

7. General Pershing, in his speech to the assembled troops directly after the inspection, touched upon the entry of the American nation into the great war. He spoke of the Spring of 1917, when the Allied armies were in a low state of morale, and of the dark days of the Spring of 1918, when the Allied armies and the civilian populations also, felt that the cause was lost. Then the United States sent in some partially trained troops and demonstrated to the Allies and to the enemy that a new force had to be reckoned with. Cantigny was captured by the First Division on May 28, 1918. On June 2nd the Second Division and the Marines were thrown against the Boche on the Paris-Metz Road, near Chateau-Thierry, and from that moment on the

(SEE OVER)

A 71-6

Americans were continuously in battle until victory was won. There followed other successful efforts, and then, under the First Army, the tremendously successful St. Mihiel and Meuse-Argonne victories were won. There were no drones in the American Army. There were no time servers. All came with an inspiration well-nigh religious. The Commander-in-Chief said that in giving much, the American Troops had received much: Depth of character, breadth of vision, practice in leadership. The victory is a moral victory for the World. The Commander-in-Chief thanked the troops, if he might presume to do so, upon behalf of the entire American people.

8. The 805th Pioneer Infantry was located in the middle of the field. The Commander-in-Chief saluted the colors when he entered the first 805th lines. The Commander-in-Chief found the 805th Pioneer Infantry worthy to be inspected, and complimented many of the company commanders on the good appearance of their men and upon the low venereal rate.

9. In general, the remarks of General Pershing to company commanders of all troops were as follows: "If you see a man in an unmilitary position and do not correct him, you confirm his error and concur in it. This is true of any fault you do not correct." He wanted the men sent home erect, vigorous, well-clad. He emphasized the power of example and warned all officers of their tremendous responsibility in this respect.

10. The troops inspected, besides the 805th Pioneer Infantry, were as follows:

803rd Pioneer Infantry	Sanitary Squads 30, 115, 116
804th Pioneer Infantry	Co. C, 348th Service Battalion
808th Pioneer Infantry	2nd Battalion, 23rd Engineers
339th Service Battalion	1st Overseas Replacement Draft
550th Engineers	2nd Overseas Replacement Draft
Hospital Train #38	151st Le Mans Provisional Battalion
Depot Service Co. #21	119th Le Mans Provisional Battalion
Veterinary Hospital #13	123rd Le Mans Provisional Battalion
Valdahon School Detachment	Camp Pontanezen Embarkation Detch.
Detachment Camp Hospital 33	Camp Pontanezen, Ordnance Detch.

Troops appeared, where so equipped, with full pack, gas masks, helmets and bayonets fixed. Officers were in helmets and wore sidearms. The 805th Pioneer Infantry was thus equipped.

11. In honor of the occasion the 805th Pioneer Infantry Regimental Colors bore for the first time a beautiful ribbon sent to the regiment by General Pershing before it left the Argonne Forest, on which was the legend "Meuse-Argonne Offensive, Oct. 3, 1917 to Nov. 11, 1918", Oct. 3rd, being the date when the regiment reached Clermont-en-Argonne (Meuse) and began its duties with the First Army in the great drive of Sept. 26th to Nov. 11th.

12. The 805th Pioneer Infantry troops and officers each wore upon the left shoulder the square, black, broadcloth "A", indicative of the First Army.

GENERAL HEADQUARTERS
AMERICAN EXPEDITIONARY FORCES
France, April 19, 1919.

3/6/53

From: Commander-in-Chief, American E.F.,

To: Commanding Officer, 805th Pioneer Infantry,

Subject: Battle Participation.

Following is a list of the battle engagements of the 805th Regiment of Pioneer Infantry during the war with Germany, including organizations which are entitled to the silver bands awarded under paragraph 244, Army Regulations. The ribbons herewith are furnished in lieu of the bands which will be supplied later by the Adjutant General, U.S.Army.

(1) MEUSE-ARGONNE Offensive, France, 3 Oct.-11 Nov., 1918.
Organization entitled to silver band:
805th Regiment of Pioneer Infantry.

BY COMMAND OF GENERAL PERSHING:

J. J. Jones
20910-A-65 Adjutant General.

GENERAL HEADQUARTERS
AMERICAN EXPEDITIONARY FORCES
France, April 19, 1919.

From: THE Adjutant General, American E.F.,

To: Commanding Officer, 805th Pioneer Infantry,

Subject: Ribbons.

1. Herewith is a copy of the order issued at these headquarters on the subject of the award of silver bands, to be engraved and placed upon the pike of colors or lance of the standards of the organizations which have served in the A.E.F. Even if we could get here in France the prescribed silver bands, it would be impossible to have the engraving done in time to present them to the organizations entitled to them. For that reason, each organization is given a ribbon which shows in which battles it participated. This ribbon will be retained until the proper silver band is presented by the War Department.

2. THE Commander-in-Chief directed me to send the ribbons to you, and to ask you to present them with appropriate ceremonies to the units for which they are intended. He regrets very much that this cannot be done by him in person.

By command of General Pershing:

20910-A-65 J.J.Jones.

1st Ind.

Hq.,805th Pioneer Infantry, American E.F., 29 April 1919.- To all troops of this command.

1. The foregoing letters speak for themselves. Copies will be furnished every officer and enlisted man of this regiment. They should be preserved.

2. The ribbons will be fastened upon the standard of the regimental colors.

C. B. Humphrey,

Prelude.

The muse has dipped her golden
pen in silver ink
And handed it to me that I might write;
'Tis only through a tried and true instinct
I labor now in phrases worn and trite.

Nature's message.

When you aint a doin' nothin'
An' you got a leisure spell,
Lend your ear to nature's whisperin',
There's a message that she'd tell.

Listen to her mighty mountains,
To her trees that lisp and sigh,
To her birds whose tiny fountains
Of sweet song will never die;

To her sun that shows his face
Jest as reg'lar as can be,
And whose' run a mighty race,
Run it all for you and me.

Her mountains say: "Young man be mighty,
In mind and body and soul,
Lift your face to the stars above ye
That have watched the ages roll"

And her trees say: "Man, be stalwart,
Stand up straight and tall and grand,
Lisp the word of heaven's blessing,
Sigh it loud throughout the land."

And her birds say: "Free your spirit,
Let it seek the realms above,
In its flight let nothing veer it,
Sing of joy thats born of love".

And her sun says: "Be ye faithful
Oh, be faithful, never fail,
For should I forget my duty
Even ruddy earth would pale."

That's her message, boys, jest hear it
Be mighty, faithful, stalwart, free,
If you'd only listen to it,
It's for all, for you and me.

The Point is.

I aint much on pronouncin'
But you'll see jest what I mean
When I say I aint no Kaiser
With his world dominion dream;

I'm jest a plain old hobo
With his whiskers on his chin
And his hand-out in his pockets
And that likes his drink o' jin;

But I know the world's a moving;
It's Democracy or bust
And the bloody autocrat
Must be buried in the dust.

Back to Kansas.

I'm tired of the roaring city,
Of its bright lights' blinding glare,
Of its painted dolls and dandies
That throng the thoroughfare,

So it me for back to Kansas
With her vast and rolling plains
And her herds of stamping horses
With their wind-blown, flowing manes;

I'll forget the blooming city
With its boom and clanging roar
As i play my ukalele
By my Kansas cabin door.

The Artist.

Each morn she would take her brushes,
Her paints, and her wonderful art
And her wings would make mighty rushes
As off to her work she would start.

At morn she would paint in the orient
At eve she would paint in the west,
At night she folded her tired wings
And lay her down to rest.

Each evening the work was completed,
But each day must be painted again,
So she painted on through the ages;
She was painting it over for men.

The artist's name is Nature,
Her brush, the brush of love,
Her colors, the hues of the rainbow,
Her canvas, the heavens above.

Now, the sunrise is linked with the sunse
The heavens have made loud proclaim,
For men have seen the painting
And bugled the artist's fame.

Reaping.

An outcast, spurned from every door
And welcomed not, but shunned forevermore
Where once received with pomp and show
I now do hear the calm word "GO".

Since all is lost and I must wander on
Until my star has had another dawn,
I now can listen to the voice within
That whispers, yet is heard above the din

"A home, the joys of living,
A hearth, a warm fire too,
A heart thats so forgiving,
A soul that lives for you."

I've squandered my youth and
I've spurned the truth
In vain and selfish seeking,
Now I turn to the sky and wander why
Sowing's followed by reaping.

Despondent.

The cup of life I've lifted to my lips
And drunk thereof and found it bitter, all;
Oh, shall I quit this life,
or shall I stand
And drink the bitter draught of
wormwood and of gall.
Who knows that to quit this life is but
To take up over there the round of sorrow
And of trouble where we left it over there
Then creep thee on, oh, petty
pace tomorrow
And tomorrow and tomorrow. Bound are we
Unto the wheel of life and to escape one
Spoke is but to find ourselves
still bound
And not to find ourselves in states more
free.
Oh, is there not from this eternal round
Some outlet for a soul thus bound!

His Letter.

Kid, the world's done gone a balkin'
An' jest drive me to myself,
An' society's done quit talkin'
And jest shoved me on the shelf.

Now I'll sit me down to thinkin'
An' I'll think things to their end,
Ones an' twos I'll begin to linkin,
Threes and fours I'll try to blend.

Then I've solved the beastly problem,
Think I'll find the world's alright,
But its my old legs that's wabbling,
An' its me thats got bad sight.

Yes I'll turn my insides outwards
An' I'll air 'em there a while,
Then I'll take a few steps backwards,
I'll git humble as a child.

I'll admit that I've been tempted
An' at times I'd almost yield,
But while still from sin exempted
Guess I'd better quit sin's field.

See I'm getting close to danger,
So I'll take the way thats true;
Crawl from out the devil's manger
An' I'll cuddle close to you.

I'll come to you pure and unsullied,
Pure as you would come to me;
You with hands that's all begoried
But with soul that's clean and free.

Then we'll settle down together
An' we'll make our two hearts one;
God's love shall be our tether,
And we'll bask in heaven's sun.

His message.

He stood upon the heights of Bethlehem
And gazed with thoughtful eyes
upon the scene,
Upon the hills that in the distance rise,
Against whose sides fair greening
pastures beam

(Continued on next page)

The Two Children.

The wee babbling babe has his nursery
With his horn, his gun, and his boo
And a goodly flock of fairies
That lurk in every nook.

The grey-beard child has his nursery
With its rows of dusty books
And the spirits of departed masters
That lurk in the dingy nooks.

The Home-coming.

The world gave me riches and honors
And fame and feasts galore,
But I bundled them all together
And layed them at her door.

And when she awoke in the morning
She swept them away with her broom,
And I entered in and found therein
That love was bride and groom.

The Conquest

I leaped from out the cradle of
my birth
And vowed by all of heaven's
twinkling stars
To conquer soon yon droll and
sleepy earth
Or go in exile to the planet, Mars.

Alas, my sword-thrusts were as
pinpricks
That barely scotched the legs
of a sleepy world
That woke to yarn and stretch
and scratch itself
And then be soon again in slumber curled.

My sword of conquest bent and well nigh
broke,
And I have shed full many a
bitter tear,
And still yon droll and sleepy world
scarce woke
And slumbered on as though I were
not here.

My strength and firey zeal I
vainly spend
In trying to conquer that which
I cannot;
My life and years are on the downward
trend
And all that's left me is one lonely
spot.

Wherein to lay this frail, exhausted
frame
That some more useful purpose might
have served
Than conquering fantom worlds
and winning fame
Until my life is spent and I am
unnerved.

His Message con.--

He looked upon the herds of feeding lamb,
Upon the white and circling doves
What nigh him soon came gently flittering down
Like harbingers of peace sent from above;

The innocence of lambs the world must know
The purity and peace the world must feel
Ere seeds of righteousness I come to sow
Will bear and wrong the might
Of right is made to feel,

The world knows not the message
that I bring,
Nor shall it know in ages yet to come,
Until the words of hate have ceased to ring
And love has found a welcome in each home.

The battle I go forth now to begin
Shall rage 'til hatred's crimson
banners soon to fall,
Love is captain, Love is warrior,
Love shall win,
Love's my watchword, Love is armor, Love is all.

The Negro Soldiers.

They shall think the thoughts of their nation
They shall strive with might for right
They shall fight for this generation,
As only a soldier can fight.

And never a cold inward quaking,
Never a meek blanching brow,
But fired by an inner waking
Beyond the here and the now.

To the dim and distant future
Whose goal is yet unknown,
Nor halt their resounding footsteps,
Till victory's laurels are won.

On that day of peaceful reckoning
Ye men of ebony hue,
Justice with finger beckoning
Shall tributes be holding for you.

Soldier's Eve.

We came away
At death of day
Our wounds a-gap and bleeding
From battles lost,
At bloody cost,
And dreamed of loved ones needing.

The Point of View.

When I look at the deeds of the
mighty
Who have climbed the ladder of fame
I feel that there's nothing remaining
For sons with an humble name;

The great deeds have all been accomplished,
The victories have long since been
won;
There's nothing to do but to languish
And idle about in the sun.

When I look at the works of the lowly
Who are earnest and seeking to learn
Behold, there's a different aspect,
And life takes a happier turn.

The story is not yet completed,
The problems are not yet all solved,
The supply is not yet depleted;
Then to labor my soul is resolved.

For by labor the mighty have risen
On that perilous ladder of fame
Till in huge flaming letters
are blazoned
Aloft their unfading name.

Tempted.

I stood on the brink of temptation
With a dizzy reeling head
As I watched the crimson stream
Filled with the floating dead.

The soul within me tottered
To behold the sickening sight
Plucking me from the sorrows
Of my awful, awful plight.

I'm the better for the tempting,
For I know the danger's there
While another, unsuspecting,
May strike the unknown snare.

But I'll steer my boat around it,
By the help of a kindly God,
And forever I'll be watching
Till my bones have marked the sod.
And my soul looks back in wonder
On the pathway that I've trod.

The Pilot.

I've looked with awe and wonder
On the sea of life at large,
And feared lest waves should sunder
My frail and leaky barge.

That braved the angry billows
Toward a port distant and unknown,
Guided by an unseen Pilot
Whose voice was the thunder's tone,

And yet could speak in whispers
As soft as a zephyr at sea;
I have felt his presence and known
That he was guiding me.

But when I sought his comfort
Or begged a word of cheer,
He has ever turned to me
A deaf and unheeding ear.

Then when I least was thinking
Of the Pilot that was nigh,
He has breathed elusive words
That came and went like a sigh.

So on I sail and nearer
To the distant and unknown port,
My frail and leaky barge
The waves and billows sport;

And when the voyage is over
And I'm safe in the harbor's calm
I shall thank my unseen Pilot
With a wondrous ringing psalm.

Windfalls.

Fair muse, do I hear you calling?
I thought you had left me free;
Then let your words be falling,
And the message you have for me:
We dont grieve when another's pal pass
We just say,"Well his day was spent."

But its H--when our own pal passes
And we're left to grieve and repent,
My faith in you is unshaken,
But I'm sorry to the last degree
That your time and your love are taken
And there's never a mite for me.

Preachin' Bill Con.-

Preachin' Bill mounting his pony,
Started off along the trail,
Then he wheeled and called to tony
In a voice purt nigh to fail:

"Well, I'm gettin' ole an' lonesome
To use to go along thru life;
Thought I wouldn't tell ye 'bout it
But I'm goin' to hunt a wife."

Preachin' Bill.

With the cowboys gathered around him
Preachin' Bill, with long legs crossed
Sat a scratchin' of his chin;
Apparently in thought engrossed.

Then the faces around the circle
Slowly he begins to scan,
Then looking way off in the distance
His little sermon he began:

"When a feller's heart 's a bleedin'
An' he feels all sick an' sore,
An' his trembling frame 's a feelin'
Like it wont stand up no more,

"Then is when he needs somebody
With a kin' and willin' heart,
An' a hand that 's allus ready
To do a little more 'n its part.

"When a feller 's heart's a bursting,
An' it jest wont hold no more
An' the avalanche of sorrer
Rushes in with deafenin' roar;

"When a feller's heart 's a sinking
An' his eyesight 's a growin' dim,
An' the chain o' life 's unlinkin'
An' his chance is pretty slim;

"Then is when he needs somebody
That cin kneel and say a prayer,
Read a verse out o' the Bible,
See that everything goes fair.

"Once I had a faithful crony,
Course all that was long ago;
Lows to me jest 'fore he passed :
'Pal, I aint good for much mo';

"Guess I aint done much to better
This ole world while I've been here;
Yet all that dont make much matter,
For there's one thought full of cheer,

"Tis the thought that there's somebody
That 'll see me to the end;
Yes, ole Pal, you've done your duty,
You've been to me what's more'n a friend.'

"With his eyes all set and starin'
An' his frame all trembling so,
An' I thought I saw a light
Fluddin' thru the open door.

"Pal , says he, the water is deepnin',
Now its way up 'round my thigh
Then he fell forever sleeping,
Boys, twas hard to see him die

"Never had another crony
Since my ole Pal passed away,
Kinder seem to feel his presence,
Some by night, but more by day.

3/6/72

My Song.

Would you ask me the why of my singing;
Would you ask me the whence of my song?
Why I sang it, and sang it, and sang it
Ere I mingled with earth's motley throng.

I sang it in great vaulted temples
In the land that lies just beyond,
And again I shall sing it and sing it
When I've quitted life's stagnant pond.

Full many a picture is painted,
Full many a story told
Ere the artist and author have come
To dwell with the earthly fold.

It's Nature.

When I'm flushed to the eyebrows
with dollars
And my clothes are in good repair
I'm idolized by the jostling crowd,
I'm smothered by damsels fair;

But wait 'til I'm hungry and ragged
Then hear the fickle crowd jeer:
"Ah, where's your poet's fancy!"
Oh, how the devils will leer.

His Work.

A thought,
A scribbled word,
A labored line,
A written page,
A book;
His work was done.

'Twas read,
Then praised,
Approved by all,
Then read again,
Success;
Surpassed by none.

April.

April come and gone
And with her goes the power;
April with her green,
With her bloom and with her shower.

With her goes the power
That fills my beating heart
To live and to laugh each hour,
To live and to love her art.

Gone art thou, oh April
Where other Aprils go,
And where are all the tides
That long since ceased to flow;

Gone to the land of Forgotten
Where Being ceases to be,
Where kingdoms and empires are sunken
And lie neath an untroubled sea.

And while you are gone, oh April,
My crestfallen soul will sigh
For the power that goes with thy going,
While fallen and prostrate I lie.

Then come ye back fair maiden,
Maid with the sapphire eye,
With green and bloom well laden
And beauty that none can buy.

And with thee comes the power
To live and to laugh again,
To laugh and to live each hour
For art, for love, and for men.

Exit.

Fair muse I have done your bidding
With a calm, unruffled brow,
Will you leave me free to my duties,
They are calling, calling me now.

I have felt the power of your presence,
I have spoken the word of your tongue,
I have drunk of the life-giving essence
That thrills the old and the young.

○

REGULATIONS GOVERNING THE EXAMINATION OF APPLICANTS FOR APPOINTMENT AS SECOND LIEUTENANTS IN THE PHILIPPINE SCOUTS.

---

1. **Boards to examine candidates.**—For the purpose of securing a list of persons specially qualified for appointment as second lieutenants of Philippine Scouts the War Department will convene boards of officers at suitable and convenient Army posts on the 1st day of November of each year for the purpose of examining applicants. In the Philippine Islands such boards will be appointed by the commanding general, Philippines Division, under authority of the War Department. These boards will consist of five commissioned officers, including two medical officers whose duties will be confined to examining into and reporting upon the physical qualifications of the candidates.

2. **Eligibility requirements.**—Enlisted men of the Regular Army of not less than two years' service, natives of the Philippine Islands, and citizens of the United States are eligible for appointment, but no applicant will be examined for appointment who is not a citizen of the United States or of the Philippine Islands, or who is married, or who is under 21 or over 30 (except noncommissioned officers of the Army as provided in par. 9) years of age on the first day of the examination, or who is not physically sound and of good moral character.

3. **Applicants from enlisted personnel.**—An enlisted man who desires to appear for examination will submit through military channels an application so that it will reach his department commander on or before July 1 of the year in which he desires to take the examination. The application will be accompanied by the "Form for Individual Record of Candidate," filled out and sworn to as indicated. (See par. 10.)

The company commander in forwarding such application will verify the statement of service as given, and will state specifically whether, in his opinion, the soldier fulfills each of

the conditions required by the preceding paragraph, and will add his remarks as to the aptitude of the applicant for the position sought.

The post commander will cause the applicant to be examined by a medical officer as to his physical qualifications and will forward the report of such examination with the application, adding his remarks as to the aptitude of the applicant for the position sought.

4. Applicants from civil life.—An applicant from civil life will submit his application in his own handwriting on or before July 1 of the year in which he wishes to take the examination to The Adjutant General of the Army. The application should be accompanied by the "Form for Individual Record," indicated on page 5, and should show whether or not the applicant possesses the qualifications prescribed in paragraph 2 of this order, and be accompanied by evidence of reputable persons as to character and fitness and by the certificate of some reputable physician that he is physically sound.

5. All papers to be submitted to board.—The applications and all papers pertaining thereto, together with such official records of the War Department as relate to the character and qualifications of applicants, will be submitted to the boards before which the respective applicants may be directed or authorized to appear. No person shall be examined unless he has a letter or order from the War Department authorizing his examination.

6. Scope of examination.—Each candidate will first be subjected to a rigid physical examination, and any candidate who fails to pass it will be rejected by the board; but should he so desire, he will be permitted to undergo the mental examination. Examinations as to physical qualifications will conform to the standard required of recruits, except that any applicant whose degree of vision is less than 20/40 in either eye or who is color blind for red, green, or violet will be rejected. The physical examination will be made complete in each case, even though a deficiency be discovered, so as to ascertain whether any other defects exist. It is highly desirable that when a candidate is rejected for any physical cause, the cause of rejection should be so clearly established as to be conclusive of the reasonableness and propriety of rejection. A certificate of physical examination by the medical officers of the board will accompany the proceedings of the board in each case.

The moral character of each candidate found physically qualified, or who desires to undergo the mental examination notwithstanding his physical defects, will then be inquired into, and any candidate who has not borne a good moral character will be rejected and his examination will cease.

Each candidate who has been found qualified physically and morally, or who desires to undergo the mental examination, notwithstanding his physical defects, will then be examined mentally, in the following subjects, questions being prepared by the board and answers submitted in writing. In the examination of a native of the Philippine Islands, the questions will be of such a character as a Filipino of fair education would be expected to know, and if he prefers the examination may be oral except "writing from dictation."

a. English grammar, including orthography, reading, and writing from dictation.

b. In his knowledge of the elementary principles of arithmetic, and ability to solve such problems only as are likely to be useful in the discharge of his duties as a company officer.

c. Geography of North America and the Philippine Islands.

d. The outlines of the history of the United States.

e. Army Regulations.

f. Infantry Drill Regulations. The examination in drill regulations will be practical, extending through the schools of the soldier, squad, and platoon, and shall take place in the presence of the board.

g. Probable efficiency and aptitude as judged by the board from his knowledge of Army and drill regulations; his record, if any, in the military or civil service, and his conduct and appearance while undergoing examination. In determining his aptitude, credit will also be given to him for knowledge of the Spanish language or of any of the dialects spoken in the Philippine Islands, as demonstrated to the board.

7. Awarding of marks.—In awarding marks the board will give to each subject in the examination the relative weight given in the following form. The general average of the candidate will be computed as follows: Mark each question according to its relative weight and reduce the aggregate of marks thus obtained in each subject to a scale of 100. The result will be the percentage of proficiency in the subject. Multiply the percentage in each subject by the number indicating the relative weight of the subject and divide the sum of the products by the sum of

the relative weights; the quotient will be the general average. No candidate will be passed by the board who shall not have attained at least 65 per cent in each subject of the examination and a general average of at least 70 per cent.

Example.

Subject.	Percentage.	Relative weights.	Products of multiplication by relative weights.
a. English grammar, etc	74	2	148
b. Arithmetic	68	2	136
c. Geography	70	2	140
d. United States history	65	2	130
e. Army Regulations	80	3	240
f. Infantry Drill Regulations (practical)	78	3	234
g. Probable efficiency and aptitude	85	4	340
		18	1,368
General average			76

8. Separate proceedings in each case.—When the board shall have examined and passed upon all the applicants it will prepare separate proceedings in each case and forward these with all papers pertaining thereto to The Adjutant General of the Army.

9. Noncommissioned officers of the Army to have precedence over all others in filling vacancies.—In filling vacancies, noncommissioned officers of the Army shall have precedence over all others and the maximum age authorized for such candidates at date of examination is 32 years.

10. Form for individual record of candidate:

1. Give the exact date and place of your birth.

2. Are you married or single?

3. Are you a citizen of the United States or of the Philippine Islands? If so, state whether native born or naturalized.

4. What schools have you attended and for what periods? Answer explicitly, giving dates and designations of schools, as public schools, academies, district schools, colleges, manual-training schools, night schools, etc. Give also names and present addresses of presidents, superintendents, commandants, principals, professors, or teachers under the supervision of whom you were while attending schools, academies, colleges, etc.

32-24-96

SPECIAL REGULATIONS NO. 4.

WAR DEPARTMENT,
WASHINGTON, *September 18, 1917.*

The following regulations governing the examination of applicants for appointment as second lieutenants in the Philippine Scouts are published for the information and guidance of all concerned, and supersede all other regulations on the subject heretofore issued.

[062.12, A. G. O.]

BY ORDER OF THE SECRETARY OF WAR:

TASKER H. BLISS,
Major General, Acting Chief of Staff.

OFFICIAL:

H. P. McCAIN,
The Adjutant General.

CIRCULAR
No. 155.

WAR DEPARTMENT,
WASHINGTON *December 17, 1918.*

RECORDS OF DISCHARGED OFFICERS.

1. The individual records of discharged officers referred to in paragraph 3, Circular No. 73, War Department, 1918, as amended by Circular No. 101, War Department, 1918, will be forwarded as hereinafter indicated:

a. For each individual officer, copy of authority for discharge or separation from active service, report of physical examination, and appendix to file record card will be fastened together with a paper clip. The package of these three records will then be fastened to the qualification card with another paper clip or rubber band, and mailed directly to The Adjutant General of the Army.

b. The notice of discharge (Treasury Department, B. W. R. I. Form 333) will be forwarded by mail directly to the Bureau of War Risk Insurance, Washington, D. C.

c. The records of more than one officer, arranged as in subparagraph *a*, may be forwarded in the same package or envelope, but packages should be securely wrapped to prevent injury to records in transit.

2. The copy of authority for discharge or separation from active service referred to in Circular No. 73, War Department, 1918, amended by Circular No. 101, War Department, 1918, is a copy of the *special order* relating to the discharge of the officer. The special order will be cited on appendix to file record card of officer under the heading "The authority for separation_____."

3. So much of the telegraphic instructions from The Adjutant General's Office dated November 14, 1918, as relates to "record of last payment and clearance of money and property accountability" is rescinded, the matter being covered by paragraphs 12 and 13, Circular No. 85, War Department, 1918.

4. Paragraph 7, Circular No. 75, War Department, 1918, will be complied with in detail. Copies of special orders relating to the discharge of officers are required to be sent to The Adjutant General of the Army under the provisions of paragraph 3, Circular No. 73, War Department, 1918, but are not desired as part of the list to be sent daily to The Adjutant General of the Army, attention Commissioned Personnel Branch.

[201.3, A. G. O.]

BY ORDER OF THE SECRETARY OF WAR:

PEYTON C. MARCH,
General, Chief of Staff.

FINAL PAYMENT ROLLS.

1. In connection with paragraph 1, Circular No. 85, War Department, 1918, the new final payment roll forms have been printed and are now available for distribution. These forms are composed of a first sheet, War Department Form No. 371, and a second sheet, War Department Form No. 371a. Final payment rolls will be prepared in a similar manner to the monthly pay roll. For the purpose of determining the number of blank forms required. it is estimated that for each 100 men discharged there will be required three first sheets and 20 second sheets, this being considered a sufficient number to make the three required copies of the roll.

2. An initial supply of final payment roll forms has been mailed by the Quartermaster General's Office to the disbursing quartermaster of each department, each of the 31 larger camps, ports of embarkation, and general hospitals. Commanding officers requiring final payment roll forms for use in discharging enlisted men will make call on the disbursing quartermaster who is charged with the payment of troops under his command, and if said quartermaster has not received a supply, requisition will be made by mail or wire, as the urgency of the case requires, to the Quartermaster General, Washington, D. C.

3. Disbursing quartermasters who require a supply of these forms and have not received an initial supply will make requisition therefor without delay.

WAR-RISK INSURANCE—REPORT IN CASE OF NONPAYMENT OF ALLOTMENTS.

1. In connection with paragraph 4, Circular No. 73, War Department, 1918, a *separate* report will be made to The Adjutant General of the Army (attention Room 524) in the case of each enlisted man who has made an allotment, but which allotment has not been paid to the allottee at the time of his discharge.

In order that such allotments may be properly investigated this report will include the following information:

a. First, middle, and last name.
b. Rank and organization at time allotment was made.
c. Army serial number.
d. Name of allottee.
e. Address of allottee.
f. Kind of allotment.
g. Amount of allotment.
h. Amount deducted from pay on account of allotment.
i. Effective date of allotment.
j. Date of discharge.
k. Future address of enlisted man.
l. Did enlisted man claim exemption from compulsory allotment?

2. Each enlisted man will be informed that should he find it necessary to write regarding his allotment, his letter should be addressed to The Adjutant General of the Army (attention Room 524) and should include the data mentioned in paragraph 1.

ENLISTMENT OF DISCHARGED TEMPORARY OFFICERS.

1. Under the provisions of the act of Congress approved March 30, 1918 (sec. V, Bul. No. 22, W. D., 1918), all commanding officers are authorized to enlist former enlisted men of the Army of the United States who were discharged to accept a commission in any component part of the Army of the United States, and who, having been discharged from such commissions, tender themselves for enlistment within three months after the termination of their commissioned service. Upon acceptance, each enlisted man shall be appointed to the grade held by him before he was discharged to accept such commission.

2. No applicant for reenlistment under this authority will be rejected until his case has been reported to The Adjutant General of the Army with a statement as to the disqualifications or other reasons for rejection and instructions to that effect having been received.

3. Until the emergency is terminated by proclamation, the term of enlistment will be for the "period of the emergency" as at present prescribed by law.

4. The names and arms of service of soldiers reenlisted under this authority will be reported to The Adjutant General of the Army by wire, with a view to instructions for their assignment.

WAR DEPARTMENT,
WASHINGTON, *December 7, 1918.*

DISCHARGE OF OFFICERS.

1. Paragraph 2, Circular No. 75, War Department, 1918, authorizes certain commanders to discharge from the military service officers of the line and staff holding temporary appointments only whose services are no longer required. In the application of these instructions the following will govern:

a. For the purpose of discharge of officers or for the purpose of reassignment to make officers available for discharge, all officers of the line and staff serving within the territorial limits of a department are placed under control of department commanders with the following exceptions:

(1) Officers on duty at the divisional camps and cantonments exempted from control of department commanders by General Orders, No. 137, War Department, 1917, and section IV, General Orders, No. 19, War Department, 1918. Such camps and cantonments embrace all units, establishments, and utilities in their immediate vicinity and closely associated with them.

(2) Officers on duty or casuals at ports of embarkation or debarkation, such posts including all units, establishments, and utilities in their immediate vicinity and closely associated therewith.

(3) Medical officers on duty at general hospitals.

(4) Officers on duty at camps or stations which are under *direct* control of the chief of a staff corps or a bureau chief of the War Department.

(5) Officers on duty at arsenals and other ordnance establishments.

(6) Officers on duty under the Provost Marshal General's Office.

b. Staff officers of those commanders having authority to discharge officers are charged with making recommendations to their commanders relative to discharge or reassignment of officers holding commissions in the staff corps and departments. The chief of each staff corps and department will transmit to staff officers of those commanders having authority to discharge such information as will cause discharges of officers to be made for the best interests of the service without necessity for referring individual recommendations for discharge to the chief of a staff corps.

c. Officers on duty with units of the Students' Army Training Corps will be discharged by department commanders on recommendation of Students' Army Training Corps district headquarters. Officers on duty at Students' Army Training Corps district headquarters will be discharged by department commanders when discharge is approved by the chairman, Committee on Education and Special Training, War Department, Washington, D. C.

d. Medical officers on duty at general hospitals will be discharged by the Surgeon General. Officers who are patients in general or other hospitals not at a military camp or station will, when further treatment is unnecessary, be physically examined at such hospital, the examination being recorded on Form No. 395–1, A. G. O. Officers' qualification card, Form No. 395–1 and Form No. 150–CPB–GS, filled out by the officer, will then be sent by the commanding officer of the hospital to the nearest department, camp, or port commander

JAN 14 1919
Received

having authority to order discharge of officers. The commander receiving the above report will either discharge the officer or order him to report for duty, according to circumstances in each case. So much of Circular No. 75, War Department, 1918, as prevents discharge of officers in hospital is amended accordingly.

e. Officers on duty at air service training or experimental stations and air service repair depots will be discharged by the Director of Military Aeronautics.

f. Officers of the Coast Artillery Corps will be discharged by department commanders upon recommendation of the Coast Artillery district commander or the commanding officer, Coast Artillery training center.

2. Paragraph 2, Circular No. 75, War Department, 1918, is so amended as to authorize and direct the Provost Marshal General to discharge officers holding commissions for the period of the emergency only who are serving under the office of the Provost Marshal General.

3. In the interpretation of paragraph 1, Circular No. 75, War Department, 1918, officers who at any time prior to publication of General Orders, No. 73, War Department, 1918, held temporary commissions in the Regular Army will not be considered as holding commissions of any kind in the Regular Army and may be discharged. Retired officers holding emergency commissions do hold commissions in the Regular Army and will not be discharged under Circular No. 75, War Department, 1918, from any commission held by them; recommendations for discharge in such cases will be forwarded to The Adjutant General of the Army.

4. Subparagraph *b*, paragraph 5, Circular No. 75, War Department, 1918, provides that officers in arrest, under charges, or serving sentence of a general court-martial will not be discharged under provisions of that circular. Commanding officers will forward without delay to The Adjutant General of the Army, through military channels, a report of each such case now existing or that may occur in future, setting forth the circumstances in full, and making such recommendation relative to the disposition of the case as is considered for the best interests of the service.

5. Subparagraph *c*, paragraph 5, Circular No. 75, War Department, 1918, states that officers having had money or property accountability and who have not a clearance therefor will not be discharged. The clearance therein referred to is not a final clearance as a result of final auditing and acceptance of property or fund returns; it is such clearance as the local commander considers reasonable protection to the Government in view of the provisions of the ninety-fourth article of war. In general, if an officer can account to his commanding officer for property or funds of which he has been custodian by receipts of successors or others to whom funds or property have been transferred or by rendition of a final return, he has a sufficient clearance to be available for discharge. Final payments of such officers are governed by the provisions of Circular No. 85, War Department, 1918. An officer may be available for discharge, but not entitled to receive his final pay.

6. The selection of and statement in the discharge order of a future date when the discharge will be effective is authorized and recommended in those cases where the station of the officer is other than that of the officer issuing the discharge order. This authority as well as the date on which a discharge is effective are set forth in XIII D 9 a, page 451, Digest of Opinions of the Judge Advocates General, 1912.

7. Where the station of an officer to be discharged is other than that where the order is issued the appendix to file record card should be held at the officer's

station until the order for discharge is received. Acknowledgment of receipt of notice of discharge should then be noted thereon as required by paragraph 6, Circular No. 73, War Department, 1918, and the card then forwarded to accompany other records required by Circulars 73 and 75.

8. Should there be no officer's qualification card at the station of the officer or at the office authorized to discharge, a new qualification card will be made out to accompany the records to be forwarded to The Adjutant General of the Army, as required by paragraph 3, Circular No. 73, War Department, 1918.

9. Attention is directed to the fact that reports required by Circular No. 73, War Department, 1918, are to be furnished in all cases of separation from the service. Such reports are required, no matter from what source the order for discharge or acceptance of resignation may be issued. The requirement of Circular 73, that the records forwarded contain a copy of the authority for discharge, will be best met in all cases by forwarding a copy of the order separating the officer from the service.

10. Paragraph 150, Army Regulations, provides that discharge certificates will be used for discharge of enlisted men and for no other purpose. Officers should be given as evidence of discharge a copy of the order separating them from the service.

11. Whenever under instructions contained in Circular No. 106, War Department, 1918, detachments of enlisted men are sent to camps or posts designated as demobilization centers for the purpose of being discharged near their homes, officers not to exceed one officer to each twenty-five men may be sent with such detachments. The officers sent with such detachments should be available for discharge upon reaching the demobilization center, and officers who will upon discharge at such center be entitled to travel pay for a less distance than if discharged at station from which sent.

ADMISSION OF HONORABLY DISCHARGED SOLDIERS AND SAILORS TO UNIVERSITY OF COLORADO.

32-24-105

The University of Colorado, located at Boulder, 30 miles northwest of Denver, will admit to all departments free of tuition or other charges all honorably discharged soldiers and sailors from any State who were disabled in the service because of wounds or disease and who possess the required educational qualifications. The School of Law of the University of Colorado will admit all honorably discharged soldiers and sailors who were disabled in the service because of wounds or disease and who have had a high-school education or its equivalent, though two years of college work is required of other applicants for admission.

WASHINGTON : GOVERNMENT PRINTING OFFICE : 1919

CIRCULAR No. 85.

WAR DEPARTMENT,
WASHINGTON, *February 19, 1919.*

WEARING OF THE UNIFORM—DISCIPLINE AND MILITARY COURTESY.

The following instructions relative to the wearing of the uniform, disciplinary measures pertaining thereto, and military courtesy, are published for the information and guidance of all concerned:

1. *Regulations.*—The regulations governing the uniform of The United States Army and its wear are as prescribed in Special Regulations Nos. 41 and 42, War Department, 1917, as changed. Generally speaking, these regulations will be strictly interpreted, but it is recognized that, in a large measure, the present laxness in conforming to the regulations has grown up as a result of the original unpreparedness of the United States in the matter of supply of clothing and equipment at the outbreak of the war. It is neither the policy nor the desire of the War Department to work a hardship, either on persons severing their relations with the military service or those who have signified their intention to remain, by requiring abandonment of necessary articles of clothing or equipment which were purchased in good faith in a time of urgent necessity. This principle will necessarily bring about a recognition of certain departures from the strict letter of the regulations; but, on the other hand, it does not condone many of the violations of regulations which are practiced at present.

2. *Exceptions.*—The following exceptions to the uniform regulations are authorized for the present:

a. Many officers returning from abroad are wearing uniform coats, apparently made in England or by English tailors, which are cut in a manner similar to the English tunic, generally with a long skirt, either with or without a slit in the back, or with large bellows pockets, especially lower pockets. Officers being discharged or soon to be discharged will not be required to discard these coats, provided the variations in cut are not so exaggerated as to cause the uniform actually to be confused with that of the British or some other foreign army. Those officers who intend to remain in the service will not be required to discard these coats until such time as they can be reasonably expected to do so, without causing them undue financial hardship.

b. Officers wearing brass buttons on their uniform coats will, if they have signified their intention to remain in the service, be required to replace them with the uniform bronzed button. Officers soon to be discharged will not be required to make this change.

c. The wearing of breeches made of a different colored cloth or cloth of a different material from the coat will for the present be authorized, provided these breeches are not of such an exaggerated color or cut as to present an incongruous appearance.

d. The matter of overcoats, boots and shoes and leggins presents many difficulties. So many different types have been worn, and their wear apparently permitted, that it is considered unwise at this time to require more than a nominal conformity with existing regulations. The question of the necessity of rapid procurement has affected these articles of the uniform more, perhaps, than any others. Provided the officer presents a creditable appearance and his uniform is easily recognizable as that of a commissioned officer of The United States Army, he will not be required to discard articles which will

require immediate replacement. Any overcoat which has been worn and apparently authorized in any organization may be worn by those soon to be discharged. This includes overcoats with fur collars, leather coats, short moleskin coats, trench coats, etc. Officers' leggins or boots will be of leather. Enlisted men will not be permitted to wear leather leggins or boots.

e. The oversea cap, the divisional, Army corps, or field Army insignia worn on the left sleeve just below the shoulder, and the spiral cloth puttee (this last for enlisted men only) are authorized for troops returning from overseas for demobilization or discharge. This includes casuals and sick or wounded officers and enlisted men alike. For officers and men who are to remain in the service and who are assigned to active duty in this country, these articles are not authorized and will not be permitted, except that the spiral puttee may be authorized for field service. In general, the rule that officers and men should conform to the uniforms of the organization of which they are a part will be applied.

f. The Sam Browne or liberty belt is not authorized in this country and will not be worn. This belt is the distinguishing mark of the commissioned officer abroad, but there is no necessity for its introduction into the United States.

3. *Decorations.*—The prescribed wound and service chevrons and special individual decorations, such as the medal of honor, distinguished-service cross and medal, and the appropriate ribbon sections, are a part of the uniform. Special individual decorations from foreign Governments, such as the French croix de guerre or similar decorations from other foreign Governments, are authorized. These decorations will be worn as prescribed in Special Regulations No. 41, War Department, 1917. The French shoulder cord known as the fourragere is, however, a part of the French uniform, and only two American organizations are authorized to wear it, namely, Sanitary Section 646 and the One hundred and third Aero Squadron. Citations are not sufficient; special authorization for the fourragere must come from the French Government. Such decorations as gold and silver stars on the sleeves, unauthorized campaign ribbons, gold chevrons presumed to denote that the wearer has been a prisoner of war, or denoting any service other than prescribed for such chevrons, are not authorized and will not be permitted.

4. *Discipline.*—The question of laxity in dress, the wearing of dirty, soiled, or torn uniforms, combinations of uniform and civilian clothing, unbuttoned coats or overcoats, etc., is for officers and men still in the service entirely a question of discipline and will be treated as such.

For discharged officers and men, the matter of discipline is beyond the control of the military authorities. It is not possible, nor is it intended, that the military authorities should prevent the wearing by discharged officers and men of uniforms which do not conform to specifications. The present law prevents the wearing of the uniform for discharged enlisted men except en route from the place of discharge to their home, which journey may take place within, or may consume, three months from the date of discharge. The uniform must be returned to the Government within four months of the date of discharge. For discharged officers, the law is the same, except that the uniforms, being the property of the officers, are not required to be returned, and the officers may also wear them on occasions of ceremony. There is, however, a bill before Congress to allow discharged officers and men to retain and wear their uniforms indefinitely. In view of the fact that this bill is clearly the result of public opinion and will probably be enacted into law, it is thought best to consider it as already in force in so far as it allows officers and enlisted men to retain and wear their uniforms for the time being.

5. *The red chevrons.*—The red chevron was adopted in order to distinguish discharged enlisted men from those still in the service. The fact that it is, perhaps, being used in some cases by enlisted men still in the service as a means of deceiving the military authorities is not sufficient cause to warrant its removal. These cases are subject to disciplinary action and military commanders have the power to make this particular breach of regulations highly unprofitable for the offenders. Discharged men seem to be willing and ready to wear the chevron, even when necessary to purchase it from civilian firms. It is not considered advisable to attempt to obtain legislation rendering discharged men in uniform subject to military discipline. The red chevron, while admittedly not a universal panacea, is the only practical plan so far suggested to maintain the distinctive character of the uniform when worn by soldiers as distinguished from ex-soldiers.

6. *Protection of the uniform.*—The impersonation of officers and the wearing of uniforms by those not entitled to do so is a question in most cases for the civil authorities to handle. These cases should be prosecuted by the civil authorities under the provisions of section 125, act of Congress June 3, 1916 (Bul. 16, W. D., 1916). This act provides for its violation a penalty upon conviction of not to exceed $300 fine or six months' imprisonment, or both.

7. *Military courtesy.*—Commanding officers should take proper disciplinary action to insure that the rules of military courtesy are carefully observed by all officers and men alike connected with the service. This can not be forced upon discharged officers and men who do not desire to be governed by these rules.

[421, A. G. O.]

BY ORDER OF THE SECRETARY OF WAR:

PEYTON C. MARCH,
General, Chief of Staff.

OFFICIAL:

The Adjutant General.

WASHINGTON : GOVERNMENT PRINTING OFFICE : 1919

CIRCULAR
No. 86.

WAR DEPARTMENT,
WASHINGTON, *February 20, 1919.*

DISCHARGE OF OFFICERS.

1. Instructions heretofore issued authorize commanding officers to readjust assignments and duties of officers in such manner as to make available for discharge as many emergency officers as can be spared. This authority is continuous throughout the period of demobilization. Officers may, subject to provisions of paragraph 18, Army Regulations, be placed upon any duty for which qualified, regardless of the arm or corps in which commissioned. Every effort will be made to reduce commissioned personnel to the minimum required. Authorization of commissioned personnel by Tables of Organization will not be construed as authorizing retention in the service of officers classified in class 1 and class 2, paragraph 4, Circular No. 75, War Department, 1918, whose services can be spared.

2. Every officer holding an emergency commission only should be classified without delay as prescribed in paragraph 4, Circular No. 75, War Department, 1918, if this has not already been done. Whenever any such officer changes station, Form 150–CPB–GS, completed to include the first indorsement, should accompany him. If the officer has been examined by a board of officers with a view to his classification, a copy of the board's recommendation will be attached to the form.

3. In determining what officers should be discharged at any time no distinction in general should be made between class 1 and class 2, paragraph 4, Circular No. 75, War Department, 1918. Every effort will be made to release any officer whose immediate discharge is desirable on account of domestic or financial reasons.

4. In determining what officers are to be placed in class 3 and retained in service for the time being, final decision in each case rests with the officer having authority to discharge. Whenever possible, this officer should cause boards of officers to be convened for the purpose of making recommendation to him relative to classification of officers desiring appointment in the Regular Army. All applications for examination for appointment in the Regular Army will, however, be forwarded to The Adjutant General of the Army for file, whether approved or disapproved.

5. Officers who have been placed in class 3 may, upon consideration of their applications by the War Department, be found unsuitable for retention in that class. Likewise, officers who desire appointment in the Regular Army may be found by commanding officers unsuitable therefor, either at the time of classification or subsequently, and some officers formerly placed in class 3 will request reclassification for their own convenience. All such officers will be placed by the commanding officer having authority to discharge in class 1 or 2, according to circumstances, and will be discharged in accordance with existing instructions. Only in those cases where an approved application for future appointment in the Regular Army has been forwarded to The Adjutant General of the Army will individual reports of removal from class 3 be forwarded. The report will state the reason for removal from class 3.

6. In those cases where officers desire appointment in the Regular Army and it is not possible to determine finally their fitness for such appointment, such

as officers on duty at colleges, patients being discharged from hospital, and similar cases, the officer should, in general, be given opportunity to demonstrate his fitness and tentatively placed in class 3 if physically qualified. Such officers should be placed upon such duty as will enable their fitness to be determined or should be sent to one of the schools established for instruction of class 3 officers.

7. Subparagraph *d*, paragraph 1, Circular No. 124, War Department, 1918, provides for the disposition of officers who are patients in hospitals not at a military camp or station. Officers who are patients in hospitals at a military camp or station will, when further treatment is unnecessary, be directed to report to the commanding officer of the camp or station. The latter will cause such officers to be sent to their former commands, assign them to duty, or cause their discharge, according to circumstances in each individual case.

8. Attention is directed to the fact that Circular No. 34, War Department, 1919, relative to retention in service until employment is secured, applies to enlisted men only. Should any officer of class 1 or 2, available for discharge, certify in writing that he is unable to secure employment and that he desires for that reason to be retained in service temporarily, he should, if possible, be assigned to duty under provisions of paragraph 1 of this circular. If there is no suitable vacancy at his station to which such officer can be assigned he may be retained in service not to exceed 30 days after the date he would normally be discharged, provided he agrees in writing to make every effort to secure employment and to immediately notify his commanding officer if employment is secured within the 30-day period. During the period of retention the officer may be sent, under provisions of paragraph 11, Circular No. 124, War Department, 1918, to a camp near his home for discharge, or he may be given leaves of absence for not to exceed a total of 15 days for the purpose of securing employment. Such leaves will only be granted upon application of the officer, certifying that the full period of the leave is desired for and will be utilized for the purpose of securing employment. Officers granted leave as provided herein will in all cases be required to return to their proper station for discharge.

9. Strict compliance with paragraph 7, Circular No. 75, War Department, 1918, is required. Reports therein required will be forwarded to The Adjutant General of the Army only by commanders *who issue discharge orders*. These reports are in addition to any other reports or copies of orders required by other instructions. Copies of special orders or letters transmitting Form 150–CPB–GS will not therefore be sent in lieu of the registered mail report required by the above-mentioned paragraph.

10. In no case should Form 150–CPB–GS be forwarded to The Adjutant General of the Army until both indorsements thereon have been accomplished and the officer discharged. When this has been done the form will be forwarded without delay. The Form 150–CPB–GS of a class 2 officer serves in the War Department as a basis for his appointment in the Officers' Reserve Corps. Such officers should be informed of the provisions of Special Regulations No. 43, War Department, 1917, and should be instructed to request on Form 150–CPB–GS appointment in an authorized section of the Reserve Corps. In preparing the indorsements on the form it should be borne in mind that only those mentally, morally, and physically fit for service should be recommended for appointment. Under remarks in first or second indorsement will be stated any prior recommendation for promotion or other information relevant to appointment in the Reserve Corps.

11. The attention of all officers having allotments will be called to the necessity of prompt notification of the paying officer of discontinuance of their allotments due to discharge. The commanding officer of every military station will inquire of each officer separated from the service thereat whether or not the officer has an allotment. For each officer separated from the service who has an allotment the commanding officer will make a report by telegram on the day of separation from service to the zone finance officer, 1729 New York Avenue, Washington, D. C., stating the name, rank, organization, date of separation from service, and that the officer has an allotment. Further detail in telegrams is not desired.

[210.8, A. G. O.]

BY ORDER OF THE SECRETARY OF WAR:

PEYTON C. MARCH,
General, Chief of Staff.

OFFICIAL:

The Adjutant General.

WASHINGTON : GOVERNMENT PRINTING OFFICE : 1919

CIRCULAR No. 248.

WAR DEPARTMENT,
WASHINGTON, *May 12, 1919.*

TEMPORARY PROMOTIONS.

Circular No. 79, War Department, 1919, covering promotions for the period of the emergency within the United States and its possessions is rescinded and the following substituted therefor:

1. Promotions will be made to give rank appropriate to command in the case of line officers, or to actual employment in the case of staff officers.

2. This relaxation of the rule with regard to promotion does not invite a departure from the principle hitherto established that promotion can not be made merely as a reward for past service, however meritorious. The rule is relaxed only to permit the Army which remains undemobilized to be treated as a living organization, with such promotions as would be normal in times of peace to fill vacancies existing or as they may arise.

3. Each branch of the line and each staff corps and department will be considered as a whole within the United States and its possessions in computing vacancies.

4. Computation of vacancies will be made by the Chief of the Personnel Branch of the General Staff.

5. Vacancies in the line will be computed on the basis of the tactical organizations in existence in the United States and its possessions.

6. Vacancies in staff corps and departments will be computed on the Tables of Organization in force on November 11, 1918, scaled down to the degree of demobilization of that staff department in the United States and its possessions. In the case of staff corps or departments which have no Tables of Organization the computation will be based upon the actual strength as of November 11, 1918, in the United States and its possessions.

7. No officer will be recommended for promotion unless the duty upon which he is engaged or to which he is to be assigned is commensurate with the advanced grade recommended and unless there is no officer of appropriate rank reasonably available for assignment to the duty in question.

8. Recommendations for promotion will be made directly to the War Department as follows:

a. In the case of an officer on duty in a staff corps or department, by the chief of that staff corps or department.

b. In the case of an officer on duty in the Corps of Engineers, the Field Artillery, or the Coast Artillery Corps, by the chief of the arm or corps in which such officer is on duty.

c. In the case of any other officer, by the officer competent to forward communications directly to the War Department.

9. The officer authorized to make recommendations directly to the War Department will, in each case of a recommendation forwarded by him, personally consider the case, make a clear statement of the circumstances, and over his own signature make answers to the following questions:

a. Is the promotion to give rank appropriate to actual employment?

b. Is the promotion a reward for past service?

32-24-91

c. Is there no officer of appropriate rank, within your command, reasonably available for assignment to the duty to which it is proposed to assign the officer recommended for promotion?

10. In addition to the vacancies as computed by the chief of the personnel branch, a vacancy to which a promotion may be made may be considered to exist in any grade where the interests of the United States make such a promotion absolutely necessary. Such a case will be rare, but may be considered to exist under the following circumstances:

a. A marked increase in the amount of work handled.

b. A consolidation of groups reducing the total number of officers employed, but increasing the responsibility of individuals available to do the work.

c. Discharge of a senior officer and assumption of his duty by a junior, when it is found, after personal investigation, to be impracticable to transfer an officer of suitable rank for the work.

d. Readjustment of rank due to new duties or new organization.

This authority is not intended as a measure for correcting inequalities in promotion as between individuals, or as between arms of the line and staff corps and departments, which existed before the armistice, nor to promote merely as a reward for past services; but it is granted solely for the purpose of furthering the interests of the Government by giving to an officer the rank necessary to enable him to discharge his duties. When emergency officers are discharged, the vacancy so created should be filled by transfer, if practicable, and by an officer of the Regular Army. A recommendation to fill the vacancy by promotion will be resorted to only in case it is impracticable to fill the vacancy by transfer. Officers will as far as practicable avoid making recommendations for the promotion of officers who are soon to be discharged or who for any other reason are soon to be relieved from their duties.

11. Recommendations for promotion in the line or staff which comply strictly with these instructions may be submitted, after personal investigation by responsible officers.

12. No promotion will be made without the personal approval of the Secretary of War.

[210.2, A. G. O.]

BY ORDER OF THE SECRETARY OF WAR:

PEYTON C. MARCH,
General, Chief of Staff.

OFFICIAL:

J. T. KERR,
Adjutant General.

[G. O. 66.]

GENERAL ORDERS, No. 66.

WAR DEPARTMENT, WASHINGTON, *May 21, 1919.*

Section.

Awards of distinguished-service cross I
Awards, posthumous, of distinguished-service cross II

I. **Awards of distinguished-service cross.**—By direction of the President, under the provisions of the act of Congress approved July 9, 1918 (Bul. No. 43, W. D., 1918), the distinguished-service cross was awarded by the commanding general, American Expeditionary Forces, for extraordinary heroism in action in Europe to the following-named officers and enlisted men of the American Expeditionary Forces:

Edgar N. Caldwell, major, 16th Infantry. For extraordinary heroism in action near St. Mihiel, France, September 12, 1918. When his company met with enemy machine-gun fire of such intensity that the success of the operation was threatened Maj. *Caldwell* (then captain), disregarding personal danger, walked up and down the front line, designating targets to his men and encouraging them. He then led an automatic-rifle squad, proceeding 200 yards ahead of the line, and captured an enemy machine gun. Home address, Mrs. E. N. Caldwell, Watertown, Wis.

Charles M. Fox, captain, Medical Corps, 353d Infantry. For extraordinary heroism in action near Bantheville, France, October 26, 1918. Although he was suffering from the effects of gas, Capt. *Fox* maintained his battalion dressing station under a terrific bombardment of gas and high-explosive shells, which had almost demolished his station, continuing to care for the wounded and refusing to be evacuated until blindness rendered him unable to work. Home address, Mrs. Mary Randolph Fox (wife), 338 North Central Avenue, Chicago, Ill.

Robert G. Marshall, captain, 58th Infantry. For extraordinary heroism in action near the Bois du Fays, France, October 4, 1918. When his company's advance was stopped by heavy enfilading machine-gun fire, Capt. *Marshall* (then lieutenant) took 7 soldiers and rushed the enemy nest, killing 6 of the enemy and capturing 30, including a captain. Capt. *Marshall* accomplished this daring feat without any of his own men becoming casualties. Home address, Mrs. Ellen D. Marshall (mother), 5051 York Avenue South, Minneapolis, Minn.

Roland R. Reinholdt, captain, 138th Infantry. For extraordinary heroism in action near Cheppy, France, September 26, 1918. Sent forward with two platoons on a reconnaissance mission, he encountered the enemy in force, but effected the capture of 13 Germans, including an officer. He then held the position he had seized for three hours, although subjected to fire that rendered three-fourths of his men casualties, until French tanks arrived, when, with the remnants of his platoons, he attacked and captured machine-gun nests inaccessible to the tanks. The stubborn resistance of enemy attacks which he maintained was one of the deciding factors in the fight. Home address, Julius W. Reinholdt (father), Boatman's Bank, St. Louis, Mo.

Russell A. Schmidt, captain, 108th Field Signal Battalion. For extraordinary heroism in action near Cumières, France, October 8, 1918. With a detail of five men, Capt. *Schmidt* was engaged in attempting to lay a telephone line across the Meuse River, when they were discovered and attacked by a superior force of the enemy. Even after being wounded three times, Capt. *Schmidt* continued the unequal struggle, killing one and wounding three of the enemy, until all his ammunition was exhausted and all of his men severely wounded. Believing himself to be mortally wounded, he advanced into the enemy's lines and gave himself up, in order to save the lives of his men. He was recaptured by our forces later in the day. Home address, Mrs. J. P. Schmidt (mother), 132 South Seventh Street, Council Bluffs, Iowa.

John E. Douglas, first lieutenant, 142d Infantry. For extraordinary heroism in action near St. Etienne, France, October 8, 1918. Lieut. *Douglas* was a member of a patrol consisting of himself, another officer, and three soldiers, which came under fire from an enemy machine-gun nest. Leading the patrol forward by short rushes to within a short distance of the enemy position, he had his companions take cover, while he continued on alone in full view of the enemy, and by accurate fire from an automatic rifle at a range of 40 yards silenced the nest, capturing 20 men and 4 machine guns. Home address, John R. Douglas, Bessemer, Ala.

Herman W. Steinkraus, first lieutenant, 127th Infantry. For extraordinary heroism in action near the Bois de Bantheville, France, October 15, 1918. Continuing in command of his company, after he had been instructed to go to the rear for treatment

for an infected leg, Lieut. *Steinkraus* skillfully extricated his company with few casualties, when it became suddenly exposed to intense machine-gun fire from both flanks. Reinforcing his command with stragglers, he organized a strong right flank guard by utilizing captured German machine guns and succeeded in maintaining his position. Home address, Herman F. Steinkraus (father), 4012 Mapledale Avenue, Cleveland, Ohio.

Clark O. Tayntor, first lieutenant, 47th Infantry. For extraordinary heroism in action at Sergy, France, July 29–30, 1918. Disregarding two wounds from shell fire, which he had suffered, Lieut. *Tayntor* continued in the advance with his platoon, keeping his men well organized, directing the consolidation of the line throughout the night, and refusing medical attention until all the wounded men in his platoon had received treatment. Home address, Mrs. Iney Olds Tayntor (mother), 511 Chestnut Street, Erie, Pa.

Roscoe D. Haley, second lieutenant, 142d Infantry. For extraordinary heroism in action near St. Etienne, France, October 8, 1918. Lieut. *Haley* was severely wounded in the head while leading his platoon forward, but he continued in the advance, directing the cutting of wire entanglements under heavy fire. Shortly afterward he received another wound in the face, but he again refused to go to the rear, remaining with his platoon, encouraging his men, and maintaining organization until he became unconscious. Home address, Mrs. Elizabeth Haley (mother), 617 West Eldra Street, San Antonio, Tex.

The citation on page 51 of General Orders, No. 37, War Department, 1919, and on page 55 of General Orders, No. 46, War Department, 1919, relating to Second Lieut. *Clinton Jones*, is rescinded and the following substituted therefor:

Clinton Jones, second lieutenant, Air Service, pilot, 2d Aero Squadron. For extraordinary heroism in action near Landres-et-St. Georges, France, October 30, 1918. Lieut. *Jones*, while attacking four enemy planes (Fokker type), was in turn attacked from above and obliged to dive through a formation of 15 planes (Fokker type). His plane was riddled with bullets, but he managed to destroy one of the enemy machines.

For the following act of extraordinary heroism in action near St. Mihiel, France, October 18, 1918, Lieut. *Jones* is awarded an oak-leaf cluster to be worn with the distinguished-service cross: He was a member of a patrol which succeeded in hedging in a

fast enemy biplace plane. Approaching the enemy plane, Lieut. *Jones* signaled the enemy to give up and land. The reply was a burst of machine-gun fire, which cut his wind shield and set fire to his plane. He then closed in and shot the German pilot and sent the plane crashing to the ground. He landed in his own plane and extinguished the flames.

The citation on page 28 of General Orders, No. 46, War Department, 1919, relating to Second Lieut. *Alden C. Perrington*, 30th Infantry, is rescinded and the following substituted therefor:

Alden C. Purrington, second lieutenant, 30th Infantry. For extraordinary heroism in action near Bois d'Aigremont, France, July 15, 1918. When the German barrage preceding their drive of July 15 was at its worst, he volunteered to go through the barrage in Bois d'Aigremont to secure hand grenades for the defense of a wooded ravine after the forward grenade dump was blown up. This was at a time when it seemed impossible for any human being to get through the barrage. Throughout the entire engagement he volunteered to lead a number of patrols, both to the front and flanks.

Elmer Evenson (Army serial No. 284183), sergeant, Headquarters Company, 128th Infantry. For extraordinary heroism in action near Juvigny, France, August 30, 1918. Sergt. *Evenson* voluntarily made five trips in front of the line under intense machine-gun and artillery fire and brought in five wounded men who had been left in an exposed position after a withdrawal of the line. Home address, Mr. Evenson, Elkhorn, Wis.

The citation on page 4 of General Orders, No. 132, War Department, 1918, relating to Sergt. *Dougald Fersuson* is rescinded and the following substituted therefor:

Dougald Ferguson, sergeant, Machine Gun Company, 126th Infantry. When the infantry on his right was held up by fire from an enemy machine gun at Cierges, northeast of Château-Thierry, France, August 1, 1918, he seized a rifle and rushed around the flank of the enemy's position, bayoneting two of the machine-gun crew and shooting the third, thus enabling the infantry to advance.

George A. Hopkins (Army serial No. 280173), sergeant, Company G, 126th Infantry. For extraordinary heroism in action near Cierges, France, October 14, 1918. Although he had received a wound in the head, Sergt. *Hopkins* returned to his

platoon, which had been stopped by a machine gun 100 yards away, and was suffering many casualties. Passing to the flank of the platoon, he located the enemy gunner and shot him, taking the other two members of the crew prisoners. The platoon thereupon resumed its advance. Home address, Mrs. R. A. Hopkins (mother), Route H. I., Burlingham, Kans.

James McSorley (Army serial No. 273900), sergeant, Company E, 127th Infantry. For extraordinary heroism in action near Ronchères, France, July 30, 1918. Painfully wounded in the right arm, Sergt. *McSorley* continued to lead his platoon in the face of terrific machine-gun fire, remaining with his men and directing the advance until he was ordered to the rear. Home address, Mrs. George Webb (sister), 7 North State Street, Chippewa Falls, Wis.

Herbert H. Miller (Army serial No. 2201262), sergeant, Company G, 353d Infantry. For extraordinary heroism in action in the Bois de Barricourt, France, November 2, 1918. Continuing forward alone, after all the other members of his combat group had been killed or wounded, Sergt. *Miller* penetrated the enemy's lines, despite machine-gun and rifle fire, located a machine-gun nest which was holding up the advance of his platoon, and put it out of action by effective rifle fire. Home address, Otto R. Miller (father), 2504 East Forty-second Street, Kansas City, Mo.

Chester A. Roberts (Army serial No. 1491227), sergeant, Company L, 142d Infantry. For extraordinary heroism in action near St. Etienne, France, October 8, 1918. He led an automatic-rifle team of seven men in an attack on an enemy machine-gun nest, advancing 150 yards under heavy machine-gun fire to within 50 yards of the enemy position, from which point he directed the fire of his team with such skill that the enemy surrendered, resulting in the capture of 4 officers, 112 men, and 17 machine guns. Home address, Mrs. Abbie Roberts (mother), Route No. 3, Cleburne, Tex.

Walter Siebert (Army serial No. 274261), sergeant, Company F, 127th Infantry. For extraordinary heroism in action near Gesnes, France, October 16, 1918. Locating an enemy machine-gun nest, Pvt. *Siebert* advanced on it alone, and, by accurate fire from his automatic rifle, killed or wounded the members of the crew, thereby saving his company heavy casualties. Home address, Mrs. Bertha Siebert (mother), White Lake, Wis.

Louis C. Thedinger (Army serial No. 1490035), sergeant, Company E, 142d Infantry. For extraordinary heroism in action

near St. Etienne, France, October 8, 1918. When his company had been stopped by heavy enemy machine-gun fire, Sergt. *Thedinger* left shelter for the purpose of interviewing two German prisoners. Learning from them the location and strength of the enemy's position, he obtained permission to attack it, and, with a party of 10 volunteers, went forward in the face of heavy machine-gun fire, flanking the machine-gun nest, and capturing 40 prisoners and 3 machine guns. Home address, Mrs. Mary Schmatzen, R. F. D. 3, Perry, Okla.

Henry D. Turner (Army serial No. 2101130), sergeant, Company B, 10th Machine Gun Battalion. For extraordinary heroism in action near La Vallée, France, July 23, 1918; near St. Thibault, France, August 9, 1918; near the Bois de Septsarges, France, September 29, 1918; and near the Bois du Fays, France, October 6, 1918. Sergt. *Turner*, a runner, repeatedly went out under shell and machine-gun fire to maintain liaison between units, frequently volunteering for especially hazardous missions. After other runners had been killed he rendered valuable service by repeatedly crossing dangerous areas in order to maintain communications. Home address, Mrs. Margaret F. Turner (mother), R. F. D. 3, Fairfield, Ill.

Fitzgerald Walden (Army serial No. 1490019), first sergeant, Company E, 142d Infantry. For extraordinary heroism in action near St. Etienne, France, October 8, 1918. After his company commander had been killed, Sergt. *Walden* took command of that portion of the company near him and, reorganizing the line under heavy fire, continued forward with his men and repulsed an enemy counterattack. He refused to be evacuated until nightfall, when he was no longer able to stand. Home address, J. E. Walden (father), Mead, Okla.

Louis Witte (Army serial No. 274172), sergeant, Company F, 127th Infantry. For extraordinary heroism in action near Ronchères, France, July 30, 1918. When all the other members of his automatic-rifle squad had been killed or wounded, Sergt. *Witte* (then a private) took the dead gunner's automatic rifle and kept it in action against the enemy. Considerable enemy machine-gun fire was thereby drawn upon him, and he was wounded, but he nevertheless continued to maintain an effective fire while the remainder of his company was withdrawing. He remained at his post firing until the entire company had withdrawn. Home address, Mrs. Amelia Witte (mother), R. F. D. 2, box 109, Wittenburg, Wis.

Walter E. Bradfield (Army serial No. 1489844), corporal, Company H, 142d Infantry. For extraordinary heroism in action near St. Etienne, France, October 8, 1918. While advancing with his company he was wounded in the hip by a sniper, who was inflicting severe losses on the company. Crawling forward, he killed this sniper and continued in action even after receiving a second wound. He refused to go to the rear until he was ordered to do so by his company commander. Home address, Elijah A. Bradfield, St. Anthony, Idaho.

Chester C. Kromer (Army serial No. 280958), corporal, Company K, 128th Infantry. For extraordinary heroism in action near Juvigny, France, August 30, 1918. Corpl. *Kromer* voluntarily made four trips in front of the line under machine-gun and artillery fire and brought in four wounded men who had been left in an exposed position after a withdrawal of the line. Home address, Mrs. J. D. Kromer (mother), 618 Logan Street, Grand Rapids, Mich.

Clarence W. Lake (Army serial No. 165959), corporal, Company F, 127th Infantry. For extraordinary heroism in action near Gesnes, France, October 5, 1918. With two other soldiers Corpl. *Lake* advanced ahead of their company and rushed an enemy machine-gun nest from the flank, capturing 14 members of the crew and two machine guns, and thereby enabling the advance to continue. Carrying the captured guns with them to the objective, they later used them successfully in repelling a hostile counter attack. Home address, William G. Lake (father), Topsfield, Mass.

The citation on page 33 of General Orders, No. 20, War Department, 1919, relating to Corpl. *George Pohl*, is rescinded and the following substituted therefor:

George H. Pohl, corporal, Company G, 126th Infantry. For extraordinary heroism in action near Juvigny, north of Soissons, France, August 2, 1918. He was severely wounded during the first stage of the advance, but he remained with his company until the objective was gained. He then went to the rear, where his wound was dressed, and he was ordered to a hospital. When his evacuation was delayed by lack of ambulances, this soldier decided to return to the front line, where he reported to his commanding officer and volunteered to assist in carrying wounded to a dressing station. During the remainder of the operation, in spite of his wounds, he continued to assist in

bringing the wounded in from a field constantly swept by machine-gun fire.

Arthur L. Stuckrad (Army serial No. 274269), corporal, Company F, 127th Infantry. For extraordinary heroism in action near Gesnes, France, October 5, 1918. With two other soldiers Corpl. *Stuckrad* advanced ahead of their company and rushed an enemy machine-gun nest from the flank, capturing 14 members of the crew and two machine guns, and thereby enabling the advance to continue. Carrying the captured guns with them to the objective, they later used them successfully in repelling a hostile counter attack. Home address, Fred A. Stuckrad (father), 633 Scott Street, Milwaukee, Wis.

Hiram F. Walter (Army serial No. 1491368), corporal, Company E, 142d Infantry. For extraordinary heroism in action near St. Etienne, France, October 8, 1918. Corpl. *Walter* volunteered to lead a patrol for the purpose of locating and silencing an enemy machine-gun nest which was holding up the advance. Before reaching the nest all his men had been killed or wounded, but he continued on alone to within a short distance of the nest, ascertained its position, and reported its location so accurately that it was soon silenced. Home address, Mrs. Maggie Walter (mother), R. F. D. 3, Okemah, Okla.

Emil Buckendahl (Army serial No. 1419977), private, Company F, 127th Infantry. For extraordinary heroism in action near Gesnes, France, October 5, 1918. Pvt. *Buckendahl*, a litter bearer, on his own initiative, went out from a position of shelter to an exposed flank under intense machine-gun fire, and carried back to safety a wounded soldier who had been left in the field. Home address, William Buckendahl (father), Pierce, Nebr.

George W. Condit (Army serial No. 2177534), private, first class, Medical Department, 353d Infantry. For extraordinary heroism in action near Barricourt, France, November 2–3, 1918. Undeterred by seeing another first-aid man killed in attempting to reach a wounded soldier who was lying in the open a hundred yards from a wood, Pvt. *Condit* fearlessly exposed himself to fire from enemy snipers and machine guns and succeeded in carrying the wounded soldier to shelter. Throughout the attack of November 2–3 he worked under severe machine-gun fire without cover in dressing wounds after all other first-aid men had become casualties. Home address, Mrs. Alice Condit (mother), R. F. D. 1, Troy, Kans.

James Conway (Army serial No. 2721014), private, Company C, 58th Infantry. For extraordinary heroism in action near Nantillois, France, September 29, 1918. Pvt. *Conway*, a company runner, repeatedly volunteered for the most dangerous missions, carrying messages through enemy machine-gun and shell fire on numerous occasions. Several days later, when his ear drum was broken by concussion from a bursting shell, he refused to go to the rear for treatment, but remained on duty until his company was relieved. Home address, Miss Nellie Conway (sister), 6 Olive Street, Newburyport, Mass.

Mike Curti (Army serial No. 3142771), private, Company F, 127th Infantry. For extraordinary heroism in action near Gesnes, France, October 4, 1918. Pvt. *Curti*, a litter bearer, went out alone in front of the lines several times under the severest of fire and carried back wounded men from an exposed area, from which his company had been forced to withdraw. Home address, Giovanni Curti (father), 231 Lake Street, Reno, Nev.

Clinton Day (Army serial No. 2264227), private, first class, Company C, 58th Infantry. For extraordinary heroism in action near St. Thibault, France, August 7, 1918. Pvt. *Day* repeatedly volunteered and carried messages from his company in the front line across an open field swept by enemy machine-gun and sniper fire to the battalion post of command. He also voluntarily made trips across this dangerous area for the purpose of filling canteens for wounded soldiers and securing stretchers. Home address, Mrs. Emma A. Day (mother), Fillmore, Utah.

Charles Holmes (Army serial No. 3132516), private, first class, Company B, 127th Infantry. For extraordinary heroism in action near Gesnes, France, October 14, 1918. He carried to safety a wounded officer, passing over a path blocked by two barbed-wire obstacles, and enfiladed by enemy machine-gun fire. After successfully accomplishing this perilous mission he succeeded in working his way back to his company over the same route in the face of heavy fire. Home address, Mrs. Minnie Holmes (mother), Potter Valley, Calif.

William E. Hurst (Army serial No. 280198), private, first class, Company G, 126th Infantry. For extraordinary heroism in action near Juvigny, France, August 27, 1918. Upon being sent with a message under heavy machine-gun fire to a platoon commander, he found the latter lying wounded. Unassisted,

he carried the officer to a shell hole, bound up his wound, and returned to his company commander with important information. Home address, Samuel L. Hurst (brother), 204 Pilgrim Avenue, Highland Park, Mich.

Thomas Logue (Army serial No. 297562), private, Battery D, 119th Field Artillery. For extraordinary heroism in action near Montfaucon, France, September 29, 1918. Pvt. *Logue* worked ceaselessly under heavy enemy shell fire in carrying wounded comrades to the first-aid station, until he was himself severely wounded. Home address, Miss Annie Logue (sister), 3 Woodbine Terrace, Colevaine, County Derry, Ireland.

Joseph Mueller (Army serial No. 274235), private, first class, Company F, 127th Infantry. For extraordinary heroism in action near Jametz, France, November 10–11, 1918. Pvt. *Mueller*, a runner, successfully maintained liaison between his company, which formed the liaison group with another division, and regimental headquarters, promptly carrying numerous messages across an area under heavy fire. Home address, Joseph Mueller (father), 1029 Walnut Street, Milwaukee, Wis.

Earl D. Norton (Army serial No. 293917), private, Company H, 9th Infantry. For extraordinary heroism in action near Vaux, France, July 1, 1918. While Pvt. *Norton*, an automatic-rifle gunner, was advancing during the attack a shell fragment struck a bag of hand grenades which he was carrying on his hip, resulting in an explosion which shattered his left leg. Despite the severe wound, he crawled forward toward a shell hole, where the remainder of his squad had taken refuge, and, with his remaining strength, threw his automatic rifle to the men in the shell hole. His injuries necessitated the amputation of his leg. Home address, Mrs. Robert Norton (mother), 177 Whitefield Street, Guilford, Conn.

Cecil E. Reed (Army serial No. 2201115), private, first class, Company E, 353d Infantry. For extraordinary heroism in action near Barricourt, France, November 2, 1918. When the advance of his platoon was held up by severe machine-gun fire, Pvt. *Reed* left cover, advanced across open ground, and opened fire on the enemy nest with rifle grenades. After twice returning to obtain more grenades, he succeeded with a well-directed shot in driving the enemy crew from the nest, whereupon they were killed by other members of his company. Home address, Otis Reed (father), Stratton, Nebr.

Samuel Shaskan (Army serial No. 282956), private, Headquarters Company, 128th Infantry. For extraordinary heroism in action near Juvigny, France, August 28, 1918. Going out from the front line through barbed-wire entanglements, under heavy artillery and machine-gun fire, Pvt. *Shaskan* brought back to safety a wounded soldier. Home address, Abraham Shaskan (brother), 71 West Twenty-third Street, New York, N. Y.

William H. Siemering (Army serial No. 1106054), private, first class, Company G, 142d Infantry. For extraordinary heroism in action near St. Etienne, France, October 8, 1918. Although one of his hands was disabled, he left a sheltered position against the advice of his companions and went through heavy shell and machine-gun fire to the aid of a wounded comrade, bringing the latter to a place of safety. Home address, Mrs. Agness Bauman (sister), Le Seur, Minn.

Rudolph Socha (Army serial No. 297587), private, Battery D, 119th Field Artillery. For extraordinary heroism in action near Montfaucon, France, September 29, 1918. Having been severely wounded in the knee, Pvt. *Socha* refused to be evacuated, but immediately returned from the dressing station to his battery position, where he assisted in caring for other wounded men until he was again wounded, inspiring his comrades by his undiminishing courage and cheerfulness in the face of danger. Home address, Agnes Haumschild (sister), 425 Tenth Avenue, Milwaukee, Wis.

David H. Underwood (Army serial No. 279050), private, first class, Company B, 125th Infantry. For extraordinary heroism in action near Fismes, France, August 6, 1918. With exceptional courage, Pvt. *Underwood* went out under heavy fire from enemy machine guns and snipers and rescued a wounded runner who had strayed into the enemy's lines by mistake. Home address, Cyrus J. Underwood (father), Ridgeway, Mich.

Henry W. Wetzel (Army serial No. 274280), private, first class, Company F, 127th Infantry. For extraordinary heroism in action near Gesnes, France, October 4–20, 1918. Pvt. *Wetzel*, a company runner, repeatedly volunteered for missions so hazardous that no others would attempt them. At all hours of the day and night, over unknown ground, he carried numerous messages in the face of heavy machine-gun and shell fire. Home address, William Wetzel, Birnamwood, Wis.

[220.52, A. G. O.]

II.—**Awards, posthumous, of distinguished-service cross.**—By direction of the President, under the provisions of the act of Congress approved July 9, 1918 (Bul. No. 43, W. D., 1918), the distinguished-service cross was awarded posthumously by the commanding general, American Expeditionary Forces, for extraordinary heroism in action in Europe, to the following-named officers and enlisted men of the American Expeditionary Forces:

The citation on page 8 of General Orders, No. 35, War Department, 1919, relating to Capt. *Benjamin H. Hewit*, 311th Machine Gun Battalion, is rescinded and the following substituted therefor:

Benjamin H. Hewit, captain, Company F, 316th Infantry. For extraordinary heroism in action near Montfaucon, France, September 28–29, 1918. He led his men into battle with such fearlessness and valor that he was at all times able to reorganize and continue forward under most difficult circumstances. Although wounded, he remained in command, always being under terrific shell and machine-gun fire, but not until he had received a second wound did he relinquish his command. While being taken from the field he received a third wound. Home address, O. H. Hewit (father), Hollidaysburg, Pa.

Stacy L. Harding, second lieutenant, 120th Field Artillery. For extraordinary heroism in action near Malancourt, and Nantillois, France, September 26 to October 11, 1918. On duty as artillery information officer, Lieut. *Harding* displayed the utmost courage, fortitude, and devotion to duty in maintaining liaison between the Infantry and Artillery, going repeatedly to the front line and carrying messages for both Infantry and Artillery commanders. In seeking the location of an Infantry company, under heavy machine-gun and artillery fire, he searched the woods on the Côte Dame Marie, as far as the enemy's wire, where he was killed by machine-gun fire. Next of kin, Mrs. J. S. Harding (mother), Antioch, Calif.

Harry E. Bayly (Army serial No. 2175201), sergeant, Headquarters Company, 353d Infantry. For extraordinary heroism in action near Rémonville, France, October 22, 1918. When the advance was checked by severe machine-gun fire, Sergt. *Bayly*, who was in charge of a one-pounder section, volunteered to open fire on the nest with a Stokes mortar. Holding the mortar betwen his legs, he put it in action immediately and silenced the machine-gun nest, allowing the advance to continue.

He was killed by shell fire several days later. Next of kin, Allyn R. Bayly (father), Tar River, Okla.

Willard D. Purdy (Army serial No. 273297), sergeant, Company A, 127th Infantry. For extraordinary heroism in action near Hagenbach, Alsace, July 4, 1918. Upon returning with his patrol after a reconnaissance of the enemy's line, Sergt. *Purdy* was calling the roll of his men and collecting their hand grenades, when the pin of one of the grenades became disengaged. Seeing that the grenade could not be thrown away without injuring some of the men, Sergt. *Purdy* called on them all to run, while he picked up three of the grenades, and bending over held them against his stomach. The grenade exploded, killing Sergt. *Purdy* instantly, but his presence of mind and self-sacrificing act saved the lives of his comrades. Next of kin, Mrs. Esther Purdy (mother), box 632, Marshfield, Wis.

Ira L. Wescott (Army serial No. 281389), sergeant, Company M, 126th Infantry. For extraordinary heroism in action near Juvigny, France, August 28–30, 1918. Sergt. *Wescott*, as second in command, accompanied a small combat patrol, which successfully attacked an enemy trench held up by 30 of the enemy with machine guns, driving the enemy from the trench and inflicting many casualties. When the patrol leader was severely wounded, Sergt. *Wescott* took command and immediately reorganized the patrol, holding the captured position, despite a severe harassing fire from the enemy, until relief came. Next of kin, Mrs. Mary Wescott (mother), Grandville, Mich.

Carroll B. West (Army serial No. 573878), sergeant, 12th Machine Gun Battalion, Company B. For extraordinary heroism in action near the Bois des Ogons, France, September 30 and October 2, 1918. He displayed exceptional courage and leadership in leading the section forward and maintaining fire on the enemy from an advanced position in the wood, successfully covering the withdrawal of the Infantry to a more secure position. This gallant soldier was killed two days later while he was successfully directing his section in breaking up an enemy counterattack. Next of kin, Allen B. West (father), Milton Junction, Wis.

Corbett Benefield (Army serial No. 1490084), corporal, Company E, 142d Infantry. For extraordinary heroism in action near St. Etienne, France, October 8, 1918. Wounded in the arm by a machine-gun bullet while leading his squad through enemy entanglements, Corpl. *Benefield* rallied his men and led them in

an attack on the machine gun which was enfilading the line, and captured the gun with its entire crew. Continuing on, despite his wound, he was killed shortly afterwards while leading his squad under a heavy enemy bombardment. Next of kin, Tom Benefield (father), Caddo, Okla.

Leon Jennart (Army serial No. 297637), bugler, Battery E, 119th Field Artillery. For extraordinary heroism in action near Barricourt, Alsace, July 12, 1918. As he was returning from a reconnaissance with his battery commander, under heavy enemy artillery fire, a shell struck between them, mortally wounding the officer and throwing Bugler *Jennart* from his horse, which was killed. Although he was himself seriously wounded, this soldier crawled across the road to the assistance of his captain, and just before he reached the latter's side was instantly killed by another bursting shell. Next of kin, Miss Anna Jennart, Spring City, Pa.

Edwin Austin (Army serial No. 174176), private, Company F, 127th Infantry. For extraordinary heroism in action near Ronchères, France, July 30, 1918. He volunteered to go out in advance of our front lines and bring back wounded who had been left there when his company was withdrawn. He made two trips, under heavy fire, bringing back wounded with the aid of another soldier, but was killed by machine-gun fire when he went out for the third time. Next of kin, George Austin (father), Turin, Mich.

James C. Hix (Army serial No. 274210), private, Company F, 127th Infantry. For extraordinary heroism in action near Ronchères, France, July 30, 1918. With another soldier, he volunteered to go out in advance of our lines to rescue wounded soldiers who had been left there when the company withdrew. Under heavy fire they made two trips, bringing back wounded men. Pvt. *Hix* was wounded by machine-gun fire when he went out for the third time. Next of kin, H. W. Hix (brother), 136 Grove Avenue, Detroit, Mich.

The citation on page 32 of General Orders, No. 44, War Department, 1919, relating to Pvt. *Ivan S. Kay*, is rescinded and the following substituted therefor:

Ivan E. Kay (Army serial No. 3128362), private, Company L, 363d Infantry. For extraordinary heroism in action near Waereghem, Belgium, October 31, 1918. When the progress of two front-line companies had been held up by intense machine-

gun fire and the enemy had begun to close in on our forces, Pvt. *Kay*, although in an exposed position, checked the advance of the enemy with rifle grenades until he was killed. His act made possible the renewal of the advance by the two companies. Home address, George W. Kay (father), Little Falls, Minn.

ISSUE OF RAINCOATS AND PONCHOS—AMENDMENT TO CIRCULAR NO. 166, WAR DEPARTMENT, 1919.

1. Subparagraph *h*, paragraph 2, Circular No. 166, War Department, 1919, is amended to read as follows:

h. One slicker, or raincoat mounted or dismounted, if in his possession. If soldier has none of these articles, a poncho will be issued in lieu thereof until supply of ponchos is exhausted.

2. Until the present stock becomes exhausted, ponchos will be issued to discharged soldiers in lieu of slicker or raincoat, as provided in paragraph 1. If this will not exhaust the stock of ponchos, they may be issued in lieu of raincoat dismounted to men in active service.

WASHINGTON : GOVERNMENT PRINTING OFFICE : 1919

CIRCULAR
No. 253.

WAR DEPARTMENT,
WASHINGTON, *May 14, 1919.*

BASIC ALLOWANCES OF EQUIPMENT—AMENDMENT TO CIRCULAR NO. 176, WAR DEPARTMENT, 1919.

1. (*a*) The allowances of the following articles enumerated in the table in Circular No. 176, War Department, 1919, are amended to read as follows:

Articles of clothing and equipage.	(War set) for field and garrison service.	Additional, for use at posts and camps or stations of a relatively permanent nature.	Remarks.
Blankets, olive-drab	1	2	One extra may be issued for use in posts or camps and stations of a relatively permanent nature, when necessary and ordered by commanding officer. An extra blanket may be taken into the field when necessary and ordered by commanding officer, if transportation is available.
Stockings, cotton, pair	.....	8	
Stockings, woolen, pair	2	4	Light or heavy according to season.
Towels	1	3	
Whistles:			
Battalion commanders'	1	.....	To each field officer.
Company commanders'	1	.....	To each company commander.
Thunderer	1	.....	To each lieutenant and sergeant.

(*b*) The following articles with the allowances of each are added to the list of articles enumerated in the table in Circular No. 176, War Department, 1919:

Articles of clothing and equipage.	(War set) for field and garrison service.	Additional, for use at posts and camps or stations of a relatively permanent nature.	Remarks.
Baton	1	.....	To each drum major of a dismounted band.
Bugle, complete with sling	1	.....	To each bugler. In organizations with band issue trumpet "G" with "F" slide in lieu.
Music stand	.....	1	To each bandsman.
Pouches, music	1	.....	Do.
Rations, reserve (see par. 302 F. S. R.)	2	.....	For each officer and enlisted man, for field service only.

A full set of outer Alaskan clothing is authorized for issue on memorandum receipt to officers serving in Alaska or Siberia.

Articles in "War set" column are worn or carried on the person or mount in field service.

2. Attention is directed to the list of clothing and quartermaster supplies published in Circular No. 176, War Department, 1919. The provisions of this circular are supplementary to Circular No. 176 and remarks in the one are applicable to the other and the reverse.

3. For the future the policy will be to issue to all individual men of the premanent forces, serving at posts and camps or other military stations of a relatively permanent nature, a double set of certain equipment, as indicated in published tables of basic allowances. When two identical articles of equipment are issued one will be kept and used only for parades, ceremonies, inspections, or similar duty, and when ordered

32-24-94

into the field for war service; the other set will be the drill set and will be used for ordinary drills and for exercises in the field other than in active campaign. The drill set will be inspected in order to insure its proper care; but the organization will not be required to make the polished appearance expected when it is inspected in its war set. When an organization is transferred from one station to another and it is considered more economical to leave its drill set, proper orders will be issued by the authority directing the transfer. The war set will always accompany the organization on change of station. No article of equipment will be submitted for condemnation, except where it is impossible to use it further for drill purposes. When an article of equipment is condemned the worst corresponding article should be transferred from the war set to the drill set.

4. Where type or model of equipment is not specified material will be issued according to specifications approved by the General Staff or pursuant to special instructions issued to the supply department concerned.

5. The following list prescribes basic allowance pertaining to the supply of the individual officers and enlisted men serving in the United States and outlying possessions in time of peace except members of organizations about to be demobilized, and supersedes allowances published in Tables of Equipment where there is any conflict. These allowances do not apply to organizations serving with the American Expeditionary Forces. Special allowances heretofore authorized for special purposes will continue in force, and for items not covered in this list or in Circular No. 176, War Department, 1919, allowances heretofore authorized will govern.

When division or department commanders approve requisition for articles not contained in field allowances herein, or in quantities not authorized herein, and certify that such articles or quantities are necessary for efficient conduct of active field service such articles shall be furnished if possible.

When such additional issues are made the division or department commander authorizing same will make immediate report thereof to The Adjutant General of the Army.

Individual equipment for Coast Artillery in coast defenses shall be the same as for heavy artillery. In addition there will be issued to each coast defense, for garrison use in recruit drills and ceremonies, one rifle, one rifle cover, one bayonet, one bayonet scabbard, one gun sling, one oiler and thong with case, one sight cover for each enlisted man, except sergeants major, first sergeants, mess sergeants, supply sergeants, cooks, buglers, bandsmen, and enlisted specialists; one barrack cleaning rod for each two rifles, and one screw driver for each eight rifles. There will be issued for land defense such additional automatic rifles, machine guns, and small caliber trench mortars and related equipment as shall be approved by the Chief of Coast Artillery as necessary in each coast defense.

Ordnance property.

Articles of clothing and equipage.	(War set) for field and garrison service.	Additional, for use at posts and camps or stations of a relatively permanent nature.	Remarks.
Axes, hand, intrenching, M. 1910, with carriers, intrenching hand ax, M. 1910.	1	1	To each two squads equipped as Infantry. To each enlisted man of Medical Department.
Bag, ration, M. 1912	1	1	To each dismounted medical officer; to each enlisted man of Medical Department.
Bandoleer, Cavalry	1	.....	To each mounted man armed with a rifle. Carried in ammunition wagons and issued on separation from them or when engagement is pending.
Bandoleer, magazine, for Browning automatic rifle, M. 1918, right and left.	1	1	To first and second assistant automatic rifleman, one of each.

Ordnance property—Continued.

Articles of clothing and equipage.	(War set) for field and garrison service.	Additional, for use at posts and camps or stations of a relatively permanent nature.	Remarks.
Bayonet, according to rifle issued	1	1	To dismounted men armed with rifle, except wagoners, chauffeurs, and motorcyclists.
Bayonet scabbard, M. 1910 or M. 1917	1	1	To each man armed with bayonet.
Belt, M. 1912, without saber ring, for pistol or revolver.	1	1	To each officer and enlisted man armed with pistol only, except automatic rifleman; to each chaplain, to each field clerk, postal agent, and to each unarmed enlisted man equipped with a haversack.
Belt, cartridge, caliber .30, M. 1910, dismounted.	1	1	To each enlisted man armed with rifle only, except first and second assistant automatic rifleman.
Belt, cartridge, caliber .30, M. 1910, mounted.	1	1	To each enlisted man armed with both pistol and rifle, except automatic riflemen.
Belt, magazine, for Browning automatic rifle, M. 1918, for automatic rifleman.	1	1	Per automatic rifleman.
Belt, magazine, for Browning automatic rifle, M. 1918, for first and second assistants.	1	1	For each first and second assistant automatic rifleman.
Bolo	1	1	To each two squads equipped as Infantry.
Bolo scabbard	1	1	To each enlisted man in machine-gun organizations, except wagoners.
Brush, thong, for United States rifle, caliber .30.	1	.....	Per rifle.
Can, condiment, M. 1910	1	1	To each officer and enlisted man, except drivers in Artillery organizations and mounted men.
Can, meat, M. 1910	1	1	To each officer and enlisted man.
Canteen, M. 1910	1	1	To each officer and enlisted men.
Carrier, pack, M. 1910	1	1	To each dismounted officer up to and including the rank of captain, to each dismounted enlisted man except (1) those in horse-drawn artillery, not including band, (2) those in Medical Department, and (3) chaplains.
Carrier, hand grenade	1	.....	1 per squad organized as Infantry.
Carrier, rifle grenade discharger	1	.....	Per rifle grenade discharger, as soon as possible.
Cartridges, ball, caliber .30	100	.....	For each man armed with rifle only; 90 for each man armed with both pistol and rifle. To be issued only when ordered by commanding officer.
Cartridges, pistol, ball, caliber .45	35	.....	For each individual armed with pistol only. 21 for each man armed with both pistol and rifle. To be issued only when ordered by commanding officer.
Case, carrying, for Browning automatic rifle, M. 1918.	1	.....	Per automatic rifle.
Case, oiler and thong, for United States rifle, caliber .30.	1	.....	Per rifle.
Case, spare part, for each automatic rifle.	1	.....	Containing: 1 extractor, 1 extractor spring, 1 recoil spring, 2 firing pins, 1 sear spring, 1 connector, 1 magazine catch spring, 1 gas cylinder cleaning tool, 1 gas cylinder tube pin, 1 trigger guard lock pin, 1 combination spanner and screw driver, 1 string cleaner, 1 oil can, 2 extractors, defective shell, 2 fabric containers (1 for recoil spring and 1 for small parts).
Cover, canteen, dismounted, M. 1910	1	1	To each dismounted officer and enlisted man.
Cover, canteen, mounted, M. 1917	1	1	To each mounted officer and enlisted man.
Cover, rifle, caliber .30, M. 1903	1	.....	Per rifle. Covers, breechlock mechanism for United States rifle, caliber .30, may be issued until supply is exhausted, except to motorized organizations and to drivers of vehicles carrying rifle in clips.
Cover, front sight, for United States rifle, caliber .30, M. 1903.	1	.....	Per rifle M. 1903.

Ordnance property—Continued.

Articles of clothing and equipage.	(War set) for field and garrison service.	Additional, for use at posts and camps or stations of a relatively permanent nature.	Remarks.
Cup, M. 1910	1	1	Per each officer and enlisted man.
Cutter, wire	1	1	To each first sergeant, stable sergeant, bugler, agent orderly or signal man, to each member of a pioneer section, and 1 to each squad organized as Infantry, or Cavalry, except bandsmen.
Cutter, wire, carrier	1	1	Per wire cutter.
Depressor, followerer, for United States rifle, caliber .30, M. 1917.	1	.....	For each rifle M. 1917 issued.
Discharger, rifle grenade	.....	.....	As shown in Tables of Organization.
Filler, magazine, for Browning automatic rifle, M. 1918.	3	.....	Per automatic rifle.
Fork, M. 1910	1	1	To each officer and enlisted man.
Gun sling, M. 1907	1	1	Per rifle, caliber .30.
Haversack, M. 1910	1	1	To each dismounted officer up to and including the rank of captain and to each dismounted enlisted man except (1) those in the Medical Department and (2) chaplains.
Holster, pistol, M. 1916	1	.....	Per automatic pistol.
Knife, M. 1910	1	1	To each officer and enlisted man.
Knot, saber	1	1	1 for each officer and enlisted man armed with a saber.
Lanyard, pistol	1	.....	To each mounted individual armed with pistol.
Magazine, extra, for automatic pistol, caliber .45, M. 1911.	4	.....	To each officer and enlisted man armed with pistol only. 2 to automatic riflemen armed with pistol and to enlisted men armed with both rifle and pistol.
Magazine, for Browning automatic rifle, M. 1918.	72	.....	Per automatic rifle.
Pick mattock carrier, M. 1910	2	2	Per squad equipped as Infantry.
Pick mattock, intrenching, M. 1910	2	2	Per squad equipped as Infantry.
Pistol, automatic, caliber .45, M. 1911	1	.....	To each officer and enlisted man armed with pistol as per Tables of Organization.
Pouch, for first-aid packet, M. 1910	1	1	To each officer, and to each enlisted man except Medical Department personnel.
Pouch, for small articles	1	1	Per squad equipped as Infantry.
Pocket, magazine, web, double	2	2	To each officer and enlisted man armed with pistol only. 1 to each man armed with both rifle and pistol, and to automatic riflemen armed with pistol. Pocket, magazine, double, M. 1918, may be issued in lieu until supply is exhausted.
Riding equipment:			
Set, consisting of—			
Currycomb, feed bag, grain bag, bridle complete, coat straps for pommel and cantle, halter complete, horse brush, horse cover when necessary and ordered by commanding officer, insignia for saddlecloth for officers, lariat, lariat strap, link, saber straps, saddle complete, saddle bags, saddle cloth for officers, surcingle, 2 extra fitted horseshoes with nails, saddle blanket.	1	.....	For each officer and enlisted man, except mounted drivers, shown on Tables of Organization as mounted on horse. Saber straps, lariats, lariat straps, not issued in Field Artillery. Blanket lined horse covers are issued when specified by commanding officer.
Set, consisting of—			
Feed bag, grain bag, horse cover when necessary and ordered by commanding officer, surcingle, saddle complete, saddle blanket, halter bridle complete, horse brush, currycomb, lariat, saddlebags, lariat strap, 2 extra fitted mule shoes with nails.	1	.....	For each man mounted individually on mule. Lariat, and lariat strap not issued to Mountain Artillery. Blanket lined horse covers are issued when specified by commanding officer.
Set, consisting of—			
1 horse brush, 1 currycomb	1	.....	For each mounted driver, Field Artillery.

Ordnance property—Continued.

Articles of clothing and equipage.	(War set) for field and garrison service.	Additional, for use at posts and camps or stations of a relatively permanent nature.	Remarks.
Rifle, United States, caliber .30, M. 1903	1	.....	Per enlisted man armed with rifle, as per Tables of Organization.
Rifle, Browning automatic, M. 1918.....	(a)	.....	a As per Tables of Organization, and as approved for each coast-defense project.
Rod, cleaning, barrack, M. 1916.....	1	3	Per squad armed with rifle. Rod, cleaning, M. 1916, with case, may be issued in lieu.
Saber, Cavalry, M. 1913.....	1	1	As shown in Tables of Organization.
Saber, Cavalry, scabbard.....	1	1	Per each officer and enlisted man armed with saber.
Saddle (*see* Riding equipment).			
Scabbard, Browning automatic rifle, M. 1918.	(a)	.....	a 1 for each mounted automatic rifleman.
Scabbard, rifle, M. 1904.....	1	.....	Per mounted man and motor cyclist armed with rifle; and per wagoner and chauffeur until vehicles equipped with rifle clips are issued.
Screw driver, for United States rifle, caliber .30.	1	.....	Per squad.
Shovel, intrenching, M. 1910.....	4	4	Per squad equipped as Infantry.
Shovel, intrenching carrier, M. 1910.....	4	4	Per squad equipped as Infantry.
Spoon, M. 1910.....	1	1	To each officer and enlisted man.
Spurs, M. 1911, pairs.....	1	1	To each mounted officer and mounted enlisted man, including mounted drivers.
Stick, breech, for United States rifle, caliber .30.	1	.....	Per rifle.
Strap sling, for Browning automatic rifle, M. 1918.	1	1	Per automatic rifle.
Straps, spur, M. 1911, sets.....	2	2	To each mounted officer and mounted enlisted man including mounted drivers.
Suspenders, cartridge belt, M. 1907.....	1	1	To each mounted enlisted man armed with rifle.
Tape, steel, 5-foot.....	1	.....	To each first sergeant.
Thong, for United States rifle, caliber .30.	1	.....	Per rifle.
MEDICAL PROPERTY.			
Adhesive tape, spools.....	1	.....	Per squad.
First-aid packet.....	1	.....	Per officer and enlisted man.
Foot powder, box.....	1	.....	Per enlisted man.
MISCELLANEOUS.

BY ORDER OF THE SECRETARY OF WAR.

PEYTON C. MARCH,
General, Chief of Staff.

OFFICIAL:
J. T. KERR,
Adjutant General.

WASHINGTON : GOVERNMENT PRINTING OFFICE : 1919

CIRCULAR No. 251.

WAR DEPARTMENT,
WASHINGTON, *May 14, 1919.*

DECISION OF COMPTROLLER OF THE TREASURY WITH REFERENCE TO TRAVEL PAY.

In connection with Circular No. 252, War Department, 1919, issued this date, the following extracts from decisions of the Comptroller of the Treasury relative to travel pay as authorized by the act of Congress approved February 28, 1919 (sec. IV, Bul. No. 11, W. D., 1919), are published for the information and guidance of all concerned:

1. The Comptroller of the Treasury under date of April 17, 1919, rendered decision as follows:

"The Honorable THE SECRETARY OF WAR.

"SIR: I have your request of the 10th instant for decision of question formulated as follows:

"'(*a*) Shall the term "actual bona fide home or residence," as contained in section 3 of the act of February 28, 1919 (Public, No. 300), be considered for the purposes of travel pay as the place at which an enlisted man entered active military service by enlistment, induction under the selective service act of May 18, 1917, muster in, or otherwise?

"'(*b*) If question (*a*) above be answered in the negative, it is requested that the term "actual bona fide home or residence" be defined for the guidance of all concerned, having in mind the fact that the terms "home," "residence" singly, and when qualified by the words "actual" and "bona fide" or "actual bona fide," have been given various constructions by various courts as found in similar or different statutes.

"'(*c*) If question (*a*) above be answered in the negative, shall an enlisted man be paid travel pay to any place claimed by him as his actual bona fide home or residence based upon his written statement alone?

"'(*d*) If evidence other than the enlisted man's written statement as to place of actual bona fide home or residence be required, what evidence should ordinarily be submitted to support such claim, having in mind the fact that there are thousands of men being discharged daily who may claim actual bona fide residence at places other than the places at which they entered the military service.

"'(*e*) The act of February 28, 1919, provides for the payment of travel pay at the rate of 5 cents per mile to enlisted men honorably discharged since November 11, 1918, or who may be so discharged after the date of the approval of said act from the place of discharge to their actual bona fide home or residence, or original muster into the service, at their option. Those men who were discharged between November 11, 1918, and February 28, 1919, were paid travel pay as provided by the act of June 3, 1916, to the place of acceptance for enlistment, enrollment, or original muster into the service, at their option, at the rate of 3½ cents per mile and at the time of discharge they had no option under such law to elect that they should receive travel pay to their home or residence if such place be different than one of the places then specified by law. Question: May such men now, after having exercised the option authorized under the act of June 3, 1916, and having been paid and accepted the travel pay due them under such act, select another place claimed by them as their actual bona fide home or residence and become entitled to the difference between 3½ cents and 5 cents per mile for a distance equal to that for which they

have already been paid travel pay and to 5 cents per mile for any distance such home or residence is from place of discharge in excess of the distance for which previously paid? In this connection attention is invited to the fact that the United States Railroad Administration upon the request of the War Department authorized the sale of tickets to discharged soldiers between place of discharge and the place to which entitled to travel pay, as specified on their discharge certificates, at the rate of 2 cents per mile.

"'(*f*) While prior to its amendment section 126, national-defense act, authorized travel allowances to enlisted men discharged, "except by way of punishment for an offense," the amendatory act provides for the allowance to an enlisted man "honorably discharged." Does this change mean that only those soldiers whose certificates of discharge show that they were "honorably discharged" are entitled to the travel allowance, or does it mean that a soldier "discharged under honorable conditions" will be entitled to the allowance?'

* * * * * * *

"Section 126 of the act of June 3, 1916 (39 Stat., 217), is as follows:

"'SEC. 126. On and after July first, nineteen hundred and sixteen, an enlisted man when discharged from the service, except by way of punishment for an offense, shall receive 3½ cents per mile from the place of his discharge to the place of his acceptance for enlistment, enrollment, or original muster into the service, at his option: *Provided*, That for sea travel on discharge transportation and subsistence only shall be furnished to enlisted men.'

"Sections 3 and 4 of the act of February 28, 1919 (Public, No. 300), are as follows:

"'SEC. 3. That section one hundred and twenty-six of the act entitled "An act for making further and more effectual provision for the national defense, and for other purposes," approved June third, nineteen hundred and sixteen, be amended to read as follows:

"'"SEC. 126. That an enlisted man honorably discharged from the Army, Navy, or Marine Corps since November eleventh, nineteen hundred and eighteen, or who may hereafter be honorably discharged, shall receive 5 cents per mile from the place of his discharge to his actual bona fide home or residence or original muster into the service, at his option: *Provided*, That for sea travel on discharge, transportation and subsistence only shall be furnished to enlisted men: *Provided*, That naval reservists duly enrolled who have been honorably released from active service since November eleventh, nineteen hundred and eighteen, or who may hereafter be honorably released from active service, shall be entitled likewise to receive mileage as aforesaid."

"'SEC. 4. That all acts or parts of acts inconsistent with the provisions of this act are hereby repealed.'

"In decisions of this office June 26, 1916 (22 Comp. Dec., 697), and November 3, 1916 (23 Comp. Dec., 282), construing the travel-pay law of June 3, 1916, it was held that it is 'the purpose of the act to return a man to the place from which he was taken by the Government.'

"In letter to Secretary of War, dated February 13, 1919 (88 MS. Comp. Dec., 713), being prior to the enactment of the law of February 28, 1919, it is said:

"'The rate of travel pay "now prescribed by law for discharged soldiers" is found in section 126 of the act of June 3, 1916 (39 Stat., 217). Any regulation which does not conform to the provisions in said section would not meet the conditions imposed by the act of July 9, 1918, namely: "Now prescribed by law for discharged soldiers." Referring to regulation (*a*) submitted, it is proper to remark that a retired enlisted man or reservist of the Regular

Army while in pursuit of civil occupation may have been many miles away from his home or place of residence when he received the order directing him to report for active service. The place to which an enlisted man of the Army is entitled to travel pay on discharge is his home or the place at which he offers himself for enlistment or takes the initial step toward entering the service. * * * The regulations you have submitted are well stated and accord with existing laws with but one exception, namely: The last clause of regulation (*a*), I am of the opinion, should be changed to read as follows: "he shall receive the same allowance to his home, the place of record where the order directing him to report for active service was to be sent."'

"Reviewing past legislation we find that under the specific provisions of section 22, act of January 11, 1812 (2 Stat., 674), section 15, act of January 29, 1813 (2 Stat., 796), section 3, act of March 19, 1836 (5 Stat., 7), and section 16, act of March 3, 1863 (12 Stat., 734), an enlisted man of the Regular Army or the Volunteer Force when discharged from the service of the United States was entitled to travel pay from the place of his discharge to his "residence." Section 15 of the act of January 29, 1813 (2 Stat., 796), and section 8 of the act of June 20, 1864 (13 Stat., 145), were embodied in the Revised Statutes as sections 1289 and 1290. This was in force until the enactment of the law of March 2, 1901 (31 Stat., 902), which authorizes the payment of travel pay to an officer 'from the place of his discharge to the place of his residence at the time of appointment or to the place of his original muster into the service.' A provision in the same law relating to travel pay of enlisted men was superseded by subsequent acts of Congress, and the travel pay law as to enlisted men of the Army discharged on or after July 1, 1916, is under the provisions of above-quoted acts of June 3, 1916, and February 28, 1919, as follows:

"To those discharged from the service in period from July 1, 1916, to November 10, 1918, honorably, without honor, or dishonorably, but not by way of punishment for an offense, 3½ cents per mile.

"To those discharged from the service in period from November 11, 1918, to February 27, 1919, without honor, or dishonorably, but not by way of punishment for an offense, 3½ cents per mile.

"To those discharged honorably on or after November 11, 1918, 5 cents per mile.

"Paragraph 150, Army Regulations, contains a provision as follows:

"'Discharge certificates will be used in the discharge of enlisted men and for no other purpose, and will be of three classes: For honorable discharge, for discharge, and for dishonorable discharge.'

"This law, passed by Congress February 28, 1919, so far as it amends section 126 of the act of June 3, 1916, was the result of an amendment offered in the Senate to the bill which provided for the retention of uniforms and other equipment by enlisted men. The amendment as offered on the floor of the Senate and adopted by the Senate February 22, 1919, was to amend section 126 to read as follows:

"'That an enlisted man discharged from the Army, Navy, or Marine Corps service, except by way of punishment for an offense, shall receive 5 cents per mile from the place of his discharge to his actual bona fide home or residence, or original muster into the service, at his option: *Provided*, That for sea travel on discharge, transportation and subsistence only shall be furnished to enlisted men.'

"As to discharge, except by way of punishment for an offense, this was similar to the former law, but the reference to 'actual bona fide home or resi-

dence,' was new. This amendment with others was disagreed to by the House and the conference committee reported in lieu of this Senate amendment the language which was afterwards enacted in the law of February 28, 1919, as hereinbefore quoted. The conference committee did not explain the purpose of the amendment as the committee framed it, but Senator Chamberlain, chairman of the Senate Committee on Military Affairs, explained the conference report to the Senate by the statement that the amendment which the Senate had adopted was broadened somewhat by the conference committee to allow 5 cents a mile either to their homes or to their place of enlistment and allowed marines and men of the Navy the same rate of pay, stating that the bill was broadened to give a man the option of receiving mileage either to his home or to his place of enlistment.

"In view of this change in the law it is evident that the Congress intended that the additional pay granted at 5 cents instead of 3½ cents a mile should be calculated upon a basis different from that which had been established by interpretation of the former laws. That intention must have been that the enlisted man should have the 5 cents a mile to his actual bona fide home or residence even if that place was different and at a greater distance from the place of discharge than the place of his 'acceptance for enlistment, enrollment, or original muster into the service' referred to in section 126 of the act of June 3, 1916.

["The question in the case of any man who exercises his option by deciding to receive 5 cents a mile to the place of original muster into the service is easily solved, because that place is indicated in the records of the service. But when he exercises the option by deciding to receive the 5 cents a mile to the place of his actual bona fide home or residence an entirely different situation arises, because of the fact that the records of the War Department furnish no evidence to establish the place of his actual bona fide home or residence, and that place, as a rule, is unknown to the military authorities. I think it is evident that a statement or affidavit of the enlisted man would not be sufficient evidence upon which to decide the question in all cases. It is not possible to lay down any general rules by which the place can be determined immediately by officers charged with payment of travel pay. This office can not undertake to state what form of evidence would be acceptable in all cases, because what would be sufficient in one case might be insufficient in another.

"While I am convinced that the language used in this law requires a different construction from the language used in the former law in order to give effect to the new words introduced in the law by the amendment referred to, I think it is clear that, in the absence of a rule of evidence established by the law itself, it is impossible to establish a procedure by which the travel pay to the actual bona fide home or residence can be allowed when such place is more distant from the place of discharge than the place of original muster into the service.

"It is to be assumed, of course, that the enlisted man, having the option to receive 5 cents a mile for the distance from place of discharge to one of two places, will very properly select the place at the greater distance. Whether or not he intends to make the travel to the place selected is immaterial.

"It is therefore concluded that upon discharge an enlisted man should be paid 5 cents a mile from place of discharge to place of original muster into the service, and if the place claimed to be that of his actual bona fide home or residence is at a greater distance, he can present a claim for the difference between that amount and the amount paid him on discharge. Such claim should

be made to the Auditor for the War Department, where the evidence as to the actual bona fide home or residence can be considered and such amount as may be found due can be certified for payment.]

"This answers questions (*a*), (*b*), (*c*), and (*d*). In answer to question (*e*) as to men discharged between November 11, 1918, and February 28, 1919, and later, who were paid 3½ cents a mile under the act of June 3, 1916, they may now be paid the difference of 1½ cents per mile from place of discharge to place of acceptance for enlistment, enrollment, or original muster into the service. Those who claim payment to the place of actual bona fide home or residence should file a claim therefor with the Auditor for the War Department.

"In connection with this question (*c*) and your reference to the granting by the United States Railroad Administration of a rate of 2 cents per mile, I am of opinion that this does not affect the rights of enlisted men under the law and authorizes no deduction from the 5 cents a mile.

"Answer to (*f*): An enlisted man who is not dishonorably discharged nor discharged without honor, but is discharged under honorable conditions, although the word honorably is omitted from his discharge paper, may be said to be honorably discharged within the meaning of section 3 of the act of February 28, 1919. * * *"

2. The Comptroller of the Treasury in his decision of May 3, 1919, in reconsidering that part of his decision of April 17, 1919, shown in brackets, stated that:

"Before this decision was written inquiry was made at the War Department and I was unofficially advised, as stated in the decision, that the records of the War Department furnished no evidence to establish the place of actual bona fide home or residence, and that place as a rule is unknown to the military authorities.

"I am now advised that when a man entered the service he was required to state the place of his residence, and that this place was recorded on his service record and this record is now in the possession of his commanding officer (or the War Department in the case of men already discharged). This record of itself is not sufficient evidence to establish a man's actual bona fide home or residence, but as this statement was made at a time when no possible advantage would be gained by claiming a place other than the actual residence, I am of the opinion that if the soldier in an affidavit made at or about the time of his discharge names a place as his actual bona fide home or residence which coincides with that stated on the service record, this record and affidavit would warrant the disbursing officer in making payment to that place, and the decision of April 17, 1919, is modified to this extent."

[242.17, A. G. O.]

By order of the Secretary of War:

PEYTON C. MARCH,
General, Chief of Staff.

Official:

J. T. KERR,
Adjutant General.

WASHINGTON : GOVERNMENT PRINTING OFFICE : 1919

CIRCULAR No. 252.

WAR DEPARTMENT,
WASHINGTON, *May 14, 1919.*

TRANSFER OF ENLISTED MEN TO DEMOBILIZATION CENTERS FOR DISCHARGE.

So much of Circular No. 85, War Department, 1918, as conflicts with the provisions of this circular; Circulars Nos. 106, 122, and 149, War Department, 1918; Circulars Nos. 13, 17, 37, 104, and 110, War Department, 1919, are rescinded, and the following substituted therefor:

Travel Allowances.

1. Under the provisions of section 3 of an act of Congress, approved February 28, 1919, entitled "An act permitting any person who has served in the United States Army, Navy, or Marine Corps, in the present war, to retain his uniform and personal equipment, and to wear the same under certain conditions" (sec. IV, Bul. No. 11, W. D., 1919), all enlisted men honorably discharged from the Army since November 11, 1918, will be paid on discharge travel pay at the rate of 5 cents a mile from their places of discharge to their points of entry into the service or to their actual bona fide homes or residence, at their option.

Point of Entry into Military Service.

2. The place of a soldier's entry into the military service for purpose of determining travel allowances due him upon separation from the service is as follows:

a. The place of acceptance for enlistment in case of men who enlisted in the Regular Army or men who enlisted in an organization of the National Guard after it had been called into Federal service: Men who enlisted in the Regular Army for active service are, upon furlough to the Reserve after November 11, 1918, entitled to travel pay at the rate of 5 cents per mile from place of furlough to place of acceptance for enlistment, or to their actual bona fide home or residence, at their option, provided they have not been previously furloughed to the Reserve in current enlistment and subsequently recalled to active service.

b. The place of induction in case of men inducted under the selective-service law: The place of a soldier's induction into the service is always the site of the local board to which the registrant reported (Form 1028, P. M. G. O.) for immediate military service. In the large majority of cases this was the same as his local board of registration or origin. In some cases it was, for geographical convenience, some other local board or board of transfer. In those exceptional cases when drafted men reported for military service directly to camps or stations and not to local boards for entrainment to camp or station their "places of induction" will, nevertheless, be taken to be the local boards to which they were ordered to report on Form 1028.

c. The home rendezvous of the organization with which they reported for present tour of Federal service in case of men who belonged to the National Guard prior to its being called or drafted into Federal service and reported for active Federal service as members of such National Guard organizations under call or draft by the President.

d. Their home in case of men of the Regular Army, who within current enlistments have been furloughed to the Regular Army Reserve and subsequently recalled to active service, and men originally enlisting in the enlisted Reserve Corps and retired enlisted men who are called to active duty: Such

32-24-93

home is construed as being the place to which their order for mobilization for active service was originally sent or should have been sent; that is, the place reported as last residence address by such soldier prior to his being called to such active service. All of these men upon return to an inactive status, as distinguished from being discharged, are entitled, under provisions of law contained in the Army appropriation act approved July 9, 1918 (Bul. No. 43, W. D., 1918), to 3½ cents per mile, payable in advance, upon release from such active duty, and not to 5 cents per mile as provided for discharged soldiers; but if, instead of being returned to an inactive status, the reservists mentioned above are discharged, they are entitled, under the act approved February 28, 1919 (sec. IV, Bul. No. 11, W. D., 1919), and section 29 of the act approved June 3, 1916 (Bul. No. 16, W. D., 1916), to 5 cents per mile as travel pay.

Travel-pay Affidavit.

3. For the purpose of payment of travel pay under the provisions of this circular, a soldier's actual bona fide home or residence will be taken to be his residence, as shown under the caption "Residence" in the first or second line of the "Descriptive list" on page 2 of his service record, supported by his affidavit, as prescribed in paragraph 4 below.

4. The present policy of the War Department contemplates the discharge of enlisted men at demobilization centers (see par. 15) nearest the points (either their homes or residences or points of entry into the service) to which they desire to receive travel pay on discharge. To this end each enlisted man will execute, subsequently to his designation for discharge, before an officer competent to administer oaths, the following affidavit, in which he will state whether he desires to receive travel pay to the place of entry into military service or to his actual bona fide home or residence:

STATE OF _____
County of _____, *ss.*

I, _____
(Christian name.) (Surname.)

_____
(Serial number.) (Rank.) (Present organization.)

United States Army, being first duly sworn, depose and say that my actual bona fide present home or residence is

_____
(Street No.) (City.) (County.) (State.)

and that I entered the military service at _____
(City and State.)

I further depose and state under section 3, act of February 28, 1919 (Public 300, 65th Cong.), I elect to receive travel pay from place of discharge or furlough to reserve to _____
(Fill in one of two places named above.)

I fully understand that any false statement made by me in this affidavit renders me liable to prosecution for fraud.

_____
(Signature of soldier.)

Sworn and subscribed to before me this _____ day of _____, 1919, at Station.

_____
(Signature of officer administering oath.)

_____
(Rank and official title of officer.)

This affidavit will be filed with the soldier's service record after his discharge, and will in all cases be executed on paper not larger than 7½ by 8½ inches in dimensions. In addition, the following statement will be written or stamped with a rubber stamp upon the margin of the final indorsement of the service record and will be initialed by the officer signing the final indorsement:

"Soldier's travel pay affidavit filed herewith ----------."

In case the soldier claims travel pay to a residence other than that shown in his service record, he will be sent to the demobilization camp nearest his point of entry in the service for discharge. He will upon discharge be credited and paid travel pay at the prescribed rate from his point of discharge to his point of entry into the service and will be advised that he may submit a claim to the zone finance officer, Lemon Building, Washington, D. C., for transmission to the Auditor for the War Department for any difference in travel pay that he may consider due him. The Auditor for the War Department will, upon the soldier's request, furnish the necessary form of application with such information as is necessary to enable the soldier to understand what proof must be submitted to fully establish such claims.

5. The affidavit called for in paragraph 4 will in all cases be executed prior to the transfer of the enlisted men concerned to the proper demobilization center for discharge. In the case of men stationed in this country affidavits will be executed prior to the departure of the men from their "present stations." In the case of men returning from overseas, affidavits will be executed prior to their departure from the port of embarkation in the United States for the proper demobilization centers.

Men who entered the service abroad will be required to execute the affidavit prior to the departure from abroad of units to which they are assigned or attached. Only such of these men as elect to receive travel pay to points within the United States, its insular possessions, Alaska, the Canal Zone, Canada, or Mexico will be returned to the United States for discharge. All men who claim travel pay to points elsewhere will be discharged overseas. In no case will an enlisted man be required to execute this affidavit prior to his designation for discharge.

Remarks on Final Pay Roll.

6. Based upon the information contained in the soldier's service record and affidavit as to his residence, an officer preparing final pay roll of enlisted men will, under these regulations, determine the place to which the soldier is to be paid travel pay by the disbursing officer, and will enter in column "Date and place, etc., to which entitled to travel allowance" the place to which the soldier has elected to receive travel pay as between the place of entry into the military service and actual bona fide home or residence, except that in the event the soldier has designated as his actual bona fide home or residence a place other than that shown on his service record, the place of entry into the military service will be noted in such column, and the soldier paid accordingly. In such cases final pay rolls will carry the remark under the soldier's name as follows: "The soldier claims his actual bona fide home or residence as ————————, which can not be verified from his service record." The soldier will be advised of such payment in writing by the officer preparing final payment roll, and that he may submit to the zone finance officer, Lemon Building, Washington, D. C., claim for the additional distance involved to his actual bona fide home or residence designated by him in such affidavit. The zone finance officer will

make record of the claim and transmit same to the Auditor for the War Department for settlement. Similar action will be taken by the officer preparing final statements.

Claims for Additional Travel Pay.

7. All enlisted men who have been honorably separated from the service since November 11, 1918, and who consider that they have a claim for additional travel pay under the act of Congress approved February 28, 1919 (sec. IV, Bul. No. 11, W. D., 1919), may submit claim therefor directly to the zone finance officer, Lemon Building, Washington, D. C. (envelope to be marked "Travel allowances"). Such claim must be submitted in the form of an affidavit upon a blank form which may be obtained from any Army recruiting officer, the Red Cross or other agencies organized to aid soldiers, or from the Director of Finance, War Department, Washington, D. C., and will be accompanied by the soldier's original discharge certificate or a true copy thereof certified as such by an Army recruiting officer. The original discharge certificate will be returned to the soldier after it has served its purpose. A true copy of discharge certificate will be accepted only when certified by an Army recruiting officer under the following conditions: The true copy will contain both printed and written matter of every nature and description of both sides of the original discharge certificate. This true copy, together with the original discharge and the soldier's affidavit, will be presented to the nearest Army recruiting officer, who will make and sign a certificate in the margin on the back of the original discharge in ink, or stamp with indelible ink, reading as follows:

"A true copy of this discharge certificate has been made and attested to by me to enable the soldier to obtain travel pay under act of February 28, 1919."

The officer will also place the following certificate on the copy of the discharge which is to be forwarded to the zone finance officer, Washington, D. C.:

"I certify that the foregoing is an exact, true, and literal copy of the discharge certificate of _____, and that I have written in ink or stamped with indelible ink and signed on the original from which this copy was made, the following words: 'A true copy of this discharge certificate has been made and attested to by me to enable the soldier to obtain travel pay under act of February 28, 1919.'"

Officers signing certificate will show rank and station.

After this certificate has been made the original discharge will be returned to the soldier, and true copy and the affidavit will be forwarded by the recruiting officer to the zone finance officer, Lemon Building, Washington, D. C., for settlement. Blank forms for making certified copies of discharge certificates previously furnished recruiting officers in connection with claims for $60 bonus may be used for this purpose by striking out of the recruiting officer's certificate the last word "bonus" and adding thereto the words "travel pay under act of February 28, 1919." Enlisted men who submitted certified copies of discharge certificates in connection with their claims for payment of the $60 bonus need not furnish another certified copy of discharge, but will forward the affidavit referred to above directly to the zone finance officer, Lemon Building, Washington, D. C., stating that they have already furnished certified copy of discharge in claim for $60 bonus, to which reference should be made in connection with the claim for travel pay. In cases where the zone finance officer is precluded, under the decisions of the Comptroller of the Treasury published in Circular No. 251, War Department, 1919, from making settlement in full of claim as presented, such zone finance officer will make settlement of the amount that he is author-

ized to pay and refer the case to the Auditor for the War Department for settlement of the balance of such claim upon its merits.

Conditions under which Men may be Discharged at "Present Station."

8. Under instructions heretofore or hereafter issued directing the discharge of enlisted men, only those men will be discharged at their present stations who fall within the following special classes:

a. Men who are nearer to the points to which they elect to draw travel pay on discharge than they are to any demobilization centers to which they can be sent for discharge.

b. Men who are nearer to the points to which they elect to draw travel pay on discharge than they would be if sent away to any demobilization center for discharge.

c. Men who have married in the vicinity of their present stations and whose applications for discharge at such stations have been approved by the officer authorized to direct their discharge.

d. Men who have had employment in the vicinity of their present stations prior to entry into the service and who have definitely arranged to return to such employment, and whose written applications for discharge at their present stations have been approved by the officers authorized to direct their discharge.

The fact that employment can be obtained in the vicinity of a soldier's present station after discharge does not act to bring a case under the provisions of this paragraph. The soldier must actually have been employed in the vicinity prior to his entry into the service.

e. When it is desired that a man be employed after his discharge in a civilian capacity at his present station by the military authorities authorized to hire civilians, and satisfactory assurance is given the officer authorized to direct the discharge that the man will accept employment for the desired period of time.

f. When the transfer to a demobilization center for discharge of a man whose discharge has been approved on the grounds of sickness or distress in his family under the provisions of Circular No. 77, War Department, 1918, will impose hardship upon those for whose relief his discharge has been approved.

Applications for discharge at the "present station" as thus provided for will be closely scrutinized, and will be approved only after the grounds upon which they are based have been clearly shown to come within the above-described classes.

In cases not coming within the above classes in which it appears that undue hardship will be imposed upon a man by his transfer to a demobilization center for discharge, request for his discharge at his "present station" may be made to The Adjutant General of the Army.

Transfers to Demobilization Centers.

9. Every other enlisted man ordered discharged will be sent for discharge to a demobilization center near the point designated as the point to which he will be paid travel pay. Normally this demobilization center will be the one nearest such point. In exceptional cases, however, when the total distance to be traveled by the man to be discharged will be substantially reduced, or when his return to the place designated in his affidavit will be clearly facilitated, the proper commanding officer may send him for discharge to a demobilization center other than the one nearest the point named in his affidavit. No such

exception will be made to facilitate a man's return to the point named in his affidavit when it will cause an excessive increase in the total cost of transportation and travel pay over that which would be incurred by the Government in sending him for discharge to the demobilization center nearest the point to which he will receive travel pay.

10. Any case which can not be decided under the provisions of paragraph 9 without imposing undue hardship upon the soldier concerned will be referred to The Adjutant General of the Army, attention room 336, for decision.

11. Men sent from a station to the same demobilization center for discharge will be formed in a detachment and will be accompanied, if practicable, by a sufficient number of commissioned officers to maintain discipline, preferably from localities near the demobilization center to which the detachment is sent. When the detachment consists of more than 30 men, the commanding officer of the station from which it is sent will prearrange all details by wire with the commanding officer of the demobilization center. When the detachment consists of 30 men or less, no preliminary arrangements are necessary. In all cases, however, the commanding officer of the demobilization center will be notified by wire of the date and hour of the detachment's departure from its station and of its probable arrival at the demobilization center. These instructions are not to be construed as prohibiting the sending of enlisted men singly to demobilization centers for discharge. This practice will be minimized as much as possible, but the discharge of no enlisted man will be unduly delayed awaiting the departure of a detachment for the demobilization center to which he is to be sent.

12. Special instructions are issued from time to time relative to the disposal of men and organizations arriving from overseas. Commanding generals of ports of embarkation and other commanding officers concerned will in each case be governed by such special instructions.

13. This circular will be quoted as authority for transfers specified above. Each movement of enlisted men under this authority will be reported by wire to The Adjutant General of the Army, attention room 155, stating destination and number of men sent.

14. All records and papers of men sent to demobilization centers for discharge will be completed as far as possible prior to their departure from the station from which they are sent.

Demobilization Centers.

15. The following stations are designated as demobilization centers and men will not be sent for discharge under these instructions to stations other than those listed below:

Camp Bowie, Tex.
Camp Custer, Mich.
Camp Devens, Mass.
Camp Dix, N. J.
Camp Dodge, Iowa.
Camp Funston, Kans.
Camp Gordon, Ga.
Camp Grant, Ill.
Camp Jackson, S. C.
Camp Lee, Va.
Camp Lewis, Wash.
Camp Meade, Md.
Fort Oglethorpe, Ga.
Camp Pike, Ark.
Presidio of San Francisco, Calif.
Fort D. A. Russell, Wyo.
Camp Shelby, Miss.
Camp Sherman, Ohio.
Camp Taylor, Ky.
Camp Travis, Tex.
Camp Upton, N. Y.

16. The commanding officers of the stations listed will discharge all men sent under authority of this circular to their respective stations who, upon examination, are found eligible therefor under current instructions. They will expedite the discharge of such men and the necessary active supervision will be instituted and maintained to insure a thorough and rapid accomplishment of all work incident to the demobilization of organizations and the discharge of men as ordered.

Physical Examination.

17. All men designated for discharge, except men arriving from overseas, will be given a thorough preliminary physical examination prior to the time they leave their present station for demobilization centers and men found not physically eligible for discharge at such examination will not be sent to a demobilization center for discharge. When such men become eligible therefor they will be immediately sent to the proper demobilization center for discharge. The final physical examination prior to separation from the service will be made at the station where the man is actually separated from the service. Men arriving from overseas at ports of embarkation in this country need not be given this preliminary examination prior to their departure for demobilization centers.

Men transferred to a demobilization center for immediate discharge who are found physically ineligible therefor will be transferred to a convalescent center or to the proper hospital for treatment. Intensive treatment will be given venereal cases. When they become eligible therefor, all such men will be immediately discharged under the authority of this circular, without further orders. A report giving number, reasons prohibiting discharge, and station from which all men ineligible for discharge came, will be promptly made to The Adjutant General of the Army, attention room 336, except in the case of men returned from overseas, who are forwarded from ports of embarkation.

Disposition of Men Desiring to Remain Temporarily in Service.

18. Men desiring to remain temporarily in the service may be transferred without loss of grade to unassigned in the arm or corps to which they belong and will be attached as extra members to permanent camp organizations.

19. Current War Department instructions, relative to discharge, should be thoroughly studied in connection with this circular. Attention is particularly directed to the provisions of Circular No. 128, War Department, 1918, and Circulars Nos. 14, 23, 34, and 66, War Department, 1919.

[246.86, A. G. O.]

BY ORDER OF THE SECRETARY OF WAR:

PEYTON C. MARCH,
General, Chief of Staff.

OFFICIAL:
J. T. KERR,
Adjutant General.

CIRCULAR No. 375.

WAR DEPARTMENT,
WASHINGTON, *July 29, 1919.*

DISPOSITION OF DRAFT DESERTERS.

1. When any draft registrant voluntarily reports to a post, camp or station for determination of his status and disposition of his case or when any draft deserter is apprehended and delivered to military jurisdiction, he will ordinarily be unaccompanied by any documentary evidence of his identity or desertion. When such a registrant reports or is delivered to a post, camp or station, the commanding officer concerned should telegraph or write to The Adjutant General of the Army, giving the name of the registrant, the designation of his local board, and when possible his order number. In response to such notifications, The Adjutant General of the Army will furnish the commanding officers concerned duly authenticated copies or abstracts of all selective service records available concerning the registration, induction and desertion of the man. This information should be of assistance in the investigation directed in Circular No. 75, War Department, 1919, to determine whether the man should be brought to trial or given a discharge (Form No. 526, A. G. O.), and such records will also be needed to assist in proving desertion in case a man is brought to trial. If the records show that the man was not inducted or if inducted did not desert, The Adjutant General of the Army will advise the commanding officer of the actual draft status of the registrant.

32-24-52

2. The following suggestions are furnished for the use of commanding officers charged with bringing draft deserters to trial, and were prepared by a board of officers charged by The Adjutant General of the Army to make recommendations in reference to what selective service records should be furnished by The Adjutant General of the Army to commanding officers of posts, camps and stations at which draft deserters reported or were surrendered. All officers concerned are cautioned that these suggestions are merely a guide to assist in the preparation of cases. These suggestions will not be construed to diminish the responsibility of the officers concerned, that all documentary and oral evidence that can be secured to properly confirm and strengthen the case is secured.

"PROPOSED INSTRUCTIONS.

"I. To prove draft desertion three things must be shown, viz.: (1) An order inducting some one by the name of the accused into the military service; (2) failure of that person to appear for induction, or after appearance to entrain, or after entrainment to proceed to camp; and (3) identification of the accused as the person to whom the order and the failure relate.

"1. The order of induction is always a matter of record. In any given case it will have been made by the local board, unless the draftee was delinquent in the matter of appearing for physical examination or of filing a questionnaire (after Dec. 15, 1917), in which event it will have been made by the adjutant general of the State (or his official substitute).

"(*a*) *Induction by the local board prior to December 15, 1917.*—The best record evidence would be a duly authenticated abstract of that portion of the local board's docket (Form 178) which relates to the accused, showing by entry in column 47 the fact and date of the order (this, under M. C. M., par. 238, 239, would, if complete, import verity and not require testimony to aid it); or, the original of Form 164–C showing on its face that it was mailed. If neither of these is available then a duly authenticated copy of Form 164–C (which must be aided by the oral testimony of some one who knows that the original thereof

ADMISSION OF HONORABLY DISCHARGED SOLDIERS AND SAILORS TO UNIVERSITY OF COLORADO.

32-24-106

The University of Colorado, located at Boulder, 30 miles northwest of Denver, will admit to all departments free of tuition or other charges all honorably discharged soldiers and sailors from any State who were disabled in the service because of wounds or disease and who possess the required educational qualifications. The School of Law of the University of Colorado will admit all honorably discharged soldiers and sailors who were disabled in the service because of wounds or disease and who have had a high-school education or its equivalent, though two years of college work is required of other applicants for admission.

OFFICIAL:

P. C. HARRIS,
Acting The Adjutant General.

98504°—19

WASHINGTON : GOVERNMENT PRINTING OFFICE : 1919

was mailed according to section 5, Mobilization Regulations); or, a duly authenticated copy of the particular list (Form 164–A) containing the name of the accused (which likewise must be aided by the oral testimony of some one who knows that a duplicate was posted as required by section 5, Mobilization Regulations). If all the foregoing fail, resort may be had to a duly authenticated copy of the particular report of the local board to The Adjutant General of the Army (Form 146–C), which contains the name of the accused (coupled with the oral testimony of some one who knows that said report was regularly compiled from official data and is correct) or to oral evidence, if there be a witness competent to testify to the fact from knowledge.

"(*b*) *Induction by the local board on or after December 15, 1917.*—The best and sufficient evidence is an authenticated abstract of that portion of the classification list (Form 1000) which relates to the accused and which should show by entry in column 24 the fact and date of induction (this, like Form 178, need not be supported by testimony). Failing it, however, resort should be had to the original of the notice (Form 1028) if available, showing on its face that it was mailed; or a duly authenticated copy of (Form 1028), coupled with the oral testimony of some one who knows that the original was mailed as required by section 159–D, Selective Service Regulations. If neither of these can be had, then a duly authenticated copy of the particular report to The Adjutant General of the Army (Form 1018) which contains the name of the accused, or a duly authenticated copy of the cover sheet of the particular case (Form 1001–B), coupled with the oral testimony of some one who knows that the report or cover sheet, as the case may be, was regularly compiled from official data and is correct.

"(*c*) *Induction by the adjutant general of the State (or his official substitute) prior to December 15, 1917.*—The best evidence would be the original of the notice (no form number) required by section 3 of Supplemental Rules and Regulations No. 1, showing on its face that it was duly mailed; failing that, a duly authenticated copy of said notice, coupled with the oral testimony of some one who knows that the original thereof was mailed as required by said section on or before the date it bears; if neither of the above can be had, then a duly authenticated copy of the particular report to The Adjutant General of the Army (Form 146–B) which contains the name of the accused, coupled with the oral testimony of some one who knows that said report was regularly made from official data and is correct.

"(*d*) *Induction by the adjutant general of the State (or his official substitute) on or after December 15, 1917.*—The best evidence would be the original of the notice to report (Form 1014) showing on its face that it had been duly mailed; failing that, a duly authenticated copy of said notice, coupled with the oral testimony of some one who knows that the original was mailed as and at the time required by section 133, Selective Service Regulations. If neither of the above can be had, then a duly authenticated copy of the particular report to The Adjutant General of the Army (Form 1018) which contains the name of the accused, coupled with the oral testimony of some one who knows that said report was regularly compiled from official data and is correct; or a duly authenticated abstract of that portion of the final list of all deserters or delinquents (Form 4003) which refers to the accused, coupled with the oral testimony of some one who knows that said list was properly compiled from official data and the abstract thereof relating to the accused is correct; failing all the above, resort may be had to the classification list of the local board (Form 1000) or the cover sheet (Form 1001–B) if supported by oral testimony sufficient to establish that the entries were made upon and in accordance with the receipt by the local board from the adjutant general of duplicate 1014.

"(*e*) Induction by the adjutant general of the State (or his official substitute) on or after September 16, 1918, may also be established by a duly authenticated abstract from the delinquent list (Form 1013–A) without further evidence.

"(*f*) In every case a duly authenticated copy of the registration card (Form 1) should be put in evidence for the general aid that it affords.

"2. Failure to appear for induction or to entrain or to proceed to camp may usually, though not always or necessarily, be shown by the record. The oral testimony of some one who knows will of course suffice.

"(*a*) If the induction was by the local board prior to December 15, 1917, then a duly authenticated abstract of that portion of the docket (Form 178) referring to the accused; if that is not available, the next resort would be a duly authenticated copy of the inside sheet of Form 164–A; failing that, a duly authenticated copy of the particular report (Form 146–C) containing the name of the accused.

"(*b*) If the induction was by the local board after December 15, 1917, the best record evidence would be a duly authenticated abstract of that portion of the classification list (Form 1000) referring to the accused; failing that, a duly authenticated copy of the particular report (1018) containing the name of the accused, or, if the failure was to entrain or proceed to camp, after appearance before the local board, a duly authenticated copy of the list of persons entrained for camp (Form 1029) which contains the name of the accused may be utilized.

"(*c*) If the induction was made by the adjutant general of the State (or his official substitute) prior to December 15, 1917, the only available record evidence of failure would be a duly authenticated copy of that particular report (Form 146–B) which contains the name of the accused.

"(*d*) If the induction was by the adjutant general of the State (or his official substtiute) after December 15, 1917, the evidence of failure would appear of record in Form 1018, and if the induction was on or after September 16, 1918, in Form 1013–A.

"3. Identification of the accused as the person inducted can not be directly established by record; identity of names will furnish a sufficient prima facie showing, but in cases where several persons of the same name have been inducted by the same board, the registration card (Form 1) will furnish additional support by its data of residence, physical description, employment, and the like.

"II. In the present state of the law it can not be asserted that any of these records except Forms 178, 1000, and 1013–A import verity, so that they will stand alone, unsupported by testimony. Hence it is always advisable whenever possible to support these records by appropriate tetsimony. It should be noted, as a matter of caution, that the testimony must be oral and in open court; depositions can not be used in the prosecution of wartime desertions."

[324.71, A. G. O.]

BY ORDER OF THE SECRETARY OF WAR:

PEYTON C. MARCH,

WASHINGTON : GOVERNMENT PRINTING OFFICE : 1919

CIRCULAR No. 400.

WAR DEPARTMENT,
WASHINGTON, *August 15, 1919.*

TRANSFER OF ENLISTED MEN TO DEMOBILIZATION CENTERS FOR DISCHARGE—AMENDMENT TO CIRCULAR NO. 252, WAR DEPARTMENT, 1919.

Circular No. 252, War Department, 1919, as amended by Circulars Nos. 280, 317, 325, and 349, War Department, 1919, is further amended as follows:

1. The last subparagraph of paragraph 4 is amended to read as follows:

In case the soldier claims travel pay to a residence other than that shown in his service record, he will be sent for discharge to the demobilization center nearest his point of entry into the service, unless his case properly falls within the provisions of paragraph 8, or of subparagraph *a*, paragraph 9, as herein amended. A soldier claiming travel pay to a residence other than that shown in his service record will, in all cases, be credited and paid travel pay at the prescribed rate from his point of discharge to his point of entry into the service, and will be advised that he may submit a claim to the Zone Finance Officer, Lemon Building, Washington, D. C., for transmission to the Auditor for the War Department for any difference in travel pay that he may consider due him. The Auditor for the War Department will, upon the soldier's request, furnish the necessary form of application with such information as is necessary to enable the soldier to understand what proof must be submitted to fully establish such claim.

2. The last subparagraph of paragraph 8 is amended to read as follows:

In cases not coming within the classes outlined in subparagraphs *a* to *g* (see Cir. No. 325, W. D., 1919), and in which it appears that undue hardship will be imposed upon a man by his transfer to a demobilization center for discharge, the request for discharge at his "present station" will be made to The Adjutant General of the Army, attention room 336.

3. The first sentence of paragraph 9 is amended to read as follows:

Every other enlisted man ordered discharged, except those men whose cases properly fall within the provisions of the following subparagraph, will be sent for discharge to a demobilization center near the point designated as the point to which he will be paid travel pay.

4. The following subparagraph is added to paragraph 9:

a. In case, however, the soldier establishes by good and sufficient proof, and by his travel pay affidavit, the fact that his actual bona fide residence is at a place other than that shown in his service record, he may, upon his properly approved written application therefor, be sent for discharge to a demobilization center so located that the travel pay due him from place of discharge to point of entry into the service will be sufficient to enable him to return to his residence after discharge. In the selection of this demobilization center, care will be taken to limit the total cost of transportation to the lowest practicable minimum. The proof of the location of the soldier's residence must, in all cases, be sufficient to establish beyond a reasonable doubt, the fact that the case is a bona fide one, and should be obtained from sources other than the soldier himself. The travel-pay affidavit of each soldier discharged, as provided for in this subparagraph, will show that he elects to draw travel pay from point of discharge to point of entry into the service. His written application for discharge, as provided for in this subparagraph, should be submitted at the time his travel-pay affidavit is executed, and should quote this subparagraph and circular as authority for the special consideration requested.

Extension of jurisdiction of Board of Appraisers I
Organization of Air Service units II

I. Extension of jurisdiction of Board of Appraisers.—1. The jurisdiction and powers conferred upon the War Department Board of Appraisers by section II, General Orders, No. 30, War Department, 1918, as amended by section II, General Orders, No. 41, War Department, 1919, are hereby extended to include claims arising under the terms and conditions, whether expressed or implied, of leases for the use and occupation of real estate by the United States Army.

2. In the disposition of such claims the War Department Board of Appraisers may make original investigation or refer any claim for investigation and recommendation to be made as provided for in section II, General Orders, No. 39, War Department, 1919.

3. The record of the claim and the approved recommendation by the War Department Board of Appraisers will be forwarded to the Real Estate Service, for transmission to the Director of Finance for final disposition.

[334.8, A. G. O.]

II. Organization of Air Service units.—The following Air Service units will be organized at the stations indicated, under Tables of Organization, 1919, for the Air Service:

a. *Units.*	*Stations.*
First Wing	Kelly Field, San Antonio, Tex.
Second Wing	Langley Field, Hampton, Va.
1st Day Bombardment Group	Ellington Field, Houston, Tex.
1st Surveillance Group	Kelly Field, San Antonio, Tex.
1st Pursuit Group	Selfridge Field, Mt. Clemens, Mich.
1st Army Observation Group	Park Field, Millington, Tenn.
1st Photo Section	Ft. Bliss, Tex.
2d Photo Section	Langley Field, Hampton, Va.
4th Photo Section	Langley Field, Hampton, Va.
6th Photo Section	Langley Field, Hampton, Va.
7th Photo Section	Langley Field, Hampton, Va.
11th Photo Section	Langley Field, Hampton, Va.
12th Photo Section	Canal Zone.
14th Photo Section	Langley Field, Hampton, Va.
15th Photo Section	Langley Field, Hampton, Va.

133917°—19

The First Wing will consist of all groups and organizations engaged on work in connection with border duty. The Second Wing will exercise supervision of all units on the Atlantic Coast. The 1st Day Bombardment Group will consist of the 11th Day Bombardment Squadron, 20th Day Bombardment Squadron, 96th Day Bombardment Squadron, and 166th Day Bombardment Squadron. The 1st Surveillance Group will consist of the 8th, 90th, and 104th Surveillance Squadrons. The 1st Pursuit Group will consist of the 27th, 94th, 95th, and 147th Pursuit Squadrons. The 1st Army Observation Group will consist of the 1st, 12th, and 258th Army Observation Squadrons. The squadron organizations of these groups have been previously authorized.

b. The commanding generals of the Philippine, Hawaiian, and Panama Canal Departments will organize units in their departments as follows:

Units.	*Stations.*
1st Observation Group	Philippine Department.
2d Observation Group	Hawaiian Department.
3d Observation Group	Panama Canal Department.

The 1st Observation Group will consist of the 2d and 3d Observation Squadrons.

The 2d Observation Group will consist of the 4th and 6th Observation Squadrons.

The 3d Observation Group will consist of the 5th and 7th Observation Squadrons.

Awards of distinguished-service medal ..... I, II, IV, V, VI
Award of distinguished-service cross III

I—**Award of distinguished-service medal.**—By direction of the President, under the provisions of the act of Congress approved July 9, 1918 (Bul. No. 43, W. D., 1918), the distinguished-service medal is awarded to the following-named officer:

Colonel *Frederick W. Lewis*, United States Army. For exceptionaly meritorious and distinguished service as officer in charge of the Publication Division of The Adjutant General's Office. To his painstaking efforts, tact, energy, and zeal are due the accuracy with which publications issued to the Military Establishment through The Adjutant General of the Army were drawn and the promptness with which they were distributed.

[201, A. G. O.]

II—**Award of distinguished-service medal.**—By direction of the President, under the provisions of the act of Congress approved July 9, 1918 (Bul. No. 43, W. D., 1918), the distinguished-service medal is awarded to the following-named officer:

Colonel *Perrin L. Smith*, Quartermaster Corps. For exceptionally meritorious and distinguished service. To his great administrative ability, initiative, and tireless energy is due in great measure the very successful practical application of the regulations governing the payment of allotments made by officers and enlisted men, the handling of the various Liberty bond issues subscribed for through the Army allotment system, and other important financial matters connected with the Army during the emergency.

[201, A. G. O.]

III—**Award of distinguished-service cross.**—By direction of the President, under the provisions of the act of Congress approved July 9, 1918 (Bul. No. 43, W. D., 1918), the distinguished-service cross for extraordinary heroism in action in Europe is awarded to the following-named officer:

Captain *Courtney Henley*, 327th Infantry. For extraordinary heroism in action north of the Sommerance-St. Juvin Road on

October 11, 1918. Capt. *Henley* led a party of three enlisted men in an attack on an enemy machine-gun position which was doing considerable damage to our forces. Under intense hostile fire his attack drove the enemy gunners from the machine-gun nest.

[201, A. G. O.]

IV.—Award of distinguished-service medal.—By direction of the President, under the provisions of the act of Congress approved July 9, 1918 (Bul. No. 43, W. D., 1918), the distinguished-service medal is awarded to the following-named officer:

Brigadier General *Isaac W. Littell*, United States Army, retired. For exceptionally meritorious and distinguished service. As Chief of the Cantonment Division of the Quartermaster General's Office he was charged with the task of building the camps and cantonments of the Army raised in summer of 1917 under conditions imposing almost insuperable obstacles. His completion of this task is a conspicuous example of the exercise of qualities of mind and character making up the highest type of officer.

[201, A. G. O.]

V.—Award of distinguished-service medal.—By direction of the President, under the provisions of the act of Congress approved July 9, 1918 (Bul. No. 43, W. D., 1918), the distinguished-service medal is awarded to the following-named officer:

Major *Henri Stanislas August Hanaut*, French General Staff. For exceptionally meritorious and distinguished service. As a member of the French Military Commission he was on duty with the Training and Instruction Branch of the War Plans Division of the General Staff. In this branch he was charged with teaching the higher phases of the military art, a course which only a talented and experienced officer could have conducted. His services to the United States were of inestimable value.

[330.4, A. G. O.]

VI.—Award of distinguished-service medal.—By direction of the President, under the provisions of the act of Congress approved July 9, 1918 (Bul. No. 43, W. D., 1918), the distinguished-service medal is awarded to the following-named officer:

Captain *Paul Elie Nevegans*, Artillery, French Army. For exceptionally meritorious and distinguished service. As a member of the French Military Mission he was placed on duty with the Training and Instruction Branch, War Plans Division

of the General Staff. His brilliant mental and exceptional professional attainments, coupled with rare tact and tireless devotion to duty, caused his services to be of signal worth to the United States Army.

Infantry Drill Regulations (Provisional), 1919 I
Increase in enlisted personnel of the General Staff College Service Detachment II
Board of Contract Adjustment III
Insignia for qualifications in marksmanship IV

32-24-37

I—Infantry Drill Regulations (Provisional), 1919.—1. "Infantry Drill Regulations (Provisional), American Expeditionary Forces, 1918," is prescribed provisionally for the information and government of the Army and the National Guard of the United States, and will supersede "Infantry Drill Regulations, 1911." Such interpretations of these regulations as may be necessary to adapt the drill to existing organizations will be made by regimental or higher commanders.

2. These regulations will be designated as "Infantry Drill Regulations (Provisional), 1919."

3. These regulations when printed will be issued without requisition.

[062.12, A. G. O.]

II—Increase in enlisted personnel of the General Staff College Service Detachment.—Paragraph 2, section I, General Orders, No. 93, War Department, 1919, is amended so as to increase the strength of the General Staff College Service Detachment (white) to 127 and the aggregate strength of the detachment to 157 by adding the following enlisted men, with pay, allowance, qualifications, and rank equal to corresponding grades in the Corps of Engineers, for duty in the Graphic Section, Geographic Branch, of the Military Intelligence Division, General Staff:

2 master engineers, junior grade.
2 sergeants, first class.
3 sergeants.

[352.091, A. G. O.]

III—Board of Contract Adjustment.—Section IV, General Orders, No. 103, War Department, 1918, as amended by section

II, General Orders, No. 135, War Department, 1918, and section IV, General Orders, No. 100, War Department, 1919, is further amended by adding the following as a subparagraph to paragraph 11:

The board may also act through one or more committees of not less than three members each, designated from time to time by the chairman or assistant chairman at the same time as or prior to the assignment to any member of such committee of the case or matter upon which such committee would have authority to act hereunder, and in case of the concurring opinion of all the members of any such committee such opinion shall be and become the action of the board as though taken by a majority of the members of the board.

[334.7, A. G. O.]

IV.—Insignia for qualifications in marksmanship.—1. Section II, General Orders, No. 41, War Department, 1918, suspending during the present emergency the gratuitous issue of insignia to officers and enlisted men qualifying in marksmanship with the rifle, pistol, and machine gun, is rescinded.

2. The issue of badges for qualifications in marksmanship will be resumed. Badges will be issued to those who qualify in the following prescribed courses:

With rifle:

Expert; sharpshooter; marksman; marksman, special course "A."

With pistol:

Expert; first-class pistol shot.

With machine gun:

Expert; sharpshooter; marksman.

3. A qualification bar bearing the year of requalification will be issued for each additional year of qualification.

4. Officers will be issued and may wear badges for rifle and pistol qualifications only.

5. Enlisted men will be permitted to wear badges given for qualification with the rifle and for qualification with the weapon or weapons with whose manipulation they are identified.

6. A badge once earned may be worn until superseded by a higher badge pertaining to the same weapon, provided this be not construed to affect qualification pay nor to authorize the

wearing of more than three marksmanship badges by any individual at any one time.

Designation of 6th and 8th Field Hospitals and 6th Ambulance Company I
Discontinuance of Committee on Education and Special Training II
Fort Riley exempted from control of department commander III
Sale of clothing, accouterments, and equipment to officers IV
Use of motor vehicles V

32-24-38

I. Designation of 6th and 8th Field Hospitals and 6th Ambulance Company.—1. The two field hospitals (motorized) now being organized at Camp Meade, Md., for oversea duty are designated as the 6th and 8th Field Hospitals (Motorized).

2. The ambulance company (motorized) now being organized at Camp Meade, Md., for oversea duty is designated as the 6th Ambulance Company (Motorized).

[320, A. G. O.]

II. Discontinuance of Committee on Education and Special Training.—1. Section II, General Orders, No. 15, War Department, 1918, creating the Committee on Education and Special Training, is rescinded.

2. All records of the Committee on Education and Special Training will be transferred to The Adjutant General of the Army for file.

3. The Director, War Plans Division, General Staff, is charged with supervision and control of military training in civil educational institutions.

[000.862, A. G. O.]

III. Fort Riley exempted from control of department commander.—All the activities of the Army now at Fort Riley, Kans., with the exception of those at Camp Funston, are placed under the command of the Commandant, Mounted Service School, and as such are exempted from the control of the department commander as provided in paragraph 191, Army Regulations, in all that pertains to administration, supply, instruction, training, and discipline, except that the commanding general, Central Department, will retain general court-martial jurisdiction over Fort Riley, Kans.

[680.22, A. G. O.]

IV. Sale of clothing, accouterments, and equipment to officers.—Paragraph 2, section III, General Orders, No. 14, War

CIRCULAR No. 420.

WAR DEPARTMENT,
WASHINGTON, *September 10, 1919.*

DISCHARGE OF OFFICERS HOLDING EMERGENCY COMMISSIONS—AMENDMENT TO CIRCULAR NO. 350, WAR DEPARTMENT, 1919.

1. Paragraphs 1, 3, 5, and 9, Circular No. 350, War Department, 1919, are rescinded.

2. Legislation prescribing the commissioned strenth of the Army for the fiscal year 1920 requires that by October 31, 1919, the total number of officers in active service be reduced to 18,000. In order to accomplish such reduction it is essential that the discharge of officers holding only commissions for the emergency be proceeded with as rapidly as possible and in such manner that only those required to complete the 18,000 commissioned personnel of the Army will remain in service on October 31, 1919.

3. To provide the 18,000 officers authorized for the fiscal year 1920 will require the retention of approximately 8,500 emergency officers. Detailed allotments in accordance with the distribution of the 18,000 officers will be furnished at an early date to organization commanders and chiefs of staff corps or other activities. Emergency officers to be retained are to be selected, subject to War Department approval, by the chiefs of staff corps, department and camp commanders, and by other commanding officers to whom allotments are made, from among officers under their jurisdiction. Emergency officers to be retained outside the continental limits of the United States are to be selected by the commanding generals of the forces with which such officers are serving.

32-24-48

4. It is necessary that emergency officers retained in service be selected so far as possible from among applicants for permanent appointment. Officers not applicants for permanent appointment will be retained only in those cases where they possess such qualifications for a particular duty that a suitable applicant for permanent appointment cannot be assigned to such duty. The selection of any emergency officer for retention at this time does not bind him to remain in the service until June 30, 1920, nor does it obligate the War Department to continue him in service should his discharge for any reason become necessary or desirable.

5. Officers under medical treatment for disabilities incident to military service will be retained in service, whether or not applicants for permanent appointment, until such time as maximum restoration has been attained. This will not be construed as authorizing retention of officers temporarily on sick report for minor disabilities.

6. In selecting for retention in service emergency officers who are applicants for future appointment in the permanent establishment, it must be remembered that all officers serving with or detailed for duty in a staff corps are, under existing law, relative to the permanent establishment, commissioned in the line of the Army. All emergency officers, therefore, selected for retention as applicants for permanent appointment should be competent to perform duty in and willing to accept appointment in the line of the Army. As the need for officers in the various staff corps decreases, it will become possible and necessary for many officers now selected by chiefs of staff corps for retention to be sent to line organizations for duty. It is not contemplated that new commissions will, in general, be issued to retained emergency officers at this time.

Department, 1919, is amended by adding the following subparagraph:

d. The operations of the tailor shop at the Zone Storage Depot, Balboa, Canal Zone, are extended to include the manufacture of uniforms for officers. An adequate supply of cloth and other material needed will be kept on hand.

[421, A. G. O.]

V.—**Use of motor vehicles.**—Paragraphs 3 and 4, section II, General Orders, No. 84, War Department, 1919, are amended to read as follows:

3. Passenger transportation will report for duty at the hour set for the beginning of the day's work, and will be released at the hour set for the conclusion of the day's work, except such as may, by special direction only of the commanding officer, be held for any duty outlined in paragraph 4 of this order. Passenger vehicles will not be used for carrying passengers, official or nonofficial, to and from their homes, to and from meals, or on any but strictly Government business for which there is any other suitable means of transportation available in the form of animal-drawn vehicles, public street car or railroad facilities.

4. Motor transportation may be used by special direction only of the commanding officer for the following purposes, provided that the use of such transportation for dances and entertainments is limited in such a way as not to require overtime work on the part of the chauffeurs:

a. Athletics.

b. Hunting.

c. For civilian employees from and to nearest railway point to place of work, where practicable.

d. For all members of garrison, including officers' and enlisted men's families, on schedule only, to and from nearest railway point, boat landing or street car.

e. Dances.

f. Entertainments.

[451, A. G. O.]

BY ORDER OF THE SECRETARY OF WAR:

PEYTON C. MARCH,
General, Chief of Staff.

OFFICIAL:

P. C. HARRIS,
The Adjutant General.

WASHINGTON : GOVERNMENT PRINTING OFFICE : 1919

7. The commanding generals of departments in the United States, the chiefs of all staff corps, the commanding general of the port of embarkation, and the commanding officers of all posts and camps not under command of a department commander or the chief of a staff corps will continue to reduce the need for commissioned personnel and to cause the discharge of emergency officers as rapidly as their services can be spared. Officers eligible for retention under allotments to be published and whose retention is contemplated will be the last officers discharged.

8. In making preliminary selection of officers to be retained for duty with the line of the Army commanding officers will be guided by the fact that allotments for such purpose when made will in no case exceed the number of officers required to complete the quota established by Tables of Organization, 1917, under authority of the national defense act of June 3, 1916 (Bul. No. 16, W. D., 1916). Selections within the continental limits of the United States for all purposes other than for duty with the line of the Army will be made by the chief of the staff corps or other activity concerned.

9. Instructions requiring Class III emergency officers serving with the line of the Army to be reported surplus before discharge are revoked. Emergency officers commissioned in or on duty pertaining to any staff corps, bureau, or separate activity of the War Department will not be discharged until concurrence of the proper chief of staff corps, bureau, or activity has been obtained. Such concurrence will be requested and granted as expeditiously as possible.

10. For the purpose of securing or making recommendations relative to retention or discharge of officers, direct communication between commanding officers of posts, camps, ports, and departments and the chiefs of various staff corps and other activities is authorized.

11. Emergency officers when available for discharge hereafter will be given the following option with respect to the place of discharge:

a. Immediate discharge at the station at which they are serving, or if not serving at a military station, at the nearest station having facilities for physical examination.

b. Being ordered to the demobilization center or military station in the United States having facilities for physical examination nearest their bona fide homes for immediate discharge upon arrival. Whenever practicable such officers will be sent with detachments of troops. When no such detachments are being sent within a reasonable time, officers may be directed to proceed without troops, the travel being necessary in the military service.

c. Upon their certificate that leave of absence is necessary and will be utilized to secure civil employment, officers may be granted leave of absence for not to exceed 15 days, at the expiration of which they will report to the demobilization center or military station in the United States having facilities for physical examination nearest their bona fide homes for immediate discharge. Such journeys must be performed on a leave status and at the officer's own expense. In no case will such leaves of absence expiring later than October 25, 1919, be granted.

Officers enumerated in paragraph 7 of this circular will issue all orders necessary to carry out the provisions of this paragraph, and will determine where the bona fide home of an officer is or will be at the time of discharge. When any officer is transferred from one station to another his orders will clearly define his status for the information of the commanding officer of the station to which he is transferred.

12. In view of the fact that ample time has elapsed for all emergency officers who so desire to submit applications for appointment in the permanent establishment, such applications will not hereafter be forwarded to the War Department, and no application initiated subsequent to the date of this circular will be given consideration in determining the classification of officers. Persons who have not heretofore submitted applications may do so, if they so desire, at the time of enactment of legislation creating vacancies to be filled.

13. The selection of any emergency officer for retention in the service under these instructions in no way changes the status of his application for permanent appointment or obligates the War Department relative to the making of such appointment. The necessary discharge of any applicant for permanent appointment in accomplishing the reduction of commissioned personnel in no way prejudices his application. It is contemplated that when the filling of vacancies in the permanent establishment is undertaken all eligible and suitable applicants, whether in or out of the service, will be given opportunity to compete for such vacancies as are to be filled.

14. *Effective this date promotions under Circular No. 248, War Department, 1919, are suspended until November 1, 1919.* Recommendations for promotions in the temporary force of 18,000 officers will not be submitted until the promulgation of the instructions that are to govern such promotions.

[210.82, A. G. O.]

BY ORDER OF THE SECRETARY OF WAR:

PEYTON C. MARCH,
General, Chief of Staff.

OFFICIAL:
P. C. HARRIS,
The Adjutant General.

WASHINGTON : GOVERNMENT PRINTING OFFICE : 1919

Historical

[G. O. 109.]

GENERAL ORDERS, No. 109.

WAR DEPARTMENT,
WASHINGTON, *September 15, 1919.*

Section.

Control of activities at Camp Alfred Vail, N. J. I
Officers' qualification card II
Disposition of historical records of troop units III
Education and recreation of the soldier IV

I. Control of activities at Camp Alfred Vail, N. J.—The Signal Corps School, Camp Alfred Vail, N. J., is exempt from the control of the department commander in all that pertains to its courses of instruction or separate organization and administration as a signal school.

[680.22, A. G. O.]

I. Officers' qualification card.—Paragraphs 3 and 4, section V, General Orders, No. 46, War Department, 1918, as amended by section I, General Orders, No. 87, War Department, 1918, and General Orders, No. 85, War Department, 1918, relating to ratings and qualification cards for officers, are rescinded.

[201.6, A. G. O.]

III. Disposition of historical records of troop units.—When records of troop units are turned in at any port, camp, or other station under the provisions of existing orders and regulations, the records of general historical interest and not administrative in nature will be sent to the Historical Branch, War Plans Division, General Staff, Washington Barracks, D. C.

[314.1, A. G. O.]

IV. Education and recreation of the soldier.—1. *Control and supervision.*—By direction of the Secretary of War, the direct control and supervision of all matters pertaining to the education and recreation of the soldier is vested in the Director, War Plans Division, General Staff, who will have associated with him a board of civilian educators to advise him on the development of educational policies within the Army. He will provide for a proper system of inspection to insure uniformity in this training.

2. *Education.*—Education in the Army will serve a twofold purpose:

a. To train technicians and mechanics to meet the Army's needs, and to raise the soldier's general intelligence in order to increase his military efficiency.

138496°—19

32-24-39

b. To fit the soldier for a definite occupation upon his return to civil life.

Educational work, within the times allotted in War Department orders, will be as regularly scheduled as is military training, and it is made the duty of all commanders to see that all subordinate officers apply to this new work the same high standard of duty heretofore exacted in the purely military training. Every possible assistance will be given by the War Department to organization, camp, and post commanders in the development of these standards. Until further orders, educational training, except for illiterates, will be voluntary, but when once enrolled as a student, the soldier will be required to complete the course undertaken; and normally an average of three hours a day, five days a week, will be devoted to such training. It is not intended in allotting a three-hour daily or fifteen-hour weekly time to educational work to restrict commanding officers rigidly thereto, but it is intended that in the allotment of time for educational work for the year, provision should be made for this proportion of the time to be devoted to educational work.

3. *Camp activities.*—Opportunity for the wise application of the soldier's leisure time will be provided. Commanding officers will assume full responsibility for the contentment and well-being of the soldiers, and be prepared to maintain, as far as practicable, the work now being carried on by the several civilian welfare agencies within their commands. Camp activities will include recreational athletics, music, dramatic entertainment, service clubs, post exchanges, libraries, and community cooperation. Every possible assistance will be given commanders in the development of these activities by superior commanders and by the War Department.

4. *Moral training.*—Commanding officers will give their support and assistance to chaplains and all other agencies in the problems of moral training, character building, and religious guidance of the soldier.

5. *Education and recreation officer.*—In order to carry out the provisions of this order, each commanding officer will appoint on his staff an education and recreation officer. This officer should have the highest qualifications, and rank appropriate to the size of the command. He will be charged with the direct control and supervision of all the activities defined in this order and will be provided with such assistants, military or

civilian, or both, in education, camp activities, and moral training (chaplain) as the strength of the command requires. Chaplains are not available for assignment as education and recreation officers.

6. *Certain activities transferred to War Plans Division.*—All functions of the Commission on Training Camp Activities and the Committee on Education and Special Training are hereby transferred to the War Plans Division, General Staff. All orders and instructions in conflict with this order are rescinded.

GENERAL ORDERS, No. 110.

WAR DEPARTMENT,
WASHINGTON, *September 24, 1919.*

Revocation of general courts-martial jurisdiction in certain places.—1. *a.* Section III, General Orders, No. 56, War Department, 1918, as amended by paragraph 3, section III, General Orders, No. 148, War Department, 1918; by section II, General Orders, No. 76, and section III, General Orders, No. 90, War Department, 1919, empowering the commanding officers of the following-named camps to appoint general courts-martial, is rescinded:

Camp Bowie, Fort Worth, Texas.
Camp Custer, Battle Creek, Mich.
Camp Devens, Ayer, Mass.
Camp Dix, Wrightstown, N. J.
Camp Dodge, Des Moines, Iowa.
Camp Funston, Fort Riley, Kansas.
Camp Gordon, Atlanta, Ga.
Camp Grant, Rockford, Ill.
Camp Greene, Charlotte, N. C.
Camp Jackson, Columbia, S. C.
Camp Kearny, Linda Vista, Calif.
Camp Lee, Petersburg, Va.
Camp Lewis, American Lake, Wash.
Camp Meade, Annapolis, Md.
Camp Mills, Long Island, N. Y.
Camp Pike, Little Rock, Ark.
Camp Shelby, Hattiesburg, Miss.
Camp Sherman, Chillicothe, Ohio.
Camp Taylor, Louisville, Ky.
Camp Travis, San Antonio, Tex.
Camp Upton, Yaphank, N. Y.

b. Section II, General Orders, No. 74, War Department, 1918, empowering the Commanding Officer, Camp Las Casas, San Juan, P. R., to appoint general courts-martial, is rescinded.

c. Section III, General Orders, No. 8, War Department, 1918, empowering the Commanding Officer of the Provisional Depot for Corps and Army Troops at Camp Wadsworth, Spartanburg, S. C., to appoint general courts-martial, is rescinded.

32-24-40

d. Section I, General Orders, No. 82, War Department, 1918, empowering the Commanding Officer, Syracuse Recruit Camp, New York, to appoint general courts-martial, is rescinded.

e. Paragraph 2, section III, General Orders, No. 148, War Department, 1918, empowering the Commanding Officer, Fort Oglethorpe, Ga., to appoint general courts-martial, is rescinded.

f. Section I, General Orders, No. 54, War Department, 1919, empowering the Commanding Officer, Camp Bragg, Fayetteville, N. C., to appoint general courts-martial, is rescinded.

g. So much of section IV, General Orders, No. 65, War Department, 1919, as empowers the Commanding Officer, Fort D. A. Russell, Wyoming, to appoint general courts-martial, is rescinded.

2. Nothing herein contained, however, shall operate to divest any commanding officer herein referred to of jurisdiction in cases which have been heretofore legally referred by him for trial at the camp, fort, depot, cantonment, post, or station over which he exercises command and which remain undisposed of.

3. Except as hereinbefore provided, all persons subject to military law serving at any camp, fort, depot, cantonment, post, or station at which a tactical division is serving are, for the purposes of trial by courts-martial and in respect of all other matters touching the administration of military justice, under the jurisdiction of the commanding officer of that division.

4. Except as hereinbefore provided, all persons subject to military law serving at any camp, fort, depot, cantonment, post, or station named in the foregoing paragraph of this order, but at which no tactical division is serving, are, for the purposes of trial by courts-martial and in respect of all other matters touching the administration of military justice, under the jurisdiction of the commanding officer of the territorial department within the limits of which such camp, fort, depot, cantonment, post, or station is located.

Award of the distinguished-service cross I
Award of distinguished-service medal ..... II, III, IV, V, VI, VII
Rescission of certain citations (distinguished-service cross) VIII
Rescission of certain citations (distinguished-service medal) IX

I. Award of the distinguished-service cross.—By direction of the President, under the provisions of the act of Congress approved July 9, 1918 (Bul. No. 43, W. D., 1918), the distinguished-service cross is awarded to the following-named officer:

Lieutenant Colonel *Converse R. Lewis*, Infantry, then second lieutenant, 23d Infantry. For extraordinary heroism in action against hostile Moros on the Buluan River, Island of Mindanao, June 14, 1904.

[201, A. G. O.]

32-24-49

II. Award of distinguished-service medal.—The citation on page 3 of General Orders, No. 89, War Department, 1919, relating to award of distinguished-service medal to Maj. Gen. *Charles S. Farnsworth*, is rescinded and the following substituted therefor:

Charles S. Farnsworth, major general, United States Army. For exceptionally meritorious and distinguished services. In command of the 37th Division, his efficient leadership and military ability were important factors in the successful operations in the Meuse-Argonne offensive, and later proved their worth when this division served with the French and Belgian forces in Belgium.

[201 A. G. O.]

III. Award of distinguished-service medal.—By direction of the President, under the provisions of the act of Congress approved July 9, 1918 (Bul. No. 43, W. D., 1918), the distinguished-service medal is awarded to the following-named officer:

Colonel *Charles Lynch*, Medical Corps. For exceptionally meritorious and distinguished service as port surgeon, Port of Embarkation, Newport News, Virginia. His service in governing and controlling the agencies for caring for sick and wounded soldiers, protecting them against diseases, and safeguarding them prior to and during transport overseas were conspicuous.

IV. Award of distinguished-service medal.—By direction of the President, under the provisions of the act of Congress ap-

proved July 9, 1918 (Bul. No. 43, W. D., 1918), the distinguished-service medal is awarded to the following-named officer:

Colonel *Edwin G. Davis*, United States Army. For exceptionally meritorious and distinguished service. As chief of the disciplinary division of the office of the Judge Advocate General of the Army he contributed a most helpful means of avoiding serious errors in the administration of military justice during the war.

[201, A. G. O.]

V.—**Award of distinguished-service medal.**—By direction of the President, under the provisions of the act of Congress approved July 9, 1918 (Bul. No. 43, W. D., 1918), the distinguished-service medal is awarded to the following-named officer:

Colonel *James M. Kennedy*, Medical Corps. For exceptionally meritorious and distinguished service as port surgeon, Port of Embarkation, Hoboken, N. J. He has organized, provided, and administered with conspicuous efficiency all of the hospitals required for the accommodation of our troops going overseas from that port, as well as for the large number of our sick and wounded soldiers returning home.

[201, A. G. O.]

VI.—**Award of distinguished-service medal.**—By direction of the President, under the provisions of the act of Congress approved July 9, 1918 (Bul. No. 43, W. D., 1918), the distinguished-service medal is awarded to the following-named officer:

Lieutenant Colonel *Palmer E. Pierce*, Infantry. For exceptionally meritorious and distinguished service. As brigadier general, United States Army, his zeal, intelligence, and effective work in the preliminary organization of our industries for war contributed substantially to the progress made.

[201, A. G. O.]

VII.—**Award of distinguished-service medal.**—By direction of the President, under the provisions of the act of Congress approved July 9, 1918 (Bul. No. 43, W. D., 1918), the distinguished-service medal is awarded to the following-named officer:

Lieutenant Colonel *Preston Davie*, United States Army. For exceptionally meritorious and distinguished service. He organized the Fuel and Forage Division of the War Department and also assisted in reorganizing the Salvage Service upon a most efficient basis to meet war conditions. By his sound judgment, marked legal and administrative ability, and unselfish devotion to duty he renderd conspicuous service in reorganizing and developing the Real Estate Service of the War Department.

[201, A. G. O.]

VIII.—Rescission of certain citations (distinguished-service cross).—The citation on page 23 of General Orders, No. 98, War Department, 1919, relating to First Lieutenant *Clinton L. Whiting*, is rescinded, a correct citation being publishd on page 40 of General Orders, No. 87, War Department, 1919.

The citation on page 24 of General Orders, No. 98, War Department, 1919, relating to First Lieutenant *George T. Worthen*, is rescinded, a correct citation being published on page 40 of General Orders, No. 87, War Department, 1919.

The citation on page 37 of General Orders, No. 98, War Department, 1919, relating to Private, first class, *Firm T. Shimel*, is rescinded, a correct citation being published on page 26 of General Orders, No. 87, War Department, 1919.

The citation on page 30 of General Orders, No. 98, War Department, 1919, relating to Sergeant *James Sutherland*, is rescinded, a correct citation being published on page 42 of General Orders, No. 87, War Department, 1919.

The citation on page 30 of General Orders, No. 98, War Department, 1919, relating to Sergeant *William C. Taylor*, is rescinded, a correct citation being published on page 42 of General Orders, No. 87, War Department, 1919.

The citation on page 23 of General Orders, No. 81, War Department, 1919, relating to Sergeant *Samuel F. Yopp, jr.*, is rescinded, a correct citation being published on page 12 of General Orders, No. 98, War Department, 1919.

The citation on page 12 of General Orders, No. 98, War Department, 1919, relating to Corporal *John C. Austin*, is rescinded, a correct citation being published on page 24 of General Orders, No. 81, War Department, 1919.

The citation on page 13 of General Orders, No. 98, War Department, 1919, relating to Corporal *Joseph F. Esser*, is rescinded, a correct citation being published on page 29 of General Orders, No. 87, War Department, 1919.

The citation on page 35 of General Orders, No. 98, War Department, 1919, relating to Corporal *Harold Thomson*, is rescinded, a correct citation being published on page 31 of General Orders, No. 87, War Department, 1919.

The citation on page 37 of General Orders, No. 98, War Department, 1919, relating to Private, first class, *William J. Turbeville*, is rescinded, a correct citation being published on page 43 of General Orders, No. 87, War Department, 1919.

The citation on page 38 of General Orders, No. 98, War Department, 1919, relating to Private, first class, *Henry A. West*, is

rescinded, a correct citation being published on page 40 of General Orders, No. 81, War Department, 1919.

The citation on page 38 of General Orders, No. 98, War Department, 1919, relating to Private, first class, *Guy Whitman*, is rescinded, a correct citation being published on page 43 of General Orders, No. 87, War Department, 1919.

The citation on page 14 of General Orders, No. 98, War Department, 1919, relating to Private *George Drysdale*, is rescinded, a correct citation being published on page 32 of General Orders, No. 81, War Department, 1919.

The citation on page 7 of General Orders, No. 139, War Department, 1918, relating to Private *Christian F. M. Nelson*, is rescinded, a correct citation being published on page 43 of General Orders, No. 87, War Department, 1919.

The citation on page 18 of General Orders, No. 98, War Department, 1919, relating to Private *Elwood Twiford*, is rescinded, a correct citation being published on page 43 of General Orders, No. 87, War Department, 1919.

The citation on page 18 of General Orders, No. 98, War Department, 1919, relating to Private *James L. Van Hoy*, is rescinded, a correct citation being published on page 38 of General Orders, No. 87, War Department, 1919.

The citation on page 43 of General Orders, No. 87, War Department, 1919, relating to Private *William E. Wood*, is rescinded, a correct citation being published on page 19 of General Orders, No. 98, War Department, 1919.

[220.52, A. G. O.]

IX.—Recission of certain citations (distinguished-service medal).—The citation on page 6 of General Orders, No. 103, War Department, 1919, relating to Brigadier General *Louis M. Nuttman*, is rescinded, a correct citation being published on page 5 of General Orders, No. 89, War Department, 1919.

The citation on page 6 of General Orders, No. 103, War Department, 1919, relating to Lieutenant Colonel *Edward J. Boughton*, is rescinded, a correct citation being published on page 13 of General Orders, No. 89, War Department, 1919.

[210.52, A. G. O.]

BY ORDER OF THE SECRETARY OF WAR:

PEYTON C. MARCH,
General, Chief of Staff.

OFFICIAL:

P. C. HARRIS,
The Adjutant General.

WASHINGTON : GOVERNMENT PRINTING OFFICE : 1919

Historical Dr

[G. O. 112.]

GENERAL ORDERS, No. 112.

WAR DEPARTMENT, WASHINGTON, *September 25, 1919.*

Military education in the Army.—The following instructions will govern military education in the Army:

1. Supervision and coordination of the military educational system is vested in the General Staff.

2. The system provides for the military education of—

a. Officers of the Regular Army.

b. Cadets.

c. Enlisted men of the Regular Army.

3. A most important feature in every phase of instruction will be to teach students the particular art of how to teach others. Special effort will be made in each school toward the development of an efficient system for the accomplishment of this purpose.

4. It will be the constant aim of all concerned to improve and perfect the methods employed. With this end in view, officers of all grades shall be encouraged to submit proposals for improvements in methods or character of instruction, through proper channels, to the War Department. These proposals will receive careful consideration by superiors, and their action thereon will be such as to encourage initiative upon the part of their subordinates and to make certain that no proposals of merit escape recognition.

5. The system embraces—

For officers:

a. Basic courses at special service schools.

b. Unit schools.

c. Advanced courses at special service schools.

d. General service schools.

For cadets: The United States Military Academy.

For enlisted men:

a. Post schools.

b. Unit schools.

c. Special service schools.

OFFICERS.

6. The object of the school system for officers is to provide systematic and progressive courses of instruction and training that will prepare each officer to perform the highest duties of command and staff commensurate with his ability.

UNIT SCHOOLS.

7. These schools include all schools for officers which are under the direct control of territorial or tactical commanders.

The primary object of these schools is the instruction and training of officers of all grades with a view to securing uniform and efficient training of the troops or personnel under their respective commands. This requires that instruction at the schools be conducted concurrently with and be definitely and closely coordinated with the schedules of training or work of the troops or personnel under the student officers.

The secondary object is to provide such supervised instruction of officers in addition to that outlined in the preceding paragraph as may be practicable in the different commands and best suited to the needs of the officers thereof.

8. In general, attendance at these schools will be in addition to the performance of their normal duties by the students. Sessions may take the form of a conference before or a critique after a drill or exercise and be held either on the ground or in an assembly hall.

If it is deemed expedient special classes may be organized to cover specific subjects and the students thereof may be relieved from all or a part of their normal duties for this purpose.

9. Responsibility for and initiative in the development of these schools to best increase the war preparedness of the service, including proper supervised delegation of this responsibility and initiative to subordinate commanders, is intentionally placed in the hands of territorial and independent tactical commanders, subject only to the provisions of paragraph 1 of this order.

10. For each school a record shall be kept showing for each school day the attendance by name of each instructor and student, the period of instruction, and nature thereof. As a general principle, the instruction should follow the applicatory system.

11. Territorial and independent tactical commanders will forward to The Adjutant General of the Army (attention Training and Instruction Branch, War Plans Division, General Staff) copies of all orders or instructions issued by them providing for the conduct and inspection of these schools.

SPECIAL SERVICE SCHOOLS.

12. Special service schools shall be maintained for each arm or service, as follows:

a. The Infantry.
b. The Cavalry.
c. The Field Artillery.
d. The Coast Artillery.
e. The Engineer Corps.
f. The Signal Corps.

g. The Air Service.
h. The Tank Corps.
i. The Ordnance Department.
j. The Medical Department.
k. The Motor Transport Corps.
l. Such other special service schools as may be hereafter authorized.

13. These schools shall be under the direct supervision and control of the chiefs of the respective arms or services having chiefs, subject to the provisions of paragraph 1 of this order. For the arms not having chiefs, direct supervision and control will be exercised by the Chief of Staff.

14. The object of the courses for officers at these schools is to develop and standardize the instruction and training of officers in the technique and tactics of their respective arm or service.

15. The complete system of courses for officers at the special service schools of any arm or service shall be of such scope as will completely fit the graduates thereof for the performance of all duties that devolve upon officers of the respective arm or service as such, excepting only such broader phases of instruction involving all arms and services as may be best given at the general service schools later provided for in this order.

16. *Basic courses.*—In the Special Service Schools of each arm or service to which officers are assigned or detailed upon their initial entry as such in the Regular Army there will be provided a basic course of not over one year's duration which such officers shall be required to attend before being assigned to any duty interfering with such attendance except in times of emergency.

These courses have for their object to so qualify all officers upon initial entry into the service that they may function intelligently on being assigned to duty with their arm or service. Each basic course shall include the following subjects: Administration, military courtesy, customs of the service, interior guard duty, military law, military sketching and map reading, military hygiene and first aid, equitation, hippology, nomenclature and use of the pistol, saber manual, so much of Field Service Regulations and Rules of Land Warfare as is necessary for officers of junior grades, training methods and principles of teaching, and such tactical and technical training in the particular arm as may be necessary.

17. *Advanced courses.*—At the Special Service Schools of each arm and service there shall be such advance courses as are best

adapted to carry out the policy enunciated in paragraph 15 of this order.

18. Special regulations governing these schools for each arm and service shall be submitted to the Chief of Staff, and after approval by the Secretary of War shall be promulgated by the War Department.

19. In so far as the exigencies of the service permit, an officer, upon completion of a course at a Special Service School, shall not be considered as available for detached service until he shall have served at least one year with his arm or service. The object of this provision is—

a. To enable the officer to apply practically what he has learned at the school, thus continuing his education along these lines.

b. To enable the arm or service to immediately obtain the full benefits of the latest doctrines and methods of instruction developed at its Special Service School.

GENERAL SERVICE SCHOOLS.

20. These schools shall be under the direct supervision and control of the Chief of Staff of the Army and shall consist of—

a. The School of the Line.

b. The General Staff School.

c. The General Staff College.

The School of the Line and the General Staff School shall be at the same place and under the same commandant.

21. The course at the General Service Schools contemplates four years, as follows:

a. First year—School of the Line.

b. Second year—General Staff School.

c. Third year—Duty with troops of arms other than those with which the student has previously served.

d. Fourth year—General Staff College.

As far as the interests of the service permit, the four years shall be consecutive. In any case, after the school system is fully functioning, no officer shall be detailed to attend the full course at the General Staff School until he has satisfactorily completed the full course at the School of the Line, and no officer shall be detailed to attend the full course at the General Staff College until he has satisfactorily completed the full course at the General Staff School.

22. *The School of the Line.*—The object of this school is to train officers (*a*) in the combined use of all arms and services functioning with a division, including the functioning of corps

and army troops and services in their relation to the division, in accordance with a uniform doctrine approved by the War Department; and (*b*) in the duties and responsibilities of field officers with regard to education and training in the Army.

23. *The General Staff School.*—The object of this school is to train selected officers for duty as General Staff officers with tactical units and for higher tactical command in accordance with the doctrine and methods approved by the War Department. In addition, it will conduct such special courses for general officers and selected officers of the technical and administrative services as may be prescribed, with a view of insuring harmonious cooperation throughout the service.

24. *The General Staff College.*—The object of this institution is to train selected officers for duty in the War Department General Staff and for high command in accordance with the doctrine and methods approved by the War Department. In addition, it will conduct such special courses for general officers and selected officers of the technical and administrative services as may be prescribed, with a view of insuring harmonious cooperation throughout the service.

25. Special regulations governing the General Service Schools will be promulgated by the War Department.

CADETS.

26. The education and training of cadets shall be conducted at the United States Military Academy as provided by law and the regulations governing the academy.

The primary object of the academy is—

To so develop the powers of analysis that the mind may reason to a logical conclusion;

To instill discipline and a high sense of honor;

To bring its graduates to the threshold of their profession properly equipped to pursue its study.

ENLISTED MEN.

POST SCHOOLS.

27. The object of these schools is to give general educational and vocational training to enlisted men. These schools shall be established and maintained as provided in orders and regulations promulgated by the War Department.

UNIT SCHOOLS.

28. The object of these schools is—

To prepare noncommissioned officers, selected privates, and enlisted specialists to carry out efficiently the schedule of training or work in progress;

To insure proper uniformity and coordination in the training or work of different elements of the same command;

To provide such additional technical and tactical instruction for the foregoing enlisted men as may be practicable and best suited to their respective needs.

The provisions of paragraphs 8, 9, 10, and 11 of this order shall apply to these schools.

SPECIAL SERVICE SCHOOLS.

29. These schools for enlisted men shall be the same as those prescribed in paragraph 12 of this order.

30. Courses will be established at these schools having for their object—

To train selected noncommissioned officers in the duties of junior officers of their respective arm or service.

To give special training to selected enlisted men in the duties of noncommissioned officers and enlisted specialists of their respective arm or service.

GENERAL REGULATIONS.

Applying to all special service schools and to the general service schools.

PERSONNEL.

31. The personnel shall consist of the commandant; his personal aids, if any; the staff; such students as may be detailed or required to pursue the course of instruction; and such school detachments and school troops as may be authorized.

The personnel shall, in general, be exempt from all duties which would interfere with the performance of their functions in connection with these schools.

COMMANDANT.

32. In each school or group of schools at the same place there will be but one commandant, who will be an officer especially selected by the War Department for the duty. He will command the school or schools and all troops at the place or reservation where the school or schools are located, unless such command is otherwise specifically restricted by the War Department.

He will make application for the detail or assignment of such suitable officers and enlisted men as may be necessary and shall assign them to specific duties.

He will be responsible for all matters of instruction in the school or schools and will see that all programs of instruction

are properly coordinated. He will make requisition for articles and equipment of all kinds that may be needed and will order the expenditure of authorized quantities for carrying out the purpose of the school or schools. Appropriations for the support of the school or schools will be disbursed on vouchers approved by him. He will prepare an annual estimate for funds which may be needed by the school for the ensuing year, forwarding the same to The Adjutant General of the Army.

At the termination of each school term the commandant will submit a report on the operations of the school or group of schools for that period to The Adjutant General of the Army. This report will include the names of officers and enlisted men who have satisfactorily completed any course during the period and such suggestions and recommendations as he may deem desirable for the interests of the school.

THE STAFF.

33. The staff shall consist of all officers not students on duty with each school or group of schools in connection with the administration and instruction.

SCHOOL DETACHMENT.

34. The school detachment will consist of such officers, enlisted men, and civilians as may be authorized by the War Department. Its members will assist in the instruction, administration, and maintenance of the school; perform the skilled labor thereat; and exercise such other functions as may be assigned to them by the commandant.

SCHOOL TROOPS.

35. The school troops will consist of such regular organizations as may be assigned for duty in connection with the school. They will perform such training, demonstrations, guard, fatigue, and administrative duties as may be assigned them by the commandant.

Unless deemed necessary by the commandant, they will not be required to comply with the annual training program for their arm or service.

STUDENTS.

36. Selection and attendance of students for each school will be in accordance with the special regulations for that school.

No officer will be detailed as a student to any school when such detail will operate to detach him from duty with an organization of his arm or service, unless he be eligible for detached

service during the entire period of the course which he is ordered to attend.

Each student who satisfactorily completes the course in any school and is declared proficient will be issued a certificate of proficiency covering all subjects completed by him during the course. Students who have been unable to complete the entire course will receive certificates of proficiency in such subjects as they have completed satisfactorily

If at any time any student officer shall be deemed unfitted for any reason to continue the course recommendation for his immediate relief from the school, accompanied by a statement of all facts relating thereto, shall be forwarded to the War Department by the commandant.

If at any time any student enlisted man shall be deemed unfitted for any reason to continue the course, the commandant shall immediately order him to rejoin his organization and shall report the facts relating thereto to his commanding officer through The Adjutant General of the Army.

OFFICERS AND ENLISTED MEN OF FORCES OTHER THAN THE REGULAR ARMY AUTHORIZED BY THE FEDERAL GOVERNMENT.

37. In addition to such special provisions as shall be made by the Federal Government for the education and training of officers and enlisted men of forces other than the Regular Army authorized by the Federal Government, the school system herein provided for the Regular Army shall be used for this purpose to the greatest possible extent consistent with the laws of Congress and the needs of the Regular Army.

STUDENTS AT CIVIL INSTITUTIONS.

38. In addition to such special provisions as may be made by the War Department under the laws of Congress for the military education and training of students at civil institutions, the school system herein provided for the Regular Army shall be used for this purpose to the greatest possible extent consistent with the laws of Congress and the needs of the Regular Army.

Official designation of the war against the Central Powers of Europe I
Appointment of special disbursing agent of United States Liquidation Commission II
Authority to discharge emergency officers and enlisted men III
Designation of Central Agent for the War Department in connection with the General Supply Committee, Treasury Department IV
Reports on internal-combustion engines V
Executive order placing Fort Beauregard Military Reservation under control of Secretary of the Interior VI
Assignment and duties of utilities officers VII

32-24-47

I. Official designation of the war against the Central Powers of Europe.—The war against the Central Powers of Europe, in which the United States has taken part, will hereafter be designated in all official communications and publications as "The World War."

[055.9, A. G. O.]

II. Appointment of special disbursing agent of United States Liquidation Commission.—Under the provisions of paragraph 10, General Orders, No. 24, War Department, 1919, Mr. *Charles H. Fiske, jr.*, is appointed special disbursing agent of the United States Liquidation Commission, effective September 5, 1919.

[334.8, A. G. O.]

III. Authority to discharge emergency officers and enlisted men.—In connection with General Orders, No. 110, War Department, 1919, commanding officers of those posts and camps enumerated in paragraph 1 therein will continue to exercise, in accordance with general instructions concerning discharges, such authority to discharge emergency officers and enlisted men as was exercised by them prior to the issuance of that order.

[323.341, A. G. O.]

IV. Designation of Central Agent for the War Department in connection with the General Supply Committee, Treasury Department.—In accordance with instructions contained in Executive order dated August 27, 1919, designating the General Supply Committee of the Treasury Department as the organization to maintain records of surplus material, supplies, and equip-

ment, the Director of Sales, Purchase, Storage and Traffic Division, General Staff, is hereby designated as Central Agent for the War Department for all surplus material, supplies, and equipment purchased out of Army appropriations.

[400.703, A. G. O.]

V.—Reports on internal-combustion engines.—Section II, General Orders, No. 71, War Department, 1909, as amended by section V, General Orders, No. 15, War Department, 1912, by section I, General Orders, No. 24, War Department, 1912, and by section I, General Orders, No. 40, War Department, 1913, is rescinded and the following substituted therefor:

An officer responsible for any internal-combustion engine issued by the Engineer Department will submit to The Adjutant General of the Army, through military channels, semiannual reports, in duplicate, on the performance of each such engine during the period covered by the report, a separate report to be rendered concerning each engine. These reports will be submitted on June 30 and December 31 of each year. In order to secure and preserve the information for the preparation of these reports, a loose-leaf weekly record will be kept under the supervision of the responsible officer by the attendant in charge of the engine. Blank forms for weekly records and for the semiannual reports will be issued by the Engineer Department upon application therefor to the Chief of Engineers.

[675.1, A. G. O.]

VI.—Executive order placing Fort Beauregard Military Reservation under control of Secretary of the Interior.—The following Executive order is published to the Army for the information and guidance of all concerned:

EXECUTIVE ORDER.

Under the authority of Section 1 of the Act of July 5, 1884 (23 Stat. 103), it is hereby ordered that Procter's Landing Military Reservation (Fort Beauregard), Louisiana, situate at the foot of Lake Borgne, in the parish of St. Bernard in the said State, containing an area of about 100 acres, conveyed to the United States by act of sale dated March 15, 1856, by Mrs. Mary Screven et al., recorded in the office of the Recorder for the parish of St. Bernard (Book No. 6 of Conveyances, folios 76 to 81, inclusive), the same having become useless for military purposes, be, and is hereby, placed under the control of the Secretary of the Interior for disposition as provided in the said Act, or as may be otherwise provided by law.

WOODROW WILSON.

THE WHITE HOUSE,
15 Sept., 1919.

[602.3, A. G. O.]

VII.--Assignment and duties of utilities officers.—1. In each camp, cantonment, zone, and interior storage depot, general hospital, fort, post, and all other stations under jurisdiction of the War Department and personnel, records, and equipment for operation and repair will be consolidated into one service. The consolidated personnel will be designated the Utilities Section, Construction Division, War Department, and the officer in charge the utilities officer. The senior officer on duty with the Construction Division in connection with utilities work at any station will be the utilities officer, and will be a staff officer of the station commander.

2. In the event that no officer is available in the allotment of officers to the Construction Division for assignment to a station as utilities officer, the station commander will assign a suitably qualified officer from the commissioned personnel at his station. Where the size of the station does not warrant the assignment of a separate utilities officer the duties will be performed by a suitably qualified officer detailed, in addition to his other duties, by the station commander to carry out the work incident to the operation of utilities. The name and rank of the officer so selected by the station commander will be reported to the Chief of Construction Division, War Department.

3. The duties of a utilities officer are defined as follows:

a. He is charged with the repair and maintenance of all military structures comprising the camp, cantonment, fort, post, or station and with the maintenance and operation of all utilities connected therewith except the operation of utilities for handling passengers or freight.

b. He is charged with the supervision of the installation and operation of all fire apparatus and appurtenances, standpipe and sprinkler systems, and the supervision of the personnel required for the operation thereof.

4. In order to perform properly and efficiently the duties specified in paragraph 3, the utilities officer will have assigned to him by the Chief of the Construction Division sufficient personnel to carry out his work.

5. In all matters pertaining to his work, the utilities officer will communicate through his intermediate commanders directly with the Chief of the Construction Division.

6. All disbursements of funds incident to repair and maintenance of buildings and roads, and the maintenance and opera-

tion of all utilities in the stations, will be made by the disbursing officer of the Finance Service at the station, the utilities officer certifying all the bills for materials purchased and all rolls for personnel under his jurisdiction, to the disbursing officer of the Finance Service at the station.

7. The procurement of all materials and supplies required for the maintenance and repair of buildings and roads and for the maintenance, repair, and operation of all utilities in the station will be vested in the utilities officer. All materials now on hand at each camp, post, fort, or station that have been procured for maintenance and repair or operation of the structures, plants, and systems will be made available to the utilities officer upon his request. If materials or supplies are not on hand at the station, requisitions will be forwarded to the Chief of the Construction Division for appropriate action and funds will be allotted. In either case, the cost of the materials or supplies will be charged to the operating cost of the station.

[211.99, A. G. O.]

BY ORDER OF THE SECRETARY OF WAR:

PEYTON C. MARCH,
General, Chief of Staff.

Requests for official Signal Corps photographs to supplement reports I
Real Estate Service II
Operation of United States Liquidation Commission and War Department Claims Board—Appointment of an additional Canadian contract assessor III

32-24-44

I. Requests for official Signal Corps photographs to supplement reports.—Requests by the several services and departments of the Government for official Signal Corps photographs to supplement and illustrate written reports, which are to be placed on file in the archives of the Historical Branch, War Plans Division, General Staff, will not be made. The Historical Branch has a complete collection of the official Signal Corps photographs, comprehensively catalogued and readily available for use in conjunction with the written reports intended for file in the archives of the Historical Branch. Unofficial photographs depicting the activities of any service or department of the Government may be forwarded with the written report to which they pertain. They will then be made a part of the official collection of the Historical Branch, War Plans Division.

[004.5, A. G. O.]

II. Real Estate Service.—Section II, General Orders, No. 43, War Department, 1919, is rescinded and the following is substituted therefor:

1. The duties and functions of the Real Estate Service, created for the existing emergency, will be as follows:

a. The procurement by purchase, lease, rental, condemnation, requisition, or donation of all real estate or interests therein (including buildings, docks, piers, offices, storage space), hereinafter termed "real estate," required for the use of the War Department.

b. The granting and renewing of all leases, licenses, permits, or privileges authorizing the use of any real estate, or interests therein, acquired for the use of the War Department.

c. The sale or other disposition of all real estate, or any interests therein, including the cancellation, extension, or modification of all leases, permits, and privileges acquired for the use of the War Department.

d. The establishment and maintenance of a filing and recording system for all grants, deeds, abstracts, leases, and other instruments pertaining to real estate and interests therein, under the control of the War Department, and the maintenance of an indexing and mapping system therefor.

2. All projects for the acquisition of real estate, or interests therein, required for the use of the Army, will be submitted to the Director of the Real Estate Service, through military channels, on forms to be provided by the Real Estate Service.

3. Commanding officers, chiefs of staff corps and departments, or other agencies of the Military Establishment charged with the supervision and control of real estate, or interests therein, whenever the same is no longer required for the use of the Army will promptly request its disposal, through military channels, to the Director of the Real Estate Service, on forms provided by the Real Estate Service.

[321.19, A. G. O.]

III. Operation of United States Liquidation Commission and War Department Claims Board—Appointment of an additional Canadian contract assessor.—1. Paragraph 2, General Orders, No. 40, War Department, 1919, is amended to read as follows:

2. The Imperial Munitions Board, constituted and appointed by authority of the British Ministry of Munitions, acting in conjunction with any two persons, whether officers of the United States Army or civilians, who have been or shall be appointed and known as Canadian contract assessors, and who shall be by due authority acting as such, is hereby authorized and empowered to exercise, and designated and established as the agency through which shall be exercised, in the name of the Secretary of War and by his authority, the powers conferred upon the Secretary of War by the act of Congress entitled "An act to provide relief in cases of contracts connected with the prosecution of the war, and for other purposes," approved March 2, 1919, in so far as the exercise of such powers relates to agreements, express or implied, and arrangements which were entered into through the agency of the Imperial Munitions Board and were to be performed within the Dominion of Canada.

All agreements, adjustments, and awards which shall be made under the authority conferred by this section shall be made in writing, signed in the name of said Imperial Munitions Board by a member or members thereof designated by said board, and by one of the aforesaid Canadian contract assessors.

2. Paragraph 4, General Orders, No. 40, War Department, 1919, as amended by section II, General Orders, No. 49, War Department, 1919, and as supplemented by section V, General Orders, No. 90, War Department, 1919, and by section IV, General Orders, No. 113, War Department, 1919, is further amended by adding thereto the following subparagraph:

Alfred E. Clark is hereby designated and appointed an additional Canadian contract assessor and authorized and instructed to exercise, in conjunction with the Imperial Munitions Board, the powers and duties provided for in paragraph 2, General Orders, No. 40 War Department, 1919, as amended by paragraph 1 hereof.

P. C. HARRIS,
The Adjutant General.

WASHINGTON: GOVERNMENT PRINTING OFFICE: 1919

CIRCULAR
No. 482.

WAR DEPARTMENT,
WASHINGTON, *October 21, 1919.*

MOTION-PICTURE SERVICE.

The following circular applicable only to forces serving within the continental limits of the United States is published for the information and guidance of all concerned:

1. *Motion-picture service.*—In order to maintain motion-picture service of high grade within the Army and to make certain that such service is available for all, a centralized administration and unified distribution is essential.

The Community Motion Picture Bureau, of 46 West Twenty-fourth Street, New York, N. Y., becomes the authorized agent for this service, and will present programs selected from the productions of practically all producers in accordance with the best standards.

2. *Basis of operation.*—In accordance with what is believed to be the wishes of the majority of the men in the Army, the War Department motion-picture service will be operated on the self-supporting basis. The profits which are realized within the large camps will go to support the showings for organizations which number too few men to be able to support the enterprise.

3. *Schedule.*—The War Department will designate the number of showings to be given each week at each station and the days of the week upon which such showings will be given. If service is required in addition to that called for by this standing authorization, authority therefor will be secured from the War Department. Previously thereto, if the time is short, notification may be given to the divisional office of the Community Motion Picture Bureau (address of divisional offices below) advising it of the probable necessity of such additional service but not definitely ordering it until authorization is formally received from the War Department. When such authorization is received, the Education and Recreation Officer will communicate with the divisional office of the Community Motion Picture Bureau, stating that he has received authorization from the War Department and that service should be rendered accordingly. Film programs will be used only at the places and upon the dates authorized by the War Department and scheduled in the notifications received from the Community Motion Picture Bureau. If the Education and Recreation Officer wishes to use the same program at a later date he should so inform the divisional office of the Community Motion Picture Bureau.

4. *Advertising.*—The War Department will be informed of what advertising material is desired in the way of one-sheets, larger posters, slides, and heralds. Such advertising material will be furnished the Education and Recreation Officer from the office of the Community Motion Picture Bureau which supplies the films.

5. *Notification.*—Two or three weeks in advance of the date of showing, the Community Motion Picture Bureau, after October 27, 1919, will notify the Education and Recreation Officer of the films scheduled for his use. Prior to October 27, 1919, the bureau will send out such notifications as promptly as may be. By 10 a. m. of the day following the date of presentation, the Education and Recreation Officer will dispatch through channels to the War Department, and by mail to the divisional office of the Community Motion Picture Bureau, report sheets which will have been sent him together with or as a part of such notification, these sheets to be carefully filled out in accordance with the instructions thereon. For the time being, the Community Motion Picture Bureau will use the "S. N." (Subscribers' Notification), and report blanks designed

and printed for the use of the welfare organizations. The Education and Recreation Officer will fill out both sides of the second and third sheets thereof as indicated thereon, and forward them through channels to the War Department, and the sheet numbered 7 to the divisional office of the Community Motion Picture Bureau.

6. *Shipments.*—The Education and Recreation Officer will communicate with the Divisional Director of the Community Motion Picture Bureau, giving him full details as to the shipping arrangement which should be made upon consignments of films addressed to his post; he will make due note of peculiar local conditions of delivery. Shipments will be addressed by the divisional office of the Community Motion Picture Bureau to the Education and Recreation Officer, and will be forwarded prepaid. Films after use will be sent prepaid by the first train carrying express or parcel post after the conclusion of the exhibition, addressed as the Community Motion Picture Bureau may direct, but only to the divisional or other branch office of the bureau within the military department where the service is furnished or to another military station. If the Education and Recreation Officer desires, he may deliver the films by messenger to the point designated by the bureau, provided such delivery can be made within the morning of the day following presentation. The Education and Recreation Officer should use every reasonable effort to cooperate with the Community Motion Picture Bureau and with the transportation companies in securing delivery of the films on time. In case the films as scheduled do not arrive at the time the Education and Recreation Officer has reason to expect their coming, he should immediately notify by telegraph or telephone the office of the Community Motion Picture Bureau from which delivery should have been made. In returning a film to the Community Motion Picture Bureau or forwarding to another post, camp, or station, it will be sent parcel post, franked.

7. *Reserve program.*—If practicable, the Community Motion Picture Bureau will supply each point of service with a reserve program, which is to be used only in emergency. Immediately after such use, such reserve program will be shipped to the office of the bureau supplying the service and telegraphic or telephonic report made to such office that such program has been used. In case of the arrival of the regularly scheduled program after the date for which it was scheduled, the Education and Recreation Officer will fill out and dispatch notification blanks (S. N.) accompanying or referring to such reserve programs, as directed upon such notifications.

8. *Operation.*—The Community Motion Picture Bureau will supply films, advertising matter, and supervising inspectors for the motion-picture service. Commanding officers of posts, camps, and stations will provide operators, properly equipped buildings, projecting machines, screens, electric current, and other materials required. Where the material is not already provided the War Department will install it, so far as available funds permit. A competent and expert operator for each exhibition will be provided by the commanding officer. Successful showings are impossible without proper projection. The operator will be responsible for proper projection and for the cleanliness and good order of the booth, projecting machine, and screen. At no time will smoking be permitted within the booth, or, if there is no booth, within 25 feet of the projecting machine. Only the operator, his duly qualified superiors, and the accredited representatives of the Community Motion Picture Bureau will have access to the projecting machine. All the films when not within the projecting machine or in process of rewinding or repair will be kept within the cans and cases furnished by the Community Motion Picture Bureau, and such cans and cases will be kept closed. The Education and Recreation Officer is responsible for the securing and delivery of a supply of electric current

suitable and sufficient for good projection. With each booth, or within 6 feet of each projection machine used without booth, there will be kept at all times a fire extinguisher of a suitable type, and a pail filled with sand. Approximately every two weeks a representative of the Community Motion Picture Bureau will visit each station and will offer suggestions to the Education and Recreation Officer to improve conditions. The supervisor is instructed to cooperate in all reasonable ways with the Education and Recreation Officer in connection with the technical operation of this service; the necessary facilities and assistance will be provided for him by the commanding officer. After November 15, 1919, an authorized representative of the Community Motion Picture Bureau will bear an identification card with his photograph and signed by the proper representative of the War Department, reading substantially as follows:

"This certifies that ——— ———, whose picture appears on the back hereof, is employed as ——— by the Community Motion Picture Bureau, the accredited agents for the War Department motion-picture service. All courtesy and assistance not incompatible with military exigency will be extended to him in the performance of his duties as above."

Previously thereto, each representative will carry formal identification.

9. *Damage.*—Films, generally cellulose-nitrate products, are fragile and expensive, and will be handled with great care. Their damage or loss is not only serious financially, but also breaks up carefully made schedules, and results in disappointments thereby. In case of damage or loss, the Education and Recreation Officer will report the facts fully and promptly to the War Department, with full details, which will enable responsibility to be placed and adjustments made.

10. *Directors of the Community Motion Picture Bureau.*—The Community Motion Picture Bureau has divided the territory of the United States for administrative purposes into "divisions" corresponding to the military departments, except that Maryland, the District of Columbia, Delaware, and Virginia are set apart and known as the Potomac Division. The Education and Recreation Officer concerning all matters except shipment should deal with the director of the division in which he is placed. Concerning matters of shipments he should consult with the manager of the "branch" which supplies him. All directors of the Community Motion Picture Bureau have been instructed to call upon or communicate with the Education and Recreation Officers as soon as it is practicable to explain the details of this service and to be of all possible help in its successful inauguration and performance. The divisional officers of the Community Motion Picture Bureau are as follows:

Northeastern.....Philip Davis, director,
42 Melrose Street, Boston, Mass.
Eastern.....E. H. Jewett, director,
71 West Twenty-third Street, New York City.
Potomac.....C. H. Moore, director,
712 Thirteenth Street NW., Washington, D. C.
Southeastern.....J. Sterling Moran, director,
146 Marietta Street, Atlanta, Ga.
Southern.....W. E. Paschell, director,
1920 Main Street, Dallas, Tex.
Central.....I. B. Haviland, director,
5 South Wabash Avenue, Chicago, Ill.
Western.....George A. Whitney, director,
821 Market Street, San Francisco, Calif.

A representative of the Southern Division is maintained at the Book Building, San Antonio, Tex.

The location of branch depots, within the above divisions, from which shipments may be made will be communicated to the Education and Recreation Officer by the director of the Community Motion Picture Bureau.

The home office of the Community Motion Picture Bureau is at 46 West Twenty-fourth Street, New York City, N. Y.

11. *Location of showing.*—The presentation or showing of a film will be in a theater, amusement hall, or such building equipped with projection machine and picture screen. In all camps with Liberty theaters, showing will be made at that theater unless local conditions make it advisable to have showing at another building.

12. *Admission charge.*—An admission charge of 10 cents will be made for all regular picture showings. For special feature showings a small additional charge will be made. Civilians will be charged the customary 10 per cent war tax in addition to regular admission charge.

13. *Finances.*—Finances connected with the motion-picture service are divided into two classes, those administered through the central agency of the War Department and those administered by the local military authorities at the various stations of the Army in the United States.

The motion-picture service is designed to be self-supporting for the Army as a whole. This service at any particular station will place its profits at the disposition of the War Department, or, if it is conducted at a temporary loss, will have its expenses paid by the War Department.

All film rentals and advertising material, being supplied by the Community Motion Picture Bureau, will be paid for by the proper office of the War Department in Washington, D. C. All transportation charges incurred by the Community Motion Picture Bureau in sending films and advertising matter to stations of the Army will be paid for by the War Department.

Expenses incurred at stations of the Army for local pay rolls and other miscellaneous items will be borne by the local station out of the local profits, unless these should be insufficient to meet the demand. In this latter event, a properly vouchered statement of expenses will be forwarded by the commanding officer to The Adjutant General of the Army on the 25th day of each month in which the expense occurs. Commanding officers will make every effort to insure the self-supporting conduct of motion-picture service at their stations.

Education and Recreation Officers will prepare weekly financial statements of the operation of the motion-picture service at their stations. This statement will comprise an accurate accounting for all moneys received and disbursed for moving-picture service, and an accurate statement of all outstanding obligations. All profits on hand after all expenses have been paid will be reported on this statement. The Education and Recreation Officer is designated as the custodian of funds accruing from motion-picture service and is authorized, subject to the approval of his commanding officer, to account for and to disburse this fund.

An amount of cash money, determined by the commanding officer, sufficient to provide box-office change and small sundry expenses, will be retained by the Education and Recreation Officer as a permanent working balance. All profits over this sum will be deposited daily, if possible, otherwise weekly, to the credit of the "Education and Recreation Officer, Camp ————, custodian motion-picture fund," in the nearest United States Government depository, or, if none exists within reasonable nearness, in a bank to be chosen by the com-

manding officer. Monday of each week the Education and Recreation Officer will secure a cashier's check or bank draft from his depository for all funds on deposit to his credit, which draft or check will be made payable to "The Officer in Charge, Camp Activities Section." He will forward this, with letter of transmittal, direct to "The Officer in Charge, Camp Activities Section, Education and Recreation Branch, War Plans Division, General Staff, room 350, State, War, and Navy Building, Washington, D. C."

The Education and Recreation Officer will retain copies of his weekly statements and will keep his accounts in such condition that they may be ready for immediate inspection by authorized persons.

on Property Loan Record cards, except articles listed below, pertaining to _____, including last Shipping Ticket No. _____,
(Organization.)
dated _____, 19__, and last Receiving Report No. _____, dated _____, 19__.

_____, *Successor.*
(Name.)

_____
(Rank and corps.)

_____
(Official designation.)

If shortage is found in property listed on Property Loan Record, the succeeding officer will enter on Organization Property Loan Record, in "Balance" column, property actually received, and in "Date" column date he received organization property. Unit commanders or property officers must be prepared to show auditors either the property as listed on cards, signatures of enlisted men to whom property has been issued, signed Receiving Report of a supply or salvage officer or new commander, or a Survey I and I Report or statement of charges, showing that it has been properly dropped. The articles excepted under (*a*), (*b*), and (*c*) of subparagraph (1) hereof, when issued to enlisted men will be listed on Form No. 637, A. G. O. Commanding officers will

retain sufficient equipment for the authorized strength
of that listed under (*a*), (*b*), and (*c*), subparagraph (

(3) Where a requisition, marked "exchanged" by
sented to a supply officer, he will issue the articles
mark the Shipping Ticket therefor "exchanged" and
the same manner as one for expendable articles. The
will file the Shipping Ticket in its proper place with other
but will make no entry or changes on his Property Loan Record, or on Form No. 637, A. G. O., for the property covered thereon.

2. Where the provisions of this circular are in conflict with paragraph 681–P, Army Regulations, this circular will govern.

Assignment to command I
Promotion of noncommissioned officers, Medical Department II
Board of Contract Adjustment III

I--Assignment to command.—By direction of the President, Lieut. Gen. *Robert L. Bullard,* United States Army, is relieved from his present assignment and duty, and will proceed as soon as practicable to Governors Island, New York, and assume command of the Eastern Department. The travel directed is necessary in the military service.

[201, A. G. O.]

II--Promotion of noncommissioned officers, Medical Department.—Section IX, General Orders, No. 139, War Department, 1917, and section II, General Orders, No. 66, War Department, 1918, relative to promotion and reduction of the enlisted personnel of the Medical Department, are rescinded.

[220.2, A. G. O.]

32-24-45

III--Board of Contract Adjustment.—Paragraph 3, section IV, General Orders, No. 103, War Department, 1918, is amended by adding thereto the following subparagraph:

The chairman may from time to time designate an assistant chairman from among the members of the board, who shall, in the absence or disability of the chairman, exercise his powers and perform his functions, and the chairman may at any time, and from time to time, delegate to the assistant chairman any of his powers and functions.

WASHINGTON : GOVERNMENT PRINTING OFFICE : 1919

GENERAL ORDERS, No. 123.

WAR DEPARTMENT,
WASHINGTON, *October 31, 1919.*

The following instructions previously published in certain War Department numbered circulars for the month of October, 1919, are published for the information and guidance of all concerned:

	Section.
Exchange of certificate of merit for distinguished-service medal by officers	I
Service chevrons	II
Official correspondence with former officers and enlisted men	III
Shipment of baggage	IV

32-24-73

I.—Exchange of certificate of merit for distinguished-service medal by officers (Cir. No. 451, W. D., 1919).—An officer of the Army who as an enlisted man received a certificate of merit will, under the provisions of the act of Congress approved July 9, 1918 (Bul. No. 43, W. D., 1918), and in accordance with an approved opinion of the Judge Advocate General (3d ind., J. A. G. O., Sept. 8, 1919—To The Adjutant General of the Army, J. A. G. 210.5), exchange his certificate of merit for a distinguished-service medal.

[201, A. G. O.]

II.—Service chevrons (Cir. No. 456, W. D., 1919).—Service rendered in the Army after October 4, 1919, will not be counted toward the acquirement of service chevrons, gold, silver, or blue, except that rendered in the American Expeditionary Forces in Siberia and with American troops in occupation of hostile territories.

[421.6, A. G. O.]

III.—Official correspondence with former officers and enlisted men (Cir. No. 458, W. D., 1919).—In all official correspondence with former officers or enlisted men now out of the service an official penalty envelope, properly addressed, will, under the provisions of paragraph 834, Army Regulations, be inclosed to cover the reply, if reply is necessary.

[311.15, A. G. O.]

147063°—19

CIRCULAR
No. 56.

WAR DEPARTMENT,
WASHINGTON, *November 6, 1918.*

EQUIPMENT FOR TROOPS ORDERED OVERSEAS.

1. The following instructions for the clothing and personal equipment of officers and enlisted men and equipment of organizations ordered on duty overseas is published for the information and guidance of all concerned:

2. No marching shoes will be taken by enlisted men. As soon as a sufficient supply is available, field shoes will be issued at mobilization camp and will be worn a sufficient length of time so that they will be thoroughly broken in before reaching an oversea station. Field shoes will be well treated with "dubbin" on shipboard.

3. Campaign hats are not worn in France. Oversea caps will be issued men upon their arrival at embarkation camps, where other headgear will be turned in for reclamation.

4. Canvas leggings are not worn overseas. Woolen puttees only will be issued for service overseas.

5. Overcoats of enlisted men will be of knee length.

6. Bacon cans have been discontinued as a regular article of issue to the service for the present emergency only. The bacon cans now issued to troops will be turned in to the nearest post or camp ordnance officer who will store same as the Chief of Ordnance may direct.

7. When supply is available, gas masks will be issued to combatant troops, including total personnel of divisions, at mobilization camps. Troops will be directed to exercise greatest care in handling them to prevent damage during the voyage. These masks will not be used in training in United States.

8. When troops are fully equipped at their mobilization camps and proceed directly from such camps to the transport without first passing through a concentration camp at the port of embarkation, the final inspection will be made at the mobilization camp by an inspector from the Embarkation Service, when practicable, otherwise by an inspector at the mobilization camp, who shall be designated, through the commanding officer, by the commanding general of the port through which the troops are to pass. The inspector of the mobilization camp shall act under the commanding general, port of embarkation, in so far as relates to inspections. In all other cases, the final inspection shall be made at the concentration camp, port of embarkation.

9. The 5 per cent surplus formerly authorized by paragraph 5, General Orders, No. 97, War Department, 1917, will not be taken.

10. Underwear for enlisted men will be either summer or winter, according to season. Both kinds will never be taken.

11. Troops that are to receive their final equipment at concentration camps will leave at their mobilization camps all articles which, in the opinion of the camp commander, are unquestionably unserviceable.

12. Inspectors and commanders of troops should bear in mind the necessity of avoiding wastage and the increasing difficulty of obtaining raw materials. Unnecessary changes or replacements must be avoided.

13. As casuals and replacements are to be sent abroad fully equipped, clothing and personal equipment accompanying troops must be limited to that required for actual strength of the command.

14. No barrack bags will be taken overseas.

15. Requisitions from troops placed on priority list will be made for all supplies needed to equip the command in all items covered by this circular. The chief of supply bureau will notify the organization of the articles which will be supplied at ports of embarkation and overseas. This notification will be the authority of the organization commander for reporting his command equipped without the articles so noted.

90727°—18

IV.—**Shipment of baggage** (Cir. No. 470, W. D., 1919).—Officers, noncommissioned officers, and civilian employees of the regular establishment when changing station will be authorized to have their permanent change of station allowance of baggage shipped, except in cases where the order directing travel specifies temporary duty.

Officers, noncommissioned officers, and civilian employees who have been assigned to field stations prior to the issuance of this section are authorized to have their baggage shipped under the same conditions as outlined in preceding paragraph if such action has not already been taken.

[524.21, A. G. O.]

BY ORDER OF THE SECRETARY OF WAR:

PEYTON C. MARCH,
General, Chief of Staff.

OFFICIAL:

P. C. HARRIS,
The Adjutant General.

WASHINGTON : GOVERNMENT PRINTING OFFICE : 1919

INDIVIDUAL EQUIPMENT, ENLISTED MEN.

16. The following is fixed as the basic allowance of clothing and individual equipment for enlisted men of all arms, corps, and auxiliary troops when leaving for duty overseas. Additional small articles may be carried on the person.

A. QUARTERMASTER EQUIPMENT.

Articles.	Number and how carried.		Remarks.
	On person.	In or on pack.	
Band instruments and accessories	1		As issued (including music, music stands and pouches).
Blanket, O. D		3	From Sept. 1 to Apr. 30; 1 from May 1 to Aug. 31.
Belt, waist	1		
Breeches, O. D., woolen, pair	1		
Bugles	1		As issued.
Cap, oversea	1		
Chevrons	3		And sleeve insignia, including brassards, as prescribed for each individual to be worn on overcoat, service coat, and O. D. shirt.
Coat, service, woolen	1		
Dubbin, 4-ounce box		1	When available for issue.
Gloves (leather mittens, 1 finger unlined)	1		From Sept. 1 to Apr. 30.
Gloves, woolen, O. D	1		Do.
Laces, shoe, extra, pairs		2	
Ornaments:			
As prescribed for each corps	3		
Bronze letters, U. S	2		
Overcoat	1		Or mackinaws as prescribed by Equipment Tables.
Pins, shelter tent		5	
Poles, shelter tent		1	
Puttees, woolen, spiral, pairs	1		
Rations, reserve		2	
Shirts, O. D., woolen	1	1	
Shoes, field, pairs	1	1	
Slicker	1		
Stockings, wool, pairs	1	3	Light from May 1 to Aug. 31; heavy from Sept. 1 to Apr. 30.
Tags, identification	2		
Tape for identification tags	1		
Tent, shelter half		1	
Toilet articles:			
Brush, clothing			1 per squad.
Brush, shoe			Do.
Brush, shaving		1	
Brush, tooth		1	
Comb		1	
Mirror, small, steel		1	
Razor		1	
Soap, hand, cake		1	
Soap, shaving		1	
Towels		2	
Housewife			1 per squad.
Underwear, suit	1	1	Summer from May 1 to Aug. 31; winter from Sept. 1 to Apr. 30.
Whistle and chain	1		For those to whom issue is authorized.

B. ORDNANCE EQUIPMENT.

Ordnance equipment will be carried as indicated in approved Ordnance Tables of Equipment for the organizations concerned, under the following headings in each table:

VII–1 Rifles.
VII–2 Pistols.
VII–5 Hand arms.
IX–1 Infantry equipment.
IX–2 Cavalry equipment.
IX–3 Artillery equipment.
X–3 Intrenching tools.

Provided, That all enlisted personnel, except Medical Department, will receive, as part of initial equipment, one complete Infantry pack. Enlisted personnel of the Medical Department will be issued ration bags if available, otherwise Infantry packs.

That equipment received, in accordance with this provision, which is in excess of authorized allowances will be turned in upon receipt of organization equipment overseas.

That pistols, caliber 45, model 1911, will not be issued in the United States until the supply is adequate. In lieu thereof revolvers and accessories will be issued on a basis of 10 per cent of organization requirements.

That small-arms ammunition issued to enlisted personnel will be turned in and shipped in bulk, as provided in paragraph 17–C herein.

C. MEDICAL EQUIPMENT.

Articles.	Number and how carried.		Remarks.
	On person.	In or on pack.	
First aid packet	1		For troops other than Medical Department.
Medical Department individual equipment.			As issued to enlisted men, Medical Department.
Foot powder, tins			1 per squad.
Adhesive plaster, spools			Do.

D. MISCELLANEOUS.

Gas mask (see paragraph 7)	1		When issued.

ORGANIZATION EQUIPMENT TO BE CARRIED AS BAGGAGE.

17. *a.* Subject to the above modifications, the following organization equipment will be taken overseas:

Colors, standards, and guidons, with carriers.
Soap, issue, 10 days' supply.
Typewriters as issued.
Mimeographs as issued.
Field ranges, as prescribed in Equipment Tables.
Cleaning material for small arms, one month's supply.

Organization records, stationery packed in field desks and necessary filing equipment.

Sweater and knitted helmet, where they have been donated to soldiers, not to exceed one to each man, packed with organization equipment.

Necessary official publications will be carried as organization baggage.

b. The following Medical Department equipment will be taken with troops as baggage: Combat equipment, less litters, pack saddles, boxes of ambulance surgical dressings, quartermaster equipment, at rate of one for each battalion or other organization equipped with combat equipment; and camp infirmary reserve. Veterinary officers will take veterinary chest and wallet. One field chest for each veterinary field unit, and one wallet for each farrier.

c. Automatic rifles and ammunition therefor; dischargers V. B. (tromblons); small arms ammunition issued to enlisted personnel; horse equipment, except that which is owned by officers and which they are authorized to take as additional baggage; and all other equipment not specifically referred to in this circular, will, prior to departure of organization from mobilization camps for oversea service, be turned in to the proper supply department and the equipment will be completed overseas.

No phonographs, barber chairs, exchange equipment, or any other property which may have been bought from company fund or presented to the organization will be taken. Such property will be disposed of before leaving mobilization camps.

d. Helmets will be issued in the United States as soon as supply permits.

e. Where the individual equipment that must be carried by the man in order that he may function upon reaching France, is different from that prescribed for combatant troops, or where the organization equipment is special and can not be provided in France, authority must be obtained in each case for its being carried or transported before troops leave for the port of embarkation.

PERSONAL EQUIPMENT, OFFICERS.

18. The following list is not mandatory; it includes all the articles which an officer ordered on oversea duty will find necessary in France. The mandatory articles are those given in Section IV, Special Regulations No. 41; but even in these cases it it is not always possible that they be taken from this side, as some articles, for example, pistols and horse equipment, can not usually be obtained before reaching France. However, officers who possess the articles should take them. All official pamphlets not taken will be turned in to the camp adjutant.

A great many articles are on sale in the commissaries established by the American Expeditionary Forces. These articles include breeches, whipcord; drawers, wool; trench coats with detachable lining, suitable both as overcoat and raincoat; undershirts, wool; boots, rubber, hip; shoes; matches; shaving outfits; soap; towels, bath. Uniforms can be purchased abroad at about the same rates as in the United States. Shelter tents complete are issued to company officers as part of company equipment.

The following containers are authorized for all officers below the rank of general officers:

1 trunk locker (or box of approximately same size), for horse equipment, when mounted officers own same and are taking it abroad.

1 bedding roll, not to exceed 50 pounds weight when packed.

1 trunk locker, of the approximate dimensions 31½ by 18 by 13½ inches.

1 piece hand baggage or clothing roll, not to exceed 40 pounds weight when packed

Additional space in containers may be utilized at officer's discretion.

General officers are permitted to take as much of their field allowance of baggage as they may find necessary.

Articles.	On person.	In bedding roll.	In trunk locker or hand baggage.	Remarks.
Ammunition, pistol, caliber .45 [1].	35			Or 23 for revolver, if prescribed.
Basin, folding		1		
Belt, Liberty (Sam Browne)			1	See note under "Belt, saber, garrison."
Belt, saber, garrison			1	For officers equipped with saber. See par. 65, S. R. 41. In addition to the prescribed field belt, the Sam Browne belt with single sling will be needed by all officers. The proper type may be obtained in France. (NOTE.—The Sam Browne or Liberty belt is not authorized for wear in the United States.)
Belt, pistol [1]	1			General officers, officers of the staff corps and departments, and Cavalry officers will wear the officers' leather waist belt with magazine pocket and necessary leather slides for first-aid packet pouch, for the canteen, and for the pistol holster. Officers of Infantry, F. A. Engineers, Coast Artillery, and Signal Corps will wear the web pistol belt, model of 1912.
Belt, waist	1			

[1] Issued in France on memorandum receipt. Not issued in United States except to officers serving with troops.

Articles.	On person.	In bedding roll.	In trunk locker or hand baggage.	Remarks.
Blankets, O. D., woolen		3		
Book, note	1			
Book, field message [1]	1			
Boots, field, pair		1		Circular A. E. F. states that shoes are required for wear inside arctic overshoes; and also very heavy hobnailed field shoes, or trench boots large enough to take a pair of heavy wool stockings. Those laced all the way up are authorized, but in cities they may be worn only in inclement weather. Mounted officers may wear boots of russet leather.
Boots, rubber, pair		1		For combatant officers.
Breeches, O. D. service	1		1	
Bucket, water, folding		1		
Can, condiment [1]	1			
Can, meat [1]	1			
Canteen [1]	1			
Cap, overseas	1			Not worn in United States before arrival at port of embarkation.
Cases, pillow		2		
Coat, O. D. woolen	1		1	
Comfortables		1		Or light sleeping bag.
Compass, luminous	1			
Cover, canteen [1]	1			
Cup [1]	1			
Dispatch case [1]	1			For field and staff officers, when issued.
Field glass [1]	1			
First-aid packet [1]	1			
Flash light			1	With extra battery.
Fork [1]	1			
Fountain pen	1			
Gas mask [1]	1			When issued.
Gloves, leather	1			Or in trunk.
Gloves, woolen, O. D	1			Do.
Handkerchiefs			12	
Haversack, model 1910 [1]	1			As prescribed for infantry officer. See note under "pack carrier."
Helmet, steel [1]	1			When issued.
Holster [1]	1			
Horse equipment [1]				Those owning horse equipment should take it as additional baggage in the authorized container.
Housewife			1	
Knife, pocket	1			
Knife, ordnance [1]	1			
Laces, shoe, extra, pairs			4	
Leggings, leather, pair	1			Or boots for mounted officers.
Magazines, pistol, extra [1]	4			
Overcoats	1			Or trench coat, which may be obtained in France. The overcoat must not be shorter than 1 inch below the knee nor longer than 10 inches below the knee. See under "Slicker."
Pack carrier [1]	1			As prescribed for Infantry officers. Medical officers make their pack with ration bag.
Pajamas, flannel, suits			2	
Pencil	1			
Pillow		1		
Pistol, caliber .45 [1]	1			Or revolver, if prescribed.
Pockets, magazine, double, web [1]	2			
Pouch for first-aid packet [1]	1			
Puttees, woolen, pair			1	
Rations, reserve [1]	2			
Saber and scabbard and saber knot.	1			Only for Cavalry officers on duty with troops armed with saber. Sold, not issued.
Shirt, O. D., woolen	1		2	
Shoes, pair	1			Or boots for mounted officers.
Shoes, field, pair			1	See note under "Boots, field, pair."
Slicker	1			The overcoat and raincoat (slicker) for officers in the trenches should be of the same appearance as those worn by the men. The English trench coat is satisfactory. It combines the requirements of overcoat and slicker and has a lining that can be worn separately. Can be bought in France.

[1] Issued in France on memorandum receipt. Not issued in United States except to officers serving with troops.

Articles.	On person.	In bedding roll.	In trunk locker or hand baggage.	Remarks.
Slippers, pairs			1	
Spoon [1]	1			
Spurs, pair [1]			1	For mounted officers. On person if boots are worn.
Stockings, wool, heavy, pairs			6	
Stockings, wool, light, pairs	1		6	
Tag, identification [1]	2			
Tape for identification tag [1]	1			
Toilet kit, with articles			1	
Towels			4	
Underwear, wool, heavy, suits			4	
Underwear, light, suits	1		3	
Watch, luminous	1			
Whistle and chain [1]	1			

[1] Issued in France on memorandum receipt. Not issued in United States except to officers serving with troops.

19. War Department Circular, "Equipment for Troops Ordered Overseas," dated July 11, 1918, as amended by circulars dated August 10, September 9, September 19, September 20, and September 21, 1918, and such other orders and instructions as may be in conflict with the provisions of this circular, are rescinded.

154338°—19

EXTRACTS FROM GENERAL ORDERS AND BULLETINS, WAR DEPARTMENT.

NOVEMBER, 1919.

SECTION I.

EXTRACTS FROM GENERAL ORDERS.

NOVEMBER, 1919.

GENERAL ORDERS, No. 125, NOVEMBER 8, 1919.

II—Shipment of baggage.—Paragraph 5, section IV, General Orders, No. 47, War Department, 1918, is amended to read as follows:

5. Officers, enlisted men, and civilian employees of the Regular Army desiring shipments of baggage under the provisions of this section will submit application therefor to the Chief of the Transportation Service, Washington, D. C., setting forth the necessity for the shipment, and such application, when duly approved, shall be the authority for a transportation officer to make the shipment. (524, A. G. O.)

III—Promotion of noncommissioned officers, Medical Department.—Section II, General Orders, No. 70, War Department, 1917, and section I, General Orders, No. 102, War Department, 1917, temporarily suspending certain regulations relative to the promotion of noncommissioned officers of the Medical Department, are rescinded. (300.42, A. G. O.)

GENERAL ORDERS, No. 127, NOVEMBER 17, 1919.

II—Appointment of noncommissioned officers at schools for bakers and cooks.—Section V, General Orders, No. 100, War Department, 1919, is amended by adding thereto the following paragraph:

5. Appointment of noncommissioned officers for the detachments authorized for the schools for bakers and cooks will be governed by the provisions of this section and not by the provisions of section I, General Orders, No. 92, War Department, 1917. Hereafter, the enlisted personnel pertaining to these schools will be considered as being an integral part of the Quartermaster Corps. (220.1, A. G. O.)

III—Appointment of noncommissioned officers in Ordnance Department.—So much of section II, General Orders, No. 50, War Department, 1918, and so much of Circular No. 84, War Department, 1919, and other instructions from the War Department which authorize various commanding officers in the United States and its possessions to make temporary appointments of all noncommissioned officers and privates, first class, Ordnance Department, with the exception of ordnance sergeants of the Regular Army, are rescinded. With the exception of the forces in France, Germany, and Siberia, all appointments of noncommissioned officers and privates, first class, in the Ordnance Depart-

154338—19

ment will be made according to the provisions of paragraph 1512½, Army Regulations. The appointments in the American Forces in France and Germany and Expeditionary Forces in Siberia will be in conformity with an allotment of noncommissioned officers and privates, first class, made by the War Department. (220.1, A. G. O.)

GENERAL ORDERS, No. 128, NOVEMBER 29, 1919.

II. Preparation of enlistment record (Cir. No. 511, W. D., 1919).—1. Many enlistment forms received in the office of The Adjutant General of the Army show corrections by erasure, interlineation, or substitution by pen or typewriting machine other than those required by instructions for the preparation of the forms.

2. When items such as the term of enlistment, date of discharge from prior service, date of acceptance, spelling of name, arm of service for which enlisted, Army serial number, date of birth, or age, and other items upon the forms are changed from the original entry for good reason in the preparation of the forms, officers making such changes will authenticate them by initialing each change.

3. No changes will be made except by those properly concerned in the preparation of the forms.

4. Examination of enlistment papers and other forms prepared in connection with voluntary enlistments shows that sufficient care is not being used in the preparation of these papers. All persons responsible for the preparation of enlistment forms will exercise due care in their preparation to avoid erasures and other corrections, and will see that they are correctly and completely prepared in all details before being forwarded to The Adjutant General of the Army. (201.3, A. G. O.)

SECTION II.

EXTRACTS FROM BULLETINS.

NOVEMBER, 1919.

BULLETIN No. 39, NOVEMBER 19, 1919.

II--Status on reenlistment of former noncommissioned officers discharged to be appointed Army field clerks.—Former enlisted men discharged to be appointed Army field clerks upon reenlisting are not entitled to be restored to their former grades by virtue of the act of Congress approved March 30, 1918 (sec. V, Bul. No. 22, W. D., 1918), but will be entitled to count their service as Army field clerks for continuous-service pay. (220.45, A. G. O.)

III--Badge for principals and alternates on an Army rifle team.—The first paragraph of section III, Bulletin No. 29, War Department, 1919, is amended to read as follows:

A badge will be issued to officers and enlisted men who, since and including the year 1906, shall have won a place as a principal or alternate on an Army rifle team selected to represent the Army, or a part of the Army, in the national matches. These badges will be included among those which will count in determining eligibility for classification as distinguished marksman. (353.154, A. G. O.)

BULLETIN No. 40, NOVEMBER 29, 1919.

I--Pistol practice for soldiers doing guard duty with the pistol (Cir. No. 496, W. D., 1919).—Whenever an enlisted man is required to perform guard duty armed with the pistol, and such man has never completed either the dismounted or mounted courses with that weapon, authority is granted to have him pursue the dismounted pistol course, and to expend the ammunition necessary therefor. (353.14, A. G. O.)

II--Polo (Cir. No. 531, W. D., 1919).—1. It is the desire of the War Department that polo should be one of the games to be encouraged and developed throughout the Army. To accomplish the aims for which this game is fostered in the service, namely, the development of horsemanship, skill, and daring on the part of officers and enlisted men, commanding officers will utilize all means at their command to further the interests of this sport. It is especially desired that teams be developed and maintained at the several division camps and at training centers and regimental posts.

2. A central polo committee has been established in the War Department. This committee will coordinate all matters pertaining to polo activities throughout the Army. It will secure every assistance possible for the furtherance of the game, and will coordinate relations between polo in the service and the American Polo Association. In order that an adequate organization may be completed throughout the service the commanding officer of each division, post, camp, or station where polo is practicable will designate an officer as polo representative and will report the name of the officer so designated to The Adjutant General of the Army. The representative thus selected will com-

municate through his commanding officer directly with The Adjutant General of the Army on all matters pertaining to polo activities at his station. Polo representatives should be chosen for their enthusiasm and organizing ability, in order to insure in each unit the attainment of the result for which polo is instituted in the service. As soon as it is found feasible to take up polo at any station the commanding officer will so report to The Adjutant General of the Army, on receipt of which report information will be furnished relative to the supplying of mounts and equipment.

3. Organizations desiring to take up polo are empowered to use regulation mounts of their authorized quota for this purpose. Regulation mounts of the necessary speed and handiness will be furnished such organizations as part of their quota on requisition made to the appropriate remount officer.

4. To units developing teams there will be issued on requisition the necessary polo equipment, including saddles, sticks, balls, etc.

5. Instructions governing participation in match and tournament play, the training and use of horses, and the requisition and care of equipment will be issued by the War Department. (353.85, A. G. O.)

SECTION III.

CONTENTS OF GENERAL ORDERS AND BULLETINS THAT ARE NOT REPRINTED IN SECTIONS I AND II.

NOVEMBER, 1919.

GENERAL ORDERS, No. 124, NOVEMBER 1, 1919.

Secs. I–V. Awards of distinguished-service medal.

WAR-RISK INSURANCE—PAYMENT OF PREMIUMS ON GOVERNMENT CONVERTED INSURANCE—AMENDMENT TO CIRCULAR NO. 498, WAR DEPARTMENT, 1919.

Paragraph 14, Circular No. 498, War Department, 1919, is amended to read as follows:

14. In those cases in which, before the receipt of this circular, application has been made for conversion of war-risk insurance, the allotment will be made to begin with the month following that for which the insured was last paid. If deductions have been made in accordance with the provisions of Circular No. 288, War Department, 1919, there will be forwarded with the original allotment to the Zone Finance Officer, and with the duplicate signed allotment to the Bureau of War Risk Insurance, a statement showing the month in which application for conversion was made, the months for which deductions have been made, pay roll or voucher on which made, and, if practicable, finance officers' voucher numbers. If any payments have been made by direct remittance to the Bureau of War Risk Insurance, a memorandum of such payments will also be attached to the original and duplicate allotment forms.

UNIFORM FOR DISCHARGED ENLISTED MEN—AMENDMENT TO CIRCULAR NO. 166, WAR DEPARTMENT, 1919.

1. Paragraph 2, Circular No. 166, War Department, 1919, as amended by Circulars Nos. 249, 277, and 315, War Department, 1919, is further amended by adding the following subparagraph:

q. Enlisted men will, on discharge, retain all used underwear, stockings, handkerchiefs, and towels, even though in excess of the allowances prescribed in subparagraphs *j*, *k*, and *n*.

2. Other uniform clothing referred to in paragraph 2, Circular No. 166, War Department, 1919, as amended, will be permanently retained only by men who have been discharged after service in the war with Germany. In other cases the outer clothing will be returned as prescribed in paragraph 1165, Army Regulations.

WASHINGTON : GOVERNMENT PRINTING OFFICE : 1919

CIRCULAR
No. 554.

WAR DEPARTMENT,
WASHINGTON, *December 17, 1919.*

EFFICIENCY REPORTS.

1. Efficiency Reports are carefully studied and analyzed in the War Department. From data contained in these reports officers are classified as to their suitability and fitness for various kinds of duty. If the data in these reports are reliable, the War Department is enabled to assign officers to duties for which they are best suited. If an officer is rated too low an injustice is done that officer; if he is rated too high an injustice is done all other officers of like grade in the service. Reporting officers should, therefore, give their best efforts to the preparation of Efficiency Reports.

2. In order that officers may be compared it is essential that the same standards be applied to all. Reporting officers should carry in mind the following definitions:

"*Average*" indicates that an officer's qualifications or his performance of duty are classed as satisfactory; but that he has not exhibited the particular qualification reported on to such a degree nor performed the duty in such a manner as to make him stand out above the *majority* of officers of his grade and length of service.

"*Above average*" indicates that the officer possesses the qualification or has performed the duty in such a manner as to make him stand out above the *majority* of officers of his grade and length of service.

"*Superior*" indicates that the officer possesses the qualification to such an exceptional degree or has performed the duty in a manner so exceptional as to make him stand out clearly above the *great majority* of officers of his grade and length of service.

"*Below average*" indicates that the officer's qualifications or performance of duty place him below the *majority* of officers of his grade and length of service.

"*Inferior*" indicates that the officer's qualifications or performance of duty place him below the *great majority* of officers of his grade and length of service.

3. Reporting officers are enjoined to pay especial attention to the following:

Compare the officer being reported upon with others of equal rank and approximate equality as to experience and length of service.

In making ratings under "K" and "L" the entry should be based on previous observation or personal knowledge of the qualification possessed by the officer or of his performance of duty. Omit the rating if these conditions are not complied with.

Analyze accurately the qualifications of an officer instead of rating him on a general impression.

Exercise care to see that the ratings are neither too high nor too low. (See charts, par. 7.)

4. A study has been made in the War Department of reports of various commanding officers. It has been found that some rate high, others rate low, while still others make a careful analysis of each officer reported upon and thus furnish a more accurate and reliable estimate. (See charts, par. 7.)

32-24-41

154629°—19

5. The following actual ratings and accompanying remarks are selected from Special Efficiency Reports to illustrate the manner in which reporting officers contradict themselves in the same report:

Capt. A:

"Physical energy and endurance"—*Superior.*

Remark: "Not especially energetic."

Maj. B:

"Judgment and common sense"—*Above average.*

Remarks: "If not wisely coordinated by his commanding officer, may exceed the limits of common sense. Shows poor judgment in handling officers and men."

Lieut. C:

"Attention to duty"—*Average.*

Remark: "Not zealous, not industrious."

Capt. D:

"Initiative"—*Average.*

Remark: "Lacks initiative."

Maj. E:

"Capacity for command"—*Superior.*

Remark: "Lacks tact, apt to irritate those under him. Shows poor judgment in handling officers and men."

6. The object of these instructions is to standardize the making of Efficiency Reports. Upon the receipt of this circular and before any reports are made out, commanding officers will assemble their officers for the purpose of studying the Efficiency Report blank (Form No. 711, A. G. O.), paragraph 829, Army Regulations, as changed by Changes No. 93, September 10, 1919, and these instructions.

7. The following charts are made up from actual reports. They show wide variation in the employment of standards by rating officers.

◤-Superior
✕-Above average
●-Average
//-Below average
○-Inferior

This rating officer DID NOT ANALYZE - ratings consistently much too high.

Officer reported on	Duty	Physical energy and endurance	Judgment and common sense	Attention to duty	Initiative	Organizing ability	Capacity for command	Esp. desire him	Satisfied with him	Object to him

WASHINGTON : GOVERNMENT PRINTING OFFICE : 1919

CIRCULAR
No. 180.

WAR DEPARTMENT,
WASHINGTON, *December 28, 1918.*

REPORT OF CHANGES.

Circular No. 173, War Department, 1918, is rescinded and the following substituted therefor:

Effective at midnight on December 31, 1918, existing instructions in Special Regulations No. 57a relative to preparation and rendition of reports of changes for officers and enlisted men are modified as follows:

1. *a.* A *separate* and complete report for each officer and enlisted man will be rendered for each person in whose status there is a change.

b. The original report will be made on a 3½ by 8 inch slip of letter paper and the carbon copies on 3½ by 3 inch slips. All entries will be made parallel to the 3½-inch dimension and entries will begin as near as possible to the top of the reports. The data contained on the reports will be contracted into the top 3 inches of the original report, in order that they will all be included in the carbon copies. The general data may be printed, typewritten, or mimeographed. No printed forms will be provided by the War Department.

c. On the report of change for enlisted men data will be entered on successive lines, each item or group of items, so far as practicable, on a single line. The entries will be as follows:

(1) Surname, Christian name, Army serial number.

(2) Grade and company and regiment or arm or corps or department.

(3) The words "Report of change" and the date expressed by the words "For the twenty-four hours ending at midnight ———, 1919."

(4) Data relating to change of status corresponding to column of "Remarks" in the report of changes required by Special Regulations No. 57a.

(5) Organization or headquarters and place from which report is rendered.

(6) and (7) Signature, rank, and organization of personnel adjutant rendering report.

(8) Serial number of report, beginning with number 1 on each day, to be placed in lower right-hand corner of the slip.

d. On the report for officers the same items with the necessary modifications will be entered in the same order.

e. The name of the personnel adjutant rendering the report will be printed, typewritten, or mimeographed on the original and all copies of the report. The original will also be signed by the personnel adjutant.

2. *a.* The reports of changes for each day will be accompanied by a memorandum of transmittal, the original and carbon copies of which will be prepared on 3½ by 3 inch slips. The data required will be entered, in a similar manner as on the report of change, as follows:

(1) Heading "Report of changes."

(2) Enlisted men (or officers).

(3) Date expressed by the words "For the twenty-four hours ending at midnight ———, 1919."

100702°—19

(4) Organization or headquarters and place.

(5) and (6) Notation of contents and number of individual reports forwarded with memorandum; for example, "Reports of change forwarded herewith" and "numbers 1 to 62."

(7) A statement, "Last report ———, 1919." The date will not be filled in except in case one or more days intervene between the rendering of reports because of no changes or through unavoidable causes.

(8) and (9) Signature, rank, and organization of personnel adjutant rendering report.

(10) Footnote as shown on model.

b. No serial number will be given memoranda transmitting reports, as dates will give check.

c. Reports of changes of officers and enlisted men will be forwarded under the same cover, but arranged in two groups, one for officers and one for enlisted men, each group transmitted by separate memorandum of transmittal. Each group will be numbered in its own series.

3. In case these instructions fail to reach an organization by January 1, 1919, such organization will render reports by the new method from that date, using retained copies of old form reports for data.

4. Instructions for preparation of reports of changes in Special Regulations No. 57a will govern, except when in conflict with these instructions.

5. Commanding officers of camps, posts, and stations will notify all concerned under their command in time to put these modifications into effect on report rendered for January 1, 1919.

6. The following are models of the Memorandum of Transmittal and Report of Change:

Model of memorandum of transmittal for both original and copies (3½ by 5 inches).

[CIR. 73.]

CIRCULAR No. 73.

WAR DEPARTMENT,
WASHINGTON, *November 18, 1918.*

PREPARATION AND DISPOSITION OF RECORDS FOR FINAL SEPARATION OF OFFICERS, ENLISTED MEN, AND ORGANIZATIONS FROM SERVICE IN THE UNITED STATES ARMY.

1. When definite orders are received for the separation of officers and enlisted men from service in The United States Army, either individually or by organization, the following instructions will govern.

2. Every officer and enlisted man will be given a critical physical examination, a record of which will be forwarded for file in The Adjutant General's Office as hereinafter prescribed. A carbon copy will be prepared for transmittal to the Bureau of War Risk Insurance in case the officer or enlisted man has a wound, injury, or disease that is likely to result in death or disability.

Individual records required.

3. In the case of officers the following are the individual records which must be transmitted for file in the office of The Adjutant General:

a. Copy of authority for discharge or separation from active service.
b. Report of physical examination.
c. Appendix to file record card.
d. Qualification card.

4. In the case of enlisted men the following are the individual records which must be transmitted for file in the office of The Adjutant General, or in the case of *d*, to the Bureau of War Risk Insurance, Treasury Department.

a. Service record.
b. Report of physical examination.
c. Pay card.
d. Notice of discharge (Treasury Department, B. W. R. I.)

Description of forms used.

5. The report of physical examination of officer must show the surname, Christian name, rank, and organization; occupation prior to entry in the service; a certificate by the officer showing whether or not at the present time he has a wound, injury, or disease, whether incurred in the military service of the United States or otherwise, and, if so, the nature and location; a certificate by an examining surgeon showing that the officer is physically and mentally sound, or that he is physically and mentally sound except that he has a defect, wound, injury or disease, the nature and location of which to be described; that it is or is not likely to result in death or disability, that it did or did not originate in the line of duty in the military service, and that in view of occupation, the per cent he is disabled. In case the certificate of the officer and the certificate of the examining surgeon do not agree the case will be submitted to a board of review consisting of not less than two medical officers convened by authority of the camp, post, or other station commander, which will consider the case, examine the officer, and complete the report showing their findings with relation to the matter covered in the certificate of the examining surgeon.

Form No. 395–1, A. G. O., now being distributed, will, when received, be used for the report of physical examination of officers. Until it is available the report will be prepared on 8″ by 10½″ letter paper.

6. An appendix to be used in connection with status card of officers on file in the office of The Adjutant General will be prepared for transmittal on 5″ by 8″ letter paper containing heading showing place and date; surname, full Christian name (no initials), rank and organization; statement that the

32-24-74

officer was separated from service at the place and on the date; a brief statement of authority for separation; record of service with American Expeditionary Forces, if any, showing the dates of sailing from United States, arrival overseas, departure from overseas, port, vessel, and date of arrival in United States; duration of ordinary leaves of absence while overseas; address for future reference; and acknowledgment of receipt of notice of separation from service.

7. Officers' qualification cards, Form CCP 1101, will be completed to date of separation from service under the heading "Military Experience." A final rating will be given each officer just prior to separation from the service and the qualification card transmitted to The Adjutant General of the Army.

8. The service record of each enlisted man separated from the service will be brought up to date; the paster and insert for service record recently distributed attached and the proper entries made thereon. A final indorsement to The Adjutant General of the Army for service record will show place, date, and cause of discharge; the character given; that the soldier was paid in full; that discharge certificate was furnished; service with American Expeditionary Forces if any; soldier's signature; and future address. A blank form for the final indorsement is now being distributed.

If the service record of the enlisted man to be discharged is missing a temporary service record, marked "Temporary" in red ink, will be prepared using available data from all sources including statements of the soldier.

9. The report of physical examination for enlisted men will contain the surname, Christian name, Army serial number; grade, company, and regiment or arm or corps or department; occupation prior to entry in the service; a declaration of the soldier witnessed by an officer relating to his physical condition; a certificate of immediate commanding officer as to the soldier's physical condition; a certificate of the examining surgeon showing data as given in paragraph 5; and if the declaration of the soldier and the certificate of the examining surgeon disagree the same procedure will be followed as prescribed above for an officer. Form No. 135–3, A. G. O., report of physical examination of enlisted man, is being distributed as rapidly as possible.

In the case of men who were accepted for special or limited service the words "Special or limited service" will be written or stamped across the top of the first page of Form No. 135–3, A. G. O.

10. After the data contained on pay cards have been used to complete the final statements or final pay rolls the pay cards will be transmitted as hereinafter prescribed to The Adjutant General of the Army.

11. A notice of discharge, Treasury Department, B. W. R. I., will be prepared in duplicate for each enlisted man separated from the service. Until the form has been received the following matter will be placed on a 5″ x 8″ sheet of stiff letter paper: Surname, first name, and middle name in full (no initials nor abbreviations); *grade and organization at the date of application* for insurance, allotments, and allowances, data to be obtained from the soldier if not of record; date of birth; date of enlistment; date of discharge; if no applications were made, state "none"; brief statement of cause of separation; under "insurance" will be entered the names of the beneficiaries, obtained from soldier if not of record, the amount of monthly premium, and the last month for which premium was checked on pay roll; under "allotment and allowance" the names of the allottees, obtained from the soldier if not of record, and the last date on which allotment is charged against the pay of the soldier under "Class A" and "Class B"; amount charged for allotment on

final payment; future address. The original and duplicate will be signed by the company or detachment commander and transmitted to the camp personnel adjutant who will mail both directly to the Bureau of War Risk Insurance, Treasury Department, Washington, D. C.

Disposition of records.

12. *a.* All individual records of officers and enlisted men separated from the service will be transmitted to the camp or other station personnel adjutant, to be forwarded to The Adjutant General of the Army.

b. When two or more enlisted men are separated from the service at the same time, and the separation is not by organization, an alphabetical list of the men will be prepared to accompany the individual records.

c. When an organization as such is separated from the service a final roster will be prepared and a copy forwarded with the individual records. (See par. 16*b*.)

13. *a.* When organizations, or two or more enlisted men, are separated from the service at the same time, the individual records will be wrapped by class in packages in such manner as to prevent injury in transmission and labeled and marked to show: (1) contents, (2) organization to which they pertain, and (3) by whom sent.

b. The packages of service records, pay cards, and reports of physical examination will be wrapped together in a package with a list or roster, as the case may be, and again labeled and marked to show: (1) contents, (2) organization to which they pertain, (3) by whom sent, and addressed to The Adjutant General of the Army, Washington, D. C.

c. The notices of discharge, B. W. R. I., will be wrapped in a package and labeled to show: (1) contents, (2) organization to which they pertain, (3) by whom sent, and addressed to the Bureau of War Risk Insurance, Treasury Department, Washington, D. C.

d. The above records in each package will be arranged in the same order as the names appear on the roster or alphabetical list accompanying them.

e. In the case of an individual separated from the service the records will be transmitted to the personnel adjutant, to be forwarded by mail to The Adjutant General of the Army or to the Bureau of War Risk Insurance, Treasury Department, as the case may be. No list, roster, or letter of transmittal will be necessary when the records of an individual are sent alone.

14. Packages of individual records will be sent by mail unless the weight exceeds that authorized by postal laws, in which event they will be sent by express.

15. When an organization is finally separated from the service the organization records will be prepared and disposed of as hereinafter indicated:

a. (1) Correspondence book and document file; (2) Morning reports—company, headquarters company, headquarters, and consolidated; (3) Sick reports; (4) Guard reports; (5) Company orders; (6) Regimental orders; (7) Charge sheets—original; (8) War diaries, operation orders, and historical data; (9) Council books.

The above records will be wrapped in packages by class of record and labelled and marked to show contents; period covered; organization to which they pertain; and by whom sent. These packages of records will be consolidated and packed for shipment by freight, the containers to be labeled as to their contents and addressed to The Adjutant General of the Army.

b. (1) Retained muster rolls; (2) Retained reports of changes of officers and enlisted men; (3) Retained monthly returns; (4) Retained rosters of troops

and of officers; (5) Qualification cards of enlisted men; (6) Retained pay rolls; (7) Requisitions, abstracts, and individual slips for clothing.

The above records, except qualification cards, Form CCP–1, will be wrapped in packages, labeled and marked as in *a*, and turned in to camp headquarters to be stored until notification from The Adjutant General of the Army that the originals have been checked, or pending further instructions from the War Department as to their final disposition. There will be entered on qualification card, Form CCP–1, in section headed "Remarks," the home address of the enlisted man and the date of discharge. The qualification cards of discharged men will be placed on file at camp headquarters for ready reference.

An inventory of the records so stored of each organization will be prepared and forwarded immediately to The Adjutant General of the Army.

c. (1) Duty roster. (2) Individual equipment record, after being closed. (3) Charge sheet, company file. (4) Extract from service record. (5) Miscellaneous memoranda except those containing material information relating to the services of officers or enlisted men or to the history of the organization. (See (8) subparagraph *a*.)

The above records may be destroyed after verification by and under the supervision of a field officer designated by the camp, station, or regimental commander for this duty.

d. The publications, manuals, and regulations in the possession of officers and noncommissioned officers may be retained by them.

e. The remaining publications, manuals, and regulations, and the files of orders, bulletins, and circulars other than regimental or company orders, will be turned in to camp headquarters for storage pending further instructions from the War Department.

Returns, rosters, morning reports, and reports of changes.

16. When an organization or headquarters is separated from the service, final returns of strength and final rosters will be prepared as hereinafter indicated:

a. Final return of strength, showing the condition of the command at date of separation, will be prepared in accordance with existing instructions for the preparation of monthly returns and forwarded to The Adjutant General of the Army.

b. Final rosters of troops and of officers will be prepared for the period since the date of last roster in accordance with existing regulations, with the following modifications and exceptions:

(1) Final rosters of troops and of officers of staff corps and departments will be prepared in duplicate, the duplicate copy being forwarded to the chief of the staff corps or department concerned. A single copy only of other rosters will be prepared.

(2) In the caption the word "Final" will be inserted before the word "Roster" and the words "at midnight" omitted.

(3) If for any reason an officer or enlisted man whose name is borne in the body of the roster is not discharged or otherwise separated from service on the date of final roster that fact will be noted after his name with statement of cause of retention in service.

(4) On the final roster of troops or roster of officers the personnel adjutant will certify to the correctness of the roster and to the fact that all enlisted men and officers named thereon have been discharged or otherwise separated from the service except as stated in the body of the roster opposite the names of such excepted officers or men.

17. Morning reports and reports of changes will be prepared and submitted to include the date an organization is separated from service.

Supervision and responsibility for preparation and disposition of records.

18. The post, camp, or station personnel adjutant, under the direction of the commanding officer, will supervise the preparation and disposition of all records pertaining to separation from service of officers, enlisted men, and organizations, and is responsible that all required records are properly prepared, verified, and disposed of.

At large camps a general officer or field officer may be designated to supervise the preparation and disposition of records incident to the separation from service of officers, enlisted men, and organizations.

The individual records of an officer or an enlisted man must be completed in every respect before he is separated from the service.

Discharge certificates.

19. A discharge certificate will be furnished to each enlisted man separated from service by discharge, as prescribed in Army Regulations, and the class of certificate will be as indicated in paragraph 150, Army Regulations.

Council books.

20. Council books relating to funds of organizations separated from the service will be audited as prescribed in Army Regulations for periodic audit, and the certificates required for such audit will be accomplished.

The vouchers covered by such audit may be retained in the possession of the accountable officer.

Information relating to War Risk Insurance.

21. Each officer or enlisted man will be informed of his rights under the War Risk Insurance Act before separation from the service.

A memorandum of such information is being prepared for distribution at the earliest practicable date.

Conduct of medical examination.

22. The following instructions for conducting the physical examination prescribed in paragraph 2 will govern:

a. The physical examination will ordinarily be made in camps or stations in the United States to which troops have been ordered for demobilization, or at which they may already be. Such physical examination will be made and completed under the direction of the camp surgeon or other senior surgeon of the command with the least practicable delay. Except in doubtful or deferred cases the examination of any individual officer or soldier should be completed on one day by the examining surgeon or a special examining board designated by the camp surgeon or other senior surgeon of the command.

b. Except in case of small commands the camp surgeon or other senior surgeon of the command will appoint a medical officer experienced in the duties of examining boards and in conducting physical examinations, who shall be the Chief Medical Examiner of that command.

c. The Chief Medical Examiner will coordinate the duties of and have general supervision over the examining board. He will organize the personnel assigned to it into one or more Examining Teams, assigning the individual

members thereof to such duties as the public interest may dictate. He will appoint a principal medical examiner for each examining team.

d. Each principal medical examiner will supervise the operation of his examining team and will be responsible to the Chief Medical Examiner for the conduction of the physical examinations made by the team and the proper preparation of the necessary records. He will sign the certificate of examining surgeon on form for report of examination.

e. The examining board should consist of sufficient medical officers, including all necessary specialists. Experience has demonstrated that a well-balanced team may be composed somewhat as follows:

	Examiners.
(1) General examination, including skin, general surgery, hernia, hemorrhoids, varicocele, varicose veins, etc	3
(2) Dental	1
(3) Orthopedic, including bones and joints	3
(4) Eyes	1
(5) Ears, nose, and throat	1
(6) Cardio-vascular	3
(7) Tuberculosis	6
(8) Neuro-psychiatric	3

f. In the physical examination of special or limited service men, medical examiners will interrogate the soldier as to the disability or defect which he had upon entrance into the service which placed him in the limited-service class. The physical examination of such men will be made with great care, with special reference to the defects which the man states that he had upon entrance into the service.

g. A report of each physical examination will be rendered upon Form No. 895–1, A. G. O., if for an officer, and upon Form No. 135–3, A. G. O., if for an enlisted man (see pars. 5 and 9). Should the certificate of the officer or the declaration of the enlisted man be at variance with the finding of the medical examiner, the officer or enlisted man will be immediately referred to a Board of Review convened by the camp, post, or regimental commander. A formal order convening the board is not necessary and in large camps or posts the power to convene the board will usually be delegated to the camp or post surgeon.

h. The Board of Review will consist of not less than two medical officers, designated by the camp surgeon or other senior surgeon of the command. The board will be under the supervision of the senior medical examiner. After a thorough physical examination of the officer or soldier referred to it, together with a careful investigation of all the circumstances in the case, it will complete Form No. 395–1, A. G. O., or Form No. 135–3, A. G. O., as the case may be.

[324.122, A. G. O.]

BY ORDER OF THE SECRETARY OF WAR:

PEYTON C. MARCH,
General, Chief of Staff.

OFFICIAL:
P. C. HARRIS,
The Adjutant General.

WASHINGTON : GOVERNMENT PRINTING OFFICE : 1918

[U.S - Dept of War]

[G. O. 58.]

GENERAL ORDERS, No. 58.

WAR DEPARTMENT, WASHINGTON, *June 22, 1918.*

I--Mr. Stanley King and Mr. E. M. Hopkins are announced as the War Department representatives on the Labor Policies Board.

[334.8, A. G. O.]

II--In all work in the United States done directly by the War Department and in all work done by contract, whether cost-plus or otherwise, where the War Department, by the terms of the contract or by agreement of employer and employees involved or otherwise, has authority as to the wages, hours, and conditions of work under the contract, no changes in hours of labor, rates of pay, rates and hours of overtime shall hereafter be made upon the authority of or by the direction of or with the approval of any bureau of the War Department except by written recommendation to one of the representatives of this department on the Labor Policies Board, approved in writing by such representative. All changes in wages, hours, or conditions of work so approved in writing shall be made effective by supervising or contracting officers concerned.

[334.8, A. G. O.]

III--1. The dangers of inadvertently communicating valuable military information to the enemy and the necessity of closing every possible gate against enemy propaganda make it necessary that the strictest attention be paid to the correspondence of both officers and enlisted men. Efforts are constantly being made by strangers to find soldiers with whom they may correspond, in most cases innocently enough, but the opportunity which might be offered to a wholesale propaganda in the Army by well-organized groups of enemy sympathizers is obvious.

2. All officers and men are forbidden—

a. To insert advertisements or letters in any publication inviting strangers to communicate with them.

b. To enter into correspondence with strangers in response to advertisements or other invitations.

3. Officers in command of troops are directed not to furnish names of men to any persons who attempt in any manner to enter into correspondence with soldiers with whom they are personally unacquainted.

[080, A. G. O.]

69735°—18

32-24-104

IV--1. The following methods of appointments and reduction of the enlisted personnel of the Veterinary Corps will govern during the existing emergency:

a. In divisions, the division veterinarian may promote enlisted men of the Veterinary Corps up to the authorized allowance and may sign warrants "for the Surgeon General."

b. In veterinary, base veterinary, corps veterinary, and Army mobile veterinary hospitals the enlisted personnel of the Veterinary Corps will be promoted by the veterinarian in charge, who may sign warrants "for the Surgeon General," except that while any of these units are in a training school any appointment must be approved by the senior veterinary instructor.

c. In veterinary detachments assigned to auxiliary remount depots, or to remount squadrons, or to any other detached command, the sergeants, first class, sergeants, and corporals will be issued warrants by the Surgeon General upon recommendation of the veterinarian. Farriers, horseshoers, cooks, privates, first class, and saddlers will be appointed by the veterinarian.

2. Any veterinarian may make reductions when in his judgment the same may be necessary, provided that the officer ordering the reduction shall have the power to fill the vacancy thus created.

[220.2, A. G. O.]

V--By direction of the President, Brig. Gen. Henry A. Greene, United States Army, is relieved from his present duties, and will proceed to San Francisco, Cal., and take the first available transport to sail from that place for the Philippine Islands, and upon arrival at Manila will assume command of the Philippine Department, relieving Brig. Gen. Robert K. Evans, United States Army, retired, who after being thus relieved will proceed to his home, and upon arrival there report by telegraph to The Adjutant General of the Army. Brig. Gen. Evans is relieved from active duty to take effect upon his arrival at his home. The travel directed is necessary in military service.

[322.08 A. G. O.]

VI--Paragraph 1, General Orders, No. 161, War Department, 1917, is rescinded and the following is substituted therefor:

When a chief of any staff corps or department of the Army, the Chief of Coast Artillery, the Chief of Field Artillery, or the Director of the Tank Corps desires a registrant inducted into the service for assignment to his particular corps or depart-

ment, and the Secretary of War has granted authority for such induction, he will make requisition in duplicate, Form 2006, P. M. G. O., on the Provost Marshal General, who will forward it to the local board concerned, and later notify the staff, corps, or department, whether the registrant accepts or declines the service. This order will not be construed as modifying the restrictions of section III, General Orders, No. 53, War Department, 1918, relative to induction of men for duty in Washington.

AMERICAN EXPEDITIONARY FORCES,

BULLETIN } FRANCE, *Sept. 12, 1918.*
No. 69. }

The following War Department letter, dated August 19, 1918, quoting a letter from the office of the Secretary of the Treasury upon the discontinuance of Liberty Bond allotments, dated June 22, 1918, and issuing instructions to the Army on this subject, is published for the information and guidance of all concerned:

32-24-52

I. "REGULATIONS GOVERNING TERMINATION AND REDUCTION OF ALLOTMENTS FOR SUBSCRIPTIONS TO THIRD LIBERTY LOAN BONDS FROM PERSONS IN THE MILITARY FORCES OF THE UNITED STATES IN CERTAIN CASES.

"1. Allotments of pay made to the Secretary of the Treasury by persons in the military forces of the United States, pursuant to 'Regulations Defining Special Arrangements for Subscriptions to Third Liberty Loan Bonds from Persons in the Military Forces of the United States,' issued under date of April 9, 1918,* may be terminated or reduced to a smaller multiple of $5.00 per month when necessity therefor arises by reason of any of the following causes:

(a) Death of allotter.

(b) Discharge of allotter, except in case of an enlisted man discharged for the purpose of accepting a commission.

(c) Desertion of allotter.

(d) Increase of obligation of allotter under the War Risk Insurance Act or reduction in rate of pay, whereby the allotter is unable to provide for his dependents and take out necessary insurance without reducing the amount of his pay remaining for personal use below the sum of $7.50 per month.

"2. Such allotment may be terminated or reduced to a smaller multiple of $5.00 per month only on approval of the Secretary of War or an officer designated by him, and in accordance with the requirements of these regulations.

"3. Where allotments are terminated by reason of death or discharge of allotter, the allotment may be canceled as of date of commencement, and the amount deducted from pay prior to termination of the allotment may be repaid to the persons entitled thereto, provided that, in case of termination by reason of discharge after $50.00 or some multiple thereof has been deducted from pay, the allotter shall be entitled to receive.

*Published in G. O. No. 37, War Department, April 17, 1918.

upon request, bonds in amounts of $50.00 or multiples thereof to the extent that the face amount thereof has been fully paid, and to receive the balance over the face amount thereof in cash. Such discharged allotter may, upon discharge, complete payments for bonds subscribed for, or for any bonds aggregating at face value a smaller multiple of $50.00 by paying the amount deducted from pay remaining to his credit under this regulation, and, in addition thereto, an amount in cash that will equal the face amount of the bonds on which payment is to be completed. Bonds delivered pursuant to this regulation will bear interest only from September 15, 1918, and, in the case of coupon bonds, will be delivered with the coupon due September 15, 1918, detached, and the allotter shall not be entitled to delivery of such coupon.

"4. Where allotments are terminated by desertion of allotter, any sum previously deducted from pay shall be forfeited to the United States.

"5. In case of reduction of allotment from a larger to a smaller multiple of $5.00 from each month's pay, the allotment shall continue for the full allotment period at the reduced monthly amount, and the excess over the reduced monthly amount which shall have been deducted from the pay of the allotter in previous months may be repaid to the allotter.

"6. The total par value of bonds upon which allotments are discontinued, either by termination or reduction pursuant to these regulations, in each month, shall be reported monthly to the Secretary of the Treasury.*

"*These regulations are supplemental to 'Regulations Defining Special Arrangements for Subscriptions to Third Liberty Loan Bonds from Persons in the Military Forces of the United States,' dated April 9, 1918.*

(Signed) "L. S. ROWE,
"*Acting Secretary.*"

II. Under the authority of the foregoing regulations, commanding generals of departments and tactical divisions, the Commanding General of the American Expeditionary Forces, commanding generals of Expeditionary depots and commanding officers of independent stations are authorized to discontinue or reduce Liberty Loan Bond allotments of enlisted men to the Secretary of the Treasury, so as to permit them to provide for their dependents under the War Risk Insurance Act, take out necessary insurance and leave them at least $7.50 per month for their personal use. Officers authorized herein to discontinue such allotments will report promptly by name to the Quartermaster General all discontinuances or reductions of bond allotments granted by them.

*This report is made by the Quartermaster General of the Army.

III. In the case of enlisted men who are discharged (except for the purpose of accepting a commission), or who, under the foregoing authority, are permitted to discontinue or reduce their allotments to the Secretary of the Treasury, the discontinuance or reduction will be effective as of date of commencement. Organization and detachment commanders will credit such enlisted men on the current pay rolls, or upon final statements, with such amounts as have been deducted from their pay on account of their allotments, or, in case of reduction of allotment, the excess over the reduced monthly amount which shall have been deducted from the pay of the allottee in previous months. Discharged allotters who desire to have one or more bonds delivered to them shall be furnished with certificates in the form prescribed below, and should be directed to forward them to the Quartermaster General, together with a check, draft or money order for a sufficient amount to make an even multiple of $50.00, or, if the amount deducted from their pay is over $50.00 and they desire delivery of one bond and the refund of the balance in cash, the certificate should be forwarded to the Quartermaster General, together with the proper request.

32-24-57

FORM OF CERTIFICATE.

.....

....., 191...

I hereby certify that Private ..... of .....

Company, ... Regt. of ..... made an allotment of $..... per month from April 1, 1918, in favor of the Secretary of the Treasury for the purchase of bonds of the Third Liberty Loan; that deductions were made upon pay rolls and final statements for the months of April, 1918, to ....., 191..., inclusive; total amount deducted ..... Dollars ($.....); and that this soldier was not credited with this amount upon pay rolls or final statements, and that no previous certificate of this nature has been furnished him. Reason for discharge was .....

.....

.....

IV. In the cases of men who have already been discharged from the service without having been credited on the pay rolls or final statements with the amounts deducted from their pay on account of allotments to the Secretary of the Treasury, the organization or detachment commander will at once forward to the Quartermaster General a certificate showing the amounts deducted from the pay of such enlisted men on account of the Liberty Bond allotments, giving present address of the discharged soldier, if practicable. Organization and detachment commanders should be careful to include in these certificates only such amounts as have been actually deducted from the

pay of the enlisted man up to the date to include which payment has actually been made on the pay rolls, and, if necessary, the certificate will be forwarded through the Quartermaster who paid the final statements (giving date of discharge) for notation by him of the amount deducted on account of the bond allotment on final statements. Upon receipt of this certificate the Quartermaster General will ascertain from the man whether or not he desires delivery of one or more bonds or refund of the entire amount in cash.

V. In case of death of an enlisted man having allotments to the Secretary of the Treasury, organization and detachment commanders will state on final statements forwarded to The Adjutant General of the Army the amount which has been deducted from the pay of the soldier on account of such allotments, in order that the Auditor for the War Department may include this amount in the settlement with the heirs.

VI. In case of desertion of an enlisted man having allotments to the Secretary of the Treasury, the organization or detachment commander will state in the "Remarks" column of the pay roll in which the name is dropped the amount which has been deducted from the pay of the allottee in previous allotments. This amount is forfeited by the soldier's desertion, but full data concerning it is required by the Auditor for the War Department in adjusting the account.

VII. An enlisted man who has an allotment to the Secretary of the Treasury and is discharged to accept a commission will continue his allotment, and should notify the Quartermaster General of his discharge, giving his rank and the organization in which he was serving when the allotment was originally made and his new rank and organization, in order that his allotment record may be identified. The officer will then enter on his pay voucher each month the charge to secure deduction, beginning with the month following that for which deduction was last made from his pay on the pay rolls or final statements.

VIII. No provision is made for an enlisted man to continue monthly payments on his Liberty Bond allotments to the Secretary of the Treasury after separation from the service, but if he so desires he may forward, together with the certificate prescribed in Par. 3 hereof, an amount sufficient to make an even multiple of $50.00 to the Quartermaster General, stating the address to which he desires bonds to be forwarded. Upon receipt of this certificate, together with an amount sufficient to make an even multiple of $50.00, the Quartermaster General will forward the man the proper number of bonds.

IX. The sale, transfer, or hypothecation of Liberty Loan Bonds which are being purchased under the Army allotment

system, but not yet delivered, is prohibited. There is no objection to a change in the name of the person or institution to whom the bond is to be delivered, provided there is a good and sufficient reason therefor, but such request must be forwarded with the approval of the organization or detachment commander. The War Department will not approve requests to have a Liberty Bond delivered to a person who is known to be a broker or speculator pecuniarily interested in the bond.

X. Allotments made to banks or other institutions will be governed by Pars. 43 to 49, inclusive, Special Regulations No. 72. Requests for discontinuance or reduction must be forwarded to the Quartermaster General, and deduction must be made upon the pay rolls until receipt of acknowledgement of discontinuance. Discontinuances of such allotments may be made under conditions mentioned in Par. 2 hereof, but must be forwarded on Q. M. C. Form 39 to the Quartermaster General. Deductions must be carried until receipt of acknowledgment of discontinuance. No refundment on account of such allotments may be made on the pay rolls or final statements, but an enlisted man should be directed to make application to the bank for settlement.

XI. Allotments made to banks should be entered on pay rolls in column headed "All Other Class E Allotments."

INSTRUCTIONS GOVERNING THE DISTRIBUTION OF BLANK FORMS AND BOOKS.

1. Distribution to stations and organizations, serving in the American Expeditionary Forces, of blank forms and books furnished by the Adjutant General's Department, including forms of the Statistical Division, will be made under the immediate direction of the Adjutant General, these headquarters, by the Adjutant General of the Services of Supply, and the adjutants of the several tactical divisions and detached brigades. Any communication with regard to such distribution should be addressed directly by the Adjutant General of the Services of Supply or by the adjutants of the tactical divisions and detached brigades to the Adjutant General, these headquarters, who will convey directly to them such instructions as may be necessary. The Adjutant General, Services of Supply, will supply all officers and organizations of the S. O. S., and the adjutants of the several tactical divisions and detached brigades will supply all organizations of their respective divisions and brigades.

2. The Adjutant General of the Services of Supply and the adjutants of the tactical divisions and detached brigades will carefully scrutinize all requisitions submitted to them under the foregoing provisions for blank forms and books distributed by the Adjutant General's Department in order to prevent any waste thereof, and will see that the issues of such requisitions are restricted to actual needs of organizations based on their strength and the proper requirements of the service.

3. The Adjutant General of the Services of Supply and the adjutants of the tactical divisions and detached brigades, and organization and other commanders using such blank forms and books will, except in emergency, make but four requisitions a year, on January 1, April 1, July 1 and September 1, for the number of blanks and books required by them for the following three months.

4. Individual officers, organization and other commanders not attached to divisions or detached brigades, or serving in the area of the Services of Supply, will submit requisitions for the necessary blanks and books direct to these headquarters under similiar conditions as those specified in Par. 3.

5. War Department standard forms and Quartermaster Corps forms are distributed by the Quartermaster Corps. Blank forms and manuals pertaining to a staff department will be distributed by the particular department to which they pertain.

DUTIES OF CHAPLAINS IN THE DIVISIONS.

1. The attention of all chaplains is called to Sec. III, G. O. No. 147, W. D., 1917, and Sec. IV, G. O. No. 133, c. s., these headquarters.

2. The senior chaplain of the division shall be responsible for the proper functioning of all chaplains within the division and the co-ordination of their work with that of the welfare organizations operating in the divisional area. He shall see that the chaplains in the division are acquainted with orders, bulletins and memoranda affecting their work; that they are instructed in work in dressing stations and in the care and burial of the dead; under instructions from the division commander he shall call and preside over conferences of chaplains in the division, and he shall make recommendations through his commanding general to G. H. Q. Chaplains' Office regarding changes in personnel. He shall enable all men to receive, as far as possible, periodic ministrations from a chaplain of their own faith.

3. Weekly reports shall be submitted by chaplains in the divisions to the division senior chaplain on forms furnished by G. H. Q. Chaplains' Office. A summary of these reports shall be made by the senior chaplain on a similarly prescribed form to the senior chaplain of the army corps, or, where the latter has not yet been appointed, to the G. H. Q. Chaplains' Office.

No. 73. }

I. The following War Department letter of August 24, 1918. is published for the information and guidance of all concerned:

"It has been noted that some bands have not in the past taken advantage of the allowance provided for securing new music, and attention is invited to Par. 2423, Vol. 1, of the Manual for the Quartermaster Corps, which gave the authority for an allowance of $5.00 per month for each army band for the purchase of music. This allowance was accumulative for the fiscal year. The usual method was to purchase $15.00 worth of music quarterly, place this authority on the voucher and send same to the supply officer for settlement.

"In circular letter from The Adjutant General, dated May 23, 1918, sent to all department and division commanders, information was conveyed to the service that the monthly allowance for band music was increased to $45.00 a quarter for each band, and that the initial allowance for purchase of music for newly recruited bands was increased to $200.00. This letter amounts to a revision of Par. 2423, of the Manual for the Quartermaster Corps, and when quoted upon the vouchers for music purchased within the allowance of a band will constitute the authority necessary for payment of same by the supply officer of the organization concerned." (8182-A-185 A. G. O.)

II. 1. The drivers of all motor vehicles will be held strictly responsible for all tubes, tires, rims, tools and other accessories issued to them. Any article issued to a driver which, through negligence or carelessness is lost, misplaced, stolen, broken, or otherwise diposed of, other than through fair wear and tear in the Government service, will be charged against the driver unless the latter is relieved of responsibility in the manner hereinafter stated.

2. In each motor vehicle there shall be a list of all accessories, including extra tires, tools and any equipment issued to the driver of the vehicle. This list shall be signed by the driver. A duplicate of the list shall be filed in the office of the garage to which the vehicle is assigned.

3. No erasure shall be made on this list except when initialed by the commanding officer of the driver.

4. If a driver has need of any article which is not in his possession, and which is not on the list mentioned in Par. 2, he is authorized to draw it from any depot carrying the article in stock. The depot, when issuing the article, shall see that a notation is made on the list mentioned in Par. 2, and that such notation is initialed by the driver. The driver shall give to the depot his personal receipt, in duplicate, covering the articles issued, and the depot shall note on the face of the receipt and of the duplicate that notation has been made on driver's list mentioned in Par. 2 hereof. The original receipt shall be held by the depot as a voucher for dropping the articles issued, and the duplicate shall be forwarded by the depot to the commanding officer of the driver, who will enter the articles so issued on the driver's list.

5. If any article in the possession of the driver becomes unserviceable through fair wear and tear in tne Government service, any depot carrying this article in stock will issue a serviceable one to the driver, the latter turning in the unserviceable article. In such case no responsibility will attach to the driver, and no alteration will be made in the list described in Par. 2.

6. If any article is lost, and if the driver presents to the depot a certificate signed by a commissioned officer to the effect that the article in question was lost through no fault on the part of the driver, then the depot shall replace the article. The certificate shall be held by the depot as a voucher for dropping the article so issued. In such case no responsibility will attach to the driver, and no alteration will be made on the list described in Par. 2.

7. If any article is lost, and the driver cannot produce such a certificate as described in Par. 6 above, and is in need of the article for an emergency, he shall give his personal receipt in duplicate to the depot issuing the article, together with a statement indicating the name of his commanding officer. The depot shall thereupon make the issue, without making any change in the list described in Par. 2 above. The depot shall at once forward the duplicate receipt to the commanding officer of the driver, giving the price of the article. The original receipt shall be held by the depot as a voucher for dropping the article so issued. The commanding officer will then:

(a) Furnish the depot with a certificate as described in Par. 6, to be filed with the original receipt; or,

(b) Notify the depot that such receipt cannot be given. In the latter case the article will be surveyed, and the commanding officer will forward to the depot a copy of the proceedings of the board, to be filed at the depot with the original receipt. If the board of survey does not relieve the driver the

value of the article shall be deducted from the driver's pay in the usual manner.

8. The forms necessary for the operation of the plan as outlined above shall be furnished by the Motor Transport Corps.

BULLETIN } FRANCE, *Oct. 8, 1918.*
No. 76. }

1. The following will govern in giving official credit to aviators of the American E. F. for enemy aircraft brought down:

(a) Every enemy airplane or balloon which, as a result of an aerial combat, lands or falls within our own lines will be considered as having been brought down. Every enemy aircraft destroyed in enemy territory as a result of aerial combat will likewise be considered as having been brought down.

(b) Enemy airplanes forced to land on enemy territory as the result of combat, and which make normal landings will not be considered as having been brought down.

(c) In order that official credit may be given for enemy aircraft brought down, one or more written confirmations, in addition to the reports of the combatants, must be made to the proper authority, by:

(a) Pilots or observers who were observers of the combat.

(b) Pilots or observers who saw on the ground, at the point stated by those who claimed the victory, debris from such enemy aircraft.

(c) From balloon observers who witnessed the facts.

(d) By observers at Anti-aircraft observation posts.

(e) From ground observers of any sort.

(f) By the declarations of enemy prisoners.

2. Enemy aircraft brought down and confirmed should be credited to everyone who has contributed to this result. To the pilot of mono-place machines which have achieved the victory; to both pilot and observer in victorious bi-place machines, and for airplanes carrying more than two in the crew, to the pilots and to such observers and machine gunners as may have taken part in the combat with the enemy plane at the time when it was brought down.

3. The names of the officers and men in the Air Service who are entitled to official credit for having brought down enemy aircraft will be furnished about the 1st and 15th of each month to these headquarters. (18065-A A. G. O.)

AMERICAN EXPEDITIONARY FORCES,

BULLETIN No. 79. FRANCE, *Oct. 19, 1918.*

The following note, transmitted to these headquarters by the Commissioner General of Franco-American War Affairs, relative to the French Liberation Loan, is published at the request of the French Government, for the information of the officers and soldiers of the A. E. F.:

"FRENCH LIBERATION LOAN.

The French sale of the War Liberation Bonds will be opened on October 20, 1918.

These bonds are the direct obligation of the Government of France, which guarantees their payment and their not being converted within 25 years.

They bear four per cent. interest on their par value.

They are sold at a discount, so that you pay only 70 francs 80 centimes for a 100 franc bond.

The bond sold at this discount pays interest at the rate of 5.65 per cent. on the actual money invested.

Interest on these bonds paid quarterly, by coupon, first payment being due on January 16, 1919.

One of the attractive features of this investment is that if these bonds reach par value, the capital invested would be consequently increased by 41 per cent.

Payments for subscription may be made on delivery or in four quarterly installments: First installment on subscription; second installment on January 16, 1919; third installment on March 1, 1919; fourth installment on April 16, 1919.

Subscription for the French Loan closes on November 24, 1918.

Any bank will take subscription."

G. H. Q.

AMERICAN EXPEDITIONARY FORCES,

BULLETIN No. 80. FRANCE, *Oct. 22, 1918.*

Articles have been printed and public speeches made in the United States and elsewhere based on letters written by members of the A. E. F. recounting atrocities falsely alleged to have been committed by the enemy. The effect of such publications has been unfortunate. Relatives of members of the A. E. F. have been unnecessarily frightened by the fear that similar atrocities had happened to their relatives in the service. Exaggerations and downright falsehoods tend, moreover, to weaken the confidence in the official reports of German atrocities which have been carefully compiled and are deserving of complete credence.

Verified reports of recent atrocities by the enemy are desired by these headquarters. Such reports should be sent with the least practicable delay through military channels to the Adjutant General, G. H. Q. A. E. F.

Unverified reports, however, are not to be circulated. Members of the A. E. F., including all civilians attached to the A. E. F., will abstain from writing anything of the sort, and company and regimental censors will eliminate from letters submitted to them any such recitals unless the facts have previously been officially verified.

G. H. Q.

AMERICAN EXPEDITIONARY FORCES,

BULLETIN } FRANCE, *Oct. 24, 1918.*
No. 81. }

1. On account of the coming of winter, the constant arrival of troops, and the prevalence of a widespread epidemic of influenza throughout Europe, the following information on transmissible respiratory diseases is published for the guidance of all officers and soldiers, more especially those in direct command of troops.

2. Certain highly communicable diseases, while not classed as diseases of the breathing apparatus, are transmitted by the secretions of the nose, throat and mouth, namely, diphtheria, scarlet fever, meningitis, measles and tonsilitis. Another group of diseases in which the air passages and lungs are the sites attacked is also transmitted directly from the breathing apparatus of the patient to that of the sound man; these are common colds, bronchitis, pneumonia and influenza. Pneumonia, the gravest and most fatal of this group, occurs in several forms. One variety, the so-called septic pneumonia, occurring as a complication of measles and influenza, is especially to be feared.

3. No body of men living together under military conditions can avoid the introduction of one or more of the above mentioned diseases in its midst, and the use of each and every means to diminish the opportunity of direct transmission from the sick to the well is imperative if widespread sickness is to be avoided, with loss of man power and of life itself.

4. The infection of the sound man by the sick occurs generally before the nature of the illness can be recognized; this is specially true of measles and influenza, both of which may at first show only slight symptoms of a "cold in the head."

5. The mechanism of infection is simply the projection of fine germ-laden spray from the air passages of one man into the air passages of another by sneezing, coughing or in the act of spitting. Germs of disease are in this way projected several feet, and therefore close contact of men in crowded assemblies or dormitories gives numberless opportunities for infection.

6. If the foregoing simple statement of well established facts is clearly understood by all officers and soldiers in the A. E. F. it must be apparent to all that much may be done to prevent opportunity for close contact, or when such contact is inevitable to diminish in other ways the direct transmission of the respiratory diseases.

7. This duty falls upon all who are responsible for the care of a party of men, the squad, the platoon, the company, the battalion and the regiment, and is by no means the exclusive province of the medical officers.

8. Watchful personal care should be afforded every soldier by his immediate superior, commissioned or non-commissioned officer. To save a soldier's life in battle is more heroic and requires more self-sacrifice than to prevent serious illness or death by careful supervision and attention to details of discipline, but the end attained is the same for the good of the soldier and our army.

9. The following instructions will be carefully observed by all officers and men concerned:

SOLDIERS. Sleep as far from your immediate neighbors as possible. Sleep alternately, head to foot, and never pool the bed covering on account of cold.

Do not cough or sneeze directly in the face of a comrade. Use a handkerchief and turn your head. Keep the handkerchief clean.

Never spit on the floor, or indoors at all, except into a receptacle placed for the purpose. Do not spit on paths and steps, nor in corners.

NON-COMMISSIONED OFFICERS. Know the men directly under you. Notice when they are ailing and report it to your immediate superior. See that your men understand the reasons for this bulletin and obey it.

OFFICERS COMMANDING ORGANIZATIONS. Keep track of the prevalence of colds, sore throat and of depressed health or spirits of any kind among your men. Use every endeavor to prevent exhaustion in marching, drilling and labor of all kinds by judicious use of rest and amusement. Co-operate closely with medical officers, and call upon them to go with you when you think a survey of the physical condition of your men is advisable. Provide, as far as possible, for special drying rooms or sheds for wet clothing. Much can be done in this direction by improvising drying places in connection with authorized kitchen or incinerator fires.

Thin out the men in sleeping quarters as far as possible. General Order No. 46, G. H. Q., October 10, 1917, provides for construction of shelter at "the lowest practicable limit" only, and does not offer a sanitary ideal or even a recognizedly sufficient amount of floor space per man. Its limitations are consequent upon war conditions, and its disadvantages must be overcome by resourcefulness and personal effort, so as to extend, whenever possible, the floor and air space per man by billets or tents. Scrupulous cleanliness and frequent airing of barracks and billets are enjoined. Devise a screen of shelter-half, or even newspaper, between sleeping men.

MEDICAL OFFICERS. Co-operate with line officers and do not be satisfied to see only men who report to you as sick. Note carefully at all times the general physical condition of the organizations with which you are serving, and try to prevent disease, so that you will not have it to treat later.

10. This bulletin will be conspicuously posted and its meaning explained to all soldiers by officers directly responsible for their care. (16670-O A. G. O.)

AMERICAN EXPEDITIONARY FORCES,

BULLETIN No. 82. FRANCE, *Oct. 25, 1918.*

1. Paragraphs 2, 3, 4 and 5 of this bulletin fix the channels for submitting statistical reports from the following classes of units:

(a) Army troops serving with corps or divisions.
(b) Corps troops serving with divisions.
(c) S. O. S. troops in the area of the armies.
  (1) If unattached to any combat unit.
  (2) If attached to a division, corps or army.
(d) General Headquarters combat troops (troops organized for service against the enemy and not included in the tables of organization of an entire army).

2. All organizations serving as army troops, except Army Artillery, will submit their statistical reports direct to the statistical officer of their army, except that if an army unit is *attached* to a corps or division, that fact will be stated in the reports, which reports will be sent through the statistical officer of the corps or the division to the statistical officer of the army. All such units, if *attached* to a corps or division, will be carried on the army station list, with the indication of the organization to which attached, and on the corps or division station list as attached from the army. Organizations serving as Army Artillery will submit their reports through the statistical officer of the unit to which attached, to the statistical officer of their army, or the Anti-Aircraft Service, or the Railway Artillery Reserve.

3. All units serving as corps troops will submit their statistical reports direct to the statistical officer of their corps, except that if a corps unit is *attached* to a division, that fact will be stated in the reports, which reports will be sent through the statistical officer of the division to the statistical officer of the corps. All such units, if *attached* to a division, will be carried on the corps station list with such notation, and on the division station list as attached from the corps.

4. All Services of Supply units will submit their statistical reports direct to the Statistical Officer of the Services of Supply section in which they are serving, except that if such unit is serving with a combat unit, that fact will be stated in the reports, which reports will be sent through the statistical officer of the combat unit. All organizations except those included in the Tables of Organization of armies, corps, divisions, or General Headquarters troops are, for statistical purposes, designated as

Services of Supply units. All Services of Supply units will report change of station directly to the statistical officer of the Services of Supply section in which they are stationed; in case of change of station from one section into another, report will be made to the statistical officer of both sections concerned.

5. General Headquarters combat troops, when in training or in reserve in a section of the Services of Supply, or at a school, will submit their report to the statistical officer attached to the headquarters of their corps. When they are attached to a combat unit they will submit their reports through the statistical officer of the combat unit to the statistical officer attached to the headquarters of their corps.

6. A detachment not provided for in an approved table of organization, which organization is formed to perform a particular function, will be reported to the statistical officer of the organization under which it is serving, and its personnel will be reported as detachments of the arm or corps or organizations of which they are members.

7. Statistical officers of combat units up to and including armies are responsible for the prompt rendering of reports for army troops to the statistical officer at army headquarters, for corps organizations to statistical officer at corps headquarters, and for Services of Supply organizations to the statistical officer at the headquarters of the Services of Supply section in which they are serving. They will supervise the collection and forwarding of these reports.

8. Any change of status of an organization will be reported by the statistical officer of the headquarters ordering the change, to all statistical officers concerned. (16139-A-4 A. G. O.)

G. H. Q.
AMERICAN EXPEDITIONARY FORCES,

BULLETIN No. 83. FRANCE, *Oct. 26, 1918.*

1. The French Government has been making special efforts to prevent excessive prices being charged members of the American Expeditionary Forces for articles of food purchased locally in France. Ministerial decrees, regional and municipal regulations have been issued by the French fixing prices for all articles of food. These decrees and regulations fix the prices which may be charged, and, in addition, they restrict the sale of certain classes of food supplies. Municipal regulations almost universally require the posting of prices for meals in the various French restaurants.

2. Cases have been frequently reported of officers, soldiers and messes of the American Expeditionary Forces paying illegal prices for the purpose of procuring restricted articles of food or excessive quantities of articles generally deficient, thus depriving the civil population of their proper share of this food. In certain regions it is reported that the civil population is nearly entirely deprived of certain classes of foodstuffs improperly reserved by vendors for the purpose of illegal sale at exorbitant prices to officers, soldiers and messes of the American Expeditionary Forces.

3. In view of the fact that the quantity of food stocks existing in France is limited, it is the duty of every member of the American Expeditionary Forces to discourage in every way possible illegal sales and speculation in foodstuffs by local vendors. All such cases coming to the notice of officers and soldiers of the American Expeditionary Forces will be promptly reported to the local A. P. M., and in turn by the latter to the proper French authorities.

4. Local commanders will take the necessary measures to prevent these practices in the future, and are further enjoined to co-operate in every possible way with the local French authorities, to the end that the decrees and regulations issued by the French authorities governing the sale of food supplies be complied with by all officers and soldiers of the American Expeditionary Forces.

G. H. Q.
AMERICAN EXPEDITIONARY FORCES,

BULLETIN } No. 84. } FRANCE, *Oct. 28, 1918.*

I. 1. A school is established at these headquarters, to be known as the "American E. F. Bandmasters and Musicians' School." The purpose of the school will be:

(a) The training of bandmasters.

(b) The training of musicians in the study of certain instruments.

2. In conjunction with the school there will be an examining board appointed by these headquarters for the examination of candidates for the grades of first and second lieutenant (band leader).

3. The course for bandmasters will be 8 weeks, and will include theoretical and practical tuition in conducting, the latter with a full practice band; a course in harmony and instrumentation, and a course in administrative work. Upon the completion of the course, candidates who are not already commissioned will be examined for promotion to the grades of first or second lieutenant. All band leaders in the A. E. F. will be required to attend the school, excepting those who have been examined in the American E. F. and have been recommended for a commission. These latter may attend the school upon their own application.

4. The course for musicians will be for 12 weeks and will include the following classes:

(a) French horn.
(b) Oboe.
(c) Bassoon.
(d) A course for sergeant buglers.

5. Candidates for commissions as band leaders who have not already been examined in France, will make application to be examined by the board prior to attending the school. In case of failure to pass said examination they will be required to attend the school and be examined upon completion of the course.

6. In making appointments for commissioned band leaders those band leaders now in the service will be given the preference; those who have had five years or more service as band leaders in the Regular Army, or National Guard, or National Army, or altogether, being eligible for commission as first lieutenants, and those who have had less than five years of such service being eligible for commission as second lieutenants.

Application for examination for a commission as band leader will be accompanied by the following:

(a) A statement by the regimental commander that such a vacancy exists.
(b) Name in full.
(c) Home address, and emergency address.
(d) Place and date of birth.
(e) Citizenship. (If naturalized, documentary proof thereof.)
(f) Detailed report of physical examination by a medical officer.
(g) Report of prior service, with special reference to length of time served as a band leader.
(h) Evidence as to whether applicant has been rejected for a commission in any branch of the military service, or as to whether applicant has another application for a commission pending; if previously rejected, reason for rejection.
(i) Letter stating whether or not the regimental commander recommends the applicant for a commission.

7. Except as noted in Par. 5 above, all students for the bandmasters and band musicians' course will be detailed from these headquarters.

II. 1. An agreement has been entered into with the French authorities whereby all animals condemned and ordered sold will be turned over to the French military authorities.

2. Notification will be sent by the officer concerned, through the American liaison officer, to the French commanding general of the region in which the animals are located, or if in the Zone of the Armies to the authority designated by the Directeur de l'Arrière of the French general headquarters, of any animals which have been condemned, and the French authorities will call for them.

3. Receipt in duplicate will be taken from the French authorities for all animals turned over to them; one copy of receipt will be retained with the organization and one copy forwarded to the C. Q. M., headquarters S. O. S.

4. All animals condemned for sale will be branded "I. C." on the neck, as provided for in Par. 3059, Manual of the Quartermaster Corps. (10973-A-512 A. G. O.)

WASHINGTON, *November 21, 1918.*

DISCHARGE OF ENLISTED MEN FOR RELIEF OF FAMILY OR URGENT NEED IN INDUSTRIAL WORK.

1. Department commanders within the United States, commanders of ports of embarkation, and commanders of camps not under the jurisdiction of department commanders or of chiefs of bureaus of the War Department, are authorized to discharge enlisted men upon their own application when there is sickness or other distress in the soldier's family, or when he is needed to resume employment in an industry or occupation in which there is urgent need of his services, provided that such discharge will not disrupt or cripple an existing organization, and that the soldier's services can be spared. Consideration will be given to the fact that the machinery of camps must be utilized in the demobilization of the Army and due regard must be taken that it is not retarded by the discharge of personnel connected therewith.

2. The instructions contained herein apply only to individual and exceptional cases and are not intended to release men in large groups or blocks for any general employment or occupation.

3. Application for discharge under the provisions of this circular will be made in each individual case by the soldier concerned and through his immediate commanding officer. No man who voluntarily enlisted prior to April 1, 1917, will be discharged under this authority.

4. Men discharged under these instructions will be included in such weekly reports of men discharged as are required by the War Department.

5. Cases of the character indicated arising in places not covered by this authority will be forwarded to The Adjutant General of the Army for final action.

Authorization for establishment	1
Title	2
Object	3

32-24-101

1. Authorization for establishment.—The Students' Army Training Corps is raised under authority of the act of Congress approved May 18, 1917, commonly known as the selective-service act, authorizing the President to increase temporarily the Military Establishment of the United States, as amended by the act of August 31, 1918, and under Section II, General Orders, No. 79, of the War Department, dated August 24, 1918, as follows:

"Under the authority conferred by sections 1, 2, 8, and 9 of the act of Congress 'authorizing the President to increase temporarily the Military Establishment of the United States,' approved May 18, 1917, the President directs that for the period of the existing emergency there shall be raised and maintained by voluntary induction and draft a Students' Army Training Corps. Units of this corps will be authorized by the Secretary of War at educational institutions that meet the requirements laid down in special regulations."

2. Title.—Those regulations will be known as Students' Army Training Corps Regulations. (S. A. T. C. R.)

3. Object.—The object of establishing units of the Students' Army Training Corps is to utilize effectively the plant, equipment, and organization of the colleges for selecting and training officer candidates and technical experts for service in the existing emergency.

Approval of units	8
Discontinuance of units	9

4. Establishment of units.—The Students' Army Training Corps consists of units established by the President in qualified educational institutions which fulfill the requirements laid down in these regulations.

5. Sections of units.—The members of the Students' Army Training Corps at an educational institution will form a single unit for purposes of military organization, but for purposes of instruction such unit may consist of one or more sections, according to the type of educational training given.

6. Requirements for the establishment of sections.—The sections of a unit of the Students' Army Training Corps and the educational requirements for the establishment of the same are as follows:

a. Collegiate section.—The establishment of a collegiate section (to be known as Section A) may be authorized at any civil educational institution which—

(1) Requires for admission to its regular curricula graduation from a standard, four-year, secondary school, or an equivalent, and

(2) Ordinarily provides a general or professional curriculum covering at least 2 years of not less than 32 weeks each, and

(3) Has a student attendance sufficient to maintain a collegiate section of a Students' Army Training Corps unit with a strength of at least 100 men.

So far as practicable an effort will be made to establish collegiate sections at institutions which have a smaller student attendance than that prescribed in the preceding paragraph. Applications from such institutions will be considered and granted so far as officers and equipment permit, and so far as arrangements for the establishment of joint units may be found practicable.

Provided the conditions of this paragraph are met, educational institutions qualified to maintain collegiate sections of Students' Army Training Corps units will include:

(1) Colleges and schools of—
  (*a*) Arts and sciences.
  (*b*) Technology.
  (*c*) Engineering.
  (*d*) Mines.
  (*e*) Agriculture and forestry.
  (*f*) Business administration, industry, and commerce.
  (*g*) Pharmacy.
  (*h*) Veterinary medicine.
  (*i*) Education.
  (*j*) Law.
  (*k*) Medicine.
  (*l*) Dentistry.
(2) Graduate schools.
(3) Normal schools.[1]
(4) Junior colleges.
(5) Technical institutes.

b. Vocational section.—The establishment of a vocational section (to be known as Section B) may be authorized at any institution having an adequate shop or laboratory equipment and a staff of instructors capable of giving approved vocational training of military value.

7. Students in preparatory departments.—Students enrolled in preparatory departments of higher civil educational institutions may not be counted by college authorities in reckoning the 100 able-bodied male students required for the establishment of a unit containing a collegiate section only.

8. Approval of units.—A unit will not be established unless the conditions laid down in paragraph 6 of these regulations are fulfilled and unless the institution is, in the opinion of the Secretary of War, capable of efficiently carrying out the work prescribed.

9. Discontinuance of units.—The Secretary of War may discontinue any unit should he consider that the proper standards are not being maintained and that the unit is not fulfilling the objects for which the corps is established.

[1] Normal schools which give at least two years of college work, following four years of high-school preparation or its equivalent, may be included.

SECTION III.

CONDITIONS AND ROUTINE OF ADMISSION TO A STUDENTS' ARMY TRAINING CORPS UNIT.

	Paragraph.
Conditions of admission	10
Status of members of the Students' Army Training Corps	11
Members of collegiate sections	12
Active duty status	13
Assignment of members of the Students' Army Training Corps	14
Preferences of voluntarily inducted men to be considered	15
Students not eligible for membership in the Students' Army Training Corps may be given military instruction	16

10. Conditions of admission.—Eligibility to the Students' Army Training Corps is limited to registrants under the selective-service regulations who are physically fit to perform full or limited military duty and who have had at least grammar-school education or its equivalent.

a. Collegiate sections.—A collegiate section (Section A) of a Students' Army Training Corps unit will include those who have graduated from a standard four-year secondary school or have equivalent educational qualifications.

Subject to the approval of the Committee on Education and Special Training an institution may prescribe any reasonable addition to the requirement for admission set forth in subparagraph *a* above. The requirement of graduation from a standard four-year secondary school or an equivalent, as a condition for admission, will be relaxed only in cases where, in the judgment of the Committee on Education and Special Training, the enforcement of this requirement would admit numbers insufficient to meet the needs of the service.

b. Vocational sections.—A vocational section (Section B) of a Students' Army Training Corps will include those who have had grammar-school education or its equivalent.

11. Status of members of the Students' Army Training Corps.—Upon admission to the Students' Army Training Corps a registrant becomes a soldier in the Army of the United States. As such he is subject to military law and to military discipline at all times.

12. Members of collegiate sections.—The collegiate sections of Students' Army Training Corps units will be recruited

in the first instance by the voluntary induction of registrants under the selective-service regulations.

13. Active-duty status.—Members of the Students' Army Training Corps will be placed upon active-duty status immediately upon their induction. The Committee on Education and Special Training will enter into contracts with educational institutions for the quartering, subsistence, and instruction of members of the Students' Army Training Corps units established at such institutions.

14. Assignment of members of the Students' Army Training Corps.—From time to time, in accordance with the needs of the service and the qualifications of the individual, it will be the policy of the Government to assign members of the Students' Army Training Corps to:

a. An officers' training camp, or

b. A noncommissioned officers' training school, or

c. A depot brigade, or

d. To continue in certain cases (in either a collegiate or vocational section) such technical or special training as the needs of the service may require.

Assignments will ordinarily be made to officers' training camps or to noncommissioned officers' training schools in the case of men who are qualified to become officers or noncommissioned officers; to continue at an educational institution in the case of qualified men who are engaged in such studies as medicine, engineering, chemistry, etc., or who give promise of qualifying for admission to officers' training camps or noncommissioned officers' training schools; and to a depot brigade in the case of those who do not give sufficient promise of qualifying for commissions after further training.

15. Preferences of voluntarily inducted men to be considered.—The preference of registrants who are voluntarily inducted into the Students' Army Training Corps as to the branch of the service that they ultimately enter (e. g., Engineers, Artillery, Infantry, Chemical Warfare Service, etc.) will be given consideration except where military needs require a different course.

16. Students not eligible for membership in the Students' Army Training Corps may be given military instruction.—Students in educational institutions at which a unit of the Students' Army Training Corps has been established may, if not eligible for membership in the corps, be given such military instruction as may be found practicable.

SECTION IV.

ADMINISTRATION.

	Paragraph.
Central administration	17
Administration within the institution	18
Relation of officers to the authorities of the institution	19
Authority in matters of discipline	21
Method of voluntary induction	22
Organization of units	23

17. Central administration.—The Students' Army Training Corps is administered by the War Department through the Committee on Education and Special Training of the Training and Instruction Branch, War Plans Division, General Staff, assisted by an advisory educational board, together with educational directors, district educational directors and special advisers.

18. Administration within the institution.—The War Department will provide an officer of the Army, active or retired, to serve as commanding officer in each institution at which a unit of the Students' Army Training Corps is established, and, so far as practicable, additional officers will be provided in proportion to the strength of the unit.

19. Relation of officers to the authorities of the institution.—The commanding officer and the other officers assigned to duty with units of the Students' Army Training Corps will, in their relation to the institution, observe the general usages therein established affecting the duties and obligations of members of the faculty and other academic instructors. Officers will not, without permission of the Secretary of War, undertake any instructional or administrative duties in the institution other than those connected with the work of the Students' Army Training Corps.

20. The commanding officer at an institution will instruct officers and noncommissioned officers in their relation to the institution and its officials.

21. Authority in matters of discipline.—It is the duty of the commanding officer, and of other officers assigned to duty with units of the Students' Army Training Corps, to enforce military discipline. Nothing in these regulations is intended to confer on the commanding officer authority over purely educational matters.

22. Method of voluntary induction.—The method of voluntary induction into the Students' Army Training Corps is prescribed in the Selective Service Regulations and instructions issuing from the office of the Provost Marshal General.

23. Organization of units.—The Students' Army Training Corps is a corps of The United States Army. Members of it will be trained for the line and for the different staff corps. Their educational programs will be shaped to prepare various groups for particular duties in accordance with the needs of the service. The Students' Army Training Corps will be organized as Infantry under the Tables of Organization and the fundamental infantry training common to all branches of the service will be given.

SECTION V.

SCOPE OF TRAINING.

	Paragraph.
Instruction in Section A	24
Approval of courses in allied subjects	25
List of allied subjects	26
Instruction in Section B	27

24. Instruction in Section A.—For Section A the instruction will be partly military and partly in allied subjects that have value as a means of training officers and experts to meet the needs of the service.

The average number of hours to be devoted each week to those subjects will be as follows:

a. Military subjects, including practical instruction (drill, etc.), theoretical military instruction, and physical training—11 hours.

b. Allied subjects, including lectures, recitations, laboratory instruction and the necessary preparation therefor—42 hours. (Each hour of lecture or recitation will ordinarily require two hours of supervised study.)

The hours above set forth have reference to the normal course. In the case of students who have pursued for at least one year at an approved institution such studies as form part of the program of preparation for the Chemical Warfare Service, the Medical Corps, the Engineer Corps, the Ordnance Corps, or other technical branches of the service, the Committee on Education and Special Training may authorize a reduction in the hours of military instruction (including practical military in-

struction, theoretical military instruction, and physical training) to not less than six hours per week, provided that the reduction is made good by the substitution of a corresponding number of additional hours of instruction in approved technical subjects.

Provision will be made for approving general programs, as well as technical and special programs, in medicine, engineering, chemistry, and other technical courses.

25. Approval of courses in allied subjects.—The Committee on Education and Special Training will furnish from time to time suggestions regarding the treatment of allied subjects that are chosen as parts of the curriculum. District educational directors (Section A) are authorized to approve courses which they deem to be suitable, subject to the ratification of the educational director (Section A).

26. List of allied subjects.—The allied subjects will ordinarily be selected from the following list: English, French, Italian, German, mathematics, physics, chemistry, biology, geology, psychology, geography, topography and map making, meteorology, astronomy, hygiene, sanitation, descriptive geometry, mechanical and freehand drawing, surveying, economics, accounting, history, international law, military law, and government.

Permission may be granted for the recognition, as an allied subject, of not more than one subject outside the above list, provided that it occupies not more than three hours per week in lectures and recitations with corresponding time for study.

In the case of technical and professional schools provision will be made for approving general programs of study containing subjects other than those included in the above list of allied subjects.

The war-issues course.—The program of study in allied subjects must include a course on the underlying issues of the war. This may be planned as a special war-issues course with a minimum for Section A of three classroom hours per week, with corresponding time for study, covering three terms, or the requirement may be met by a course or courses in history, government, economics, philosophy, or modern literature where those courses are so planned as, in the opinion of the educational director (Section A), to accomplish substantially the same purpose.

The district educational director (Section A) may empower colleges to excuse from this course:

a. Members of the Students' Army Training Corps who have had a similar course, even though not identical in every detail, or

b. Members of the Students' Army Training Corps who have already had at least two years of work of collegiate grade in an approved institution and who should be required to concentrate the whole of their time on advanced studies.

While the study of any of the subjects set forth above should be useful as a part of the training of future officers, the contents of the course and the methods of instruction will in each case determine the acceptance of the subject as well as the amount of credit to be assigned to it as an allied military subject. This credit may vary according to the branch of the service for which the student is preparing, e. g., Field Artillery, Medical Corps, or Engineering Corps.

27. Instruction in Section B.—For Section B the average number of hours to be devoted each week to military and vocational training will be as follows:

a. Military subjects, including practical instruction (drill, etc.), and physical training—15½ hours.

b. Vocational subjects—33 hours.

c. War-issues course (see fourth subparagraph of paragraph 26 above)—1 hour.

SECTION VI.

MILITARY INSPECTION.

28. A body of military inspectors will cover units of the Students' Army Training Corps and report directly to the Committee on Education and Special Training.

SECTION VII.

UNIFORM AND EQUIPMENT.

	Paragraph.
Uniform, arms, and equipment	29
Use of Government property	30
Issue of Government property	31
Requisitions	32
Shipments	33
Storage and cleaning	34
Loss or damage	35
Sale or pledge	36
Insignia	37

29. Uniform, arms, and equipment.—*a.* The uniform of a member of the Students' Army Training Corps and his allowance of clothing will be that of a private soldier and will be furnished complete as far as practicable.

b. The number and kinds of arms and equipment to be issued will, so far as praticable, conform to those prescribed for the Army.

30. Use of Government property.—No article of Government uniform or equipment, issued under the provisions of the foregoing paragraphs, shall be used except to uniform members of the unit of the Students' Army Training Corps at the institution to which said uniform and equipment were issued.

31. Issue of Government property.—All Government property will be issued and invoiced to the supply officer, who will be accountable to the Government for same. Requisitions and returns for Government property must be prepared in accordance with the regulations governing the respective supply departments concerned.

32. Requisitions. — Requisitions for Government property will be sent by the commanding officer to the Committee on Education and Special Training, who, after approving, will forward them to the proper source of supply.

33. Shipments.—Authorized shipments of Government property from depots, arsenals, or armories to institutions, and authorized return shipments of such property from institutions to depots, arsenals, or armories will be made on regular form of Government bill of lading at the expense of the United States.

34. Storage and cleaning.—Adequate facilities must be provided by the institution for the proper storage, care, and safekeeping of Government property issued to it. All Government property must be kept in serviceable condition. A proper allowance of cleaning material and spare parts will be issued so far as practicable by the Government for this purpose. Detailed instruction as to the care, use, preservation, and accountability of Government property are found in the Army Regulations and in other regulations or instructions issued by the War Department, and strict adherence to same is enjoined upon all concerned.

35. Loss or damage.—Action concerning the loss, damage, or unserviceability of Government property will be in accordance with Army Regulations.

36. **Sale or pledge.**—The sale or pledge of any article of uniform, arms, or equipment by an enlisted man is an offense punishable by court-martial.

37. **Insignia.**—Members of the Students' Army Training Corps will wear, with the service hat, an olive-drab cord. They will wear as collar insignia a bronze disk bearing the letters "U. S."

Acting noncommissioned officers of the Students' Army Training Corps will wear the chevrons prescribed for noncommissioned officers of the Army.

○

[U.S. Dept. of War]

Circular
No. 126.

WAR DEPARTMENT,
Washington, December 9, 1918.

WAR RISK INSURANCE--REPORT IN CASE OF NON-PAYMENT OF ALLOTMENTS.

1. In connection with paragraph 4, Circular No. 73, War Department, 1918, a separate report will be made to The Adjutant General of the Army, attention Room 524, in the case of each enlisted man who has made an allotment but which allotment has not been paid to the allottee at the time of his discharge.

In order that such allotments may be properly investigated this report will include the following information:

a. First, middle, and last name.
b. Rank and organization at time allotment was made.
c. Army Serial Number.
d. Name of allottee.
e. Address of allottee.
f. Kind of allotment.
g. Amount of allotment.
h. Amount deducted from pay on account of allotment.
i. Effective date of allotment.
j. Date of discharge.
k. Future address of enlisted man.
l. Did enlisted man claim exemption from compulsory allotment?

2. Each enlisted man will be informed that should he find it necessary to write regarding his allotment his letter should be addressed to The Adjutant General of the Army (Attention Room 524) and should include the data mentioned in paragraph 1.

(004.61 A.G.O.)

By order of the Secretary of War:

PEYTON C. MARCH,
General, Chief of Staff.

OFFICIAL:
P. C. HARRIS,
The Adjutant General.

Hq P of E Hoboken Jan 21 1919.

WAR DEPARTMENT
THE ADJUTANT GENERAL'S OFFICE

MEMORANDUM OF INFORMATION.

Admission of Enlisted Men of the Regular Army, National Guard, and National Army, and Graduates and Undergraduates of Certain Universities, Colleges, and Military Schools, to Training Camps to be Held January 5 to April 5, 1918.

1. GENERAL PLAN.

With the object of training enlisted men of the Regular Army, National Guard, and National Army for appointment as officers to fill vacancies that may occur in these forces, a third series of training camps will be organized. The graduates of these training camps who may be so recommended will be listed as eligible for commission as second lieutenants and will be commissioned as vacancies occur. To these camps, which are primarily for enlisted men as indicated above, it has been decided to admit a certain number of graduates and undergraduates of universities, colleges, and schools which have earned recognition by having had military training under Army officers during the past 10 years.

The following institutions have earned such recognition and have been assigned a quota—the entire number of graduates and undergraduates to be admitted is 2,490:

Colleges.

Ouachita University, Arkadelphia, Ark.
University of Alabama, Tuscaloosa.
Leland Stanford, Jr. University, Stanford University, Cal.
Throop College of Technology, Pasadena, Cal.
Yale University, New Haven, Conn.
Wesleyan University, Middletown, Conn.
University of Chicago, Chicago, Ill.
Indiana University, Bloomington.
Dubuque College, Dubuque, Iowa.
State University of Iowa, Iowa City.
Bowdoin College, Brunswick, Me.
St. John's College, Annapolis, Md.
Johns Hopkins University, Baltimore, Md.
Harvard University, Cambridge, Mass.
Williams College, Williamstown, Mass.
Princeton University, Princeton, N. J.
Pennsylvania College, Gettysburg, Pa.
The Citadel, Charleston, S. C.
Norwich University, Northfield, Vt.
University of Virginia, Charlottesville, Va.
University of Washington, Seattle, Wash.
Virginia Military Institute, Lexington.
Alabama Polytechnic Institute, Auburn.
University of Arizona, Tucson.
University of Arkansas, Fayetteville.
University of California, Berkeley.
State Agricultural College of Colorado, Fort Collins.
Connecticut Agricultural College, Storrs.
Delaware College, Newark.
University of Florida, Gainesville.
North Georgia Agricultural College, Dahlonega.
University of Georgia, Athens.
University of Idaho, Moscow.

3—4063

University of Illinois, Urbana-Champaign.
Purdue University, Lafayette, Ind.
University of Kentucky, Lexington.
Louisiana State University and State Mechanical College, Baton Rouge, La.
University of Maine, Orono.
Massachusetts Agricultural College, Amherst.
University of Minnesota, Minneapolis.
Mississippi Agricultural and Mechanical College, Agricultural College.
Montana College of Agriculture and Mechanic Arts, Bozeman.
University of Nebraska, Lincoln.
University of Nevada, Reno.
New Hampshire College of Agriculture and Mechanic Arts, Durham.
Rutgers College, New Brunswick, N. J.
New Mexico College of Agriculture and Mechanic Arts, State College.
Cornell University, Ithaca, N. Y.
North Carolina College of Agriculture and Engineering, West Raleigh.
North Dakota Agricultural College, Agricultural College.
Ohio State University, Columbus.
Oklahoma Agricultural College, Stillwater.
Oregon Agricultural College, Corvallis.
Rhode Island State College, Kingston.
South Dakota State College of Agriculture and Mechanic Arts, Brookings.
Clemson Agricultural College, Clemson College, S. C.
University of Tennessee, Knoxville.
Agricultural and Mechanical College of Texas, College Station.
Agricultural College of Utah, Logan.
University of Vermont and State Agricultural College, Burlington.
Virginia Polytechnic Institute, Blacksburg.
State College of Washington, Pullman.
West Virginia University, Morgantown.
University of Wyoming, Laramie.
Iowa State College of Agriculture and Mechanic Arts, Ames.
Kansas State Agricultural College, Manhattan, Kans.
Maryland Agricultural College, College Park.
Michigan Agricultural College, Lansing.
University of Missouri, Columbia.
Pennsylvania State College, State College, Pa.
University of Wisconsin, Madison.
Massachusetts Institute of Technology, Cambridge.
Pennsylvania Military College, Chester.

Military Schools.

Western Military Academy, Alton, Ill.
Culver Military Academy, Culver, Ind.
Wentworth Military Academy, Lexington, Mo.
Kemper Military School, Boonville, Mo.
New Mexico Military Institute, Roswell, N. Mex.
St. John's School, Manlius, N. Y.
St. John's Military Academy, Delafield, Wis.
Kentucky Military Institute, Lyndon, Ky.
College of St. Thomas, St. Paul, Minn.
Shattuck School, Faribault, Minn.
Staunton Military Academy, Staunton, Va.
New York Military Academy, Cornwall on the Hudson, N. Y.
Marion Institute, Marion, Ala.
The Harvard School, Los Angeles, Cal.
Georgia Military Academy, College Park, Ga.

3—4963

Georgia Military College, Milledgeville, Ga.
Gordon Institute, Barnesville, Ga.
Gulf Coast Military Academy, Gulfport, Miss.
Northwestern Military and Naval Academy, Lake Geneva, Wis.
Ohio Northern University, Ada, Ohio.

2. DATE AND LOCATIONS OF CAMPS.

Date, January 5, 1918, to April 5, 1918.

(*a*) One in each Regular Army, National Guard, and National Army Division.

(*b*) One each in the Philippines, Panama, and Hawaii.

(*c*) One each at Fort Bliss, Tex., Fort Sam Houston, Tex., and Chickamauga, Ga.

3. QUOTA.

From educational institutions: As given above.

From the Regular Army, National Army, National Guard: 1.7 per cent of the enlisted strength of the organization (regiment or other smaller separate unit).

4. QUALIFICATIONS FOR GRADUATES AND UNDERGRADUATES OF THE INSTITUTIONS LISTED.

Graduates and undergraduates of the institutions listed, who will be between 21 and 31 years old on January 5, 1918, are eligible to apply for admission.

Applicants may be married or unmarried, but other things being equal, examining officers will give preference to unmarried men.

Graduates and undergraduates of these institutions who did not take the course of military training offered by the institution are *not* eligible for admission.

5. APPLICATIONS.

Graduates and undergraduates who are eligible as indicated above and who desire to be admitted to the training camp must apply on the blank which accompanies this circular and forward the completed application to the Instructor in Military Tactics of the institution from which the applicant graduated. Read the instructions on the application and fill it out carefully. Note particularly that letters of recommendation are not wanted, but only the names of three responsible citizens who know the applicant best. Each applicant must be examined physically at his own expense by a reputable physician, who will fill out the physical report forming part of the official application blank. Applications will be received between October 15 and December 1. No application received after December 1 will be considered, but will be promptly returned to the applicant. Examining officers will be instructed to designate the full quota of principals and the same number of alternates, provided the number of qualified applicants admits of this.

6. ENLISTED MEN OF ORGANIZED DIVISIONS OF THE REGULAR ARMY, NATIONAL GUARD, AND NATIONAL ARMY.

The commanding general of each Regular Army, National Guard, and National Army Division will at once inform the enlisted men of his command of the fact that the school is to be held and that, if they so desire, they are authorized to apply to attend, and that their application must be submitted to their immediate commanding officer before December 1. From these applications the company or other unit commander will carefully select those of the most deserving men not to exceed in number 10 per cent of the enlisted strength of the organization, the age limits to be 21 to 40 years. These applications will be forwarded through the usual channels to the division commander, who will call a board of three Regular Army or National Guard officers to consider all applications and select and designate the men to attend. Should the application of any man be disapproved by any intermediate authority before reaching the division commander it will not be considered by the board. In selecting men to attend, the board will be guided by the following considerations:

(*a*) Character of the applicant as regards:
Conduct.
Leadership.
Ability to learn quickly.
Ability to instruct others.

(*b*) General suitability; i. e., military appearance, etc.

3—1963

last enlistments
allowed in Engineer
Regiment - Camp Sherman
up to Dec. 15-1917 (more)

7. ENLISTED MEN OF TROOPS WHICH ARE NOT ORGANIZED INTO DIVISIONS.

Department commanders will at once inform the commanding officers of such troops in their departments of the scheme of training schools authorized and direct them to submit the names of enlisted men between the ages of 21 and 40 recommended for attendance, the number they recommend not to exceed 1.7 per cent of the enlisted strength of the organization; any fraction to be regarded as 1. Recruiting officers will send to the department commander the names of members of their recruiting parties who are recommended by them to attend, and the department commander will select not to exceed 1.7 per cent of the total number of men on recruiting duty in the department, from those recommended.

8. ORGANIZATION OF TRAINING SCHOOL.

The normal strength of each training school will be about 440 students, organized into one Infantry company and one Light Artillery battery.

The schools prescribed in (*a*), paragraph 2, will be under the supervision of the division commanders, who will detail the commanding officer and the instructor personnel.

The schools prescribed in (*b*), paragraph 2, will be organized at such places as the commanding generals of the territorial divisions and departments concerned may order, and will be under their supervision.

The schools at Fort Bliss, Chickamauga, and Fort Sam Houston prescribed in (*c*), paragraph 2, will be organized by the department commanders.

32-37-9

9. STATUS OF STUDENTS.

(*a*) Enlisted men of the Regular Army, National Guard, and National Army will be carried on detached service while students at training schools. They will receive the pay and allowances of their grade.

(*b*) Graduates and undergraduates of the institutions listed, if selected to attend, will be required, upon reporting at the school, to enlist for the duration of the war. If after completing the three months' course they are not recommended for commission, they will be required to remain in service and finish their enlistment. While students they will receive the pay and allowances of privates first class; this will be about $30 per month, plus food, clothing, and quarters.

10. GENERAL.

All men who successfully complete the three months' course and are so recommended will be carried on a list as eligible for appointment as second lieutenant and will be commissioned as vacancies occur, in the order of merit determined by performance while at the training school, provided that their service, between date of graduating and date of occurrence of their vacancy, has been satisfactory.

11. OBJECT OF TRAINING CAMPS.

The training camps described in this memorandum are primarily for men to be commissioned in the line. The Quartermaster General, Chief of Ordnance, Chief of Coast Artillery, Chief of Engineers, and Chief Signal Officer have been authorized to organize such schools as they may deem necessary for the training of men to be officers in their corps.

NO APPLICATION WILL BE RECEIVED AT THE WAR DEPARTMENT.

NOTE.—Application blank is not inclosed with this memorandum, as they have not as yet been received from the printer. An application blank can be obtained from any of the schools listed in this memorandum as soon as the supply is received, which should be by October 10.

H. P. McCAIN,
The Adjutant General.

PART I.

THE SELECTIVE-SERVICE ACT AND ITS ADMINISTRATION.

DECEMBER 20, 1917.

The SECRETARY OF WAR.

SIR: Herewith I submit my report upon the operations of the first draft under the Selective-Service Act, 1917.

I.

INTRODUCTORY.

On May 17, 1917, no advocate of preparedness could with confidence have forecasted the success of a compulsory-service law. There existed no mechanism for the enrollment or selection of individuals. The body politic was an inchoate mass of available but unorganized resource. The administrative history of the United States disclosed a consistent popular adherence to the principle of voluntary enlistment if not a repudiation of the principle of selection or compulsory military service. It is true that, during the Civil War, a modified conscription bill had passed the Congress and had been in effect for a period of two years, but the application of that law can scarcely be termed a popular success. It was softened and weakened by provisions authorizing the payment of bounties and the hiring of substitutes which practically made it a means for adding inducements to volunteers. Its effect was persuasive rather than compulsory. It was destined to the fate of all halfway measures. It reduced the city of New York to a state of anarchy, and it was received throughout the Nation with an ill grace of riot and protest. In practical result it contributed a compelled service from only 46,347 men out of 776,829 men drafted for service.

With this concrete example, and with such abstract deductions as could be made from our history, there were many who feared the total failure of the Selective-Service Law which was enacted by Congress on May 18, 1917. The law was unequivocal in its terms. It boldly recited the military obligations of citizenship. It vested the President with the most plenary power of prescribing regulations which should strike a balance between the industrial, agricultural, and economic need of the Nation on the one hand and the military need on the other, and should summon men for service in the place in which it should best suit the common good to call them. It was a measure of unguessed significance and power. It flung a fair challenge at the feet of the doubters, and the refutation of their assertion was nothing less than spectacular.

The governors of States, the mayors of cities, and the officials of counties had been called upon to lend their aid in the accomplishment of registration, and, in the 18 days intervening between May 18, the day the law was approved, and June 5, the day the President had fixed as registration day, a great administrative machine was erected. This system comprised some 4,000 registration boards with over 12,000 members, employing a personnel of registrars and assistants to the number of 125,000. Between dawn and dark of one single day practically the entire male population of the United States within the age limits fixed by law for registration presented themselves at the enrollment booths with a registered result of nearly 10,000,000 names. The project had been so systematized that within 48 hours practically complete registration returns had been assembled by telegraph in Washington.

The Selective-Service Law left the details of administration to presidential regulation. The registration completed, it became necessary to provide a complete and somewhat intricate system of Selection Boards, to prescribe their procedure in hearing and resolving claims for exemption, and to codify a complete set of rules under which the most sacred rights and the gravest obligations of registrants and their dependents were to be adjudicated. These boards were constituted and appointed and the regulations were published and distributed by June 18. The intricate task of computing and allotting quotas and credits for voluntary enlistments was accomplished early in July.

The remaining preliminary task was to determine the order in which the 10,000,000 registrants were to be called to determine their availability for military service. This was accomplished on July 20 by a great central lottery in Washington, which fixed the order of call for the whole 10,000,000 names. This order determined, the boards proceeded promptly to call, to examine physically, and to consider claims for exemption of a sufficient number of men to fill the first national quota of 687,000 men.

Moving under the press of an apparent great urgency with the intention of evolving the entire quota by the end of September, before which time it was then thought the cantonments would be ready to receive the entire quota, the boards proceeded to call and examine over one and one-half million men. On

32.29.72

July 30, the Army assimilated the first selected man under the new plan, and by September 1, the date by which it had originally been called upon to produce the first 30 per cent of the initial draft, the Selective-Service System stood ready to deliver to the national cantonments 180,000 selected men.

Thus in less than three months and one-half, the Nation had accepted and vigorously executed a compulsory-service law. The mechanism for the vast task of registration had been conjured from the uncoordinated political systems of the several States in a fortnight. The more compact organization for selection was erected in only a little more time, and the great sifting process was accomplished in season to furnish the men necessary for the formation of our armies long before the logistic preparation for their reception could be completed.

The whole tale has been thus tersely told by way of introduction, and the expedition and smoothness with which the law was executed has been recounted for the sole purpose of emphasizing the significance of this remarkable demonstration of the flexibility, adaptability, and efficiency of our system of government and the devotion of our people. Here will be found a gigantic project in which success was staked not on reliance in the efficiency of a man, or an hierarchy of men, or, primarily, on a system. Here was a bold reliance on faith in a people. Most exacting duties were laid with perfect confidence on the officials of every locality in the Nation, from the governors of States to the registrars of elections, and upon private citizens of every condition, from men foremost in the industrial and political life of the Nation to those who had never before been called upon to participate in the functions of government.

By all administrative tokens, the accomplishment of their task was magic, but the magic lay solely in this:

At the President's call, all ranks of the Nation, reluctantly entering the war, nevertheless instantly responded to the first call of the Nation with a vigorous and unselfish cooperation that submerged all individual interest in a single endeavor toward the consummation of the national task. I take it that no great national project was ever attempted with so complete a reliance on the voluntary cooperation of citizens for its execution. Certainly no such burdensome and sacrificial statute had ever before been executed without a great hierarchy of officials. This law has been administered by civilians whose official relation lies only in the necessary powers with which they are vested by the President's designation of them to perform the duties that are laid upon them. They have accomplished the task. They have made some mistakes. The system offers room for improvement. But the great thing they were called upon to do they have done. The vaunted efficiency of absolutism of which the German Empire stands as the avatar can offer nothing to compare with it. It remains the ultimate test and proof of the intrinsic political idea upon which American institutions of democracy and local self-government are based.

It is the relation of this novel but successful experiment in government to which the following pages are addressed.

II.

ERECTING THE REGISTRATION SYSTEM.

From the moment American participation in the world war became apparently inevitable the enactment of the Selective-Service Law was also inevitable, and at that moment the preliminary studies that resulted in the present Selective-Service System were instituted. The trend of continental military organization since the battle of Jena, and the inception of the junker idea of "the nation in arms" (not to mention the unprecedented military effectiveness of the German Empire in the present conflict), left no doubt that no intelligently directed nation could afford to enter the conflict with less than its entire strength, systematized, organized, and controlled for war. Such systematization is impossible under any other than the selective plan for raising armies. The thinking element of the Nation was perfectly aware of the truth of this proposition; and Germany had given such a demonstration of its effectiveness that little argument was necessary to support it in May of this year, and none is necessary to-day. If farms, factories, railroads, and industries were not to be left crippled, if not ruined, by the indiscriminate volunteering of key and pivotal men, then, in the face of such an enemy as Germany, the total military effectiveness of the Nation would have been lessened rather than strengthened by the assembly of 1,000,000 volunteers.

On the assumption that the selective-service bill would become a law, therefore, the plans for the execution of that law were formulated in very minute detail and were submitted to the Secretary of War for approval; and all the initial plans and much of the actual preparation for carrying them into execution had been made six weeks before the enactment of the law.

The only precedent was the execution of the Civil War draft act, and while this afforded emphatic warnings of what not to do, it was worth little as a guide. For the execution of the Civil War draft, the Nation was divided into enrollment districts corresponding to the congressional districts. A complete Federal military machine for its administration was erected, with enrollment boards in every district and enrollment officers in every precinct. Two months were required for the appointment of the boards. The registration was not begun until these boards could be erected and four months were required to complete it. The enroll-

ing officers went from house to house in making their canvass; and practice proved that they went at peril of their lives. Some were killed and many were injured. The enrollment was very incomplete and far from accurate. The Civil War plan was therefore very slow, very expensive, and not at all satisfactory. If it had anything to recommend it, it was the military control and power behind it for enforcement. Study seemed to reveal, however, that perhaps this very aspect of it may have had much to do with its unpopularity and lack of success. It seemed to advertise a lack of faith in popular support and participation. It was completely foreign to our intrinsic ideas of popular and local self-government. It was centralized, slow, and cumbersome. If it were to be followed there was no reason to anticipate a more speedy registration of our vastly increased and more widely distributed population, and our other military preparations (with which the selection must necessarily synchronize) demanded a very much greater rate of speed.

It was apparent that the first task of preparation must be a registration of the millions of young men who would be subject to the law, and that nothing further could be attempted until the registration was complete. Standing ready at hand was the State, city, and county electoral machinery, enhanced by the significant circumstance that most State election registrations are promptly prepared for and are usually executed in a single day. It was computed that the most convenient number of persons to be carefully but swiftly selected under the jurisdiction of a single selection board was about 3,000, and that this was nearly the average male population between the ages of 21 and 30 in a county. Considering that the county is the principal minor unit of political administration throughout the United States, the plan of a collection of such convenient registration and selection units in each State, concentering about State headquarters, was very persuasive, and the added circumstance that such a plan was the perfect pattern of the normal peace-time administration of the Nation was compelling. It was distinctively an American plan. The arguments against its systemic soundness were only the stock arguments against the systemic soundness for war purposes of the political structure of the Nation itself. It was often said, in the days of that planning, that, for the purposes of war, we lack the solidarity and compactness of such absolute governmental system, as that of Germany. On the other hand, there was the suggestion that the very centralization and lack of opportunity for popular participation might have been responsible for our unsatisfactory experience in 1863.

Once the plan had been decided upon, it became apparent that there could be no equivocation in its execution. The county was selected as the typical working unit. The county organizations within each State were grouped in the larger administrative units of the States themselves, and finally the State units were controlled from a central source in Washington.

The plan itself is described in full in the following excerpt from a letter to the governors of the several States under date of April 23, 1917, nearly a month before the enactment of the selective-service law:

THE LETTER OF ANNOUNCEMENT TO THE GOVERNORS.

The President desires that I bring to your attention the following considerations which he is not at present ready to give to the press: Pending legislation contemplates calling to the colors a sufficient number of young men to provide for the common defense. It will be apparent to you that no steps can be taken toward the actual mustering of the selected army until, in the form of a registration of all males of designated age, there has been completed a most comprehensive census of our resources of men. Notwithstanding difference of opinion that may exist as to other features of this legislation, no voice has yet contested the necessity for such an enrollment; and we may confidently assume that the law will carry a provision requiring all such persons to present themselves for registration at a day and place to be named by presidential proclamation, under pain of penalty for failure to do so.

While enrollment is thus necessary, the undertaking it imposes is very great. The machinery for such a census must first be created. In the Civil War a period of two and one-half months of preparation was necessary before a single name could be written in the rolls of available men. The prospect of such delay is disturbing. At the moment of the enactment of a law levying new armies there will be a wide demand for instant action; yet the enthusiasm and the potential energy of our people must remain pent and poised while we await the completion of the uninspiring and tedious preliminary of enrollment. If this delay can be avoided, it must be avoided. Intrinsic in the problem that confronted Congress in 1863 was the necessity for creating a complete Federal instrumentality for effecting the registration. The States, unhappily, were not at one in bearing out the Nation in this. When we afford ourselves the satisfaction of saying that this condition no longer subsists, we put the chief impediment to swift action out of our reckoning. The gratifying and evident eagerness of the States to do their utmost in aid of the Nation at this emergent moment persuades us to indulge the belief not only that State agencies can be used for this purpose, but that they promise the swiftest and the most effective possible execution of the law. It is not too sanguine, I think, to say that this consideration breaks our way directly to the light and insures the resolution of all our difficulties.

As an incident of elections, and in those elections themselves, our people have long been practiced in presenting themselves at accustomed voting places to be polled for one purpose or another by the agencies of the States. The methods employed in those enumerations are admirably adapted to the accomplishment of this, for we find in every State a mechanism for registration and a people accustomed to its use. The details of the local instrumentalities may differ, but all exist for a single purpose that is, in essential substance, the purpose we now entertain. It is true that those agencies are not at present bound in a single uniform system responsive to a sole control, but the elimination of this objection is precisely our problem. I can not think that it is difficult. The pending bill contains the following provision, which I confidently believe will become a law:

SEC. 5. That the President is hereby authorized to utilize the service of any or all departments and any or all officers

or agents of the United States and of the several States, Territories, and the District of Columbia in the execution of this act, and all officers and agents of the United States and of the several States, Territories, and the District of Columbia are hereby required to perform such duties in the execution of this act as the President shall order and direct, and officers and agents of the several States shall hereby have full authority for all acts done by them in the execution of this act by the direction or request of the President.

It is proposed to execute so much of the law as I have here discussed along the following lines. By proclamation the President will call upon persons of the designated classes to present themselves on a certain day at the customary polling places in their domiciliary voting precincts. These precincts are now delineated with contained populations of convenient size for enumeration in one day. In nearly all of them there is a provision of method and material to that end. The voting precinct shall, therefore, be the primary registration area. For each the service of registrars must be secured; but, so well are their population proportioned to enumeration, that in most of them one registrar will be sufficient. It is felt that much voluntary service will be offered. It would be gratifying to think that in each precinct the position of registrar could be filled by competent and responsible citizens who would claim no compensation, but while I desire to encourage such offers, I shall not rely on them.

For the purpose of securing prompt replies and of orderly administration and centralization of control and for further execution of the law, a local authority supervising an appropriate number of precincts is necessary. The county is, without exception, I believe, the territorial and political subdivision into which all voting precincts integrate without overlapping. For this reason, registration in the precincts must be under supervision of a county board of control. Other reasons are these: After the registration is complete, selections of persons to be called to the colors must be made based upon the information found in the registration lists. While the class from which soldiers are to come is to be segregated by draft, the law is careful to provide for avoiding the misery that war brings to dependents at home and for a choice of those whose military service the Nation most needs and whose civil and domestic service can best be spared. The important duty of making the selection from the drafted class can best be performed by a permanent board in each county composed of citizens who can be relied upon to execute this solemn function with even justice and with apprehension of its gravity. This board should control the process of selection from its earliest steps, and therefore it must supervise the registration. For the sake of uniformity, for the elimination of expense, and for further and self-evident consideration, it would be prescribed that this board be composed of the sheriff, who would act as its executive officer, the county clerk, who would be the custodian of its records, and the county physician, who would serve as surgeon and pass upon the physical fitness of those who are selected for service. In the normal case the board must be so constituted, but county organization is not uniform throughout the Nation, and, important as is the requirement of homogeneity in the general pattern, it is not desired to restrict the discretion of governors in adapting the essentials of the plan to the peculiarities of local political institutions, in so far as that may be done without impairing the function of the national machine. Cities of over 30,000 inhabitants present a special case; while urban voting precincts are as well adapted to registration as those in rural districts, the supervisory county board is not suited to the municipal organization of cities of so great a population. It is thought that, for the execution of the law in such cities, boards similar to the county board should be constituted for one or more wards to supervise the registration in indicated precincts and to further execute the law, and that the various ward boards should function under a central city board of control.

While the territorial organizations here described must be preserved, and the pattern of county and city control must not be distributed, there shall not be laid down any inflexible rule governing the composition of those local boards, and that matter shall be left to your good judgment. You will realize, however, that the maintenance of the suppleness and efficiency of the whole system requires that the least possible departure be made in the constitution of these boards and that considerations arising from local peculiarities should be strong indeed to induce a change in the normal constitution here indicated.

It would be gratifying also to think that the service required of members of these boards would be offered without hope of compensation, but it is borne in mind that the duties imposed upon them will be exacting, difficult, and frequently distressing. If compensation is necessary, the Government stands ready to make it. Where any service in connection herewith is rendered gratuitously the Government will be prompt to express its appreciation.

The next thought in coordinating local organizations under a central control indicates yourself as chief executive of the State, functioning, of course, through some appropriate office that will relieve you of detail. The office that suggests itself instantly to my mind is that of your adjutant general. The President has the firmest confidence that in the execution of this law of devoted sacrifice by the people themselves our genius for self-government will transcend all prior expressions. For this reason it is desired to make the point of actual application of the law nonmilitary, but as the system centralizes its military object is emphasized, and with the assistance of such clerical force as may be necessary, your adjutant general's office is excellently adaptable to the integration of the State system with the War Department.

It has thus far been attempted to demonstrate the difficulties of the problem and the plan proposed to obviate them and to visualize the system which shall result which, in recapitulation, may be stated to be: First, a central bureau in Washington; second, a collection of State and territorial systems decentralized as far as possible under control of the governors; third, county and city boards of control; fourth, for the purpose of registration, a registrar for each voting precinct and an assistant were necessary.

I have already indicated the necessity of expedition in completing the registration. It is important to add that the selection of those who are to go ought to be made swiftly, in order that as long a time as is consistent with the national interest may be given them in which to compose their affairs and to make their farewells.

Since even the coordination and preparation of existing mechanism will consume no litle time, this letter is being addressed to you to apprise you of the plan, to enable you to consider it and be prepared immediately upon enactment of the law to adjust the machinery in your State to this registration and to gearing with the national unit. This will suggest to you the desirability of some such proper and necessary anticipation as a selection of the best method of constituting your county and city boards and a preparation for promptly calling these boards into being and apprising them of their functions. It is intended to inform the public mind of the details of the plan in order that all may know the duties to be required of them.

The War Department is ready to follow a rather expeditious schedule. The President's proclamation will be published throughout the United States on the day of the approval of the bill. It is hoped that, on telegraphic notification

of the governor that the bill has passed, all county and city boards of registration in the United States can be constituted by the governors within three or four days. The necessary instructions, regulations, and cards for registration must come from a single Federal source in order that the information received may be of a uniform character. All arrangements have been made here to print and forward this material directly to sheriffs and to mayors of cities of over 30,000 population, as shown by the census of 1910, in time to have the distribution complete in the most remote county seat within six days after the approval of the bill. This distribution will be only to county seats and we must look to the sheriffs (or to such officers as you may choose in their stead) to see to it that the distribution to precincts is complete within eight days even if, in case of remote precincts, they have to cause the blanks and instructions to be sent by special messenger. Should you constitute boards not including the sheriff, those boards must procure the blanks from the sheriffs. In order to accommodate changes that may have occurred in the population of counties since the last census (upon which we shall rely in distributing blanks) we shall forward to you a surplus to fill deficiencies in county supplies and your sheriff should be instructed to telegraph State headquarters in case of shortage.

The hope is entertained that the whole system may be ready to proceed to registration within 10 days (or, at most, two weeks) after enactment of the law, but confidence in this is reserved until advices have been received from the governors apprising of difficulties (if such there be) which have not been foreseen in this rather hasty survey of the political systems of the States.

It is of course apparent that the success of this great undertaking is dependent entirely upon the zeal and cooperation of State, city, and county officials, and of private citizens. It will require the very best efforts of everyone concerned in it. Such a complete reliance on State organization for the performance of the Federal service has never before been made in our history, and it is a happy day for the Union when it can be said, as it now can be said, that the very best means that could possibly be employed for such a necessary and emergent national task are the political organizations of the several States.

The response of the governors was, without a single exception, nothing less than inspiring. Preparation for the execution of the registration had been carried forward with such rapidity in anticipation of enactment of law that, on the day of its approval, the whole system was practically complete. Preliminary drafts of the regulations governing registration, lacking only the authorization of the statute itself, had been distributed to all registration officials. The complete supply of 45,000,000 blank forms had been so thoroughly disseminated that every registration board was provided with all the necessary paraphernalia. It is a fact that, save for the necessity of giving ample publicity and distribution to the President's proclamation fixing June 5 as registration day, the registration could have been as well consummated on May 25 (one week after the bill became a law) as it was on June 5, the day fixed by the President. In short, the registration machinery had been completely provided before the law was enacted, so that all that remained to do was to make a few minor adjustments and to await, with some groundless apprehension, the response of our people to the first considerable demand of the war.

ORGANIZATION OF THE OFFICE OF THE PROVOST MARSHAL GENERAL.

As soon as its progress in Congress gave form to the probable trend of the pending selective-service legislation the undersigned was assigned the task of preparing the preliminary studies for its execution. Two officers, then on duty in the Office of the Judge Advocate General, Capts. Hugh S. Johnson, Cavalry, and Cassius M. Dowell, Infantry, were assigned to the specific task of working out the details of the general plan which was formulated and approved on April 10. On May 22 the undersigned was formally designated Provost Marshal General.

On April 26 offices were occupied in the old Land Office Building, and between that date and May 10 six more officers had reported and a tentative office organization was worked out, with Maj. Johnson as executive officer in charge of the detail of administration, Col. Kreger in charge of the department of quotas and credits, Maj. Dowell in charge of the appointment division, Capt. Perrin L. Smith as disbursing officer, and Maj. J. B. Scott in charge of the Correspondence Division. Maj. Johnson and Maj. Dowell had composed a committee to prepare registration regulations; Col. Kreger and Maj. Warren composed a committee to prepare the regulations for the first draft.

This tentative organization of the office has not been substantially departed from, although there have been several changes in personnel and some additions.

Correspondence is now handled by the Executive Division, which is divided into several sections, absorbing the administrative detail of the work.

The provisions of the old regulations allowing an appeal to the President from the final decisions of the district boards on claims for exemption on the ground of engagement in industry or agriculture have resulted in the receipt to date of 22,250 appeals.

The records in each of these cases require exhaustive study and concise briefing for final administrative action. Lieut. Col. E. A. Kreger, assisted by Maj. C. B. Warren, has been in charge of this work. Under their direction 13,441 cases have been so treated and have been finally resolved, with 12,435 affirmances and 1,006 reversals.

The congestion of cases resulting from the first draft required a very large force of examiners. Twenty-four Reserve Corps judge advocates have been temporarily detailed for this service. The requirements were so great, however, that an appeal was made for the voluntary assistance of members of the bar of the District of Columbia, and the following

members of that bar responded with an unselfish devotion that can not pass without commendation:

L. Russell Alden.	C. Clinton James.
C. G. Allen.	Guy H. Johnson.
Ralph P. Barnard.	Paul E. Johnson.
Henry P Blair.	Eugene A. Jones.
James H. Blount.	J. Miller Kenyon.
Edmund Brady.	L. L. Korn.
Chapin Brown.	Wharton E Lester.
W. Clayton Carpenter.	John P. McMahon.
Frederick E. Chapin.	Benjamin Micou.
Myer Cohen.	W. W. Millan.
Fred G. Coldren.	Charles F. R. Ogilby.
G. B. Craighill.	R. Ross Perry.
William T. S. Curtis.	Mason N. Richardson.
Charles Ray Dean.	Charles E. Roach.
M. M. Doyle.	Thomas E. Robertson.
Andrew B. Duvall.	W. H. Sholes.
John S. Flannery.	John Lewis Smith.
Richard A. Ford.	R. E. L. Smith.
Charles L. Frailey.	Henry W. Sohon.
Arthur F. Gotthold.	Joseph Solomon.
Harry R. Gower.	Milton Strasberger.
Walter B. Guy.	Robert H. Turner.
A. A. Hoehling, jr.	Alexander Wolf.

In preparing studies for the new regulations members of local and district boards from widely separated districts, selected with a view to presenting as many diversities of the problems of the first draft as possible, were called to Washington for conference, and all local and district boards were called upon for a statement showing criticism and recommendations. Provided with the valuable data thus evoked, Lieut. Col. Johnson, Maj. Easby-Smith, and Capt. H. C. Kramer were appointed as a committee and directed to prepare a revision of the old regulations along the lines discussed at length in the latter pages of this report.

Their labors were completed and the new regulations promulgated on November 8. The vast distribution and preparation of forms had already been begun, and on December 15 the task of classification was initiated by the boards. It is proceeding smoothly and without untoward incident.

A list of the officers who have been on duty in this office is given in the Appendix.

A proper acknowledgment of the loyal and efficient service rendered by those who have assisted in the performance of the very large task which confronted this office would require a roll call of all who have been identified with this work either as officers or in a clerical capacity; the office force has at all times been loyal and speedily became efficient.

Certain ones have been drawn into such a conspicuous relation to the work that special acknowledgment is their due. They include Lieut. Col. Hugh S. Johnson, who has carried so efficiently the duties of executive officer which have brought him into responsible contact with every line of its administration; Lieut. Col. E. A. Kreger, who formulated the regulations respecting quotas and had charge of the correspondence relating to the same, and who later became the directing head of the appeals division of this office which considered the large number of agricultural and industrial claims for exemption which had been appealed to the President from the judgment of the district boards; Maj. Charles B. Warren, who had primary responsibility in the formulation of the regulations for the first draft and upon whom and Col. Kreger fell the duty of coordinating and directing the work of the appeals division; Lieut. Col. A. W. Gullion, upon whom the work of the correspondence division has fallen so heavily, and who has been the efficient substitute in the executive office during periods of time when Col. Johnson was withdrawn therefrom for other work; Maj. J. H. Wigmore, a conspicuous name in the legal profession, whose participation in the work of this office has carried him into all fields of our work, and who has found time, among other exacting duties, to organize the statistical division of the office, and who has supervised the preparation of the various tables and comments thereon which appear in this report; Maj. Edwin W. Fullam, who has had charge of office organization; and, finally, Maj. James S. Easby-Smith, who came to this office from the presidency of the District Board for the District of Columbia, and who has rendered most valuable service both as a member of the committee which prepared the revised regulations under which the new military and industrial classification of 9,000,000 registrants is proceeding satisfactorily, and who has since then assumed, in responsible portion, work connected with such classification in the executive branch of this office.

Such commendation as the administration of this office merits at your hands will be found due, in a great measure, to Lieut. Col. Johnson, executive officer. It has rarely happened in our service that an officer of his age and experience has been called upon to perform such responsible duties. In their performance he has challenged and held my attention and, as well, the attention of the office force in a very special way, and the opinion of all associated with him is confirmatory of my own of the indefatigable zeal and energy and the great ability with which he has addressed himself to his tasks. What I here make of record in this formal report will serve to bring to your attention the special commendation of specific tasks performed by Col. Johnson, which I have brought to your attention from time to time.

III.

THE REGISTRATION.

The registration is set forth by States in Appendix Table 1, and its several aspects are fully analyzed and discussed in Part II. It suffices here to say that on the morning of June 5 a perfectly coordinated system

which, by the patriotic and devoted cooperation of the officials and citizens of the several States, had been created almost in a fortnight, stood ready to the task. On the evening of that day, practically the entire male population of the United States between the ages of 21 and 30 had presented themselves for enrollment for service, and within 48 hours the returns in the city of Washington were 90 per cent complete. A volume that would read as an epic of patriotic ingenuity and endeavor could be devoted to the story of the registration in many of the States. Seemingly insurmountable difficulties were overcome. The men of the Nation made their first response to the call of national need in a unison that removed all doubt of the solidarity and devotion of our people. The event proved the President's forecast of it.

June 5 is destined to become one of the most significant days in American history.

IV.

ORGANIZATION OF THE SYSTEM FOR SELECTION.

Preparation for the registration having been made before enactment of the law, the fortnight intervening before registration was given over to a study of the intricacies of the law as it had come from the hands of Congress, and to a reorganization of the hastily erected registration system, for the execution of the overwhelming task of selection.

It had been the intention to utilize the registration mechanism for the selection and to merge the system for registration easily into the plan for selection. Changes inserted in the bill as originally drafted, however, required considerable adjustments of the registration system.

The intrinsic idea of the latter system, as it had been conceived, was to pass complete responsibility for the execution of the selection on to the States, to vest the governors with as much control as possible, and to that end to hold them responsible for the selection of all officials who were to be charged with the actual local administration. The registration boards were selected in precise accord with this idea. Congress had, however, inserted provisions, apparently intended to give statutory effect to the tentative draft of registration regulations, but actually requiring that selection boards should be appointed by the President. While authorizing the President to call upon the governors, and all State or national officials or other persons within a State, to perform such duties as he might designate, under pain of heavy penalties for neglect or refusal, the terms of the statute required a considerable readjustment of the registration system for the purposes of selection. It was determined at once to maintain as far as legally possible the pattern of national supervision and State control, under the original basic idea of what may (not too pedantically) be termed a system of "supervised decentralization."

The areas of jurisdiction of the local boards were to remain practically the same as the jurisdiction of the registration boards. Local boards were to have original jurisdiction of all claims for exemption or discharge except those on the ground of engagement in industry and agriculture, jurisdiction of which was vested in the district boards. From the local board jurisdiction a right of appeal to the district boards was provided, but the decision of the district board in all matters within the original jurisdiction of the local boards was final. From matters within the jurisdiction of the district boards a right of appeal to the President was provided.

The principal question to be decided by the local boards was that of dependency. The regulations permitted the exemption of any man who had a wife, a child, mainly dependent upon him for support. This question of dependency involved circumstances of domestic relation which required the sympathetic consideration of the neighbors of the registrant. The personnel of the local boards was therefore to be selected with reference to their environment rather than with reference to their professions or callings. In some States the local officials who had supervised the registration were selected to continue as local boards; in others the governor made a complete new selection.

The district boards were to be created anew, and the careful selection of their personnel was of paramount importance. The view of this office as to their composition is given in the succeeding pages.

While the President was to exercise his statutory functions of appointing the selection boards, upon the governor of each State was imposed the responsibility for districting his State; and he was called upon to nominate the personnel of the local and district boards, under certain restrictions contained in the following instructions to governors and a memorandum for the information of Members of Congress under date of May 26 and June 18:

> The execution of the selective-service law divides itself into two distinct stages—first, the registration; second, the selection and the determination of exemptions. Instructions and regulations which have so far been furnished you have concerned themselves solely with the registration.
>
> It was the intention to erect for the purpose of registration a machine which could pass to the execution of the second step with few modifications. For this reason it was prescribed that there should be a registration board of three members for each county and for each group of 30,000 in each city of over 30,000 population. The second paragraph of section 4 of the selective-service act prescribes a mandatory organization for exemption boards. It is confidently expected that in the large majority of cases registration boards as created by the various governors can be continued as exemption boards after appointment by the President, but reports from many of the States indicate variations from the plan thus laid down in registration regulations. These variations make it impossible to designate by a blanket President's order the registration boards as the

local boards of exemption prescribed in section 4. It is now desirable for every State to prepare to create a system of local boards which shall be in precise accord with the requirements of the second paragraph of section 4.

Your nominations for this system should be in the hands of the President on or before June 7 in order that he can appoint the whole machinery of local boards for the second stage of the execution of the law. It will be necessary to observe strictly the following rules: Each city of over 45,000 must be divided into subdivisions containing approximately 30,000 of the population. Each county whose population, exclusive of cities of over 30,000 population, exceeds 45,000 must be divided into subdivisions each containing approximately 30,000 of the population of such county. In making these subdivisions care must be taken not to cross county, city, or registration district lines. This is necessary to delineate jurisdictional areas and insure that the cards of any subdivision can be readily segregated to that subdivision. For each county, for each city of over 30,000, and for each subdivision in either cities or counties of over 45,000 a board shall be nominated by the governor, to consist of three members, none of whom shall be connected with the Military Establishment, to be chosen from among the local authorities of such subdivision or from other citizens residing in the area or subdivision over which the board to which they are nominated shall have jurisdiction. At least one of the members must be a physician in whom the governor feels that he can repose implicit confidence.

In the majority of States little or no change will be necessary from the organization already erected by the governor for the purpose of registration, but, in order that complete information may be available to the President, he desires to receive a complete list of the governors' nominations from every State in the Union on or before June 7. This list must be in precise accord with the foregoing rules, which are prescribed by statute and from which no variations can be permitted. The lists should show first the name or other designation of each county or city or subdivision thereof; second, the names of the persons nominated by the governors to be appointed by the President as members of the local boards for each county or city or subdivision thereof, with a statement of the official position, if any, held by each of such persons.

The necessity for an expeditious and decentralized selection of the membership of exemption boards is necessary for the following reasons:

First. Our time is limited. The organization of a country of 100,000,000 people for such a task as ours is a colossal undertaking. It can be expeditiously accomplished in only one way—decentralization. There is no need to attempt to draw the picture of a bureau of appointment in Washington for the constitution, organization, and control of some four thousand local boards, and the confusion, complications, and unwieldiness that would ensue. Without reliable means for informing ourselves of the character of candidates, without prompt facility for communication, in the face of a necessity to create a new Federal machine with points of contact in every county in this Nation, we should be confronted with a task whose mere mechanical accomplishments would require months of effort and an enormous expenditure of money, and it is not an extravagance to say that for the lack of men furnished under the selective-service law we should be losing battles on the field of France sometime next spring while we continued to struggle with the constitution and organization of these boards.

Second. The difficulty of centralization is not mechanical alone. The law we have to execute demands a sacrifice. Under our dual form of government we have everywhere, side by side, two systems, and, to a certain extent, two centers of interest, loyalty, obligation, and devotion. At the very beginning of our task we decided to adopt a method which was designed to link these two systems together in a combined pull in a single direction and to avoid sedulously any suggestion of putting them in opposition, or even of letting the State systems also serve by only standing and waiting.

The vital, the truly tremendous value of this decision justifies itself more completely every day. There were two ways to take our young men from the States. One was to let the Federal Government go in and extract them, and the other was to let each State offer them. We adopted the latter method. The result of registration speaks for itself. The system is very efficient.

Third. Study of the Civil War draft acts and the execution they received reveals very clearly that a centralized Federal system of enforcing such a sacrificial law as the one before us is not effective and there can be little hesitancy in saying that the improper system on which that draft was conducted resulted in its practical failure.

The word "improper" is used in designating that system because it is believed that our entire political structure rests on the basic principle of local self-government, and that a system for the execution of a law imposing a direct and universal burden which neglects to apply that principle just as far as it can be applied is an "improper" system for us.

It is thought that at the completion of our work of organization we should find a machine for the turning out of recruits in each State. When men are needed, the governor of the State will be called upon by the Federal Government for the number of men required from his State and he will proceed to set the machine in operation and continue it until the necessary quota is furnished. That machine should consist of boards chosen from the residents of each locality who shall operate under the direction of the President and the supervision of the governor in all functions save that of determining exemptions. In this latter function they will be under very direct Federal supervision and through the medium of the Federal district board.

In effect we shall have the same sort of executive machine that we had for the registration. The law is executed in each locality normally by local officials chosen from among the people upon whom the burden falls. This is self-government. This is decentralization and this places the State organizations in line with the Federal organization working in the same direction with the same purpose and to the same end. In my opinion we can not afford to do less than this.

These considerations have compelled the conclusion that we must continue our pattern of "supervised decentralization" to the end. We must therefore place upon the governor as much responsibility for the selection of the boards with which he has to work as it is possible to place upon him.

For these reasons the governor of each State has been called upon to submit for the consideration of the President lists of persons whom the governor recommends for the constitution of these local boards. Normally these lists are composed of local officials chosen by the people themselves, but the governor has been allowed a latitude of discretion in departing from this ex officio personnel whenever in his discretion such departure is advisable.

This is not only the system of appointment, it is the system of administration that has been selected after full consideration and because it offers the swiftest and most effective execution of the law, and seems to remove the consideration of partisan politics as far as it can be removed from the selection and the action of these boards.

At the completion of our organization we expect to find in each State a complete machine for the furnishing of that State's share of the men necessary to the common defense. Upon any call the governor shall set this machine in action and continue to operate it until the State quota is full. In a word, it is not proposed that the Federal Government shall go into the State as such and *extract* men. It is proposed that

the State shall *offer* men. To this end the President has called upon the governors of the several States to nominate the personnel of the local boards from among local officials, or if considered best by the governor, from other citizens resident in the respective areas over which those boards shall have jurisdiction. By reason of the ministerial character of the duties of these local boards, the matter of their selection was not so grave a thing as the next step in the organization of the Nation for the execution of the selective-service law. I refer to the constitution and organization of the boards for the Federal judicial districts within each of the several States.

To district boards will be intrusted the solution of one of the most vital problems of the war. Two thing are to be accomplished—to raise armies; to maintain industries. As the war proceeds, more and more men will be required for the battle line, and yet there are certain industries that must be maintained to the end. Any considerable diminution of man power must interfere to some extent with industry. The diminution must be made and hence it is self-evident that the problem is not absolutely to prevent interference with industry, for that is impossible; it is to reduce interference to a minimum. A balance must be struck and maintained between the military and the industrial needs of the Nation and the necessary sacrifice must be distributed with scientific accuracy and in such a way as to accomplish both purposes of the Nation. The very statement of the problem demonstrates most forcibly that in making this economic balance it is the *interest of the Nation solely that must be subserved;* that the interest of individuals or associations of individuals can not be considered as such, and indeed, can only benefit from the action of district boards where the individual interest happens to coincide with the interest of the Nation.

Enough has been said to predicate a conclusion as to what the members of these boards ought to be and to leave evident without saying what they ought not to be.

First. They must be men possessing mentality, experience, and information that will enable them to solve the very difficult economical problem of striking a balance between military and industrial necessity.

Second. They must be men of such stability, patriotism, and integrity as will insure the interests of the Nation against the urging of private claim.

There is instantly suggested that to fill these requisites we must have representatives of the most important national industries. Since district boards also sit as boards of review of the action of local boards and must exercise a self-executing review over all such action and since action on claims of physical disability will be a considerable matter of review, there must be a physician on each of these boards. For obvious reasons there should be one lawyer.

The normal composition of these boards is five members. Where the number of cases for their consideration will be great, the membership must be increased proportionately by groups of five, each of such groups to comprise a division of the board composed of representatives of the same industries and professions as are to be found in the normal group.

This composition of the normal board should be as follows:

One member who is in close touch with the agricultural situation of the district.

One member who is in close touch with the industrial situation of the district.

One member who is in close touch with labor.

One physician.

One lawyer.

In districts where there are no considerable industries other than agriculture or where there is no considerable agriculture, a representative of general business may be named instead of a representative of industry or of agriculture, as the case may be.

The selective-service act lays upon the President the duty of creating and establishing these boards and appointing the members thereof. While the problem is one that arises from the necessity of the Nation, its resolution must affect each of the States very directly. The President has need, therefore, of your counsel and advice in this matter. He desires that you submit to him, as a field for his selection, a list of the names of men of your State who possess the requisite I have outlined and whom you can recommend for the high and solemn functions of these boards.

Upon the conditions thus stated and the information herein contained you will be able to meet the grave responsibility that is being tendered you. The proper selection of members of these boards is one of the most vital necessities of the national defense, since upon their motion equally depends the maintenance of the industries of the country and the selection of the armies by which these industries and the whole Nation are to be defended. The matter is, therefore, essentially a war measure of defense. In the steps you have already taken to organize your State for war, you have created a council of defense. No doubt this council will be of great service to you in arriving at your decision.

The President desires that you consider this as the bearing of the Nation's problem on the area and the people within your State. He will view your recommendations as your resolution of that problem and will give them the most earnest and thoughtful consideration. The necessity for an early receipt of your recommendation arises from the urgent demand of all circumstances that the organization of the country for the execution of the selective-service law shall be completed at the earliest practicable moment.

The adjustment to the selection of the administrative mechanism already erected for the registration was of subsidiary importance to the task that now confronted the office of the Provost Marshal General—the formulation of the regulations that should govern the selection.

Ten million men were to be affected, and the execution of the Selective-Service Law was certain to invade, with more or less direct effect, practically every American home. In the most sacred sentiment of our family life, the execution of the law was to have a very direct bearing, and in the more practical economical aspect a discriminating administration was of vital importance.

The immediate and emergent problem was to make the withdrawal in such a way as to wreak the least disturbance. The obvious way to accomplish this was so to frame the regulations that, from the whole 10,000,000 registrants rendered liable to military service, we should skim away the precise number on the first draft that could be spared with the least interference with our varied industries. Upon the slightest reflection, the proposition demonstrates itself that to accomplish this result an examination into the circumstances of each of the 10,000,000 registrants would be necessary. Under the conditions of the problem as they were then presented, this was obviously impossible. The responsibility was upon the office of the Provost Marshal General to produce men as rapidly as they could be accommodated and absorbed by the Army; and the information then furnished

by the War Department was to the effect that the Army would be prepared to receive a first call of over half a million men during the month of September, 1917. To inquire with discriminating deliberation into the cases of 10,000,000 registrants within that time was simply out of the question.

Reserving, therefore, the right to make other dispositions as soon as it could possibly be done, the problem was to evolve an expedient stop-gap which should produce the first contingent within the time allowed. A plan was therefore formulated which, while protecting the necessary individuals engaged in industry and agriculture, under regulations imposing upon no considerable enterprise a dangerous burden, would be stringent enough to evolve the necessary contingent by September 1. The first draft was for 687,000 men; and, after the most careful computation, it was estimated that about 3,000,000 cases could be examined under the system planned within the time at our disposal. The problem then was to gauge the regulations to these conditions, and to evolve a set of rules just stringent enough to select 687,000 men from among the 3,000,000 who stood earliest in the order of liability.

Even under such a resolution as this, the preparation of regulations which could be capable of administration by men, not necessarily skilled in legal formalism, was an intricate and difficult task. The formulation of these regulations along the lines just indicated was undertaken and accomplished with the utmost expedition possible. Such of them as governed the steps preliminary to the actual selection were promulgated early in June, by separate pamphlets, to the newly constituted selection boards, and the final approved volume was disseminated on the last day of that month.

On that date the process of selection was instituted throughout continental and contiguous United States.

THE DRAWING OF ORDER NUMBERS.

One of the most difficult tasks that always attends a selection from a mass of men whose obligation before the law are all equal was the determination of the order of liability to examination and selection. The problem is not new. History abounds with examples. Decimation, or the arbitrary selection of every tenth man, is a not infrequent method; but there is an atavistic appeal in the wager of hazard which springs perhaps from some lurking idea of divine intervention in the appeal to chance. The problem was solved during the Civil War period by local application of the jury-wheel system, but charges of manipulation and fraud were at that period plentiful. It was felt that a different method should be adopted in the instant case, and that, if one central lottery in Washington could be fairly arranged under circumstances admitting of no suggestion of favoritism, the effect would be beneficial.

The circumstances were readily adaptable to the idea. Each registration card deposited with each local board was numbered in a separate series for each board, and this afforded an opportunity for a selection from among many kinds of drawing. With an idea of preventing possible manipulation, it had been prescribed that the cards for each board should be numbered without regard to alphabetical arrangement of names of registrants. It was thought that this requirement would have resulted in so thorough a shuffling that a single drawing of the numbers from 1 to 1,000 would result in an order of recurrence of integers, in numbers of less than three figures, such that the numbers so drawn could be applied to the cards within the jurisdiction of any board in such a way as to give an absolutely fair sequence of liability.

Four separate plans for determining order of liability had been worked out in their uttermost detail, and, while it had been decided to adopt the single drawing of 1,000 numbers, three other plans were on file. The details of the proposed plan of drawing were nevertheless held secret, not because any fraudulent manipulation was possible, but to guard against even a suggestion of such a possibility.

On the eve of the national drawing, however, it was discovered that in one State (under instructions that easily admitted of the unintended construction placed upon them) numbers had been assigned to cards in absolute sequence in precincts and districts within the jurisdiction of each local board, with a possible result that a central drawing of 1,000 numbers would have effected a localization of the draft in single voting precincts to the exclusion of other precincts within the jurisdiction of the same local board. This required a change in the draft plan overnight.

Under the precautions that had been taken it was necessary only to advert to one of the other fully prepared plans, so that, without the slightest delay or disturbance, a drawing was held of numbers corresponding to the highest sequence of numbers within the jurisdiction of any local board, viz, 10,500 numbers. These numbers were stamped on slips of paper. To prevent confusion each slip of paper was inclosed in a black capsule, and the 10,000 capsules were placed indiscriminately in a large glass bowl and thoroughly mixed with a ladle. The numbers were then drawn out publicly, one at a time, by blindfolded men, specially selected from among students at the various universities. The order in which any number was drawn from the bowl was recorded by six tallymen, and determined the relative order of liability of the man whose card bore that number in the sequences in which numbers had previously been assigned to the registration cards within the jurisdiction of each local board.

The drawing took place on Friday, July 20, in the public hearings room of the Senate Office Building.

The first number, 258, was drawn by the Secretary of War. And it is interesting to note that one of the holders of that number was, before the end of the month—July—inducted into the military service of the United States and had reported for military duty at Washington Barracks.

As soon as the order of liability had been thus determined each of the 4,557 local boards began, most assiduously, the task of evolving their quotas of selected men under the hurriedly prepared selection rules and regulations.

V.

APPORTIONMENT OF QUOTAS AND ALLOCATION OF CREDITS.

Meantime the process of calculation and apportionment of quotas had been proceeding.

1. *Statutory rule.*—The selective-service act, after empowering the President to raise by draft certain military forces enumerated in the act, provides:

> SEC. 2. * * * Such draft * * * shall take place and be maintained under such regulations as the President may prescribe not inconsistent with the terms of this act. Quotas for the several States, Territories, and the District of Columbia, or subdivisions thereof, shall be determined in proportion to the population thereof, and credit shall be given to any State, Territory, district, or subdivision thereof, for the number of men who were in the military service of the United States as members of the National Guard on April first, nineteen hundred and seventeen, or who have since said date entered the military service of the United States from any such State, Territory, district, or subdivision, either as members of the Regular Army or the National Guard. * * *
>
> SEC. 4. * * * Notwithstanding * * * exemptions * * *, each State, Territory, and the District of Columbia shall be required to supply its quota in the proportion that its population bears to the total population of the United States.

The apportionment of quotas and credits was determined in accordaince with regulations governing the apportionment of quotas and credits prescribed by the President on July 5, 1917, by virtue of authority vested in him by the terms of the selective-service act.

2. *Calculation of national total to be raised.*—For the purpose of apportioning quotas to the States and Territories and the District of Columbia there was *added* to the total number of men 687,000, to be raised by the first draft under the selective-service act; the further number of 465,985 thus composed: (*a*) 164,292 men who were in the military service of the United States as members of the National Guard on April 1, 1917; (*b*) 183,719 men who entered the military service of the United States as members of the National Guard during the period from April 2 to June 30, 1917, both dates inclusive; and (*c*) 117,974 men who entered the military service of the United States as members of the Regular Army during the period from April 2 to June 30, 1917, both dates inclusive, making 1,152,985 in all.

This addition was necessary in order to secure the number to be raised as fixed in the President's call. If only the 687,000 had been treated as the gross quota, and the credits of 465,985 had then been deducted from this total, the number raised would have been only 221,015, and a further draft would then have been necessary for raising the 465,985 lacking. Hence this number—465,985—was first added to the 687,000 to give the gross quota; then, upon apportioning this gross quota among the jurisdictions, pursuant to the statute, and deducting the credits for each jurisdiction from its gross quota, the net quota of all jurisdictions thus obtained would, when added together, produce the number required to be raised, viz, 687,000.

3. *Allocations of credits.*—The credits above enumerated included enlisted men only. Class (*a*) included and was limited to all men who on April 1, 1917, were enlisted in National Guard organizations then recognized by the Militia Bureau of the War Department; and class (*b*) included and was limited to all men who during the period of April 2 to June 30, 1917, both dates inclusive, enlisted in National Guard organizations recognized by said bureau or who during that period became enlisted national guardsmen as members of new units recognized during the period by the bureau. Each of these classes included all enlisted men within the description, irrespective of whether they were actively in Federal service or only subject as national guardsmen to be drafted into such service.

It is to be noted that in apportioning quotas and credits no credit was given for enlistments in the naval service, in the Marine Corps, in the Federal Reserve Corps, or in the National Guard Reserves. This was due to the fact that the statutory provision for the allowance of credits was limited to credits based upon enlisted membership in the National Guard on April 1 and upon enlistments in the National Guard and the Regular Army after April 1.

The aggregate number of men of classes (*a*) and (*b*) from each State and Territory and the District of Columbia was determined by the Chief of the Militia Bureau of the War Department; and the aggregate number of men of class (*c*) from each State and Territory and the District of Columbia was determined by the Provost Marshal General from information supplied by The Adjutant General of the Army. The sum of these items for any jurisdiction was its gross credit.

The average percentage of credit for such enlistments for the United States was 40.42 per cent on the national gross quota to be raised under the President's call. The percentage of enlistment credits to gross quota for the several States is shown in Appendix Table A. The State showing the highest percentage was Oregon; the State showing the lowest percentage was Oklahoma; of the Territories Hawaii figured as the highest and Porto Rico as the lowest.

RATIO OF ENLISTMENT CREDITS TO GROSS QUOTA.

STATES ABOVE NATIONAL AVERAGE

1	HAWAII	182.97

COMMUNITIES HAVING NO NET QUOTA.

The following Banner Communities filled their entire gross quota by voluntary enlistments, and therefore did not need to contribute any men under the Selective Service Act, as shown in Appendix Table 45:

CALIFORNIA: Alpine County, Tehama County.
COLORADO: Summit County.
FLORIDA: Franklin County, Osceola County.
IDAHO: Boise, Bonner County, Canyon County, Idaho County, Payette County, Washington County.
ILLINOIS: Danville.
INDIANA: White County.
IOWA: Cedar Rapids, Council Bluffs, Hamilton County, Page County, Story County.
KANSAS: Allen County, Chase County, Douglas County, Ford County, Kearny County, Montgomery County, Ottawa, Topeka, Wichita, Woodson County, Wyandotte County.
KENTUCKY: Breathitt County, Lee County.
MAINE: Cumberland; Kennebec; Oxford County; Portland.
MISSISSIPPI: Forrest County, George County, Greene County, Jackson County, Jackson (city), Pearl River County, Yalobusha County.
MISSOURI: Holt County, Howell County, Laclede County.
NEBRASKA: Hamilton County.
NEW MEXICO: Eddy County, Luna County.
NEW YORK: Schenectady County.
NORTH CAROLINA: New Hanover County.
NORTH DAKOTA: Rolette County.
OHIO: Adams County, Gallia County, Jackson County, Union County, Warren County, Zanesville (city).
OREGON: Benton County, Coos County, Crook County, Douglas County, Hood River County, Jackson County, Josephine County, Lane County, Linn County, Marion County, Multnomah County, Polk County, Portland, Tillamook County, Yamhill County.
PENNSYLVANIA: Harrisburg, Lancaster.
RHODE ISLAND: Barrington.
SOUTH CAROLINA: Union County.
SOUTH DAKOTA: Buffalo County, Clark County, Coddington County, Davison County, Hughes County, Jackson County, Marshall County, Miner County, Minnehaha County, Moody County, Stanley County, Todd County.
TENNESSEE: Carter County, Cumberland County, McMinn County.
TEXAS: Austin, Donley County, Foard County, Karnes County, Kendall County, Kerr County, Potter County, Uvalde County, Waco, Willacy County.
VERMONT: Windham County.
VIRGINIA: Lynchburg.
WEST VIRGINIA: Huntington, Preston County, Wood County.
WISCONSIN: Douglas County, Forest County, Green Bay, Lincoln County, Oneida County, Oshkosh, Price County, Washburn County.
WYOMING: Big Horn County, Crook County, Fremont County, Hot Springs County, Park County, Platte County, Uinta County.

32.29.74

RATIO OF ENLISTMENT CREDITS TO GROSS QUOTA, BY STATES.

32096°—18——2

ENLISTMENTS CHART B.

RATIO OF ACTUAL ENLISTMENT TO GROSS QUOTA.

[For States printed in groups, reading left to right gives the downward sequence.]

But it is to be remembered that in several respects the percentage of enlistment credits, figured according to the statutory mandate, ignores a number of important elements which should be taken into consideration in estimating at their true level the respective zeal of the several communities in making their contributions of men to the national cause without waiting the operation of the selective service law. In the first place, the conditions affecting the credits to be given for National Guard enlistments were abnormal in some localities; for example, in Hawaii abnormal conditions increased the credits and in Porto Rico abnormal conditions diminished the credits; moreover, in several of the States numerous analogous considerations, too detailed to permit of elaboration in this place, affected the credits given. Furthermore, the statutory credits did not include enlistments in any branch of the Naval Service, nor enlistments in any branch of the Army since June 30, nor enlistments at any time in the Marine Corps, the Officers' Reserve Corps, or the National Guard Reserves. In order, therefore, to set forth with more approximate accuracy, the relative *actual* contributions, in men, of the several States, Appendix Table B shows the percentages of such actual contributions, reckoned on the same original gross quota. From this Table B it appears that the State having the highest percentage of actual contributions was Oregon; the lowest was South Carolina.

4. *Apportionment of State quota.*—The number of men required of each State or Territory or the District of Columbia as its share, proportionate to population, of the national total, has been known as its *gross quota;* and the number of men required of each such State, Territory, or District, after deducting the credits for men in classes (*a*), (*b*), and (*c*), has been known as its *net quota.*

The Federal apportionment was made on July 12, 1917. This date, or one substantially neither earlier nor later was necessarily taken. No earlier date was needful or feasible, because the local boards were not fully organized and equipped for work, throughout the country, until the end of June. No later date was possible, because the boards could not proceed to raise the required men until they were informed how many men were to be raised by each, and they could not be informed until the net quota had been definitely and finally fixed by subtracting credits from gross quota. Hence, the date of June 30 was taken as the last day on which to allow (on this draft) the credits for enlistments. After a brief time needed for receiving and tabulating the reports of enlistments, the calculation was made. Thus it was that the earliest date on which the apportionment could be made was July 12, and no change of the State quota was needful or feasible after that date. A further time, however, was required for the calculation, by the governors, of the apportionment of the State and Territorial quotas among the several counties and cities. When this process had been completed, and not feasibly until then, the arrangements were made for the drawing of the order numbers at Washington.

The total number of men to be apportioned was 1,152,985. Gross quotas were apportioned to the several States and Territories and the District of Columbia in proportion to the population thereof on July 1, 1917, as determined by the Bureau of the Census of the Department of Commerce. To determine the net quota there was first deducted from the gross quota of each State, Territory, or District the gross credit due such State, Territory, or District on account of the enlisted membership in the National Guard and the Regular Army. The difference thus obtained in the case of each State, Territory, or District would then have been the net quota thereof had it not been for the fact that in one jurisdiction, the Territory of Hawaii, the gross credit exceeded the gross quota. This fact rendered an adjustment necessary. That adjustment was made by distributing to the other Territories, the States, and the District of Columbia, in proportion to population, the excess of gross credit over gross quota in the Territory of Hawaii. The resulting difference in each case constituted the net quota required of the State, Territory, or District.

5. *Apportionment of local quotas.*—Pursuant to the provisions of the regulations governing the apportionment of quotas and credits (in prescribing which the President had invoked the authority of the statute to utilize the services of any or all officers or agents of the United States and of the several States and Territories and the District of Columbia in the execution of the selective-service act) the governors of the several States and Territories and the Commissioners of the District of Columbia, acting for and by direction of the President, apportioned the draft within their respective jurisdictions. The governor of each State and Territory first allocated to cities of 30,000 population or over, and to counties exclusive of such cities, the credit due each such county and city on account of enlisted membership in the National Guard, and the Provost Marshal General furnished the governor of each State and Territory a statement, based upon information supplied by The Adjutant General of the Army, of the credit due each such city and county on account of enlistments in the Regular Army. Each governor then apportioned the gross quota, less any adjustment determined by the Federal apportionment, for the State or Territory to cities of 30,000 population or over, and to counties exclusive of such cities, in proportion to population, as determined by the governor. He then determined the net quota for each city or county by deducting from the gross quota

32.29.15

thereof the gross credit to which it was entitled. An adjustment, similar to the one mentioned above as having been made by the Federal authorities, was made for the several counties and cities in the case of any State or Territory in which the gross credit of one or more cities of 30,000 population or over, or one or more counties exclusive of such cities, exceeded the gross quota thereof.[1]

The new city and county quota being thus reached, the governor of each State and Territory and the Commissioners of the District of Columbia, as a final step in the apportionment, where a county or city had more than one local board apportioned among the several local board jurisdictions in proportion to population as determined by the governor or the commissioners, the net quota of such county or city.

6. *Estimates of population within the States.*—A tentative draft of the regulations governing the apportionment of quotas and credits had been sent to all governors on June 15 and their study and suggestion invited. Soon thereafter a number of governors made inquiry as to whether estimates of population of counties and cities might not be furnished by the Census Bureau to aid them in determining population for apportionment purposes. Pursuant to these suggestions the Census Bureau was requested to furnish the estimates desired, which were published in Form 18, P. M. G. O., as of date July 1, 1917. The governors were, however, not bound by these estimates in determining the population, for apportionment purposes, of the respective counties, cities, and local board jurisdictions within their respective States and Territories, but were at liberty to make use of the estimates and any other information regarded by them as reliable in arriving at the necessary determination respecting population.

7. *No gross quota below counties and cities.*—The ultimate units considered in apportioning gross quotas and in allocating credits where cities of 30,000 population or over and counties exclusive of such cities; but the ultimate units considered in apportioning net quotas were local board jurisdictions. This plan of apportioning quotas and allocating credits was adopted after very careful consideration of the law and the administrative phases of the problem. Very few suggestions looking to a modification of the plan, which was embodied in the tentative regulations referred to in the preceding paragraph, were received from governors in response to the invitation addressed to them. Careful examination of the very limited number of suggestions which contemplated making a unit inferior to the city or county the ultimate unit for the allocation of credits led to the conclusion that any such plan involved administrative difficulties and delays and probable inequities which forbade its adoption.

The fact that the net quota could not possibly be calculated till early in July led to certain unavoidable consequences affecting a large number of cities and counties. As the registration had to be the first stage in the administration of the law, and the local board areas for registration had to be defined according to population (30,000 or more) under the statutory requirements, these areas were defined according to the best estimate of population then available. Otherwise the organization could not have proceeded. In July, however, when the apportionment of quota was made, more accurate estimates of population, revised in the light of the registration figures of June 5, became available. In the case of some cities and counties their population was found to be greater than before estimated; in others, less. If, by the new estimates, a city formerly estimated at less was now found to have more than 30,000 population, it now received an independent local board (pursuant to sec. 4 of the act), and its net quota was apportioned on such basis of population. Nevertheless, inasmuch as all enlistments proceeding during April, May, and June had been reckoned and credited on the basis of the original subdivision, such enlistment credits had to be credited in mass to the county at large of which such city had figured as a part in the original organization. Thus, though its enlistments might have been relatively large, it received no independent credits for them apart from its fractional share of the gross county credits, while its net quota debit was reckoned on the basis of its own population as an independent unit.

Through not always perceiving the total impossibility of avoiding this occasional result, a few communities experienced dissatisfaction. Nevertheless, the patriotic spirit which had supplied such an overshare of enlistments must have sufficed to content them with the glorious distinction of surpassing other communities in the sacrifice made to a noble and national cause. And, after all is said and done, the number and kind of sacrifices and contributions voluntarily made in other ways were so enormous throughout the country that no community, in the last analysis, would be willing to have its patriotism measured solely by the number of enlistments.

8. *Aliens.*—The provisions of the selective-service act requiring the apportionment of quotas in proportion to population are parallel to provisions relating to the same subject in the draft legislation of 1863. As soon as the estimates of population made by the Census Bureau had been received, it began to be apparent that the rule of the selective-service act, which based the apportionment of quotas on total population and yet draw the draft quotas from citizens and

[1] The figures of gross and net quota for all communities are printed as Appendix Table 45.

declarants only, would operate quite differently upon communities having largely differing percentages of aliens in their population. In certain local board jurisdictions, in which the element of alien population exceeded 30 per cent of the total, the burden placed upon the citizen population was very great.

The matter received the attention of the military committees of Congress, and an effort was made to find a more equitable rule for the apportionment of quotas. Two propositions were considered: One, to base quotas upon the registration; and another to base quotas upon the citizen population. After somewhat extended consideration both were rejected. The first was rejected for the reason that in so far as the distribution of the burden of the draft under that rule would differ from the distribution according to the population it would serve to require communities in which the registration had been most complete to furnish the largest proportion of men for the Army and to permit communities in which for any reason the registration had been incomplete to profit individually and locally by sending into the service a smaller proportion of men. The second was rejected for the reason that the application of its basic principle would serve to make the economic disturbances due to the withdrawal from industrial life of men of military age increase in proportion to the citizen population of the community.

For example, if in two communities of equal population the citizen population of one were 100 per cent of the whole and in the other only 50 per cent, the remainder being composed of aliens, the two communities, though equal in population, in resources, in industries, and in need of the labor, the efforts, and the enterprise of men of military age, would fall under a very unequal tax upon their man power. The all-citizen community would be required to furnish twice as many men as the half-citizen, half-alien community. The unfairness and the undesirability from an economic point of view of such a system required no demonstration.

The result of the consideration and discussion of the apportionment of quotas in the earlier stages of the execution of the selective-service act was to leave the legislation in its original form, and to lead to the promulgation of regulations which, while based upon broad principles of selection, were designed to synchronize the furnishing of men with the military needs of the country and the readiness of the War Department to receive recruits. In the meantime the entire subject has been receiving careful consideration and close study, and this office does not despair of being able, in the light of the classification now under way and in the light of treaties now being negotiated, to suggest a solution in the form of a joint resolution which, if enacted, would serve not only to distribute the next draft equitably but also to rectify earlier inequities.

VI.

THE SELECTION.

Quotas having been apportioned, regulations and instructions required each local board to call before the board for physical examination, in the order of their liability, a sufficient number of registrants to procure about half the first quota of the board. Two hundred per cent of the quota was computed to be the number necessary to this end.

Under ideal conditions and with a perfectly trained and instructed personnel, it would have been advisable to make the selection a matter in which the Government should be the sole party in interest. Under this plan, which was strongly urged by men whose opinion was entitled to respect, there would have been no such thing as an "exemption claim." The boards would have called each registrant in turn and forthwith entered an inquisitional procedure to determine whether the registrant should be called for service or continued at home. This was, in the opinion of this office, impracticable. While the principle was deduced that no exemption authorized in the selective-service law was intended for the direct benefit of an individual and that every such exemption was for the sole benefit of the Government, the administrative problem required a short, simple, and effective mechanism for bringing pertinent circumstances to the attention of the examiners; and uniformity of decision was possible only by a crystallized set of rules under which the boards could act.

It was therefore provided that each registrant must present a claim for exemption, under the burden of substantiation of its merits. Seven days after notice to the registrant that he had been called for physical examination was prescribed as the time within which the claim must be presented, and in the absence of claim the registrant was deemed to have waived his right to claim exemption, subject to the power of the board to grant an extension of time. The procedure was necessarily swift, but every reasonable opportunity was given for the filing of claims. Every case presented to the local board was required to be certified to the district board either as exempted or held for service by the local board. Within five days after a case had been certified to the district board the registrant could make his original claim on the ground of engagement in industry or agriculture before the district board, or he could, within 10 days after such certification, appeal from decision of the local board adverse to his claim before the latter.

By this method the number of cases coming before the district board was reduced by the number of cases in which a claim for exemption on the ground of engagement in industry or agriculture was rendered unnecessary because an exemption had already been granted on dependency or some other ground within the jurisdiction of the local board.

3229 76

Coincidentally with the erection of the selective-service system, the War Department was moving with great expedition to erect the 16 National Army cantonments which were to house the first contingent and to provide the necessary supplies of clothing and equipment. On August 8 the War Department directed the Provost Marshal General to furnish 30 per cent of the first draft on September 1, 30 per cent on September 15, 30 per cent on September 30, and 15 per cent as soon after September 30 as practicable.

The governors of all States were informed of this requirement, and on August 13 called upon for specific reports as to whether they would be able to fill their quotas on this very expeditious schedule.

Administrative history offers few instances of such unselfish and patriotic devotion or of such efficiency, in a newly erected and untried system, as was displayed by members of local and district boards in the month of August. Inspired by the appeal that had been made to them, based on the apparent instant need of the Army, the members of these boards addressed themselves to the task before them with absolute self-abnegation. Working from early morning until the late hours of the night, and in very large measure without claiming any compensation for their labors, the 4,557 local boards had, between July 20 and August 25, heard and disposed of almost 1,000,000 cases, or an average of 70 cases by each board each day. And they had produced the required result. Before September 1 reports had been received in this office that the States were ready to furnish their quotas according to the schedule originally prescribed by the War Department.

Unexpected delays in the erection of camps and the accumulation of supplies caused such deferments of the original call that at the date of this report only 76 per cent of the first quota has been called to camp. This delay was unfortunate in its effect upon men who, having been selected for military service and notified that they might be called for instant duty, under the schedule as above described, had made arrangements to sever their civil connection at about the dates indicated for their final call. But this effect can not be imputed to the selective-service system.

The most difficult problem of selection for the local boards was raised by the question of dependency, and especially in its relation to married men of draftable age. There had been some very significant debate in the Senate, on consideration of the bill, as to whether married men should be exempted from the first draft as such, or whether the determinative principle should be dependency, as it had been agreed that it should be in all other relationships. An amendment exempting married men as such was rejected by the Senate on the direct issue that there was no equity in excusing a married man and necessarily sending a single man to the battle front in his place when no condition of dependency of the wife existed in fact. There is much to be said on both sides of this question, but it was for this office to execute the law and not to debate it.

It may not be amiss to remark, however, that the net result of the provision was to extract from the field of persons who had no claim of exemption other than the fact that they were married, 163,115. And of the 1,294,830 persons discharged on all possible grounds of exemption, 748,762, or 58 per cent, were discharged on the ground of dependency accruing from marriage. There were 1,500,056 married persons called, and only 163,115, or less than 11 per cent, chosen.

The question of actual dependency was left to the boards to determine. It can hardly be said that local boards composed of the neighbors of men to be taken for military service were not the best conceivable tribunals to weigh these questions of dependency, or that they could not be relied upon both to protect the Government from the insistence of selfish and thoughtless claimants on the one hand, and to treat each case of substantial merit with intelligent and sympathetic consideration on the other. In by far the majority of boards this result was attained, but in a very few instances, such an uncompromising view of the regulations and the rulings issued in aid thereof was taken that some married men were selected, leaving wives and even children in distress.

It must be recognized that there were very great difficulties in deciding individual cases. A soldier's pay is $30 a month. The provisions of the war risk insurance law make it easily possible for an American soldier to allot for his family during his absence a sum substantially in excess of this monthly pay. In many cases, especially among tenant farmers in certain Southern States and among the poorer classes in large cities this is a greater contribution than the registrant normally makes to the support of his family; and considering the insurance feature of the law, it is a much more certain and infallible income than could be obtained from any other source. In such a case it was impossible to arrive at a fair conclusion that there was a dependency on the labor of the registrant for support.

Very early in the execution of the law the specific question was put to this office: "Where the parents of the registrant, or of his wife, or both, are ready, able, and willing to undertake the support of the wife during the absence of the registrant, can the wife be considered as mainly dependent on the labor of the registrant for support?" It is an extremely dangerous thing to attempt to guide the discretion of so large a collection of tribunals as the Selective-Service System by abstract rulings on hypothetical questions. At the time this question was propounded reports from the various governors were rather alarming, since it was

stated that over 70 per cent of registrants were claiming exemption on the ground of dependency. A considerable class of cases had been brought to the attention of this office, in which men who had never really supported their wives, but who were, in fact, dependent on their own parents or the parents of their wives, were claiming exemption on the ground that their wives were "mainly dependent on their daily labor for support." Requests for rulings on these two classes of cases became so insistent that it was apparent that without some expression of a general rule, decisions by the boards in the different parts of the country would present an uniformity that would seriously affect the even execution of the law.

On August 8, therefore, a ruling was made that in that class of cases where the registrant, as a matter of fact, was not dependent upon himself, and the parents of the registrant or of his wife were ready, able, and willing to undertake the support of the wife during the absence of the husband, the boards would be justified in finding that such a registrant had not a good claim for exemption on the ground of the dependency of his wife.

This ruling did not work well. The few boards that had been prone to hold married men for service in the absence of the most unequivocal circumstances of dependency took the ruling as authority to look into the material wealth of the parents of the husband or of the wife. Regardless of readiness and willingness, regardless of whether or not the wife had in the past been actually dependent on the labor of the husband for support, these boards held some married men for service wherever it appeared to them that, rather than let the wife suffer, the parents would undertake her support during the absence of the husband.

As soon as this condition developed, attention of the boards was called to the error on August 27, and the district boards were cautioned to scan cases before them on appeal to correct such errors. On September 27 local boards were instructed to reopen and reconsider cases in which such erroneous action had been taken, even though the registrant might have been inducted into military service in the meantime. A period of 47 days was allowed for the correction of these errors in the cases of men inducted into military service, and within that period most of such cases were, and all of them should have been, corrected.

Notwithstanding the conditions with which it had been guarded, this authority was pressed upon many boards to obtain a rehearing in cases in which no error had been committed and in which there was no merit. The reopening of unmeritorious cases reached a magnitude that began to embarrass the orderly raising and training of the National Army. On November 13, therefore, the authority to reopen cases of registrants who had already been inducted into the military service and sent to a mobilization camp was withdrawn. Ample time had elapsed to correct all cases decided before the errors of the boards had been discovered and rectified, and there was no reason to reopen cases decided after that time. It was still provided, however, that, in cases alleged to be of special merit or hardship, the commanding officer of the mobilization camp to which the registrant had been sent for service should consider such circumstances, and, if he found the case to be of merit, that he should discharge the induct from the Army under the plenary authority of the Secretary of War to grant such discharges to any enlisted man. As a matter of law, after the boards had passed upon the merits of a case and inducted the registrant into military service the boards were without further authority in the case, and the reopening by the boards of cases of men already so inducted and their findings thereon had been advisory merely, since such action had no effect, ex proprio vigore, to effect a discharge from military service. The actual discharge had been consummated in every case by the commanding officer.

The new procedure has been found just and effective.

37-29-11

RESULTS OF THE SELECTION.

The detailed statistics of the selection are reserved for Part II of this report, but the narrative report requires some recapitulation of them.

Of the 9,586,508 registrants enrolled on June 5, 3,082,949 have been called and examined by the boards, and of this latter figure 1,057,363 were certified for military service. The first call was for 687,000 men only, but, answering an insistent demand of registrants to have their cases resolved and as a measure of precaution against an immediate future draft, many boards continued to examine men thus in excess of their quotas.

Under the regulations men called to report to their local boards for examination who failed to appear and make claims for exemption were regarded as having waived the right to make such claims and were, after due notice, inducted into military service and thereafter treated as delinquent from such service. After registration many young registrants who were eager for immediate service abroad left the country to enlist in Canadian, British, or French armies or to take service with the Red Cross and other Ambulance units abroad, and in their haste and enthusiasm some of them, although warned of their obligations under the law and required to make a statement that they would answer when called, failed to make arrangements to have their whereabouts made known to their local boards, with a result that they were inducted into the military service as delinquents. Many men enlisted in the Army and the Navy without notifying their local boards. Many men in the floating population of the United States registered leaving an insufficient address, and many foreigners registered names unfamiliar to

English spelling, with the result that mailed notices did not reach them. Notice was posted and published in each case of call, but for one reason or another 252,294, or 8.2 per cent of all men called, failed to appear. This figure is included among those certified for military service in excess of the national quota, leaving a total excess of 118,069 on November 12, 1917.

A physical examination preceded the exemption examination in respect of each man called, and if the registrant was found to be disqualified physically he was discharged forthwith, and there was no necessity to proceed further. Of the total number called (3,082,949) 730,756, or 23.7 per cent, were physically rejected. Of the total number actually examined by the boards (2,510,706) the 730,756 represents 29.11 per cent of the men physically examined by local boards and later sent to camp. Of this number 22,989, or 5.8 per cent, were rejected on physical reexamination at camp. Of the total number called (3,082,949) 1,560,570, or 50.62 per cent, made claims of exemption. Of the claims made, 1,215,049, or 39 per cent of persons called, or 77.86 per cent of claims made, were granted. Of 1,419,678 claims made to local boards, 1,161,206 were granted; that is, 81.79 per cent of claims made before local boards were granted. One hundred and forty thousand eight hundred and ninety-two claims were made to district boards, and 53,843, or 38.21 per cent of claims made, were granted. District boards discharged only 1.74 per cent of the total number called.

Of the total claims granted (1,161,206), 859,150 or 73.99 per cent of all claims granted were on the ground of dependency, 228,452 or 19.67 per cent were on the ground of alienage, 67,716 or 5.83 per cent were on the ground of vocation, 3,887 or 0.34 per cent on the ground of religious belief, and 2,001 or 0.17 per cent on the ground of moral unfitness.

These figures, with the deductions that are to be made from them, are analytically considered in Part II of this report. At this place it is sufficient to remark that the statistical projections made from the registration for the purpose of formulating the preliminary set of regulations have been almost magically justified by the results of the first selection. At the time of the formulation of those regulations, the very grave industrial and agricultural problem before the Nation was recognized in this office; but, as shall be developed later in this report, the theory accepted here was that the responsibility for the determination of the question whether this Nation was to contribute militarily, industrially, or both, to the allied aims in this cosmic struggle, had been decided before this office was created; that the decision was for military cooperation; that this decision imposed upon this office the necessity of producing the first draft of men synchronously with the military preparation to receive them; and, therefore, that the paramount military necessity was to be adjusted to the agricultural and industrial necessity with the least possible disarrangement of the latter, but with the absolute military necessity always in the foreground.

With this thought in mind the first regulations were promulgated. No apology is needed for them. It is believed that they produced a result with such accuracy in respect of the plan that no substantial criticism can be made of them. Formally, it is frankly admitted that they were full of faults. In the haste in which they were prepared, it was necessary to adhere to the most primitive procedure. A different form was prescribed for each permitted exemption claim, with an interesting result that will be found reflected with absolute faithfulness in the early development of not only the common, but the Roman Law. It must be of the keenest interest to the lawyer and to the legal historian to note this inevitable reversion to primitive type, to the formalism of the early common law of writs in the early stage of any legal or quasi-legal development and as a reflection of the evolution of every legal system under the sun.

Admittedly, also, and for the reasons hereinbefore stated, these early regulations were not addressed to the complete solution of what must now be recognized as the high functions of this office—the striking of the ultimate balance between the industrial (including the agricultural) needs of the Nation and its military needs. With a full realization of the ultimate problem, the first regulations were nevertheless intended to serve solely as an expedient which should produce the military result required, with far greater expedition (as it afterwards proved) than was demanded, but in a way such as would never permit this office to fall behind the supply departments in the military preparation of the Nation, and at the same time would protect other national activities against indiscriminate drafts on labor supply. That they have been effective in their result and to this end can never be questioned.

EVASION OF THE DRAFT.

During the interim between the enactment of the selective-service law and registration day the Department of Justice and local peace officers throughout the Nation, especially the police departments of the larger cities, feeling somewhat apprehensive of the spirit in which this novel and untried method of raising our armies would be accepted, exercised the greatest care in providing for ample cooperation with the selective-draft officials for the speedy and effective registration of eligibles, which was, in fact, the first step in the mobilization of the National Army. During the fortnight preceding registration day an occasional threat of resistance was reported, but on June 5 nearly 10,000,000 males of the designated ages were successfully registered. So willing were the registrants to demonstrate their approval of the new order

and to support the Government in the emergency that throughout the 62 Federal district jurisdictions, practically the entire United States, up to December 1 we find a total of only 5,870 arrests made or reported by the Department of Justice for failure to register.

The authorities early assumed an attitude of leniency toward all those who, after arrest, exhibited a willingness to register, and extended the locus penitentia as far as possible, believing that the purpose of the law was to secure a full registration rather than full jails. Consequently, 2,663 of those apprehended were released after having registered and prosecutions begun against 2,095, of which 1,645 cases are still pending. It is noteworthy that of those released or prosecuted 3,236 have actually been registered, and in the final analysis but 0.00026 of males between 21 and 30, inclusive, have failed or neglected to register.

There were some cases of persons aiding those subject to registration to evade or to attempt to evade the law, and on charges of this nature 180 arrests were made, of which 34 were convicted and heavy sentences usually imposed; 21 cases resulted in acquittals. There are still pending 98 cases of this kind.

After the registration came the call for the physical examination of registrants for military service in the order of their liability. To the Department of Justice and local police officials fell the duty of locating the whereabouts and apprehending those civilians who had not responded to this summons. The Department of Justice, up to December 1, had reported to it 14,212 registrants who had failed to appear for physical examination at the various local boards throughout the United States. Of this number 149 were arrested, and 813 were transferred to the military authorities to be dealt with under the rules established for cases of this kind. The final data on this subject (see the further comments in Part II) will undoubtedly show that the number of those who willfully refrained from reporting is comparatively insignificant.

Of the 156 district and 4,557 local boards organized and established throughout the country for the execution of the selective-service law, the Department of Justice notes few bona fide complaints and reports a negligible number of prosecutions against members thereof.

Of individuals indulging in antidraft propaganda throughout the country, 343 prosecutions are reported, with heavy penalties imposed in practically all cases where convictions resulted, there being 105 of these cases now pending.

In a few Federal districts efforts have been made to bring before the courts for review on writs of mandamus or habeas corpus, the action of the local and district boards in holding registrants to service. These cases have usually involved claims for exemption from the operation of the Selective Service Law by reason of alienage, and attempts were made to have certain adjudications of selective-draft officials repudiated by court order. The trend of decisions in these cases, however, has been to support the findings of the local and district boards in instances where full and fair hearings have been afforded to the registrants, it being generally held that the jurisdiction of the board is the proper one for the determination of these questions, and that the court will not interfere where a registrant has been given an opportunity to be heard. All courts have generally been of the opinion that ample time for the presentation of claims for discharge or exemption was provided by the Regulations, and that a claimant must establish his case within the time prescribed.

VII.

MOBILIZATION.

The Provost Marshal General, as the head of the selective-service system, was charged by the President's regulations with the general duty of entraining men selected by their boards and of delivering them at the mobilization camps or other points designated by the Secretary of War.

Under the President's regulations a registrant is inducted into the military service from the day and hour specified in the notice for him to report to his local board for transportation to a mobilization camp or military post. Though the registrant is in the military service from and after the arrival of the time so specified, it is a function of the selective-service system to arrange for his subsistence and transportation to the destination to which he is ordered. By a simple, and as practice has proved, a very workable plan, the local boards marshal and check the several contingents of their respective quotas, issue to them meal and transportation requests, select a competent leader of the party, and superintend the entrainment.

It should be clearly understood that the clothing, housing, training, transfer, and discharge of selected men after induction into the military service are matters outside the jurisdiction of the Selective-Service System and of the Provost Marshal General. Similarly, the number of selected men called for, whether in all, or at any particular time, and the dates and places of delivery, are questions decided by the War Department proper. When the decision is made, The Adjutant General of the Army transmits the order of the Secretary of War to the Provost Marshal General, whose duty it is to see that the order is carried out.

Prior to the mobilization the War Department had impressed upon the Provost Marshal General the urgent necessity of his being in readiness to furnish, beginning September 1, large numbers of drafted men. It was intimated that the first of such men would be called for on September 1, and that there-

after large increments of such men would be called for at intervals of about two weeks each; so that by about October 15 the entire 687,000 men called for in the draft of July 12, 1917, would be in training.

Accordingly, the Provost Marshal General urged the States to expedite the selection of men. The States and the various local and district boards performed their duties promptly and efficiently. At the stated time they reported that they were ready to furnish men in such numbers as it had been intimated that they would be called upon to send to camp. Arrangements were made with the American Railway Association to cooperate with the Government by preparing schedules for entrainment and by furnishing a representative at each State headquarters to assist and advise the local authorities. The railway association requested that, to enable them to arrange schedules, they be given two weeks' warning of any contemplated movement of troops, together with information as to the number of men to be moved.

This report would be incomplete and inconsiderate if this opportunity passed without some mention of the work of the American Railway Association in mobilizing National Army quotas. No more difficult transportation problem could be conceived. Small groups were to be assembled at every county seat in the United States, entrained and transported in converging contingents at 16 separate destinations, sometimes a thousand miles from their points of origin. The smoothness and dispatch with which this problem was solved was nothing short of marvelous. Whatever of uncertainty and lack of coordination may yet remain in the adjustment of our peace-time facilities to the uses of war, it must be said that the railroads' handling of selected men could not have been bettered had it resulted from a military experience of a decade.

1. *First call.*—On August 8, 1917, The Adjutant General of the Army directed that the National Army be called to the colors as follows:

30 per cent to be delivered commencing September 1.
30 per cent to be delivered commencing September 15.
30 per cent to be delivered commencing September 30.
The remainder as soon thereafter as practicable.

This information was communicated to the States on August 13, 1917.

On the same date, August 13, The Adjutant General of the Army, referring to his letter of August 8, 1917, wrote the Provost Marshal General to the effect that—

The Secretary of War, having in mind the fact that Saturday, Sunday, and Labor Day are three of the first five days in September, directs that the calls be made as follows:

First call September 5 (instead of September 1).
Second call September 19 (instead of September 15).
Third call October 3 (instead of September 30).
The remainder as soon thereafter as practicable.

Owing to the fact that during the early days of September the railroads would be transporting large numbers of troops of the National Guard and of the Regular Army, The Adjutant General, "in order to coordinate movements of National Guard and National Army and movements to ports of embarkation," modified, on August 25, his previous instructions and directed that selected men be moved as follows:

5 per cent beginning September 5 (at the rate of 1 per cent each day).
40 per cent beginning September 19.
40 per cent beginning October 3.
15 per cent beginning October 17.

On the same date The Adjutant General directed, by letter, that the first 5 per cent should include white men only. These instructions were communicated to governors on August 25, 1917.

However, it appeared that at Camp Meade the water-supply system would not be completed by September 5, and at Camp Upton the construction of the cantonment would not, on that date, be sufficiently advanced. The calling of the first 5 per cent of men to Camp Meade was, therefore, delayed until September 19 and at Camp Upton until September 10.

2. *Second call.*—The second call for 40 per cent commencing on September 19 was moved in accordance with instructions of August 25, except at Camps Upton, Meade, and Dix. The movement of 40 per cent of selected men to Camp Upton was made in two increments of 20 per cent each on September 19 and September 28. This was to avoid the congestion of traffic, which would have ensued had such a large number of men as 40 per cent of the quota been moved from the small area contributory to Camp Upton. The District of Columbia sent 45 per cent of its quota to Camp Meade on September 26. At Camp Dix the only variation from schedule was that the New York quota (40 per cent) began to move on September 26 instead of on September 19.

This call was ordered to be composed exclusively of white men.

3. *Third call.*—On September 22 The Adjutant General of the Army transmitted to the Provost Marshal General a memorandum dated September 21, 1917, signed by the Chief of Staff, directing that selected white men be mobilized, as follows:

40 per cent of quotas to Camps Devens, Funston, and Lewis.
30 per cent of quotas to Camp Sherman.
25 per cent of quotas to Camp Upton and, from Oklahoma, to Camp Travis.
20 per cent of quotas to Camps Taylor, Grant, Travis (from Texas), and from Pennsylvania and West Virginia to Camp Lee.
5 per cent of quotas to Camp Meade.
"As many white men as are yet certified for military service" were ordered mobilized at Camps Gordon, Jackson, and Pike, and from Virginia at Camp Lee. This white call totaled about 117,530 men.

Colored selected men were ordered mobilized at the same time, as follows:

At Camp Pike, 12 per cent of Louisiana's quota and 16 per cent of Mississippi's quota.

At Camp Gordon, 17 per cent of Georgia's quota.

At Camp Jackson, 26 per cent of South Carolina's quota.

This colored call totaled about 9,270 men.

Total of entire third call about 126,800 men.

4. *Fourth call.*—On October 13 The Adjutant General of the Army informed the Provost Marshal General that the Secretary of War directed colored men to be mobilized on October 27, as follows:

Camps Upton, Meade, Lee, Sherman, Custer, Grant, Funston, and Lewis, all of certified colored quotas; in addition 7 per cent of Tennessee's quota (all colored) were ordered mobilized at Camp Meade, and all of Oklahoma's colored quota were ordered mobilized at Camp Sherman.

Camp Dodge, 25 per cent of Alabama's quota (all colored) and 1 per cent of its own quota (all colored).

Camp Travis, 12 per cent of Texas's quota (all colored).

Camp Jackson, 10 per cent of South Carolina's quota (all colored).

Camp Pike, 10 per cent of Arkansas and Louisiana quotas (all colored).

This colored movement comprehended about 29,300 men.

At the same time the Secretary of War ordered the following movements of white men, to commence "as soon after October 27 as will not interfere with the colored draft":

Camp Meade: "Whites yet certified."

Camp Lewis: "All remaining whites yet certified."

The movement of these white men commenced November 2, 1917. The total of white movement was about 18,000; the total of white and colored was about 47,300 men.

In a letter dated November 15, The Adjutant General informed the Provost Marshal General that the Secretary of War authorized the calling to the colors of 1 per cent of the quota of each divisional area. This movement was authorized with a view to relieving cases of hardship where men, having been notified of selection, had given up their employment expecting to be sent immediately to camp.

5. *Fifth call.*—On November 5 the Secretary of War directed that there be called to the colors and sent to Camp Custer 30 per cent of the quota of that cantonment, all to be white. This movement comprehended about 10,800 men and took place during the five-day period beginning November 19. On November 6 the Secretary directed a movement of 15 per cent of its quota to Camp Dix. This movement also commenced during the five-day period beginning November 19. About 6,450 men were called to the colors, of whom about 1,450 were colored. The total of the fifth call was about 17,250 men.

6. *Sixth call.*—The Secretary of War directed on November 21 that 20 per cent of quota of Camp Upton (about 8,440 men) be sent to that camp. This movement took place during the five-day period commencing December 5.

7. *Seventh call.*—On December 7, The Adjutant General of the Army directed that the remainder of the quota of that portion of Pennsylvania contributory to Camp Sherman be called to the colors and transported to that camp. The movement took place during the five-day period commencing December 14 and comprised about 1,000 men.

8. *Eighth call.*—On December 8 the Secretary of War directed the immediate call into military service of 9,000 white men to be sent direct to the coast defenses of Portland, Portsmouth, Boston, Narragansett Bay, Long Island Sound, eastern New York, southern New York, Sandy Hook, the Delaware, Baltimore, the Potomac, Savannah, Pensacola, Mobile, New Orleans, Galveston, San Diego, Los Angeles, San Francisco, the Columbia, and Puget Sound. These men were ordered to be sent out during the five-day period commencing December 19 and were drawn from the following States: Connecticut, Delaware, Illinois, Iowa, Kentucky, Minnesota, Massachusetts, Maine, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oklahoma, Rhode Island, Texas, and West Virginia.

Summary.—The total number of men called for in the draft of July 12, 1917, was 687,000. Of these there have been called to the colors up to the date of preparing this report (Dec. 20), for duty at mobilization camps and coast-defense commands, about 527,100, or 76.72 per cent of the entire draft.

Included among these 527,100 men are about 2,300 men who were specially inducted from their status as drafted men at the request of the different corps or branches of the Army and sent to places other than mobilization camps. A flexible system has now been adopted which will permit the voluntary or involuntary induction of both skilled and unskilled men, either in accordance with their regular order of liability to service or regardless of such order of liability. Men so inducted will be sent where they are especially needed and not necessarily to mobilization camps.

The Provost Marshal General is ready and able to produce all of the remaining men called for under the initial draft. Many States have expressed not only a readiness but a desire to send their selected men to camp, in some instances reporting that the failure to call for men already notified of selection is causing considerable hardship and dissatisfaction.

VIII.

FISCAL ARRANGEMENTS AND COST OF DRAFT.

(I) FISCAL ARRANGEMENTS.

1. At the time the present fiscal policy for the selective-service system was under consideration all departments of the Federal Government were overwhelmed by offers of voluntary and uncompensated service. Influenced by this splendid showing, calls were made upon the governors of 48 States for their advice on the question that was up for consideration, namely, whether uncompensated service should be solicited and received in the execution of the selective-service law. The response was almost unanimously affirmative. We adopted the policy in the Regulations Governing Disbursements, issued June 15, 1917, in which the President stated:

> The desire in all communities to render patriotic service to the Government has given rise to numerous assurances that civilian services required in connection with the registration, selection, and draft authorized by the selective-service act will, in many cases, be rendered gratuitously. In order, however, that no person selected for such service may find himself compelled to decline to serve because the financial sacrifice involved is too great, compensation was authorized in cases in which the services referred to are not rendered gratuitously.

An estimate of funds laid before Congress was computed with a view to a large proportion of such gratuitous service.

Members of boards were from the very beginning of the administration given to understand that the necessity for economy and uncompensated services was a vital element in the execution of this law; that, as the duty of all selection boards was to go into American homes and take out for the service of the Nation our strongest and best young men to send them to the battle lines to incur the risks of a sacrifice which is not and can not be measured in terms of money compensation, so the duty of selection boards ought to be given the aspect of a service of the same sort; and that as far as possible this service should be rendered without compensation. Recognizing, however, that many patriotic citizens would find the burden of uncompensated service unsupportable, and that this element ought not to be excluded from participation in the administration of the law, rates of compensation to meet the financial sacrifices in such cases were prescribed. It was the underlying idea that the law would impose a sacrifice upon each community to the necessity of the Nation, and it was especially desired that at no time should the execution of the law have the aspect of a taking from each community of its quota by paid agents of the Federal Government.

2. The response was most inspiring. Thousands of members appointed to the boards declared their intention to render the service without compensation for their loss of time. Regardless of the injury to their personal affairs or to their business, they came to the assembling places of the boards, stayed from morning till late at night, and continued this devoted service throughout the hot months of the summer, day after day, without remuneration. Captains of industry and labor leaders, professional men and business men, teachers and doctors, university presidents and public officials of counties and cities—all alike joined in the huge task of making the selective-service administration an efficient success without any regard for financial sacrifices or business losses.

This was a part of their contribution to the war, and it was made eagerly and gladly. They were, by a large majority, the older men, the responsible men of affairs in the community, who were neither eligible nor liable for military service; but they regarded themselves as equally drafted with the younger men into the service of the Nation, and they made their contributions in the shape of time, skill, and labor, and of the sacrifices to their business and personal affairs. Had they been paid in money, it would have been an ordinary commercial transaction of hiring or appointing. In fact, it was the discharge by them of an obligation to the entire Nation—a service, nevertheless, for which the Nation can never repay them in any amount measured by money figures.

3. Here and there, however, not only were services charged for, but reports were received of boards that have met from day to day with an apparent sole purpose of basing a claim for compensation. As an instance, one board whose total quota to be produced was six men, submitted a claim for compensation amounting to several hundred dollars. This, of course, was an exceptional case, which the great majority of our board members would condemn; but it is such boards as this that would have produced an inflated unit cost.

It was such boards, also, that rendered necessary the strict and formal system of accounting which the Provost Marshal General instituted in the regulations for disbursements above quoted. This system of accounting was calculated to put a check upon the extravagance and irresponsibility which occasionally was met with. Had such a check not been rigorously imposed, this extravagance was likely to spread to an injurious extent. Nevertheless, the requirements of the accounting system which insisted that authority should be obtained beforehand for important expenses, and that vouchers properly made out in detail should be presented before payment could be made, proved to be irksome and inconvenient to many boards whose competence and business judgment could have been fully trusted to regulate their expenses in the effective

manner of experienced business men. Furthermore, the inevitable delays caused occasionally by the congestion in the offices of the State adjutants general led, in some instances, to further inconvenience. The enormous nature of the task, the creation of the system and the organization suddenly and out of material new to the task, the complexity of the correspondence passing up from nearly five thousand boards through fifty adjutants general will sufficiently explain the occasional obstacles and delays which were felt in their effects to the inconvenience of the boards.

But the boards, for the most part, met even this difficult situation with an astonishing degree of patriotic vigor, characteristic of American power of achievement. Hundreds of boards advanced out of the pockets of the members the sums necessary to pay clerks, to hire quarters, and to purchase supplies, and patiently awaited the settlement of the accounts by the Government. To all those boards who so nobly and efficiently responded in this direct and prompt manner to the exigencies of the situation, instead of weakly permitting themselves to be blocked by the temporary obstacles, the Nation owes a debt of recognition and gratitude which it can never repay; but it should be publicly and emphatically acknowledged in these pages.

4. Toward the end of November estimates of the money cost of the administration within the various States were called for. The preliminary estimates of cost from the various States disclosed remarkable discrepancies, ranging between $3 and $17 per capita of quota due. The States estimating a high per capita cost were then asked to scan closely all claims for compensation and reimbursement, for the purpose of eliminating unmeritorious claims and of bringing the cost of administration throughout the United States to a more uniform figure, and to make a vigorous and renewed appeal to the splendid patriotism and unselfish devotion with which the administration of this law was begun.

On November 15, in order to obtain the most complete and accurate information, adjutants general directed their disbursing officer to prepare immediately a printed form calling upon each member of local and district boards, or other persons likely to submit claims for their services, for an exact and final statement of all their claims for service in the execution of this law to include November 24. Boards whose claims were exorbitant or exceeded a reasonable cost, as disclosed by a comparison of the expense accounts of the majority of boards or of the most efficient boards, were required to explain their figures, and were cautioned that not the least effective index of their cooperation in helping the Nation in this emergency is this figure of cost. It would certainly not seem to be too great a demand upon the members of boards to ask them to exercise economy and frugality in their control of Government expenditures during the present emergency.

About December 1 each disbursing officer submitted by telegram to this office an itemized statement of the expense incurred up to and including November 24, showing separately the amount of money actually expended and the amount of just indebtedness incurred and outstanding against the Federal appropriation, and, specifically, compensation of members of local boards, compensation of members of district boards, compensation of clerks, allowances for travel, rental of offices, purchase of supplies, etc.

5. This office has by some been accused of parsimony in its fiscal administration. But the matter has never been viewed here as one of mere dollars and cents. Under the selective-service law, members of boards are as effectively drafted as are the men whom they send to the battle field. It is altogether well that this should be so. It is intrinsic to the psychological atmosphere that should surround the draft. The solemn function of these men should never appear to be exercised in the hope of any other reward than that of the satisfaction to be derived from a grave duty well discharged.

The aspect of pecuniary and physical sacrifice was deliberately impressed to this sole end. During the period of the classification which will require the undivided attention of board members, compensation for their services is provided. After the classification their duties will be no more onerous than those performed by members of town councils and many other local officials who are not compensated. It is intended, therefore, that as soon as the classification is complete, compensation of members of local and district boards shall cease, and the only continuing expense of the selective-service system shall be continued authority to hire the necessary clerical force, not to exceed one competent clerk for each board.

(II) COST OF DRAFT.

1. *Per capita cost, National and State.*—From the reports sent in by the governors of the several States between December 1 and December 3, it appears that the total expense (including money paid out and liabilities incurred) was $5,211,965.38. Appendix Table C shows the total figures from each State, together with the per capita figures. Appendix Table D shows the expenditures in detail from each State, classified under the several heads.

(1) It thus appears that the per capita cost of the selective-service system, *nationally*, to the end of the first draft was as follows:

Cost per registrant	$0.54
Cost per man called	1.69
Cost per man accepted for service	4.93
Cost per man of quota due	7.59

Of these several per capita costs, the third, i. e., *per man accepted for service*, is obviously the most significant, being the nearest to the real measure of the money expense of the system for the first draft. The fourth figure, i. e., per capita cost *per man of quota due*, is, of course, too narrow a basis for cost estimate, because the entire effect produced by the expenditure of the money is to be measured not merely by the number of men required to be raised but by the number of men effectively obtained for service; and this number (see Appendix Table 4) lies somewhere between the total number certified, 1,057,363 (not all of whom appeared on call), and the number to be raised as required by the President's call, or 687,000. The reasons for the certifying of an excess number of men have been fully explained in Chapter X, Table 4, of this report. Had the President named 1,000,000 men as the number to be raised, something near that number would have been ready for the camps as the result of the identical expenditure. In other words, the true estimate of cost being the number of men actually produced as ready for service, it would have cost very little more under the selective-service system to produce a million men if a million men had been called for.

To the above sum, consisting of the expenses of nearly 5,000 boards and 50 adjutants' general offices in the States, must, of course, be added the overhead expense (Appendix Table E) of the Provost Marshal General's office in Washington. This overhead expense, however, should in part be spread over the ensuing drafts. Taking half the expense of equipment and all of the salaries and supplies up to the end of November (except such as were incurred as a part of administering the new selective-service regulations going into effect December 15 in preparation for further drafts), the total of such overhead expense is $132,829.36. This amount, however, should be offset by one-half the amount of permanent equipment now on hand with the various boards, because such equipment will serve for further drafts also. Estimating this one-half at $50,000 only, the net overhead expense would be $82,396.36. Adding it to the above national total reported from the several States, we have a grand total of $5,294,361.74, or a per capita cost per man certified for service of $5.

(2) In the *several States* the per capita cost ranged widely. Per man accepted for service it ranged between $1.57 and $19. The lowest cost was in Oklahoma and in North Dakota; the highest, in Rhode Island and in Maine. Appendix Table C shows the variances in detail. The causes for this variance will require further study.

From the point of view of the boards in the several States, however, it is important to note the differences between the per capita costs per registrant and per man

CHART C.

COST PER MAN CERTIFIED FOR SERVICE, BY STATES.

called, as well as the per capita cost per man certified for service. A large part of the expenses were proportionate to the number of registrants in a given area; that is, a board having 5,000 or 6,000 registrants necessarily incurred larger expenses than a board having 500 or 600 registrants, no matter how many men were called or were certified. Similarly, the expense of calling men for physical examinations and for hearing on claims was a large item regardless of the total number of men ultimately certified; for example, in a board having 30 per cent aliens, the expense of calling them and passing upon their claims was a necessary expense, although none of the aliens might be certified; thus, two boards which certified for service 300 men apiece might have called and examined 1,000 and 500 men, respectively, in order to produce the same number of certified men.

For the foregoing reasons it is only just to the several States that the per capita cost per registrant and the per capita cost per man called should be compared, as well as the per capita cost per man certified. Appendix Table C, showing these several per capita costs for the respective States, makes it plain that some States having a relatively high per capita cost per man certified for service had a much more moderate cost per man called or per registrant. These differences should be taken into consideration in fairness to the earnest and laborious work of the thousands of boards who have rendered their services in this great task.

2. *Per capita cost of the Selective-Service system and of Recruiting, compared.*—It should not be omitted from consideration that the selective-service system, besides its advantages as a rational and necessary measure for raising the National Army, has also the advantage of being a more economical system than that of recruiting by voluntary enlistment.

The comparative statement of unit cost between the recruiting system and the selective-draft system is a difficult one to formulate accurately. To make the comparison fair to the recruiting system, we should eliminate the expense of travel paid between recruiting station and recruiting depot, the cost of subsistence prior to acceptance at the latter, the expenses at general recruiting depots, and the cost of clothing. The cost of obtaining men by the selective-service system will include only expenses up to the time of entrainment for the camps. By a statement received from The Adjutant General and placed in Appendix Table G, it appears that the per capita cost of recruiting in the year 1914 was $24.48 and in 1915 $19.14. It further appears, from a statement of The Adjutant General, printed as Appendix Table F, that the per capita cost of recruiting for the first nine months of the fiscal year 1917—July, 1916, to April, 1917, inclusive—was $28.95.

The marked economy of the selective-service system is apparent.

3. *Per capita cost of the Selective-Service system in 1917 and the Civil War draft, compared.*—Under the act of March 3, 1863, Gen. James B. Fry was appointed the Provost Marshal General. In his report dated March 17, 1866, he states (on p. 2, second paragraph) that the cost of recruiting 1,356,593 men, prior to the passage of the act referred to, was $34.01. What items of expenditures were considered in arriving at this per capita cost are not shown; but because he uses these figures in comparison with the per capita cost of raising the Army under his administration, it is fair to presume that the same items were considered.

Under the act of March 3, 1863, referred to, each district of every loyal State was assigned a certain quota of men which it was required to produce for the Army. If the entire quota volunteered, no draft was held. If part volunteered, the balance were drafted. For that reason the expenses of the volunteer and draft systems under Gen. Fry's administration were so intermingled that no separate per capita cost can be arrived at. His report shows (p. 749) a total of 1,120,621 men produced at a cost of $11,027,715.21 or $9.84 per capita. This report nowhere gives the items going to make up the total amount. Of this number, only 168,649 were drafted men or substitutes. Considering this low number of drafted men, and the fact that the total expenditure of over eleven million included these drafted men and all of the volunteers, and the further fact that there must have been but relatively small expenditure in securing the volunteers, the per capita cost for producing the drafted men would have been seen to be very much higher, if it had been possible to segregate the expenses on account of producing them.

But any comparison with the Civil War cost is, of course, valueless unless we keep in mind the much lower money values of those days; that is to say, the relative wage-paying power of money at the period of the Civil War two generations ago was several times higher than it is now. The sum of $10 in those days would purchase services which to-day would cost $20 or more. As an illustration of this, it may be mentioned that the general wage-level rose from 50 degrees to 100 degrees between 1865 and 1910.

We may fairly assume, therefore, that the per capita cost of the Civil War was relatively several times higher than the mere figures show it to be.

In short, for the purposes of the present day and our present problems of cost, the true standard of economy for the selective-service system is a comparison, as above given, between the expense of the recruiting system and the expense of the selective-service system.

In so far as we are forced to consider the purely financial aspect, the Selective-Service system is the most

economical measure that could possibly have been devised for raising the National Army of brave men to defend the cause of liberty and democracy against the nefarious world-designs of a ruthless hostile power.

IX.

THE FUTURE.

When the breathless haste of the first draft was over there was time to consider the problem in its larger aspects and to make provision against the future.

The industrial and agricultural needs of the nation were strongly developed as a result of the first draft. In the light of literal thousands of special urgings and claims for consideration arising from the emergent need of every activity in the Nation, and pressed with patriotic singleness of purpose, but not always with patriotic broadness of view, the needs of every department of national activity had been emphatically presented to this office. In these circumstances the whole problem may be regarded as having been presented in full perspective.

It may be shortly stated thus:

The needs of the war have resulted in an unprecedented demand for labor in the following vital fields: (1) Shipbuilding and manning, (2) munitions manufacture, (3) agriculture. These three principal activities are listed in this order after considerable thought and a wide experience and discussion. The predication for this result is roughly as follows: The national industrial and agricultural need may, in the light of the experience of years, be relied upon to move toward adjustment in the mutual reaction of supply and demand, accelerated by certain indirect methods of which the draft itself is one. Experience has not shown that the national shipbuilding program may do so. To descend to platitude, it is an ill wind that blows nobody good. The Civil War removed our merchant flag from the seven seas, with untold disparagement of our national advantage. If the World War can restore it we shall reap benefit for generations to come. The guiding principle of this office must be "military effectiveness first," but when military effectiveness is enmeshed with marine effectiveness, as it must be in a foreign war on a battle field 3,000 miles from our coast line, there is no room for hesitation. If our soldiers are to be effective, if the munitions we produce are to be effective, if our agricultural productiveness is to be effective, we must produce the bottoms to carry all aboard. When we find coupled with this a promise for the future which meets a need unfilled in 50 years of peace-time effort there can be little room for hesitation. Since we are in war military effectiveness comes first, but there never was a more fortunate corollary for the Nation than that marine effectiveness comes next. However, soldiers are helpless without weapons, and what has been said can never be taken to mean that the manufacture of munitions is to be hampered by the building of ships or the disproportionate raising of armies. All of these things are to be carried synchronously forward, and the problem is simply one of relative adjustment from month to month and year to year, with no thought of carrying one to a disproportionate prejudice of the other. The same is true of agricultural productiveness. The problem is to carry each evenly forward, avoiding the destruction of any. It must not be forgotten, however, that the problem does not stop here. The entire effectiveness of the Nation has not been envisioned when we have mentioned the manufacture of the instruments of war, the instrumentalities for the over-seas transportation of them, and the men who are to manipulate them. The Nation must be an economic integer and a very effective one, and all is by no means said when these essentials are mentioned. It is a solemn fact that no strict legal constructionist could read the Selective-Service Law as a direct protection of all national activities. Commerce, for instance, is not only not mentioned, but, according to the strictest construction of its terms, is not even suggested. "Industry," especially when the word is qualified by such significant addition as "including agriculture," does not import commerce or any other than strictly productive endeavors. Yet the Selective-Service Law must receive a common-sense administration unless it is to fail. The economic balance of the Nation must be preserved.

All these thoughts had been presented and considered here when in September of this year it was determined that the time had come when the regulations should be revised and the entire original plan of the draft be reconsidered. The resolution was rather one of expediency than afterthought. The necessity had always been recognized, but it had not been anticipated that the delay in preparation by the supply departments would permit of the readjustment so soon. The instant that the respite was granted orders were given for the rewriting of the regulations on the lines just suggested.

Upon the most superficial survey it was apparent that we are already facing a unique disarrangement of the labor supply appurtenant to every normal industry, and especially that appurtenant to agriculture. Urgent drafts had been made upon our industrial and agricultural industries by the war in Europe before our own participation therein. Vital necessities abroad had invaded our markets with unusual demands, resulting in unusual labor requirements. The available credit of the world had been rendered contributory to new industries, with a resulting coalescence of raw labor supply about industries solely engaged in the manufacture of instruments of destruction, and with the inevitable consequence of paucity of labor in our normal peace-time industries, includ-

ing agriculture. The industrial, economic, and labor balance was in this manner upset. And it becomes instantly apparent that, with any considerable reduction in man power for the uses of the Army, some, if not all, industries will find this already overtaxed labor supply seriously curtailed.

Such a condition is the inevitable consequence of modern war. Under a perfect economic system the productive enterprise of a nation affords a field for labor for all able-bodied men. War being an emergent condition, even under such a perfect system, the instant necessity is profound adjustment to meet the paramount demand of the Army. But the adjustment is required not alone by the necessity for armed men. The increased manufacture of the instruments of war requires as great or even greater drafts of men from normal peace-time industries. This second requirement had already been made upon our normal industries by our efforts to supply the needs of the allied powers. Upon a declaration of war, these already abnormal demands were increased by our own immediate warlike necessities. It was this condition that was to be addressed by the first regulations which were potential of so profound an effect upon our national supply of man power.

As has already been pointed out, it was the object of the old regulations to enter the disturbed condition with a plan for raising 687,000 men in the short time available and with the least possible interference with national activities. The maximum number of cases that we could hope to consider in the time available was 3,000,000. The maximum number of men available was 10,000,000. Scientifically, the regulations should have been so framed as to produce precisely the 687,000 most available men in the whole 10,000,000. Practically there was no time to examine 10,000,000 cases. Therefore, the regulations were so drawn as to select the 687,000 most available men in 3,000,000. Admittedly, the regulations for future drafts had to be revised to produce three times as effective a discrimination.

But there was much more than this circumstance, striking as it is, to be considered. The draft itself is an instrument of compelling force in controlling and distributing labor supply throughout the United States. It is conceivable that our national necessities may require a direct draft of labor. Repugnant as this may seem to some of our ingrained peace-time ideas, there can be little doubt of the authority of the Government to adopt such a measure. But there are measures short of this suggested in the draft regulations as they now stand, which give a powerful lever of control of labor supply that should be tried before we pass to the extreme of a direct industrial draft. Since this is so, the responsibilities of this office do not end with the prompt supply of levies for the Army. The entire industrial field must be explored, provision of facile and effective methods must be perfected, and the selective-service system must stand as a pervasive and supple control which shall serve its purpose, so far as its powers make possible, in coordinating the man power of the Nation and so fostering its industries in a nice and impartial balance which shall carry forward all varied endeavors, not singly or irregularly, but compacted in an even and synchronized march.

With these ideas uppermost it was necessary to amend the original regulations. They had not been addressed to the bulk supply of labor appurtenant to any industry or agriculture, but had contented themselves with the preservation of indispensable men, and they protected all such industries only by incidental effect of the vastly effective exemption of men whose circumstances as to dependents relieved them from liability to the draft.

It must not be supposed, however, that this protection was insignificant. Applying to any class of industry (or any other national activity), the rule potently applicable to all, it becomes apparent that at least 80 per cent of the labor supply appurtenant to any particular class is either wholly removed from the operation of the draft by being under or over the age limit or is deferred by the domestic circumstance of the dependency of relatives. It is then relatively a small field within which we have to function, and the draft is not by any means the bogey that it is often made to appear.

It must be emphasized that the desired result can not be made by the administration of the draft alone, and, before entering a discussion of the thing which is to be achieved, the thing that has already been accomplished by other belligerents must be mentioned. It is impossible to say what armed strength of the central powers has been put into the field, but with only 60,000,000 people in Germany and less than 50,000,000 in Austria-Hungary, it is perfectly apparent that the military burden imposed upon those two countries alone has been many times as heavy as anything we have been called upon to face, and that, with conspicuous success they have met it, as have England and France. To what precise extent it is not feasible now to say, but one thing at least is certain: the nations with which and against which we are arrayed have made such sacrifices of man power, such adjustments of agricultural and industrial relations to meet these sacrifices, that it little becomes us to emphasize above a whisper, as a substantial national problem, anything that we have yet been called upon to face. Relatively, the surface of our resource of men has not been scratched. Unless we are to confess a national inefficiency, shameful before the nations of the world, we shall solve these problems without great controversy.

32.29.18

That these nations have made these economic adjustments at a sacrifice is not to be questioned. That our people have not as yet shown too great a disposition for proportionate, or even comparable, adjustments is unfortunately true. We should hear less and do more in this regard.

One thing must be borne in mind. Adjustments to the war-time need of the Nation are to be made. The direct draft on labor supply is the draft of the Army. Every other responsible activity sees that draft in horrific perspective. Adjustments are demanded, and always, as a first insistence, at the expense of the Army. Actuated by none but the most patriotic impulses, representatives of different interests—agriculturists, industrialists, men engaged in oceanic shipping, educators, and religionists—have come forward with arguments for absolute exemption of their class from draft—arguments which, in their respective field, are almost unanswerable, but which, in the broad view of the national necessity, would (if all were acceded to) result in a Falstaffian army composed only of vagrants and the sons of the idle rich, inadequate in numbers and contemptible in personnel. Against such blandishments this office must stand forth without compromise. Herein it must be supported by the manhood and the mature and unbiased thought of the Nation, or its plan of selection must fail. And with its failure the Nation must confess inadequacy in the virility of the fighting nations of the world.

THE NEW CLASSIFICATION.

The new regulations are intended to accomplish two principal things. The first is to make a scientific and most complete inventory of our man power, with a searching inquiry into the qualifications and the industrial and domestic circumstances of each man registered; with this at hand, the second is to make a scientific classification of their relative availability for military service and for all the war-time activities of the Nation.

With these two objects accomplished, the registered field ceases to be an heterogeneous medley of unorganized resources. It becomes rather as the keyboard of a piano, upon which, by easy manipulation, the maximum result in any desired harmonization of effect may be accomplished. It was to this capital purpose that the new system is addressed.

Its first step is to require from each registrant an uniform and simply executed inventory of his qualifications and circumstances by means of a questionnaire, composed of inquiries carefully designed to elicit answers which shall compel conclusions along the desired lines. It provides for an immediate classification of all registrants into five classes arranged in the inverse order of their availability for military service. When the classification is complete we shall be prepared to make the maximum use of every direct and indirect influence on labor supply growing out of the Selective-Service Law.

Examining the system more closely, we find that it is designed to list in Class I, the names of those whose immediate induction into military service will least interfere with the industrial, economic, and agricultural life of the Nation. It excludes from that class the key and pivotal men, whether they be managers or assistant managers of farms or mechanical or administrative experts in factories. The latter classes, it defers into Classes III and IV, and it excludes from immediate liability to draft skilled labor in both industry and agriculture. In the troublesome field of dependency claims, it endeavors to address with the most unequivocal rules every difficulty that was raised in the first draft, and, as to married men, to include in the immediately available class only those who by no stretch of the imagination should be deferred on any ground of dependency.

While it attempts to protect only those engaged in industries essential to the national interest, it covers by the clearest terms all agriculture and all industries except those patently nonessential. It is designed to produce an immediately available class which shall protect all skilled labor appurtenant to agriculture and to all essential industry.

The failure in direct deferment on account of engagement in nonessential industries may seem at first sight to depart from the resolution that the general industrial balance of the Nation is not to be destroyed. The first impression fails to consider the effect of the dependency deferments and the fact already adverted to that fully 80 per cent of men in any particular industry, essential or nonessential, are removed entirely from the operation of the draft by being under or over draftable age or on account of dependency exemptions. The protection to nonessential industry, while not nearly so effective as that offered to essential industry, is sufficient to prevent destruction. This is as it should be. The added protection to essential industry will be a force to attract labor to such industry, but it will not be such a potent force as to destroy nonessential industry.

Great pressure has been exerted, first, to withdraw any exemption whatever from nonessential industry; second, to grant absolute exemption to all labor (skilled and unskilled) engaged in essential industry. The second is the milder course. The first is revolutionary. Either would be so potent as to coalesce labor supply about the favored industry.

The second suggestion has been used specifically for the benefit of shipbuilding. The creation of a merchant marine is conceived by this office to be (next to the unhampered raising of our Army) the most vitally necessary step in the prosecution of the war. As soon

as it was made to appear that there was not sufficient labor to carry this project forward, there was inserted in the new regulations a provision granting absolute immunity from draft to laborers engaged in the building and fitting of ships under the supervision of the Navy or the Emergency Fleet Corporation. The effect was electrical, and there is every indication that it will prove to be continuously effective. There is no longer any labor shortage in that industry.

But the danger of such a step was instantly demonstrated. Munition factories at once demanded the same protection. The time has not yet come for this. If it were accorded to munition factories, agriculture would present a claim equally substantial, and the result would be such an inroad into class I as to abate it, to drive us into classes II and III in all other industries, and thus to break down the entire value and effect of the classification system. We can not take such a step now. When the classification is complete we shall know to the uttermost ounce just what concessions the Army can make to the other paramount industries of the Nation. Until that time no further concessions may be made.

But this must be recognized: Even after all such concessions have been made, the labor supply will be insufficient for the demands of even necessary industries. Man-power adjustments must be made on every hand, and they can no longer be made at the expense of the Army. What are termed nonessential industries must not be destroyed; and if this Nation can not continue under the relatively slight burden upon its man power, then it will stand established as the incompetent among the civilized nations of the world. Such a result is unthinkable. The problem must be faced and solved. This office will go as far as is humanly possible, but with its limited power it can not offer a complete solution. Women must take the place of men wherever that is possible. Waste of effort must be abolished. And finally, aside from manipulation of the effect of the draft, more subtle and equally powerful methods must be evolved, labor must be regulated, and the disproportionate prices now prevalent for the inducement of labor to abnormal areas must be controlled by administrative regulation which shall more effectively control the supply of labor appurtenant to every war-time industry. In no other manner can this very clearly defined and really simple problem be approached.

The powerful potentialities of the draft, the revision of the regulations to make full use of them, and the lines along which it may be necessary to proceed, have thus far been outlined. Before descending to the less fundamental (but hardly less important) revisions, there are one or two further aspects of these fundamental principles which require address.

THE INCOMING AGE 21 AND THE ATTAINED AGE 30.

No human mind can forecast the resultant numbers in Class I, but (as the roughest guess based on the experiences of the first draft) it is estimated that Class I will comprise a list of physically acceptable men in number close to one million—enough for any call in present prospect. **Whether this guess be justified in practice or not, it can be announced now as the policy and belief of this office that in all probability it will be possible to fill our military needs without ever invading any class more deferred than Class I; and this is the promise, the standard, and the goal, here for the first time announced, toward which every administrative effort of this office shall be directed.**

It is admitted that the fulfillment of this hope will require further legislation (as shall be presently explained), and the requirements of the war may impose problems that will demand much more profound adjustments; but as a rough measure of protection it is not too much to say that the present classification scheme offers possibilities that have never been attained by any other nation in the history of war.

It is perfectly demonstrable that the fostering of our industrial and agricultural institutions requires the deferment—not of the younger men, who have not yet become integrated with the domestic, industrial, or agricultural life of the Nation—but rather of men who have passed beyond their majority and who have assumed domestic or industrial or agricultural relations which demand their discharge from the obligations of military service. Therefore, presuming that the military needs of the Nation should require more men than those who within the present draftable ages, and under the present rules would be in Class I, the problem would instantly present itself whether it were better to invade the deferred classes or to add another class of younger men.

Between the two alternatives there can be little hesitation. Against the proposition to add the class of men who have reached 21 since last registration there can be urged but a single objection, that among the younger men will be found those who are just completing their education and, as has already been forcefully urged, that where the education is technical (medical, chemical, or engineering) the completion of the training of men so skilled is necessary for war purposes. As to such technical students the arguments are overwhelming and they have prevailed.

In other fields of education different considerations are controlling. If a nation is to make any sacrificial adjustment it is here. The value of an educated youth is not to be underestimated, but war is an emergent condition which by the very nature of the problem can not last forever. While due provision must be made for the future, the obligation of military service is not

32.29.9

lightly to be passed over. It is not difficult to find that the relations of a man to the war industries of a nation are sufficient to defer his call to military service and in his place to send another man to a stern and vicarious sacrifice; but it is much more difficult to reach the conclusion that, either the interests of the nation or the interests of the favored man, are sufficient to justify sending forth in the place of a college student a less fortunate youth at the imminent and great peril of life—not because he is better fitted to defend his country (for admittedly such is not the case), but because the national life has vouchsafed him fewer opportunities. Yet that idea is rampant in the Nation. It is unfair and unjustly partial. Human lives and destinies are at stake. There is too great a disposition to weaken on this ground; and the sooner the Nation comes to an exact realization of the issues involved the sooner will the powerful disposition of high but single-minded educators be opposed in this regard.

The inclusion of the class of those arriving at the age of 21 should add yearly at least 700,000 undeferred men to the available class, and with such an addition there is certainly no immediate necessity of going beyond Class I in future drafts. This is a consummation most devoutly to be desired. It removes from consideration the most troublesome problems of the draft and places us in a most enviable position among belligerent nations.

A paragraph will serve to dispose of the question whether in like manner those passing the age of 30 should be removed from liability. In the first place such men are, physically and as a class, the most perfectly fitted for military service. Practically those who at that age have not yet integrated themselves with the economic or domestic life of the Nation to such a substantial extent as to dictate their segregation in a class more deferred than Class I are entitled to no consideration in this regard. The classification system automatically defers meritorious cases, and the rest ought not to be removed from liability.

CHANGE OF QUOTA BASIS.

We come next in our consideration of the new plan to one of its most significant incidents.

As the law now stands, quotas are to be apportioned by a blind rule of population. This rule has already been fruitful of almost insurmountable difficulties. In the first place gross population includes aliens. Aliens are, by the terms of the law, entitled to exemption from draft. In districts with a large alien population this rule has resulted in a considerable reduction of the citizen population, and in such regions as the Big Bend district of Texas this has resulted in a condition little short of calamitous. But the conclusion to base the apportionment of quotas on citizen population is not to be accepted as a curing alternative. The opposing argument is readily demonstrable. As between two States with, let us say, 1,000,000 population, 100 per cent American and the other 50 per cent alien, a rule of citizenship apportionment of quotas would result in a withdrawal from the all-American State just twice as great as the withdrawal from the 50 per cent hyphenate. Since the economic wealth of a State is bound up with its man power, and since man power is not to be computed according to citizenship, the gross inequity and the certainly ensuing protest against any such rule are instantly apparent. Further, there is to be urged against the population rule the circumstance that there is no reliable criterion of population, since the last census is seven years old and since the most potent influences have been at work on the distribution of population since 1910. These influences were most potent among men of the draftable age; and since the Census Bureau's estimate was made on the registration as a basis the distribution of the first draft was admittedly but incurably inequitable.

The new classification system not only renders the old apportionment of quotas still more inequitable. It requires an absolute change to a new rule. If this Nation is to be regarded as a compacted whole (and it must be so regarded), and if the early classes represent the men who could be taken with the least disturbance of peace-time normality (not only nationally but emphatically locally), then there is only one just basis for quotas to be called from any class, and that is the proportion of men in that class in the various localities. This plan is too just, too even, and unassailable to require argument. If the classification is to be accepted, then the apportionment of quotas on the basis of the classification must be accepted. Any other rule would result in one board furnishing its quota from Class I, while immediately across the jurisdictional dividing line another board might easily be invading Class IV. This is too obvious to require discussion. The justice of an apportionment of quotas in proportion to the classification from which the quota is to be filled is unassailable, and the law should be amended along these lines.

If these two amendments are promptly made; that is, if all men who have attained the age of 21 since June 5 are required to be registered and thereafter to be immediately classified, and if the law is amended to require the distribution of quotas in proportion to the number of men in any class from which the quota is called, then the problems of this office are already half solved—but not entirely solved, as shall appear immediately.

SKILLED AND UNSKILLED LABOR POWER.

The effect of the proposed amendment will be, then, to require that Class I be exhausted—not merely locally but nationally—before any inroads are made in Classes

II, III, or IV. If, as is earnestly hoped and confidently believed, all drafts in immediate prospect can be confined to Class I, then the entire supply of skilled farm labor and of labor appurtenant to every industry can be conserved intact, and our only remaining problem is that of unskilled labor. This problem is not so simple as its statement might suggest. The line of demarcation between skilled and unskilled labor is not always plainly marked; apart from this the supply of unskilled labor is the very commodity that presents the most serious problem in the present aspect of the war. Unskilled labor is responsive to slight impulse and controlled by many causes. The relatively disproportionate prices rendered possible by the abnormal economic situation that has prevailed in the United States have been sufficient to withdraw unskilled labor from agricultural pursuits and to concenter it about the great industrial regions of the Nation to such an extent as to present a most difficult problem in national economics. The fact must be faced, in this report and elsewhere, that the present raw and unskilled labor supply is insufficient to fill the Army while also maintaining industry and agriculture to the maximum effectiveness required by military necessity. As has been remarked before in this report, the instant recourse of every superficial student is to make the necessary adjustment at the expense of the Army. Since the decision has been made to render this Nation militarily effective as a measure of self-preservation, the protagonists of this idea can fairly be characterized as fatally shortsighted. The adjustment must be made in some other way.

Such adjustment will involve the shifting of labor power from one industry to another or from one group to another. There are here many obvious possibilities. For example, in commerce, in nonessential industries, and even in essential industries, there are thousands and hundreds of thousands of positions that could be filled by women and are filled by women in every other belligerent country. The positions of clerks, elevator boys, salesmen, porters, and the like, may be mentioned by way of illustration. As the means for effecting such readjustment, there are powerful indirect possibilities in the draft, but the dangers in its indiscriminate use are not to be overlooked in any careful survey of the situation. Moreover, other powerful influences to this end are available outside the draft, and so far removed from the jurisdiction of this office that they may not now be considered here. The vital and overwhelming facts of this problem ought to be addressed at once by some administrative authority vested with sufficient power to act as well as to resolve. It is doubtful whether there is a more important problem before the country just now.

One more important phase of the new regulations remains to be discussed. The deferment of men on account of their engagement in industry and agriculture can be regarded solely as for the national interest. The interests of individuals or association of individuals can benefit incidentally but solely as the individual's interest happens to coincide with the interests of the Nation. Now, commonly it is to the interest of the Nation that men highly skilled in industry remain at their normal employments, but such is not always the case. Our armies have urgent need for a small proportion of men highly skilled in certain industrial pursuits. Wherever such is the case the interests of the Nation are no longer served by leaving men in their civil pursuits, and since such men will, by the very terms of the new regulations, be found in deferred classes, the interests of the Nation require that in such cases the deferred classes be invaded and the necessary men withdrawn. Ample provision for the exercise of this authority is found in the new regulations. It will be utilized with discrimination and care, but when the necessity arises the authority must be exercised expeditiously and acceded to without protest.

32.29.8.0

PROCEEDINGS UNDER THE NEW CLASSIFICATION.

While what has been discussed covers the essentials of the revision of the regulations, many other considerations required the revision.

Some 3,000,000 men had been called and their cases had received a tentative disposition. Nine million five hundred thousand men were registered on June 5 and fully 500,000 since that time. The fate of some 7,000,000 of the best and most virile men of the country remained suspended. It became forthwith necessary to assign to them a place in the national defensive scheme, and both for the repose of the public mind and in justice to them it was necessary that their cases be resolved.

Improvements in method are of very great importance. The entire regulations have been compressed between the covers of a single volume. Instead of the involved and sometimes obscure verbiage of the original regulations, the new ones are expressed in almost colloquial and never obscure English, and the arrangement, annotation, and index are such that any required provision can be found readily and easily. The method for physical examination is improved, and a comprehensive appeal to the leaders of the medical profession has been made in such a way that it is believed that the preliminary examination of registrants will be of a more exhaustive and scientific character than any physical examination that can be accorded at the mobilization camp. If this proves to be as effective as it promises, the physical examination at the mobilization camp will become a mere labor of supererogation. Each registrant is required to submit his answers to a catechism evolved from the experiences of the first draft and so thorough as to search his entire industrial and economic relation and

to develop his answers in such a way as to compel the conclusion upon which his classification must be made.

The entire legal profession has been enlisted, not as advocates presenting the necessarily one-sided view of a party in controversy, but as assistants of the Selective-Service System engaged to present the merits of each case in its fair relation to the national problem. The procedure is simplified and systematized to an extent which, according to the testimony of some 50 members of local and district boards, will reduce the mechanical labor 70 per cent.

Every administrative incident of the first draft, every failure, difficulty, and omission of the old regulations discerned by our experience thus far was considered and attempted to be corrected in the new.

The classification is at the date of this report in full progress. It is anticipated that it will be completed by February 15. When it is complete, a carefully prepared tabulation and index of it will be made in Washington. We shall then know to the minutest detail the condition and the engagement of so much of the man power of this Nation as is within the draft age. In a military as well as in an industrial sense this index will be an invaluable thing. The control by the Government of the field of labor will have been rendered flexible, exact, and most powerful. By the preferment or deferment of any industry—complete, as in the present case of the shipbuilding industry, or partial, as in the present case of all other necessary industries—the labor problem can be controlled, adjustments forced where right and proper that they should be forced, and in this manner this Nation, in respect of its control of that aspect of the labor problem affected by military service, will be in the most advantageous position ever occupied by a belligerent power in this or any other war. The selective idea will have been carried to its uttermost practicable refinement.

PART II.

THE RESULTS OF CALLING AND SELECTION BY THE BOARDS.

On November 7 a request was issued to all Local and District Boards to make return to the Provost Marshal General of the results, in numbers, of the calling and selection of men, and to report their experience in the administration of the Selective-Service Act. This tedious but necessary task was achieved with a zealous promptness and thoroughness for which public thanks are due. The returns represented the state of the Local Board records on or about November 12, and of the District Board records on or about November 18. The number of Local Boards making returns was as follows: Complete returns of results in figures, 4,341; incomplete returns, 80; no returns, 117; reports of experience, 3,416; no reports of experience, 1,122. The number of District Boards making returns was as follows: Complete returns of results in figures, 145; incomplete returns; 2; no returns, 3; reports of experience, 140; no reports of experience, 10. The compilation of returns was completed on December 8.[1]

X.

CALLS REQUIRED TO FILL THE FIRST DRAFT QUOTA OF 687,000.

(I) PROPORTION OF REGISTRANTS CALLED.

TABLE 1.

Registrants called.	Number.	Ratio to total registrants.
		Per cent.
1. Total registrants, ages 21–30 years	9,586,508	100.00
2. Registrants not called by boards	6,503,559	67.84
3. Registrants called by boards for hearing or examination	3,082,949	32.16

NOTE.—The above figures are of November 12, 1917 (approximately), being the totals as reported from time to time to the Provost Marshal General's Office by the Local Board. In various boards the registration and calls for examination still continue on a small scale; but no estimate can yet be given of the actual figures.

Thus it appears that over 67 per cent of the registrants remain uncalled; and that for filling the first draft, the percentage of registrants called was 32.16 per cent.

Appendix Table 1 shows how wide was the range of percentages in the several States. A chief reason for this variance was the variance in credits for enlistments; for obviously a State whose net quota had been reduced by large enlistments did not need to call as many registrants in order to fill its quota.

(II) PROPORTION OF CALLED PERSONS CERTIFIED BY BOARDS.

But what portion of the number called were *effectively obtained by the boards to fill the quota of 687,000 selectives?*

TABLE 2.

Proportion of certified to called men.	Number.	Per cent of called.
1. Total men called by boards	3,082,949	.....
2. Certified for service in the National Army	[1]1,057,363	34.30
3. Appeals pending Nov. 18 (Table 38).	16,156	.....
4. No appeals pending	1,041,207	.....
5. Remainder (rejected, exempted, and discharged)	2,025,586	65.70

[1] This figure is 4,082 in excess of the number actually returned by the boards in their reports, but their returns for line 1 (total called) and line 5 (total rejected, etc.) are presumed to be more reliable; and the balance of 4,082, necessary to make the sum of lines 5 and 2 tally with the total number called (line 1), has therefore been added.

NOTE.—The above figures for "Certified for military service" (Table 2, line 2) are of November 12, or about that date, and therefore are slightly higher than the ultimate figures, because they include the *cases pending* at that date on appeal before the district boards. The total appeals pending on November 12 were approximately 16,156 (Table 2, line 3). Of this number, perhaps 7,000 should be deducted from the figures in table 2, line 2, to represent the additional persons likely to be discharged or exempted finally, after being certified originally by the local boards. The same number, 7,000, should be added to line 5, of Table 2.

Furthermore, the figures of Table 2, line 2, are of course higher than the numbers actually destined for immediate

[1] Acknowledgment is made of the valuable services of Mr. C. F. Balch, statistician of the Chicago & North Western Railway Co., who was consulted in planning the mode of securing the statistics and was invited to take charge of the computing staff.

CHART TO TABLE 1.

Ratio of called to registrants, by States.

CALLED

REGISTERED BUT NOT CALLED

service, because they include a large number of men not to be ordered to report under the first draft (Table 3). Most boards certified a considerable number in excess of their quota, so as to be on the safe side and have a supply ready to fill vacancies caused by the reversals of rulings on appeal, rejections at camp, etc. The percentage of such excess of men certified over men due to be ordered to camp under the first draft is 35.03 per cent or 370,363 in all.

1. Thus it appears that, so far as the *board machinery* could effect this, the calls (up to November 12) had provided a maximum of 1,057,363 men (line 2); i. e. an average of 292 registered men were called in order to produce, at most, 100 certified men for the service. Appendix Table 2 shows the variances by States.

2. What does this signify for *future drafts?* It signifies that if the same board procedure were adhered to, and applying the ratio of 2.92 to 1, the number yet uncalled (6,503,599) would yield approximately a maximum of 2,227,246 additional men certified for the service.

3. Comparing the number *called* with the *quota* fixed for the first draft, we find:

TABLE 3.

Total called compared with quota.	Number.	Ratio to total called.
		Per cent.
1. Total number called	3,082,949	100.00
2. Net quota required	687,000	22.28
3. Number certified for service	1,057,363	34.30

Thus, the percentage of quota to total called was 22.28 per cent. In other words, for every 100 of required quota, 448 men were called, although the call of that number produced 154 certified men.

(III) PROPORTION OF PERSONS CALLED WHO FAILED TO APPEAR.

Persons called by the boards for examination who *failed to appear* were nevertheless certified by the boards for military service. The figures of those certified for service (Table 2, L. 2), therefore, include some who failed to appear.

How numerous were these men who failed to appear on call? The figures are:

TABLE 4.

Proportion of called to appeared.	Number.	Ratio to total called.
		Per cent.
1. Total persons called by local boards	3,082,949	.....
2. Failed to appear for examination	252,294	8.18
3. Appeared	2,830,655	91.82

Thus, 8.18 per cent of men called are recorded as "Failed to appear." Appendix, Table 4, shows the figures by States.

1. This group who failed to appear includes, however, at least three classes of persons who were not "slackers": (1) Many who had enlisted or been commissioned in the meantime, since registration, but

NUMBER OF MEN CERTIFIED PER 100 CALLED, BY STATES.

neglected to notify the boards of their military status and claim exemption, as they should have done; (2) some who had died; and (3) many who were transferred to other boards for physical examination or for the hearing of claims, but were inadvertently carried on the books of their original board as "failed to appear."

Class (1) may be estimated at 85,000. Probably the entire June and July enlisters failed to notify their boards (which were being organized, but issued no calls until August), and a large proportion also of the enlisters during August, September, and October. Class (2) may be estimated at about 750. Class (3) may have reached 15,000; no figures are yet available.

This leaves some 150,000 to be accounted for. Were they all "slackers"? Undoubtedly much the greatest part of this 150,000 is represented by aliens; the reports of the local boards explicitly show this. Of these aliens, many left this country to enlist in their own armies; this was especially true of English and Canadians. Many other aliens failed to appear through ignorance of their duties, or through nonreceipt of notices due to the mischances inherent in the spelling of foreign names or change of occupation and residence. Many aliens residing near the national border lines, north and south, slipped over the line, especially during June and July, and failed to appear, even though they could have claimed exemption as aliens.[1] The total of these groups, as shown by the local boards' report, may be roughly estimated at 100,000 or more.

The remainder, representing the real "slackers," thus numbered 50,000 or less, or an average of less than 10 for each local board.[2]

2. Those who failed to appear were reported to the municipal police or to the Federal district attorney by some local boards. But the pressure of daily business at the boards made it impossible to do this systematically. Moreover, since many nonappearances were due to ignorance or inadvertence, since the larger number were due to the men having enlisted without notifying their boards, and since in any event the delinquents were certified for military service under the regulations and would become duly subject to service when the time arrived for issuing orders to report for entrainment, it was therefore deemed wise to undertake no general legal measure against them at this interim stage. The Department of Justice, however, has secured reports from the several United States judicial districts showing the total cases brought to their attention. The figures (as shown by United States Department of Justice records) are:

Reported for failure to appear	16,525
Arrested	2,152

(IV) PROPORTION OF CAMP STRENGTH OBTAINED.

But the board's machinery was not the final process. Of those certified for service (Table 2, line 2), some failed to appear for mobilization, some others were rejected at camp on physical reexamination, some were awaiting orders to report for mobilization, and some were or will be sent back from camp on account either of reversals of ruling by appeals boards or sundry errors. The figures are:

TABLE 5.

	Camp strength compared with total certified.	Number.
1.	Total certified finally for service	1,057,363
2.	Appeals pending and likely to be granted (Table 18) (est.)	7,899
3.	Failed to appear for examination (originally listed—252,294, less subsequently reported (est.) 20,000)	232,294
4.	Failed to report (1) at entrainment	13,128
5.	Failed to report (2) at camp	2,421
6.	Rejected at camp for physical disqualification	29,709
	Total	285,451
7.	Net reported and accepted in camp as of Nov. 20	383,675
8.	Awaiting orders to report on Nov. 20 (est.)	388,237
	Total	771,912

In line 3, however, are included some 85,000 or more men who enlisted in various branches of the service without notifying their boards formally (Table 4). These men are therefore somewhere in the military service in addition to the numbers in the National Army camps (line 7).

Thus a shortage (lines 2–6) of 285,451 (estimated as of November 20) is to be subtracted from the total certified for service, giving the total potential camp strength.

1. Is this *temporary shortage*, represented by lines 2–6, a feature peculiar to the first draft, or must it be

[1] This part of the story can plainly be seen in Appendix Table 4, where the highest percentages of "failed to appear" are found in Arizona, California, Florida, Louisiana, Montana, Nevada, New Mexico, and Texas; the similar high percentages in Connecticut, Illinois, Wisconsin, and Wyoming are explainable on other grounds.

[2] The returns of the State adjutants general, made to The Adjutant General of the Army on Form 146–B (as required by supplemental regulation No. 1) show, as the net number of men who failed to appear and unaccounted for, 46,851. These returns were made up by compiling the total returns of the local boards made through the district boards to the State adjutant generals on Form 146–A, and by then deducting the numbers of those men who had in the meantime reported for service, and by making return of the remainder to The Adjutant General of the Army. Though this method of reckoning differs from that above set forth in accounting for the 252,000 borne on the records of the local boards as "failed to appear," yet the net result of the two reckonings, viz, 47,000 and 50,000, respectively, does not substantially vary.

reckoned with as a permanent factor in future drafts? That is, will there always be such a discount to be made from the gross number finally certified? The failures to appear will in future be largely lessened, the organization being better perfected. The failures to report will be lessened by more complete cooperation by the police. The physical rejections at camp are perhaps a permanent element. The discharges on appeal may not occur to such an extent for future drafts. On the whole, the percentage of shortage will be much lower in future drafts.

2. Comparing the *quota* required to be raised with the number *actually accepted* in camp on November 20, we find a discrepancy:

TABLE 6.

Quota and camp comparisons.	Number.	Per cent.
1. Quota required	687,000	.....
2. Number in camp on Nov. 12	383,675	55.85
3. Shortage	303,325	44.15

1. This shortage was of course temporary only, for the boards will continue to order men up for mobilization and into camp until the quota is finally filled.

2. The reason for the shortage on November 20 was the unpreparedness of the camps. The date originally fixed for mobilization into camp was September 5. On that date, and ever since that date, the local boards had in readiness large numbers of men in excess of the numbers actually ordered to be entrained. The selective-service administration produced the men on schedule time; the delay has been solely due to the delayed readiness in camp construction and equipment at various points.

3. There will, however, always be at intervals a small difference between required quota and men actually and permanently in camp. Interim enlistments and commissions represent only a credit to each board on its quota, and thus a slight discrepancy will always exist between this nominal and actual man power at camp. When registered and called men are enlisted or commissioned in the Military or Naval Service, their papers only are forwarded to camp by local boards; such are termed "paper men," being in the service elsewhere, and appearing only on the records of such camps to which their respective local boards would have sent them; therefore the camp quota (representing the National Army) is temporarily short, but the national quota with these items counted in (representing additions to the war strength of the Regular Army and the National Guard) will ultimately be filled.

(V) COLORED CITIZENS UNDER THE FIRST DRAFT.

The following table shows the number of colored citizens who were affected by the first selective draft:

TABLE 7.

Colored citizens registered.	Number.	Ratio to total registrants.
1. Total of all registrants	9,586,508	100.00
2. Total of colored citizens registered	737,626	7.69

Thus it appears that the total registration of citizens of African descent was nearly 8 per cent of the entire (composite) registration.

2. What proportion of colored citizens registered were *called* by the boards?

TABLE 8.

Colored citizens called.	Number.	Ratio to colored registered.	Ratio to white registered.
1. Total colored citizens registered	737,626	.....	.....
2. Total whites registered	8,848,882	.....	.....
3. Colored citizens called	208,953	28.33	.....
4. Whites called	2,873,996	.....	32.48

Thus it is shown that 28.33 per cent of such registered colored citizens were called by the local boards for examination as to availability for service, in contrast with 32.48 per cent of white registrants. Appendix Table 8 shows this variance for the respective States.

The difference is apparently due to the circumstance that in some States the roster of colored and white was kept separate, and that the call sometimes proceeded more rapidly with one than with the other.

3. What proportion of colored citizens called were *certified* for service?

TABLE 9.

Colored citizens certified for service.	Number.	Ratio to colored called.	Ratio to white called.
1. Total colored citizens called	208,953	.....	.....
2. Total whites called	2,873,996	.....	.....
3. Colored citizens rejected, exempted, and discharged	133,256	63.77	.....
4. Whites rejected, exempted, and discharged	2,162,783	.....	75.25
5. Colored citizens certified for service	75,697	36.23	.....
6. Whites certified for service	711,213	.....	24.75

Thus it appears that out of every 100 colored citizens called 36 were certified for service and 64 were rejected, exempted, or discharged; whereas out of every 100 whites called 25 were certified for service and 75 were rejected, exempted, or discharged.

Appendix Table 9 shows the variant figures for the several States.

The explanation of this difference can not be yet definitely ascertained, until a more thorough study of the records becomes possible. The difference is probably not due to either a difference in physical qualifications, nor to a difference in the applicability of the several legal grounds for exemption and discharge. So far as the several regions of the country are concerned, the lesser ratio for colored to white certified appears mainly, but not exclusively, in the Southern States.

4. If the same processes were adhered to, as in the first draft, what disposition would be made of the remaining *uncalled* colored registrants?

TABLE 10.

Colored citizens in later drafts.	Number.	Ratio to colored not called.
1. Colored not called for examination	528,673	100.00
2. Exemptions, discharges, and rejections (estimated)	337,134	63.77
3. Selectives for National Army (estimated)	191,539	36.23

Thus it appears that, if future drafts were to be conducted by the same processes of selection, we might reasonably expect to increase our National Army strength by only 191,539 of the uncalled registered colored citizens still to be examined; the balance, 337,134, being probably covered by exemptions, discharges, or rejections.

(VI) CAUSES FOR EXCESS OF MEN CALLED OVER MEN OBTAINED BY BOARDS.

Turning back now to the number of called persons not certified for service by the boards (Table 2, line 5), and seeking for the causes thereof, they fall into two general classes: Physical rejections, and legal exemptions or discharges. These two causes were distributed as follows:

TABLE 11.

Causes for nonacceptance.	Number.	Per cent of called.	Per cent of not certified.
1. Total men called	3,082,949	.....	.....
2. Total not certified	2,025,586	65.70	.....
3. Rejected physically by local boards	730,756	23.70	36.08
4. Exempted or discharged on claims	1,294,830	41.99	63.92
5. Total certified (either finally or awaiting appeal)	1,057,363	34.30	.....

1. Thus of the total persons *not certified* it appears that physical disqualification furnished 36 per cent of the total, while legal exemptions and discharges furnished 64 per cent.

2. Taking the total men *called* for examination or hearing (Table 11, line 1), it appears that the percentage rejected for physical disqualification was 24 per cent, and that the percentage exempted or discharged on claims was 42 per cent.

XI.

REJECTIONS FOR PHYSICAL DISQUALIFICATION.

Taking first among these two general causes for rejection that of physical disqualification, we note that the foregoing figures show us merely the relative importance of this ground of rejection to the other grounds, but do not throw any light on the absolute physical condition of draftable men.

1. For this purpose we must examine the proportion of physical rejections to *all* persons *physically examined*. The figures are:

TABLE 12.

Physical rejections.	Number.	Per cent.
1. Total examined physically by boards	2,519,706	100.00
2. Total rejected by local boards	730,756	29.11
3. Total accepted by boards	1,779,950	70.89

Thus it appears that the *percentage of physical disqualification* to all men examined was approximately 29 per cent. Appendix 12 shows the variant figures for the several States.

During the Civil War this percentage approximated 26 per cent (report of the Provost Marshal General, Part I, p. 252, Tables 2, 8, 14, 20, 25). In view of the great advance since that date in standards of medical diagnosis and physical perfection, the foregoing figures indicate a decided improvement in national physical condition during the past two generations.

The Civil War percentages were:

	Per cent.
First draft	31.69
Second draft	24.76
Third draft	24.95
Fourth draft	13.42
Average for all	25.74

There was evidently a great relaxation in strictness of examination as the war proceeded. It should be noted, too, that the war had been in progress for some time before the first draft was made, and that the men later examined probably fell below the physical average of the men available at the opening of the war.

2. Comparing the physical rejections with the total men *called*, we find:

TABLE 13.

Physical rejections and total called.	Number.	Ratio to total called.
1. Total men called for examination and hearing	3,082,949	.....
2. Examined and rejected on physical grounds	730,756	23.70
3. Examination not required by law.	54,352	1.76
4. Examination otherwise postponed (estimated)	265,597	8.62
5. Failed to appear for examination.	252,294	8.18
6. Accepted on examination	1,779,950	57.74

The difference between this percentage in line 2 and that of Table 12, line 2, is due of course to the fact that not all persons called were physically examined. The persons called but not physically examined were (1) those whose physical examination was postponed under regulations, section 16, because they claimed certain exemptions; (2) those who failed to appear, and were there certified for service without physical examination; and (3) those who were called and heard as to legal claims, so as to have an ample supply of men ready in excess of quota, but were not physically examined, pending decision as to their need to fill quota.

3. The *causes* for rejection, when ascertainable, will be of great sociological and medical value. But, in the present emergency, the time and labor to examine in detail two million and a half records can not be spared.

4. But the physical examination at the local boards was further supplemented by a second examination of the accepted men at the camp by *camp surgeons*. What was the result?

TABLE 14.

Physical rejections at camp.	Number.	Per cent arrived in camp.	Per cent arrived from local boards.
1. Examined by local boards to obtain the number in line 3 (estimated)	561,000	.....	.....
2. Arrived in camp (to Nov. 20).	413,384	.....	.....
3. Men passed by local boards (estimated)	393,384	.....	.....
4. Rejected by camp surgeons (estimated)	22,989	.....	5.8
5. Men not examined by local boards (estimated)	20,000	.....	.....
6. Rejected by camp surgeons (estimated)	6,720	.....	.....
7. Total accepted in camp (to No. 20)	383,675	92.84	.....
8. Total rejected at camp (to Nov. 20)	29,709	7.16	.....

32.29.61

RATIO OF PHYSICALLY QUALIFIED TO PHYSICALLY EXAMINED, BY STATES.

(*a*) The percentage 7.16 in line 8, however, is not the criterion of the superior strictness of the camp surgeons over the local boards, because the men arriving at camp included a large number who had failed to appear at all before the local boards (line 5). These men had been certified to the district boards and reported to the State adjutant general (Form 146A), and then had been searched out and sent forward directly to camp by the adjutant general without prior physical examination at all; thus, obviously, they must not be included in comparing the revisory work of the camp surgeons with that of the local boards. An inspection of a sample series of records indicated that this class of men accounted for about 1 in every four rejections. The proper basis for comparison is, therefore, the ratio of rejections by camp surgeons of men already physically examined by local boards to the total of such men arrived in camp.

(*b*) This comparison (line 4) shows that the percentage of men accepted by local boards who did not measure up to the standards of the camp surgeons was only 5.8 per cent. This small figure is a remarkable testimony to the efficiency of the local board surgeons.

Moreover, as the 393,000 men in line 3 represent only the acceptances (70 per cent) out of a group of 561,000 examined, and as the 23,000 rejected at camp (line 4) are only 4 per cent of that number, it may be said that the amount of additional corrective culling effected by the camp surgeons' labors was 4 per cent on the whole mass examined.

(*c*) Rumors here and there in the public press stated that the camp surgeons had discovered, among the men accepted by the local boards, some with glass eyes, some with cork legs, and some with other obvious disqualifications. If such men were found, no disparagement is involved for the local board surgeons; for it is safe to assert that such grossly defective persons came from the contingent of about 20,000 men who had never appeared before the local boards, but had been gathered up by the adjutants general and sent direct to the camps. There is no ground for supposing that the local board surgeons were either incompetent or careless to that extent. The spirit of their practice was to make all intendments in favor of the Government; but nothing permits us to suppose that they would or did send to camp any men with cork legs or glass eyes.

(*d*) Doubtless the local boards varied extremely in the strictness of their examinations. But so also, it seems, did the camp surgeons. Table 14A shows that the percentage of rejections at camp varied between 0.72 per cent and 11.87 per cent; and as the physical condition of the men from the different regions can not entirely account for this, it must be attributable in part to differences of strictness in the examinations by the camp surgeons:

TABLE 14A.

Specific camp showings for physical rejections.	States contributing to camp.	Number arrived.	Number rejected.	Per cent of arrived.
1. Camp Custer	Mich., Wis.	17,487	1,660	9.49
2. Camp Devens	Conn., Me., Mass., N. H., N. Y., R. I., Vt.	36,082	4,281	11.87
3. Camp Dix	Del., N. J., N. Y.	19,804	1,573	7.94
4. Camp Dodge	Ill., Iowa, Minn., N. Dak.	20,505	690	3.36
5. Camp Gordon	Ala., Ga., Tenn.	19,935	1,556	7.80
6. Camp Grant	Ill., Wis.	26,658	1,148	4.30
7. Camp Jackson	Fla., N. C., S. C.	17,754	1,975	11.12
8. Camp Lee	Pa., Va., W. Va.	36,938	920	2.49
9. Camp Lewis	Cal., Idaho, Mont., Nev., Oreg., Utah, Wash., Wyo.	46,313	5,095	11.00
10. Camp Meade	D. C., Md., Pa., Tenn.	35,971	2,245	6.24
11. Camp Pike	Ala., Ark., La., Miss.	24,389	1,819	7.46
12. Camp Riley	Ariz., Colo., Kans., Mo., Nebr., N. Mex., S. Dak.	38,975	281	.72
13. Camp Sherman	Ohio, Pa.	9,850	1,012	10.27
14. Camp Taylor	Ill., Ind., Ky.	27,903	2,143	7.68
15. Camp Travis	Okla., Tex.	32,746	993	3.03
16. Camp Upton	N. Y.	31,423	2,318	7.38
17. Totals		[1]442,733	29,709	

[1] A difference in the source of the figures accounts for the difference between this total and that of line 2, table 14.

5. But were the Surgeon General's rules for physical examination, as set forth in the directions to the local boards, *stricter than necessary* for securing efficient fighting men? On this point the civilian surgeons have expressed variant opinions. A large majority consider that the physical requirements are not too exacting. But a considerable number deem the requirements too strict in many respects, notably as to the weight-and-height relation, teeth, eyes, and feet, and contend that the regulations as strictly applied tend to exclude many capable and efficient men. For example, one board cited a case of exclusion for flat-foot of a man who had for many consecutive seasons endured the hardships of a guide's vocation in the Canadian forests; and the prevalence of flat-foot among sturdy negroes of the South was frequently commented on.

6. Was there any extensive attempt at *deception* of the local board surgeons by registrants called for examination?

It is gratifying to report that falsification was attempted to only a slight and negligible extent. Here and there a board reports a locality as showing 50 per cent of attempted falsification; but these instances were sporadic, and represent only some local obliquity of morals.

7. Of the various *grounds for rejection*, which were the most common? It must be left to the future to study accurately the valuable mass of data now latent in the records. Time has sufficed only to examine a

small group of the records of rejections; 10,000 men were represented, spread over eight camps. The specific source of defect showing the largest percentage was *eyes;* and the next largest, *teeth.* The figures for the principal causes of rejection are as follows:

TABLE 15.

Causes for physical rejections.	Number.	Per cent.
1. Total number of cases of physical rejections considered	10,258	.....
2. Alcoholism and drug habit	79	0.77
3. Physical undevelopment	416	4.06
4. Teeth	871	8.50
5. Blood vessels	191	1.86
6. Bones	304	2.96
7. Digestive system	82	.80
8. Ear	609	5.94
9. Eye	2,224	21.68
10. Joints	346	3.37
11. Muscles	66	.64
12. Respiratory	161	1.56
13. Skin	118	1.15
14. Flat foot	375	3.65
15. Genito-urinary (nonvenereal)	142	1.39
16. Genito-urinary (venereal)	438	4.27
17. Heart disease	602	5.87
18. Hernia	766	7.47
19. Mentally deficient	465	4.53
20. Nervous disorder (general and local)	387	3.77
21. Tuberculosis	551	5.37
22. Underweight	163	1.59
23. Ill defined or not specified	93	.91
24. Not stated	809	7.89

8. As between *urban* and *rural* residents, the figures throw an interesting light on the much-discussed question of the relative physical condition of country and city boys. Selection was made of a typical set of cities of 40,000 to 500,000 population, having no large element of foreign immigrants, and distributed over 10 different States (Alabama, Arkansas, California, Colorado, Kansas, Montana, Nebraska, New York, North Carolina, and Texas), and a corresponding set of counties of similar total size located in the same States, and containing no city of 30,000 population; the total number of registrants represented was 315,000. The comparison results as follows:

TABLE 16.

Urban and rural rejections.	Number.	Per cent. of examined rejected.
1. Urban areas, total persons physically examined	35,017	.....
2. Accepted	25,048	71.53
3. Rejected	9,969	28.47
4. Rural areas, total persons physically examined	44,462	.....
5. Accepted	32,030	72.04
6. Rejected	12,432	27.96

The result, therefore, is virtually a tie for the country boy and the city boy.

XII.

EXEMPTION AND DISCHARGE IN GENERAL.

It has been seen that the percentage of all called persons who were rejected on claim of exemption or discharge was 64 per cent, totaling 1,294,830 (Table 11, line 4).

Before examining the several grounds for such rejections it is necessary to note (*a*) the mode of computing this total, and (*b*) the relation of claims made to claims granted.

(I) MODE OF COMPUTING EXEMPTIONS AND DISCHARGES.

To ascertain the total exemptions and discharges, the number granted by the local boards must be increased by the numbers later granted by the district boards and by the President. The figures are:

TABLE 17.

Exemptions and discharges.	Number.	Per cent.
1. Total of all exemptions and discharges	1,294,830	.....
2. Exemptions and discharges by local boards (as of Nov. 12)	1,161,206	89.68
3. Discharges by district boards on appeal (as of Nov. 18)	78,829	6.09
4. Discharges by district boards on occupational claims (as of Nov. 18)	53,843	4.16
5. Discharges by President on appeal (as of Dec. 16)	952	.07

These figures are slightly short of the facts, because of the cases still pending (on November 18) in the district boards, and (December 15) on appeal to the President (lines 2, 3, 4). The possible number of pending appeals that may be granted is projected in the following table:

TABLE 18.

	Pending appeals.	Probable total of discharges granted.
1. Appeals pending before district boards Nov. 18 (estimated)	16,156	.....
2. Appeals (44.96 per cent) likely to be granted (Table 38)	7,268	.....
3. Appeals pending before President Dec. 15	8,794	.....
4. Appeals (7.18 per cent) likely to be granted (Table 40)	631	.....
5. Total pending appeals likely to be granted (lines 2 and 4)	.....	7,899
6. Exemptions and discharges already granted (Table 10)	.....	1,294,830
7. Grand total of exemptions and discharges granted (estimated) (lines 5 and 6)	.....	1,302,729

32.29.92

(II) RELATION OF TOTAL PERSONS CALLED TO CLAIMS MADE AND CLAIMS GRANTED.

Two questions here must be answered: What proportion of persons *made* claims of exemption or discharge? What proportion of their claims were *granted?*

The first of these inquiries affects the popular willingness to serve at any sacrifice. The second inquiry involves both the popular willingness to make groundless claims and the boards' laxness or overstrictness in granting or refusing them. The figures are:

TABLE 19.

Relation of persons called to persons making claims.	Number.	Ratio to called.	Ratio to claims filed.
1. Total persons called	3,082,949	.....	.....
2. Total claims made	1,560,570	50.62	.....
3. Total claims granted	1,215,049	39.41	77.86
4. Total claims made to local boards	1,419,678	46.05	.....
5. Claims granted	1,161,206	37.67	81.79
6. Total claims made to district boards	140,892	4.57	.....
7. Claims granted	53,843	1.74	38.21

1. Thus it appears that 50 in every 100 persons called *made a claim* of exemption or discharge.

It further appears (Appendix Table 19) that the State where the highest percentage of claims was filed in local boards was Kentucky, and the lowest was Montana.

The reports of the local boards show clearly that in general the community has cordially and loyally supported the boards, and the individuals summoned for service have willingly accepted the duty to serve without attempting to strain the uttermost limits of legal privilege in order to escape service. Nevertheless a few communities appear to have endeavored to abuse the exemption privilege; these communities, however, being widely scattered. On the other hand, many communities have made a high record for patriotism by proudly declining to avail themselves of their legal privileges. Appendix Table 45 shows the location of these banner communities.

In general, the local boards were distinctly less favorably disposed than was the public to recognizing claims for exemption or discharge.

2. It appears that for 77 in every 100 persons claiming the *claims* were *granted*, i. e., for 23 in every 100 the claims were either groundless or were ruled upon overstrictly by the boards.

It further appears (Appendix Table 19) that the State having the highest percentage of claims granted by local boards was Connecticut, and the lowest was Mississippi.

As to the difference of result in local and district boards, it appears that the district boards either were more strict or were more assailed by groundless claims than the local boards.

A pronounced majority of the local boards report that unfounded claims were few and that exaggeration was not serious. Many boards, on the other hand, say that 40 or 50 per cent of the claims were unfounded or exaggerated; reports that 25 per cent of the claims were exaggerated are common.

A few boards confess that they administered the exemption provisions in a liberal spirit, especially in dependency cases, but in general the boards declare that they interpreted the provisions strictly and gave the Government the benefit of a doubt, convinced that this policy was supported by the people.

The public in some districts appears to have been more favorably disposed to dependency exemptions than to those resting on agricultural or industrial grounds. The reason for the latter classes of exemptions were not always clearly understood; for example, the exemption of a prosperous farmer having large property was likely to be resented.

3. Is any improvement feasible in the mode of *inquiring into the truth of claims?*

Nearly all of the boards believed that improvement is feasible. Twenty-five boards say that the new regulations and questionnaire meet their criticisms of the old mode, or at least constitute a great improvement. The suggestions of many other boards indicate that they had not yet seen the new regulations. Thus a number of boards recommended that they be given authority to summon and examine witnesses, while others suggest that affidavit forms in dependency cases be elaborated, much as they have been in the new regulations.

4. A further question has some interest. What proportion of men *now certified* into the National Army went willingly or unwillingly? The actual state of mind, of course, can not be known. But the filing of an unsuccessful claim for exemption or discharge is at least an index of unwillingness, and the figures here show as follows:

TABLE 20.

Involuntary conscripts.	Number.	Ratio to total certified.
1. Total certified for service in the National Army	1,057,363	.....
2. Involuntary conscripts (failed to appear, or filed unsuccessful claims for exemption or discharge)	418,309	39.56
3. Voluntary conscripts (filed no claims for exemption or discharge)	639,054	60.44

CHART A TO TABLE 19.

Ratio of persons filing claims in local boards to persons called, by States.

CLAIMS FILED CALLED BUT NO CLAIMS FILED

32096°—18——4

CHART B TO TABLE 19.

Ratio of claims granted in local boards to claims made, by States.

CLAIMS GRANTED CLAIMS MADE

(III) RESPECTIVE GROUNDS FOR EXEMPTION AND DISCHARGE BY LOCAL BOARDS.

Coming now to the several grounds for the granting of claims of exemption or discharge we find them thus for the local boards:

TABLE 21.

Grounds for exemption and discharge.	Number.	Ratio to total claims.
1. Total claims granted	1,161,206	.....
2. Dependency (sec. 20 *h*)	859,150	73.99
3. Alienage (sec. 18, *e* and *f*)	228,452	19.67
4. Vocations (sec. 18 *a*, *b*, *c*, *d*, sec. 20 *a*, *b*, *c*, *d*, *e*, *f*, *g*)	67,716	5.83
5. Religious creed (sec. 20 *i*)	3,887	.34
6. Moral unfitness (sec. 21)	2,001	.17

It thus appears that dependency furnished 74 per cent of the rejections and alienage furnished nearly 20 per cent, or together made 93¾ per cent of the whole.

These several grounds may now be examined separately.

XIII.

DEPENDENCY AS A GROUND FOR REJECTION.

1. A first inquiry would be: What *proportion* of all *persons having dependents* sought discharge on that ground? This question can not be answered—partly because the needful examination of individual files has not been feasible in the limited time available, and partly because most persons not making such claim refrain from disclosing the dependency of their families.

2. A second inquiry is: How far was dependency a *less extensive ground for discharge than marriage* would have been if the law had made marriage alone a sufficient ground? The figures are:

TABLE 22.

Dependency exclusions or discharges.	Number.	Per cent of total persons called.	Per cent of married persons called.	Ratio between married dependency discharges and married acceptances.
1. Total persons called	3,082,949	.....	.....	.....
2. Total married persons called	1,500,056	48.66	.....	.....
3. Married persons accepted	163,115	.....	10.87	18
4. Married persons exempted or discharged on all grounds	1,336,941	.....	89.13	.....
5. Married persons discharged for dependency of wife or children.	748,762	.....	.....	82

Thus the first draft gained 163,115 of the total call by not having marriage alone as the ground of discharge. But this figure is a little too high, because not all married persons would have claimed discharge.

More significantly, the *ratio* of married persons accepted (line 3) to married persons discharged for dependency (line 5) was 18 per cent and 82 per cent, respectively, showing that dependency was to that degree a less extensive ground of discharge than marriage alone would have been. Table 22 in the Appendix shows the variation in the several States.

These figures demonstrate the wisdom of Congress in establishing dependency, rather than marriage alone, as the ground for discharge; this provision of the statute has saved for the Army some 163,000 men, or 18 per cent over the number discharged by the opposite provision.

And that this distinction of the statute commands the solid support of public opinion, after a fair and full trial, is equally plain. In answering the question, "Should marriage be substituted as the ground for discharge?" an overwhelming majority of the boards, both local and district, are opposed to marriage alone as a ground for discharge; apparently the remainder would favor marriage-and-children as the ground. Those boards who at the time of reporting had studied the new regulations of November expressed their satisfaction with the way in which this subject is there dealt with.

In administering the statutory rule there was an entire lack of uniformity in the action of the local boards. Many discharged all or virtually all married men (see chart to Table 25); some discharged married men with children; some held many married men with children. Probably there were as many criticisms of the local boards for holding too many married men as for discharging too many.

There is no doubt that a large number of local boards in the aggregate did discharge virtually all married men. But this number fell far short of a majority of the boards, it seems reasonably certain. Some shifting of policy was caused by the President's statement late in August; after its issue there was a greater liberality toward married men.

By "married men" the boards usually refer to men married prior either to April 6 or May 18, 1917.

3. A further inquiry is: Which *forms of dependency* were the most common? The figures are:

TABLE 23.

Specific dependency classes.	Number.	Ratio to total discharges.
1. Total discharges for dependency	859,150	.....
2. Wife, or wife and children	743,141	86.50
3. Widowed parent	56,002	6.51
4. Infirm parent	49,340	5.75
5. Motherless child	5,621	.66
6. Minor orphan brothers and sisters	5,046	.58

32.29.83

CHART TO TABLE 22.

Ratio of married accepted to married discharged for dependency.

MARRIED ACCEPTED

MARRIED DISCHARGED FOR DEPENDENCY

4. Another inquiry is: For *future drafts*, how far will married men form an element to be reckoned with? The figures are:

TABLE 24.

Future prospects as to married men.	Number.	Per cent.
1. Total registered men not called yet	6,503,559	.....
2. Known married men (June 5)	3,149,473	48.43
3. Known single men (June 5)	3,354,086	51.57

Thus it appears that in future drafts we shall find virtually every other man married.

5. In these totals of married and single yet uncalled, what is the net prospect of their *relative availability*, as shown by the experience of the first draft? The figures show that the percentage of married men accepted was 10.87 per cent; the chart to Table 25 shows the variances for the several States.

TABLE 25.

Future prospects as to available single men.	Number.	Ratio of married men accepted to total married called or to be called.	Ratio of single men accepted to total single called or to be called.
1. Total married not yet called	3,149,473	.....	.....
2. Total single not yet called	[1] 3,354,086	.....	.....
Accepted men in *first* draft (called):			
3. Married	163,115	10.87	.....
4. Single	623,796	.....	39.41
Probable net acceptances on *later* draft (not called):			
5. Married	342,348	10.87	.....
6. Single	1,321,845	.....	39.41

[1] From this number should be deducted the number of marriages of such men contracted since June 5, estimated at 97,128, by taking the Census Bureau's estimated percentage of all marriages by men 21 to 30, viz, 6.95 per cent per annum, for five months, and applying it to the number of single men still uncalled.

This signifies that, after all grounds of rejection have been passed upon (whether dependency, physical disqualification, or all else), the net available numbers of married men and single men, respectively, would be as shown in lines 5 and 6, assuming that the same rules continued to be applied. This is of service in estimating the probable effect of the new classification announced in November.

XIV.

ALIENAGE AS A GROUND FOR EXEMPTION.

Here the figures are:

TABLE 26.

Alien exemptions.	Number.	Ratio to population.	Ratio to registered.	Ratio to called.
1. Total alien male population 21 and over (estimated)	2,800,000	.....	.....	.....
2. Total alien males 21–30 registered	1,243,801	44.42	.....	.....
3. Total aliens called	457,713	.....	36.80	.....
4. Aliens discharged, exempted, or rejected	381,168	.....	.....	83.28
5. Aliens certified for service	76,545	.....	.....	16.72

1. It thus appears that the proportion of *called* aliens *discharged* was 83 in 100.

(*a*) The proportion of aliens discharged, however, varied in *different States*, as shown by Appendix Table 26, the largest proportion being found in Delaware and the smallest in Montana.

(*b*) In the populous *metropolitan centers*, where the largest numbers of aliens were concentrated, there was also much variance, as shown in Appendix Table 26. There the largest proportion of discharges was found in Seattle and the smallest in Philadelphia.

(*c*) Was the fact that the aliens accepted were as many as 17 in 100 due to their *voluntary waiving of claim*, or to their ignorance? The figures do not reveal the answer, but the reports from the boards throw some light on this:

Most of the boards say that no appreciable number of aliens were certified through ignorance on their part of their privilege of exemption. A comparatively small number report that some—generally only a few—were certified through such ignorance. The areas where this occurred were the congested metropolitan wards, having high numbers of registrants; the overworked clerks were sometimes heedless of aliens who could not make their desires known; moreover, the aliens' ignorance of the language and of the legal system often discouraged them from persisting in the due presentation of their claims. Add to this the marked sentiment prevailing in some localities

32.29.84

CHART TO TABLE 25.

Ratio of married accepted to married called.

MARRIED ACCEPTED

MARRIED BUT NOT ACCEPTED

that the quota system fixed by the act of Congress made a burdensome discrimination in favor of aliens. These considerations suffice to explain the occasional rumors in the public press as to the treatment of aliens. There is no reason to suppose that aliens were not given full consideration in any but a very few instances. The figures in tables 27 and 28 strongly corroborate this conclusion. There is ample testimony also that wherever such errors were brought to the boards' attention every effort was made to correct them; many aliens were in this way discharged from camp.

It must also be remembered that many aliens were strongly sympathetic with the allies' cause, and were ready and desirous to serve. An overwhelming majority of the boards, to be sure, report that no appreciable number of aliens were willing to serve; some boards say "a few were willing." On the other hand, in one Chicago board, 40 per cent of the registered aliens were willing; in Carlyle, Clinton County, Ill., 50 per cent; in Dekalb County, Ill., 75 per cent.

(*d*) As between *neutral* aliens, *allied* aliens, and aliens allied with the enemy, were there differences of attitude?

The boards' answers to this question are rather indefinite, but it seems probable that while allied and neutral aliens are more sympathetic in their attitude toward the selective-service law than are aliens allied with the enemy, their sympathy does not very often find expression in an eagerness to serve in the Army.

As between allied and neutral aliens, a number of boards say the allied aliens showed a better attitude, but there are one or two boards who found the neutral aliens the more willing to serve.

2. On the whole, how did aliens fare, *compared with citizens* and declarants, in being held for service after all exemptions were passed upon? The figures are:

TABLE 27.

Aliens, declarants, and citizens compared.	Number.	Ratio to citizens called.	Ratio to aliens called.
1. Total registered citizens and declarants called [1]	2,625,236	.....	.....
2. Certified for service	710,366	27.06	.....
3. Total aliens called	457,713	.....	.....
4. Certified for service	76,545	.....	16.72

[1] By "declarants" is meant such aliens as have taken out their first naturalization papers and thereby declared their intention and desire to become full citizens of the United States. Declarants are liable to serve under the selective-service act.

It thus appears that the benefit of alienage, over and above all other grounds for exemption and discharge, amounted to 10 per cent.

3. Was alienage the *sole ground* availed of for exemption by aliens, or did they avoid service on other grounds? The figures are:

TABLE 28.

Grounds of aliens' claims.	Number.	Ratio to called but not accepted.
1. Total aliens called but not accepted	381,168	.....
2. Exempted on claim of alienage	228,452	59.93
3. Exempted, discharged, or rejected on other grounds	152,716	40.07

Thus it appears that 4 in 10 aliens were enabled to avoid service in other ways than by claiming alienage.

4. What was the difference in the number of discharges for aliens proper and for *declarant aliens?* The figures are:

TABLE 29.

Aliens and declarants.	Number.	Ratio to called.
1. Total aliens called for examination	457,713	.....
2. Discharged or exempted or rejected	381,168	83.28
3. Total declarants called	180,461	.....
4. Discharged or exempted or rejected	133,729	74.10

Thus it appears that the percentages of aliens and of declarants, respectively, discharged, exempted, or rejected, were 83 per cent and 74 per cent.

5. What was the proportion of *citizens native*, *citizens naturalized*, and *declarants*, when called, who were certified for service? The figures are:

TABLE 30.

Naturalized citizens called and accepted.	Number.	Ratio to called.
1. Total citizens native called for examination	2,355,602	.....
2. Certified for service	643,559	27.32
3. Total citizens naturalized called	89,173	.....
4. Certified for service	20,075	22.51
5. Total declarants called	180,461	.....
6. Certified for service	46,732	25.90

Thus it appears that the respective percentages accepted in each class when called for service were 27, 23, and 26.

6. Thus it also appears that the *relative numbers* of these three foregoing classes as certified for service are:

TABLE 31.

Camp strength as to citizenship.	Number.	Ratio to total certified.
		Per cent.
1. Total certified for service	710,366	.....
2. Citizens native	643,559	90.59
3. Citizens naturalized	20,075	2.82
4. Declarants	46,732	6.59

7. For *future drafts*, what is the proportion of *citizens and aliens* in the draftable population not yet called for examination?

TABLE 32.

Aliens and citizens not yet called.	Number.	Ratio to total registrants.
		Per cent.
1. Total registrants not yet called for examination	6,503,559	.....
2. Citizens, native	5,221,663	80.29
3. Citizens, naturalized	181,474	2.79
4. Aliens	786,088	12.09
5. Declarants	314,334	4.83

(*a*) This shows that in future drafts of, say, 500,000, the number of aliens *liable to call* will be 60,450, on the basis of the above percentage.

(*b*) To find the probable number of these aliens who would *enter the service*, after all rejections, exemptions, and discharges were made, on the basis of the present law and original regulations, take the percentage accepted under the first draft (Table 27, line 4), viz, 16.72 per cent; applied to the above total 786,088 (Table 32, line 4), it yields 131,434.

8. *Nationality of the aliens.* (*a*) Grouped according to the status of *belligerency* (as it exists at the time of preparing this report), the figures are:

TABLE 33.

Nationality of aliens.	Total registered.	Total called.	Accepted for service.
1. Cobelligerents	772,744	281,982	49,276
2. Neutrals	148,274	55,901	11,206
3. Allied with enemy	43,352	14,672	1,902
4. Enemy—Germany	40,663	12,959	928
Austria-Hungary	238,768	92,199	13,233
5. Total	1,243,801	457,713	76,545

Appendix Table 33 shows their location by States.

Appendix Table 33A shows the figures for the specific nationalities.

(*a*) The 13,233 Austro-Hungarians in column 3 (accepted for service) were not enemies at the time of the boards' action, nor at the time of making their returns (November 12).

The 928 Germans figuring in column 3 (accepted for service) are accounted for in part by inadvertent misplacing of figures in the boards' statistical returns, and in part by reckoning declarants or naturalized citizens as aliens; for no board would have accepted any Germans for service.

(*b*) Of allied (cobelligerent) aliens, what number would be *available in future drafts*, if by treaty with all cobelligerents and by legislation based thereon such persons ceased to be exempt?

TABLE 34.

Allied (cobelligerent) registrants available.	Number.	Percentage of aliens exempted, etc.
1. Cobelligerents not yet called	490,762	.....
2. Cobelligerents called but exempted, discharged, or rejected	232,706	.....
3. Total (liable to later calls)	723,468	.....
4. Percentage of aliens rejected, exempted, or discharged on other grounds than alienage in the first draft (Table 28)	289,894	40.07
5. *Probable available number for later drafts*	433,574	.....

XV.

OTHER GROUNDS OF EXEMPTION OR DISCHARGE.

(A) VOCATIONS SPECIFICALLY RECOGNIZED IN THE LAW AS A BASIS FOR EXEMPTION OR DISCHARGE.

The selective-service law makes specified vocations a ground for exemption or discharge by local boards (apart from the "necessary industries" dealt with by the district boards).

What was the relative effect of these several grounds of exemption or discharge? The figures:

TABLE 35.

Vocations specifically recognized.	Number.	Ratio to total exemptions on vocational grounds.
		Per cent.
1. Total exempted or discharged on these grounds	67,716	100.00
2. Federal and State officers (sec. 18a)	1,665	2.46
3. Ministers (sec. 18b)	3,976	5.87
4. Divinity students (sec. 18c)	3,144	4.64
5. Military and naval service (sec. 18d)	47,822	70.62
6. Total for *exempted* vocations (sec. 18)	56,607	83.59
7. County and municipal officers (sec. 20a)	889	1.31
8. Customhouse clerks (sec. 20b)	171	.25
9. Mail employees (sec. 20c)	1,476	2.18
10. Arsenal, etc., workmen (sec. 20d)	2,358	3.48
11. Federal employees designated by the President (sec. 20e)	1,777	2.63
12. Pilots (sec. 20f)	1,772	2.62
13. Mariners (sec. 20g)	2,666	3.94
14. Total for *dischargeable* vocations (sec. 20)	11,109	16.41

1. For the foregoing classes the first inquiry is, What *proportion of the whole number* in each such vocation (as shown by census estimates) was exempted or discharged on claim made? The answer could be given only after a careful projection of the thirteenth census figures for the year 1917, and the available time has not sufficed to do this.

CHART TO TABLE 38.

Location of alien registrants, by States.

2. The second inquiry is, What was the *relative size* of this group of exemptions or discharges in the total of exemptions and discharges? This percentage, 5.83 per cent, has already been shown in Table 21, line 4.

3. The local and district boards reports show a *general support* given to this group of exemptions and discharges, with a tendency (if any changes were made) to *eliminate or restrict* some of them.

About one-fifth of the boards recommend that *officers* of the United States and the States should not, as a class, be exempt. A few of these say that only elective officers should be exempt; a large number believe that only the more important officers, or those whose places would be difficult to fill satisfactorily, should be exempt.

Nearly 40 per cent of the boards recommend that *ministers of religion* should not, as a class, be exempt. The reason most frequently given is that they are needed at least as much in the Army as at home, and that their presence would have an excellent effect upon the moral tone of the Army. A few boards suggest that they should be assigned, if they so desire, to noncombatant service.

Ninety out of 133 district boards recommend that *students of divinity* should not, as a class, be exempt. There appears to be a good deal of feeling on this subject. Some boards suggest that an Army camp is the best of training schools for the ministry; a larger number point out that the influence of divinity students in the camps would be excellent. Many say they see no reason for distinguishing divinity students from other professional students, and some suggest that divinity students be treated the same as medical students.

There is practically no opposition to the exemption of persons in *military or naval service;* though there is some feeling that men of draft age who are likely to be called at an early date should not be allowed to take refuge in a noncombatant branch of the service.

The reports indicate considerable dissatisfaction with the laxness on the part of men who have entered the military or naval service in notifying the local boards. By some boards it is recommended that Army officers certify enlisted men. One suggestion is that a man who intends to volunteer should be required first to obtain a card from his local board and then report back to the board with proof of his actual entry into the service.

As already pointed out (pp. 41–42), some 85,000 or more men who enlisted failed to notify their boards of their new status. Moreover, by the terms of the selective-service act persons in the military or naval service on June 5, 1917, were not required to register. These two circumstances explain the small number of exemptions based on this ground.

There is a strong opinion among the boards against the discharge of the *governmental classes* covered by Regulations, section 20 a–e. The best proposal is that these cases should be treated as analogous to those of occupational grounds of discharge and left to the judgment of the district boards. The boards, however, have apparently not fully realized that none of these vocations were dischargeable absolutely and entirely as a class, and that by direction of the President each individual case in all of these Federal groups (customhouse, mail, arsenal, and sundry employees) was treated on its merits as to the necessity of retaining the man at his civic post, and no claim for discharge on those grounds was authorized unless his superior officer, or the Secretary of the department himself (in many cases), issued a certificate of necessity.

A large number of boards oppose the discharge of *county and municipal officers* as a class. This view is partly based on the difficulty of establishing a fair definition which will discharge only those who are really necessary in the local government.

Similar considerations lead several boards to express disapproval of the discharge of *pilots* and *mariners* as a class.

B. RELIGIOUS CREED; "CONSCIENTIOUS OBJECTORS."

1. As to the partial discharge authorized by the law for persons professing a "religious creed opposed to war in any form" (so-called "religious objectors"), the total number of such discharges was 3,887. (Table 21, line 5.)

(*a*) A first inquiry might be: What *proportion* of such creed members availed themselves of this claim? This question can not yet be answered, until time permits a complete examination of the files of the local boards.

(*b*) As to the partial nature of the discharge (leaving them liable to serve only "in some capacity declared by the President to be noncombatant"), it may be stated that the President has not as yet seen fit to call for such noncombatant services in any such instances. Nor has he by any Executive order defined, at the time of preparing this report, the scope of noncombatant services for such persons.

(*c*) This ground of discharge, however, has been far from receiving public support. A very large majority of the district boards recommend that religious objectors should not be discharged. Evidently the feeling is widespread that the religious-creed objection is in many cases not genuine. Furthermore, many boards express the belief that honest religious objection ought not to be allowed to deprive the Nation of an able-bodied defender. Many of the boards, however, which favor holding religious objectors to military service express the opinion that those whose objection seems genuine should be assigned to noncombatant service.

2. The "conscientious objector," so called, has no recognition in the selective-service law, and is thus distinct from the religious-creed member.

(*a*) It was supposed by some that the number of "conscientious objectors" who would refuse to appear if drafted, or to serve if ordered to camp, would be large—as many as 20,000. In fact, the reports from camp commanders indicate that only 561 have disclosed themselves by refusal.

The Secretary of War had under consideration, at the time of preparing this report, a plan of treatment in the camps which will preserve from impairment the necessary standards of military discipline, without doing undue violence to the sensibilities of such of these misguided men as may be sincere in their principles.

(*b*) There is extremely little popular sympathy for this class. Almost unanimously the boards assert that they are slackers in disguise, and ought to be sent to the front.

(*c*) Some boards treat religious and conscientious objectors as one class, and say that, when found to be honest, they might well be assigned to noncombatant service. But it should not be forgotten that the two classes are entirely distinct—legally, morally, and practically. They are *legally* distinct, because the act of Congress expressly recognizes and gives a legal status to the one, but wholly ignores the other. They are *morally* distinct, because the one is obeying what he regards as a divine mandate, binding the conscience of believers, and sanctioned by the settled tradition of their church; while the other is merely choosing to accept the loose and untried speculations of modern theorists who avow no respect for religious scriptures and profess no authority over the conscience. They are *practically* distinct, because the one includes an ascertainable group of individuals, registered in their sect, definitely fixed on May 18 (the date of the passage of the selective-service act), and not capable of enlargement at will; while the other may include anyone whomsoever who has chosen, after May 18 last, to make profession, however insincerely, of an opinion opposed to war; and thus this group, if recognized in practice, would inevitably become an easy and impregnable refuge for an unlimited number of "slackers."

(C) MORAL UNFITNESS.

The selective-service law authorized the President to exclude or discharge the "morally deficient." This was defined by the President's regulation (sec. 21) to include persons convicted and sentenced for felony in any court of record; thus conforming to the general rule forbidding such enlistments (U. S. Rev. Stat., sec. 1118).

1. The total number of such persons, 2,001 (Table 2, line 6), was gratifyingly small.

2. On this subject there is a pronounced difference of opinion among the boards. A considerable majority of the boards believe that the morally deficient should be held for service, (1) because it is not fair to others to discharge them, and (2) because the discipline of the Army and the opportunity to prove their usefulness to their country would be of benefit to them. The dissenting minority emphasize the danger to the moral tone of the Army if moral defectives are admitted. A number of boards say they should be held, but assigned to special service or organized in separate units.

The reports of the boards disclose considerable uncertainty as to the meaning of the words "morally deficient." The President's regulation, above cited, explicitly excluded a certain class, but left to the boards' discretion the further application of the terms of the statute. Such use of local discretion seems to afford the best solution.

3. In the case of persons already *under arrest* or *on bail* on charges of crime there was no uniformity of action. A few boards discharged persons of this class; a larger number held them if the prosecuting attorney was willing to discontinue the prosecution; some reported them on Form 146 A ("failed to appear"); some discharged them temporarily, pending the outcome of the prosecution; many simply certified them for service. The most common practice, apparently, was to certify for service those charged with misdemeanors, but to postpone or temporarily discharge those charged with felony. In many cases it appears that the civil authorities consented to the action of the board in holding men for service.

(D) ENLARGEMENT OF THE GROUNDS FOR EXEMPTION OR DISCHARGE.

By an overwhelming majority, the boards, both local and district, indicate that no additional grounds of exemption of discharge, other than those now recognized, should be provided. Indeed, about a dozen boards express the opinion that there are already too many grounds.

A few boards recommend that students of medicine, dentistry, engineering, and chemistry be exempted or discharged. But this proposal had been anticipated by recent amendments of the selective service regulations enabling such students to be entered in the Enlisted Reserve Corps pending the completion of their

technical studies—a solution more effective for the purpose and more consonant with the spirit of the selective-service system.

XVI.

ENLARGEMENT OF THE AGE LIMITS FOR COMPULSORY MILITARY SERVICE.

Should the class of draftable persons in future drafts be enlarged or diminished, as to the ages to be included?

A pronounced majority of the boards favor some enlargement, but there is great diversity of opinion as to the proper age limit. Nineteen and 35 are perhaps the limits most frequently suggested; but some recommend 40 or 45 years as the upper limit. There is a distinctly stronger demand for raising the maximum age than for lowering the minimum.

The reason given for advocating this enlargement is the fact that there are many good men under and over the present limits who could more easily be spared than an equal number within the limits.

The following additional suggestions are made by a number of boards: (1) That young men who were under age should come within the law when they reach the minimum draft age; (2) that young men of 18 or 19 should be enrolled and trained, so as to be ready for active service immediately upon attaining draft age.

It is obvious that we are at the threshold of this problem in our further provision for the conduct of the war, and that a wise foresight should be employed in settling it.

The two most important preliminary inquiries are: What are the numbers of available men in the additional age-groups? Which groups can we least afford to draw from?

1. The available numbers are as follows:

TABLE 36.

Male population available 1918.	Numbers.
1. Males 31–45 years, both inclusive (estimated)	10,683,249
2. Males 21–30 years, both inclusive, not yet called	6,503,559
3. Males, 18–20 years, both inclusive (estimated)	3,087,063
4. Males arriving at age 21, between June, 1917 and June, 1918 (estimated)	1,000,000

Inasmuch as most (96 per cent) of the age 18–20 group are not married, and most (77 per cent) of the age 31–45 are married, it will serve sufficiently the purpose to estimate the number of single persons available in each of these groups, and then to take the probable number of acceptances, as shown by the percentage of acceptances in the first draft (Table 25). This estimate results as follows:

TABLE 37.

Probable acceptable men in age groups.	Gross number.	Probable per cent of acceptables.	Net numbers.
1. Single males 31–45 years (estimated)	3,525,472	39.41	1,389,388
2. Single males 21–30 years not yet called	3,354,086	39.41	1,321,845
3. Single males 18–20 years (estimated)	2,963,581	39.41	1,167,947
4. Single males arriving at age 21 (estimated)	960,000	39.41	378,336
5. Total	10,803,139		4,257,516

These figures show us the respective sizes of the available reservoirs to be drawn from.

In considering the grounds of preferences for the three groups not now liable to service, conflicting considerations meet us. The younger men are generally deemed to make the soundest and most pliable military material. On the other hand, the older men are more likely to yield in large numbers the occupational skill so necessary in the varied composition of the modern army. Moreover, under the rational selective-service system, which seeks to distribute the burden equally among the willing and the unwilling, it is important, if not essential, to include the older men, because a smaller proportion of them are likely to enlist; i. e., to enter the Army voluntarily without waiting for the call of the law. If the age limits were not enlarged to include the older men for raising the needed numbers, too large a proportion of the younger and more aggressively patriotic men would be withdrawn from civil life, thus unduly injuring the coming generation.

In view, however, of the considerable number of men already available under the law, the main reason for enlarging the age limits at this time is to distribute the burden more equally, in preparation for a later situation of need that may arise. From this point of view, the extension might well be both upward and downward, by way of a registration of all ages 19 to 21 and 31 to 45.

In any event, the greatest caution should be exercised not to interfere with the technical training of the younger group of men. The higher training should be protected from undue inroads; for it is there that the practical sciences are being developed. Both war and industry must be able to count upon a continuous and ample supply of trained young men. The experience of continental countries here has its lessons for us. The technical courses should not be allowed to be gutted. Already, by volunteering alone, many or most colleges have lost (on the average) 50 per cent of their students. The number at stake is not large in respect of the mere man power of the Army, but it is potent in its possibilities for service if properly trained.

A wise expedient would be (if the age limits are lowered to 18 or 19) (1) to require every technical student in a recognized college to enter the Enlisted Reserve Corps, and to relieve him from call by a local board during the completion of his course; (2) to require every such student to take a course of military instruction and drill for each of such years, or to enter an officers' training camp during the summer; (3) to appropriate the sums necessary to provide military instruction and drill at every college furnishing a unit of 100 men. By this means, the vital demand for educated young men could be filled, and at the same time their preparation for military service when needed could be insured.

XVII.

RELATION OF LOCAL AND DISTRICT BOARDS (APPEALS).

The appellate system provided for the revision and control of rulings, and for rulings on claims of exemption and discharge there was an appeal from the local board to the district board.

(I) APPEALS ON RULINGS OF PHYSICAL QUALIFICATIONS.

There was no appeal from a local board ruling on physical qualification, but provision was made for the equivalent of an appeal by the Government from the examining physician to the board when the physician found the man disqualified; this was the method of re-examination by a second physician.

This method, however, has been replaced in the new selective-service regulations (Dec. 15) by a method of sending doubtful cases to a medical advisory board and of permitting an appeal to the district board.

(II) APPEALS ON CLAIMS OF EXEMPTION OR DISCHARGE.

Appeals from rulings of local boards could be taken from any ruling on a claim of exemption or discharge, whether granting or denying such claim.

The figures for such appeals are:

TABLE 38.[1]

Appeals from local boards.	Number.	Ratio to total claims disallowed.	Ratio to total appeals acted on.
1. Total claims disallowed by local boards	245,737	100.00	.....
2. Total appeals filed by parties with district boards (Nov. 18)	191,484	77.92	.....
3. Appeals acted on. Denied	96,499	.....	55.04
4. Appeals acted on. Granted	78,829	.....	44.96
5. Appeals pending Nov. 18 (estimated)	16,156	.....	.....

[1] The data yet available do not cover the appeals taken by persons disputing the correctness of a ruling *granting* such a claim, either a private person or the Government appeal agent. The above data cover only the appeals filed by or on behalf of persons whose claims were *denied*.

Besides these formal appeals, many cases have been "reopened" by local boards, for further hearing, for the correction of clerical errors, etc. (under Compiled rulings, No. 11, *m*, No. 12, *m*, and P. M. G. Telegraphic Instructions 10151, dated Nov. 15, 1917). No data are yet available as to the number or the result of such cases.

1. It thus appears that 78 per cent of all claims disallowed were *appealed*, indicating a marked demand for consideration by an independent authority.

2. It also appears that 45 per cent of all appeals filed were *granted*. This seems to indicate that the institution was a useful and needful one, even though the correctness of the appellate ruling in every case be not assumed. Nevertheless, the wide variances in the figures for the different States (not here printed) show that not much significance can be attached to the average percentage. One board, in Illinois, reports only 2 per cent of reversals on appeal; another board, in Missouri, reports 95 per cent of reversals. In other States the range of reversals was from 10 per cent to 55 per cent, and from 20 per cent to 65 per cent for different boards within the same State. Evidently the average of 45 per cent does not signify that this was the usual amount of correction needed for local boards' rulings, but merely that this was the national average for a wide variety of policies and attitudes in the several district boards.

Nevertheless, the revisory function of the district boards was a valuable and necessary one. Both district and local boards, though naturally taking opposite points of view, concur in this view. Some two-thirds of the local boards express the opinion that the appeal to the district board is useful, not only as tending to uniformity and as increasing public confidence, but as relieving the local boards themselves from the often difficult and delicate task of sitting in final judgment on the cases of their friends and neighbors. The dissent, however, is vigorous and in some cases bitter, the chief argument being that the district boards do not understand local conditions and are not so familiar with the real facts. The district boards are unanimous in believing that the appeal is useful. Many of them speak of it as one of the most important provisions of the law. According to their views, it is essential to the uniform administration of the law and to the correction of errors committed by the local boards; it greatly mitigates dissatisfaction with the decisions of the local boards; it protects registrants from injustice resulting from local prejudice and influence; it serves to prevent local boards from neglecting their duty or abusing their power; it bars the escape of many men who ought to be in the Army.

Most of the district boards report that their relations with the local boards, in interchange of business, were satisfactory. There is frequent complaint, however, of the slowness of local boards in certifying their lists of eligibles. The volume of complaint against the district boards for tardiness in certifying lists is just about equal to that against the local boards by the district boards. As one local board very considerately expresses it, "We realize that they have their troubles also."

3. Under the original regulations the local boards were not required to *make any record* of the grounds of their ruling for the information of the district board in reviewing the ruling. Nor were the district boards required to do the like in reversing a local board ruling. In consequence, few boards of either sort did so. This left each in ignorance of the other's reasons for action and proved to be in some respects undesirable. Most boards recommended a change in the regulations. But this need had been foreseen, and under the revised regulations of November 8, 1917 (sec. 101, Rule XXXIII; sec. 107, Rule XLII), each class of boards is required to enter a minute of its reasons for a ruling. Other minor recommendations have also been anticipated in the new regulations.

XVIII.

INDUSTRIAL NECESSITY AS A GROUND FOR DISCHARGE.

It remains to examine the scope and effect of those discharges placed by law in the original jurisdiction of the district boards, viz, "persons engaged in *industries, including agriculture, found to be necessary* to the maintenance of the military establishment, or the effective operation of the military forces, or the maintenance of national interest during the emergency.

(These will be referred to hereafter as "industrial discharges," to follow the statutory use of the term "industry.")

NOTE.—The figures here to be given have some margin of uncertainty, so far as the net final results are concerned, because the final action of the district boards, and of the President on appeals, was not completed at the date (Nov. 18) when it became necessary to call for the national figures for use in this report. The number of cases pending and undisposed of on that date was approximately 24,652. (Tables 17 and 40.)

Three main inquiries here suggest themselves:

(I) *What were the numbers of industrial claims presented and acted upon by the boards?*

(II) *For the several industries, what was the proportional inroad made on the industry at large*, by the first draft?

(III) *For the several industries, what numbers of registrants* remain *available for future drafts*, under the selective-service act as it now stands?

MODE OF COMPUTATION OF TABLES 39, 42, 43.

1. The docket summaries of the local boards do not show the respective industries of the registrants. For this purpose it was necessary to rely upon the registration cards.

2. Nor do the docket summaries of the district boards specify the respective industries, other than agriculture. For this purpose, it would be necessary to consult the papers filed by each claimant. As the time available was limited, and the boards were overworked, the call for the figures was left optional for the district boards to answer. The total number replying was 95. Hence the figures represent probable percentages only.

3. The total number of industries as classified in the Thirteenth Census was several hundreds. As the boards, in the limited time, could not be asked to classify with such nicety, the census classes were reduced, by condensation, to 30 groups. The census totals for these 30 groups therefore give an accurate basis for computing the effect of the draft on the entire personnel of the respective industrial groups.

4. For topic (I) above, the source of the figures is the docket sheets of the district and local boards. For topics (II) and (III) the source is the registration cards.

Obviously the former source showed only the action taken upon claims made, and was useless for determining the *net effect* of the draft upon a *given industrial group;* e. g., out of 500 registrant farmers in a given area, 100 farmers might have been discharged on industrial claims, and yet 100 others might have been discharged on dependency claims, or 200 in all, so that the net loss to the farming industry was only 300 (instead of 400, as the industrial claim discharges alone would have seemed to indicate). Therefore the registration cards, marked to show whether discharged or not discharged, were taken as the source for this information.

(I) INDUSTRIAL CLAIMS ACTED UPON BY THE DISTRICT BOARDS.

A. *Action of district boards.*—Taking the statutory grouping of *agricultural* and *nonagricultural industries*, the respective numbers of claims for discharge acted upon by the district boards were as follows:

TABLE 39.

Industrial discharges.	Number.	Ratio to total agricultural and non-agricultural registrants.	Ratio to claims.
1. Total agricultural registrants called	782,503	100.00	.....
2. Total agricultural claims filed	93,428	11.94	100.00
3. Held for service	58,812	.....	62.95
4. Discharged	33,528	.....	35.89
5. Pending	1,088	.....	1.16
6. Total nonagricultural registrants called	2,300,446	100.00	.....
7. Total nonagricultural claims filed	47,448	2.06	100.00
8. Held for service	26,247	.....	55.32
9. Discharged	20,315	.....	42.81
10. Pending	886	.....	1.87

1. Thus it appears that 12 in every 100 agricultural registrants called *filed claims*, while but 2 in every 100 nonagricultural registrants called filed claims.

Appendix Table 39 shows how this varied by States.

2. It also appears that 36 in every 100 agricultural *claims were granted*, while 43 in every 100 nonagricultural claims were granted.

Whether the difference was due to variance in strictness or laxity of boards, or to variance in groundlessness of claims, for the two classes, does not appear.

Appendix Table 39 shows the variations in the several States.

3. Dividing all the industries into 30 groups, the relative numbers held for service and discharged in each *industrial group* are shown in Appendix Table 39A.

This table shows that the group in which the greatest percentage of claimants was held for service was trade and merchandise in general; and that the groups in which the least percentage was held for service were iron and steel industries, especially blast furnaces, steel rolling mills, iron foundries, military weapons factories, powder, cartridge and dynamite factories, ship and boat building yards. This throws some light on the convictions of the district boards as to the relative necessity of the various industries, under the definition of the selective-service law.

NOTE TO TABLE 39.—In these figures there is a small margin of uncertainty, because the figures for the total claims filed represent agriculture, etc., as classified in the district board docket sheets, while the figures for total registrants represent agriculture, etc., as classified by the local board enumerators.

The foregoing figures represent the original action of the district boards. On appeal to the President some rulings were reversed, as shown in Table 40.

B. *Appeals from district boards to the President.*—Appeals from rulings of a district board to the President on an industrial claim were the last stage of the selective procedure. The figures are:

TABLE 40.

Appeals to the President.	Number.	Per cent of claims disallowed.	Per cent of appeals acted on.
1. Total claims disallowed	85,059	.....	.....
2. Total appeals to President (Dec. 19)	22,250	26.16	.....
3. Appeals acted on, denied	12,435	.....	92.51
4. Appeals acted on, granted	1,006	.....	[1] 7.49
5. Appeals withdrawn or nonappealable	313	.....	.....
6. Appeals pending (Dec. 19)	[2] 8,496	.....	.....

[1] This figure was on Dec. 15 only 7.18 per cent (952 cases), which percentage was used in the computations for Table 17.
[2] This figure on Dec. 15 amounted to 8,794, which number was used in the computations for Table 18.

1. Thus it appears that 26.16 per cent of *all claims* disallowed were appealed, and that 7.49 per cent of all appeals acted on were granted.

(*a*) The former percentage indicates that there was relatively small disposition to dispute the decisions of district boards.

(*b*) The latter percentage indicates that there was small ground for the employment of the appeal to the President. Inasmuch as many of the appeals were taken where the district board had ruled unanimously after the most careful investigations and deliberations, the revised regulations of November 8, 1917, provide (sec. 111) that an appeal to the President can be taken only when one member of the district board recommends it, as well as either the Government appeal agent or the State adjutant general.

2. Taking the two statutory classes of industrial claims, viz, *agricultural and nonagricultural*, the figures are as follows:

TABLE 41.

Kinds of claims appealed.	Number.	Per cent of claims disallowed.	Per cent of appeals acted on.
1. Total agricultural claims disallowed	58,812	.....	.....
2. Total appeals to President (Dec. 19)	17,218	29.28	.....
Appeals acted on:			
3. Denied	9,457	.....	92.74
4. Granted	740	.....	7.26
5. Appeals pending	7,021	.....	.....
6. Total nonagricultural claims disallowed	26,247	.....	.....
7. Total appeals to President (Dec. 19)	4,719	27.98	.....
Appeals acted on:			
8. Denied	2,978	.....	91.80
9. Granted	266	.....	8.20
10. Appeals pending	1,475	.....	.....
11. Appeals withdrawn or nonappealable	313	.....	.....
12. Total appeals filed	22,250	.....	.....

(*a*) Thus it appears that the percentage of *appeals filed* to claims disallowed was, for *agricultural* claims 29, and for *nonagricultural* claims 28.

(*b*) The percentage of appeals *granted* was for *agricultural* claims, 7.26, and for *nonagricultural* claims, 8.20; indicating no substantial difference between them.

(*c*) For the several States, however, an interesting range of difference appears (Appendix Table 41).

(II) EFFECT OF THE FIRST DRAFT ON INDUSTRY AT LARGE.

The second inquiry here is: What was the proportional inroad made by the first draft upon industry at large, for the several industries? The figures are:

TABLE 42.[1]

Effect of first draft on industry at large.	Total industrial population, 1917.	Total registered.	Total called.	Total accepted for service.	
	Number.	Number.	Number.	Number.	Ratio to population.
A. AGRICULTURE, FORESTRY, AND ANIMAL HUSBANDRY.					
1. Agriculture (farming, truck gardening, fruit raising, etc.)	13,843,518	2,439,246	782,503	205,731	1.48
2. Forestry (lumbering, etc.)	200,991	78,241	24,507	7,984	3.97
3. Animal husbandry (fishing; cattle raising; sheep raising, etc.)	227,325	46,646	15,642	4,570	2.01
B. MINES, QUARRIES, AND WELLS.					
4. Coal mines	600,148	225,109	74,109	18,710	3.12
5. Other mines (copper mines; gold and silver mines; iron mines; lead and zinc mines); quarries; salt mines; salt wells and salt factories	275,561	92,062	35,553	10,377	3.77
6. Oil wells and gas wells	51,223	33,040	10,610	3,026	5.91
C. MANUFACTURING INDUSTRIES.					
(I) Building industries.					
7. House contractors; carpenters; blacksmiths; machinists; electricians; painters; plasterers; plumbers; etc	2,878,792	700,790	231,835	57,970	2.01
(II) Chemical industries.					
8. Powder, cartridge, dynamite, fuze, and fireworks factories	10,307	25,999	9,692	2,310	[1]22.41
9. Fertilizer factories; paint factories; soap factories; other chemical factories	80,331	24,946	7,986	1,926	2.40
(III) Clay, glass, and stone industries.					
10. Brick, tile, and terra-cotta factories; glass factories; lime, cement, and gypsum factories; marble and stone yards; potteries	246,072	74,580	24,928	6,022	2.45
(IV) Clothing industries.					
11. Clothing factories; glove factories; hat factories; shirt, collar, and cuff factories	754,062	114,687	44,952	7,370	.98
(V) Food industries.					
12. Bakeries; butter and cheese factories; candy factories; fish curing and packing; flour and grain mills; fruit and vegetable canning; slaughter and packing houses; sugar factories and refineries; other food factories	396,519	160,709	50,929	11,687	2.95
(VI) Iron and steel industries.					
13. Blast furnaces; steel rolling mills; iron foundries; military weapons factories	373,701	241,145	92,434	22,068	5.90
14. Shipbuilding and boat building	62,071	35,949	11,910	2,628	4.23
15. Agricultural implement factories; automobile factories; wagon and carriage factories; car and railroad shops; other iron and steel factories	822,540	310,318	102,860	24,857	3.02
(VII) Leather industries.					
16. Harness and saddle factories; shoe factories; tanneries; trunk factories	343,805	81,575	24,663	5,063	1.47
(VIII) Liquor and beverage industries.					
17. Breweries; other liquor and beverage factories	89,190	17,669	5,752	1,472	1.65
(IX) Lumber and furniture industries.					
18. Box factories (wood); furniture factories; piano and organ factories; saw and planing mills; other woodworking factories	541,926	145,379	43,144	11,458	2.11
(X) Metal industries (except iron and steel).					
19. Brass mills; clock and watch factories; copper factories; gold and silver factories; jewelry factories; lead and zinc factories; tin-plate factories; tinware and enamelware factories; other metal factories	268,537	123,992	46,480	10,182	3.79

[1] The following adjustments must be made for unavoidable uncertainties:

(*a*) The census figures of 1910 (Thirteenth Census) had to be corrected by estimate for 1917 (column 1); and this estimate can only be approximate, owing to the shifting of industrial activities, etc. The marked instance in which the census projection appears as too low is that of group 8 (powder, cartridges, and dynamite); obviously the large shift to this industry was impossible to estimate by any determinable percentage.

(*b*) The figures in column 2 are subject to some uncertainty for the same reasons set forth in footnote (*a*) to Table 43.

TABLE 42—Continued.

Effect of first draft on industry at large.	Total industrial population, 1917.	Total registered.	Total called.	Total accepted for service.	
	Number.	Number.	Number.	Number.	Ratio to population.
(XI) Paper and printing industries.					
20. Blank book, envelope, tag, paper-box factories; paper and pulp mills; printing and publishing houses	507,986	101,750	30,711	6,745	1.33
(XII) Textile industries.					
21. Carpet mills; cotton mills; hemp and jute mills; knitting mills; lace and embroidery mills; linen mills; rope and cordage factories; sail, awning, and tent factories; silk mills; woolen and worsted mills; sundry textile mills	919,800	155,938	52,462	9,833	1.07
(XIII) Miscellaneous industries.					
22. Broom and brush factories; button factories; charcoal and coke works; cigar and tobacco factories; electric light and power plants; electrical supply factories; gas works; oil refineries; rubber factories; straw factories; other miscellaneous industries	1,254,361	275,679	87,780	22,089	1.76
D. TRANSPORTATION.					
23. Steam railroads	1,236,867	277,018	85,063	21,557	1.74
24. Telegraph and telephone companies	297,067	66,119	20,128	4,955	1.67
25. Water transportation; construction and maintenance of streets, roads, sewers, and bridges; electric and street railways; livery stables; truck, transfer, cab, and hack companies; express companies; Postal Service	1,297,132	400,513	128,262	34,565	2.67
E. TRADE AND MERCHANDISE IN GENERAL.					
26. Banking and brokerage; insurance; real estate; sundry wholesale and retail trades; buying and selling of all sorts of articles; any kind of store or shop; grain elevators; stockyards; warehouses and cold-storage plants	4,708,908	364,151	111,541	24,892	.53
F. PUBLIC SERVICE (NOT ELSEWHERE CLASSIFIED).					
27. Public administration (United States, State, county, city, and township employees); National Defense (Army and Navy); marshals, sheriffs, policemen, watchmen	529,315	335,053	106,068	23,606	4.46
G. PROFESSIONAL SERVICE.					
28. Actors, professional showmen, etc.; artists, sculptors, and teachers of art; clergymen; officials of lodges, religious and charity workers; legal profession; literary professions (journalists, etc.); dentists; physicians and surgeons; veterinary surgeons; musicians and teachers of music; scientific professions; teachers, professors in colleges, etc.; other professional pursuits; students	2,202,609	383,140	119,448	30,082	1.37
H. DOMESTIC AND MANUAL SERVICE IN GENERAL.					
29. Barbers and hairdressers; bartenders; cooks; hotel keepers and managers; janitors, porters; restaurant, café, and lunch-room keepers; saloon keepers; servants; waiters; clerks; laundries; other occupations	4,208,862	977,853	297,348	78,221	1.86
30. Laborers (in general)	4,053,385	1,277,213	403,649	114,955	2.84

1. This table shows, in the first place, that the *percentage* in the several industrial groups *varied* widely.

The causes for this are various and not accurately ascertainable.

One cause is the difference in the size of the 21–30 age group in the different industries. For example, the census of 1910 shows, in agriculture, in 100 males of age 21 upward, 62 of age 21–44 as against 38 of age 45 upward, but in oil and gas wells 80 of age 21–44 as against 20 of age 45 upward; and this explains in part why the percentage taken by the draft (age 21–30) was larger for the latter than for the former industry.

Another cause is the localization of industries in connection with the size of the net quota. For example, if in a certain region most of the draftable persons were in the oil and gas industry, and in another region most were in agriculture, but the quota of the former region had been relatively reduced by large credits for enlistments, the effect of the draft on the two industries would, in appearance, be relatively less in the former than in the latter industry.

Two other obvious causes are the differences in the numbers of exempt aliens and of nonliable females in the several industries.

Further study will doubtless reveal other explanatory causes.

2. It appears, secondly, that, although in no industrial group was the inroad absolutely large in quantity, the groups experiencing the *greatest* inroads were oil and gas wells, powder and cartridge, etc., factories, steel mills, etc., and shipbuilding.

The groups experiencing the *smallest* inroads were agriculture, clothing, leather, liquor and beverage, paper, textiles, trade and merchandise, and professional classes.

Is this result a desirable one, in view of the needs for war preparation and for the maintenance of national welfare during the emergency? This question introduces us to a problem of unusual and pressing importance, viz., the problem of using the selective-service system so as to distribute the contingents contributed to the Army among the several industries in the wisest manner. This problem is discussed in Part I.

It is here enough to point out, with reference to the need of measures *in future* for protecting specific necessary industries from injurious inroads, that the above mass figures can be of little direct service, first, because they do not exhibit in sufficient detail the smaller branches of these groups, such branches differing widely in their relative necessity; and, secondly, because they do not exhibit the relative differences between individuals within a given group or industry, such differences in skill, responsibility, and replaceableness being of vital consequence in any effective scheme of industrial readjustment.

(III) INDUSTRIAL REGISTRANTS AVAILABLE FOR FUTURE DRAFTS.

The third and last inquiry is: For the several industrial groups, what numbers of *registrants*, draftable under the present law, remain *available for future drafts?* The figures are:

TABLE 43.

Industrial registrants still available.	Total registrants. (1)	Registrants still available for draft.					
		Not called. (2)		Called but discharged (3)		Maximum total available. (4)	
A. AGRICULTURE, FORESTRY, AND ANIMAL HUSBANDRY.							
	Number.	*Number.*	*Per cent.*	*Number.*	*Per cent.*	*Number.*	*Per cent.*
1. Agriculture (farming; truck gardening; fruit raising, etc.)	2,439,246	1,656,743	67.92	576,772	23.65	2,233,515	91.57
2. Forestry (lumbering, etc.)	78,241	53,734	68.67	16,523	21.12	70,257	89.79
3. Animal husbandry (fishing; cattle raising; sheep raising, etc.)	46,646	31,004	66.46	11,072	23.74	42,076	90.20
B. MINES, QUARRIES, AND WELLS.							
4. Coal mines	225,109	151,000	67.08	55,399	24.61	206,399	91.69
5. Other mines (copper mines; gold and silver mines; iron mines; lead and zinc mines); quarries; salt mines; salt wells and salt factories	92,061	56,508	61.38	25,176	27.34	81.684	88.72
6. Oil wells and gas wells	33,040	22,430	67.89	7,584	22.95	30,014	90.84
C. MANUFACTURING INDUSTRIES.							
(*I*) *Building industries.*							
7. House contractors; carpenters; blacksmiths; machinists; electricians; painters; plasterers; plumbers, etc.	700,790	468,955	66.92	173,865	24.81	642,820	91.73

TABLE 43—Continued.

Industrial registrants still available.	Total registrants. (1)	Registrants still available for draft.					
		Not called. (2)		Called but discharged (3)		Maximum total available. (4)	
		Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
(II) Chemical industries.							
8. Powder, cartridge, dynamite, fuse, and fireworks factories	25,999	16,307	62.72	7,382	28.39	23,689	91.11
9. Fertilizer factories; paint factories, soap factories, other chemical factories	24,946	16,960	67.99	6,060	24.29	23,020	92.28
(III) Clay, glass, and stone industries.							
10. Brick, tile, and terra-cotta factories; glass factories; lime, cement, and gypsum factories; marble and stone yards; potteries	74,580	49,652	66.58	18,906	25.35	68,558	91.93
(IV) Clothing industries.							
11. Clothing factories; glove factories; hat factories; shirt, collar, and cuff factories	114,687	69,735	60.80	37,582	32.77	107,317	93.57
(V) Food industries.							
12. Bakeries; butter and cheese factories; candy factories; fish curing and packing; flour and grain mills; fruit and vegetable canning; slaughter and packing houses; sugar factories and refineries; other food factories	160,709	109,780	68.31	39,242	24.42	149,022	92.73
(VI) Iron and steel industries.							
13. Blast furnaces; steel rolling mills; iron foundries; military weapons factories	241,145	148,711	61.67	70,366	29.18	219,077	90.85
14. Shipbuilding and boat building	35,949	24,039	66.87	9,282	25.82	33,321	92.69
15. Agricultural implement factories; automobile factories; wagon and carriage factories; car and railroad shops; other iron and steel factories	310,318	207,458	66.85	78,003	25.14	285,461	91.99
(VII) Leather industries.							
16. Harness and saddle factories; shoe factories; tanneries; trunk factories	81,575	56,912	69.76	19,600	24.03	76,512	93.79
(VIII) Liquor and beverage industries.							
17. Breweries; other liquor and beverage factories	17,669	11,917	67.45	4,280	24.22	16,197	91.67
(IX) Lumber and furniture industries.							
18. Box factories (wood); furniture factories; piano and organ factories; saw and planing mills; other woodworking factories	145,379	102,235	70.32	31,686	21.79	133.921	92.11
(X) Metal industries (except iron and steel).							
19. Brass mills; clock and watch factories; copper factories; gold and silver factories; jewelry factories; lead and zinc factories; tin-plate factories; tinware and enamelware factories; other metal factories	123,992	77,512	62.51	36,298	29.27	113,810	91.78
(XI) Paper and printing industries.							
20. Blank book, envelope, tag, paper bag, and paper box factories; paper and pulp mills; printing and publishing houses	101,750	71,039	69.82	23,966	23.55	95,005	93.37
(XII) *Textile industries.*							
21. Carpet mills; cotton mills; hemp and jute mills; knitting mills; lace and embroidery mills; linen mills; rope and cordage factories; sail, awning, and tent factories; silk mills; woolen and worsted mills; sundry textile mills	155,938	103,476	66.36	42,629	27.33	146,105	93.69

TABLE 43—Continued.

Industrial registrants still available.	Total registrants. (1)	Registrants still available for draft. Not called. (2)		Called but discharged (3)		Maximum total available. (4)	
(XIII) *Miscellaneous industries.*							
22. Broom and brush factories; button factories; charcoal and coke works; cigar and tobacco factories; electric light and power plants; electrical supply factories; gas works; oil refineries; rubber factories; straw factories; other miscellaneous industries	*Number.* 275,679	*Number.* 187,899	*Per cent.* 68.16	*Number.* 65,691	*Per cent.* 23.83	*Number.* 253,590	*Per cent.* 91.99
D. TRANSPORTATION.							
23. Steam railroads	277,018	191,955	69.29	63,506	22 93	255,461	92.22
24. Telegraph and telephone companies	66,119	45,991	69.54	15,173	22.96	61,164	92.50
25. Water transportation; construction and maintenance of streets, roads, sewers, and bridges; electric and street railways; livery stables; truck, transfer, cab, and hack companies; express companies; postal service	400,513	272,251	67.97	93,697	23.39	365,948	91.36
E. TRADE AND MERCHANDISE IN GENERAL.							
26. Banking and brokerage; insurance; real estate; sundry wholesale and retail trades; buying and selling of all sorts of articles; any kind of store or shop; grain elevators; stock yards; warehouses and cold-storage plants	364,151	252,610	69.37	86,649	23.79	339,259	93.16
F. PUBLIC SERVICE (NOT ELSEWHERE CLASSIFIED).							
27. Public administration (United States, State, county, city, and township employees); national defense (Army and Navy); marshals, sheriffs; policemen; watchmen	335,053	228,985	68.34	82,462	24.61	311,447	92.95
G. PROFESSIONAL SERVICE.							
28. Actors, professional showmen, etc.; artists, sculptors, and teachers of art; clergymen; officials of lodges; religious and charity workers; legal profession; literary professions (journalists, etc.); dentists, physicians and surgeons; veterinary surgeons; musicians and teachers of music; scientific professions; teachers, professors in colleges, etc.; other professional pursuits; students	383,140	263,692	68.82	89,366	23.32	353,058	92.14
H. DOMESTIC AND MANUAL SERVICE IN GENERAL.							
29. Barbers and hairdressers; bartenders; cooks; hotel keepers and managers; janitors; porters; restaurant, cafe, and lunchroom keepers; saloon keepers; servants; waiters; clerks; laundries; other occupations	977,853	680,505	69.59	219,127	22.41	899,632	92.00
30. Laborers (in general)	1,277,213	873,564	68.40	288,694	22.60	1,162,258	91.00

NOTE.—The above figures need a few adjustments by estimate before final accuracy can be reached.

(a) Column 3, called but discharged. By section 4 of the Selective Service Regulations of November 8, 1917, it is provided that "all exemptions and discharges made prior to noon on December 15, 1917 * * * are hereby revoked." Nevertheless, as the law providing the conditions for exemption or discharge remains the same, it is of course certain that not all registrants discharged under the first draft will be practically available in later drafts.

It may rather be assumed that the largest portion of the total men discharged under the first draft will *not* be available on future drafts. The only certain basis for the estimate of available men in the several industrial groups, therefore, is to add a small, unknown, and variable percentage to the totals shown in column 2, Table 43, above. What the variation of that percentage should be in the respective industrial groups is not practicable to estimate at this time.

(b) A second adjustment for Table 43 must be made, because column 3 represents the men not certified for service by the local boards, and this number could not be accurately known at the time of compiling the data (Nov. 12), because (1) many cases of claim for exemption or discharge, still pending on appeal at that time, would be decided in favor of the claimants, and (2) the lists of certified men were subject to some depletion by rejections or nonappearances at camp; and both of these causes would increase column 3. No apportionment of it to the specific industrial groups could be worth estimating.

1. This table shows that the *percentages* of men of draftable age *still available in the respective industries* vary substantially in column 2, ranging between 60.8 per cent and 70.32 per cent, but vary less notably in column 4, ranging between 88.72 per cent and 93.79 per cent.

In column 2 (which is the safer basis for judgment, for the reasons mentioned in footnote (*a*)) the highest percentages available are found in leather, textiles, and clothing; the lowest, in forestry and sundry mines. In column 4 the highest percentages are found in lumber, paper, leather, domestic and manual service, and telegraphs and telephones; the lowest in clothing and sundry mines.

The causes for these variances are more or less the same as the causes already set forth for table 42, viz, the several circumstances that differ in the composition of each industrial group—locality, age, sex, alienage, etc.

But it should be remembered that the variations are in *little or no degree* attributable to the administration of the selective-service law by the district boards in granting discharges in "necessary industries." Obviously, the judgment of the boards as to "necessary industries" is not reflected in the high and low percentage industries above mentioned. The tenor of the boards' judgment on that subject must rather be sought in the figures of Table 39 (and appendix, Table 39A) as to the percentage of discharges granted on *claims made* in the several industrial groups. The district boards dealt only with those who made claims, and had no control over the mass of registrants at large or the mass of registrants called and discharged by the local boards. The judgment of the district boards as to "necessary industries," as shown in Table 39A, is in direct harmony with the obvious needs of the present emergency. But the results here shown for Table 43 have no such obvious relation.

This Table 43, it must be remembered, shows only the effect of the draft on the *registrants* (ages 21 to 30) in each industrial group, and not on the *total population* in the group. Naturally, therefore, no identity could be expected in the percentage for the same group in the two tables. This explains why the industrial groups most notably affected as a whole (in Table 42) appear to be oil and gas, powder and cartridges, steel mills, and shipbuilding; while the industrial groups most notably affected in their age 21 to 30 registrants (Table 43) appear to be forestry and sundry mines; no one industry appearing in both of these lists.

The further development of other important and interesting inferences and explanations to be drawn from a comparison of these several tables of results would require prolonged analysis and study.

2. A final observation on Table 43 is that these *mass numbers* in themselves do not assist much for future drafts in determining the measures of industrial readjustment or conscription to be used in the emergency, first, because they do not locate the masses geographically (though the data not here printed would serve for that); secondly, because they do not reach and locate the individuals; and thirdly, because they do not differentiate the relative skill or usefulness of the individual within each industry. Nothing short of a central industrial card file will do this.

E. H. CROWDER,
Provost Marshal General.

APPENDIX TABLES

APPENDIX TABLE A.

PROPORTION OF QUOTA TO STATUTORY ENLISTMENT CREDITS.

	Gross quota.	Enlistment credits.	Ratio to gross quota.	Net quota.

[1] This column includes the entire volunteer contribution of each State to the military service, namely, the National Guard and all enlistments in the Army, Navy, and Marine Corps, from the declaration of war to Dec. 16. It does not include, however, the Officers' Reserve Corps or Naval Reserves, of which the figures at this time could not be obtained.

APPENDIX TABLE C.

PER CAPITA COST OF SELECTIVE SERVICE SYSTEM.

	Total cost.	Total registrants.	Cost per registrant.	Total men called.	Cost per man called.	Total men accepted.	Cost per man accepted.	Net quota.	Cost per man of quota due.
United States	$5,211,965.38	9,586,508	$0.54	3,082,949	$1.69	1,057,363	$4.93	687,000	$7.59

APPENDIX TABLE E.

PROVOST MARSHAL GENERAL'S OFFICE, EXPENSES TO NOV. 30, 1917.

Salaries, employees	$42,699.21
Traveling expense	682.76
Per diem cost (lodging, meals, etc.)	506.80
Livery and drayage	34,287.90
Salaries, local and district board members ordered to Washington	354.00
One-half of stationery and office supplies' account, $28,935.20	14,467.60
Printing, forms, etc	9,144.70
Miscellaneous	30,686.39
Total	132,829.36

APPENDIX TABLE F.

COST OF RECRUITING FOR 1917 (9 MONTHS).

Rent of stations	$91,537.75
Lodgings	94,555.11
Heat and light, water, stationery, car tickets, furniture, toilet articles	48,508.71
Ice	350.62
Laundry work	3,094.13
Laundry materials	151.74
Telephones	3,660.94
Baths	1,365.17
Drayage	2,042.66
Removal of ashes and garbage	96.03
Drinking water	65.70
Printing	2,668.58
Advertising	11,133.01
Bill posting	38,042.09
Subsistence:	
Recruiting parties	176,839.83
Applicants for enlistment	101,622.07
Commutation of quarters for officers on duty at recruiting stations	35,739.00
Pay of enlisted men of recruiting parties	262,568.00
Difference between active and retired pay of retired officers on recruiting duty	24,093.90
Medical and surgical attendance	35,330.47
Examining and vaccinating applicants	5,204.62
Transportation of recruiting parties	60,466.37
Mileage of officers on recruiting duty	111,813.02
Total	1,110,949.52

APPENDIX TABLE G.

THE ADJUTANT GENERAL'S STATEMENT (NOV. 17, 1917) OF COST OF RECRUITING IN 1914 AND 1915.

1. Extracting from the expenses of the recruiting service for the fiscal years 1914 and 1915, as compared in the office of the Quartermaster General the items of such expenses that appear to have been incurred by the recruiting service in procuring recruits for the Army and assembling them at recruiting stations, it appears that the total expenses for those years are $803,408.52 and $693,432.20, respectively. The items of expenses considered in this computation are as follows:

	1914.	1915.
Nonpersonal services	$234,445.07	$178,684.57
Supplies and advertising	105,610.95	105,428.30
Commutation of rations	30,825.63	36,865.54
Toilet articles	413.88	179.15
Mileage	72,641.01	53,625.79
Commutation of quarters for officers	33,857.20	26,716.80
Difference between active and retired pay of officers	28,376.42	25,187.78
Pay of enlisted men	240,606.45	201,412.80
Clothing for parties	30,026.50	28,565.00
Medical and surgical attendance	5,703.06	5,552.80
Examining and vaccinating applicants	349.20	419.94
Transportation of recruiting parties	20,553.15	30,793.73
Total	803,408.52	693,432.20

2. The number of applicants accepted at general recruiting stations within the year specified were 41,210 and 45,111, respectively. The number of those applicants actually enlisted within those years were 32,828 and 36,222, respectively. It appears therefore that the per capita cost or the unit cost of applicants accepted at *recruiting stations* for the years 1914 and 1915 were $19.49 and $15.37, respectively, and that the per capita or unit cost of the applicants *actually enlisted* within those years were $24.48 and $19.14, respectively.

(Signed) H. P. McCAIN,
The Adjutant General.

APPENDIX TABLE H.

APPENDIX TABLE 39A.

CLAIMS GRANTED, CLASSIFIED BY INDUSTRIAL GROUPS.

RELATIVE NUMBERS OF CLAIMS GRANTED IN INDUSTRIAL GROUPS.

Industrial group.	Total claims filed (number).	Held for service.		Discharged.	
		Number.	Per cent.	Number.	Per cent.
A. AGRICULTURE, FORESTRY, AND ANIMAL HUSBANDRY.					
1. Agriculture (farming, truck gardening, fruit raising, etc.)	75,170	46,394	61.7	28,776	38.3
2. Forestry (lumbering, etc.)	274	168	61.2	106	38.8
3. Animal husbandry (fishing, cattle raising, sheep raising, etc.)	1,602	1,061	66.3	540	33.7
B. MINES, QUARRIES, AND WELLS.					
4. Coal mines	2,601	1,750	67.3	851	32.7
5. Other mines (copper mines, gold and silver mines, iron mines, lead and zinc mines), quarries, salt mines, salt wells, and salt factories	540	321	59.4	218	40.6
6. Oil wells and gas wells	367	221	60.1	147	39.9
C. MANUFACTURING INDUSTRIES.					
(I) *Building industries.*					
7. House contractors, carpenters, blacksmiths, machinists, electricians, painters, plasterers, plumbers, etc.	3,256	1,761	54.1	1,495	45.9
(II) *Chemical industries.*					
8. Powder, cartridge, dynamite, fuse, and fireworks factories	2,878	1,068	37.1	1,810	62.9
9. Fertilizer factories, paint factories, soap factories, other chemical factories	700	310	44.4	389	55.6
(III) *Clay, glass, and stone industries.*					
10. Brick, tile, and terra-cotta factories, glass factories, lime, cement, and gypsum factories, marble and stone yards, potteries	404	268	66.3	136	33.7
(IV) *Clothing industries.*					
11. Clothing factories, glove factories, hat factories, shirt, collar, and cuff factories	574	398	69.3	176	30.7
C. MANUFACTURING INDUSTRIES—Continued.					
(V) *Food industries.*					
12. Bakeries, butter and cheese factories, candy factories, fish curing and packing, flour and grain mills, fruit and vegetable canning, slaughter and packing houses, sugar factories and refineries, other food factories	2,021	1,363	67.5	657	32.5
(VI) *Iron and steel industries.*					
13. Blast furnaces, steel rolling mills, iron foundries, military weapons factories	10,205	2,961	29.0	7,245	71.0
14. Shipbuilding and boat building	3,824	1,153	30.1	2,671	69.9
15. Agricultural implement factories, automobile factories, wagon and carriage factories, car railroad shops; other iron and steel factories	4,201	2,016	48.0	2,184	52.0
(VII) *Leather industries.*					
16. Harness and saddle factories, shoe factories, tanneries, trunk factories	538	370	68.8	168	31.2
(VIII) *Liquor and beverage industries.*					
17. Breweries; other liquor and beverage factories.	55	47	84.6	9	15.4
(IX) *Lumber and furniture industries.*					
18. Box factories (wood), furniture factories, piano and organ factories, saw and planing mills, other wood-working factories	653	489	74.9	163	25.1
(X) *Metal industries (except iron and steel).*					
19. Brass mills, clock and watch factories, copper factories, gold and silver factories, jewelry factories, lead and zinc factories, tin-plate factories, tinware and enamelware factories, other metal factories	2,376	981	41.3	1,395	58.7

CLAIMS GRANTED, CLASSIFIED BY INDUSTRIAL GROUPS—Continued.

RELATIVE NUMBERS OF CLAIMS GRANTED IN INDUSTRIAL GROUPS—Continued.

Industrial group.	Total claims filed (number).	Held for service.		Discharged.	
		Number.	Per cent.	Number.	Per cent.
C. MANUFACTURING INDUSTRIES—Continued.					
(XI) *Paper and printing industries.*					
20. Blank-book, envelope, tag, paper-bag, and paper-box factories, paper and pulp mills; printing and publishing houses	379	305	80.9	74	19.1
(XII) *Textile industries.*					
21. Carpet mills, cotton mills, hemp and jute mills, knitting mills, lace and embroidery mills, linen mills, rope and cordage factories, sail, awning, and tent factories, silk mills, woolen and worsted mills, sundry and textile mills	1,054	647	60.8	407	39.2
(XIII) *Miscellaneous industries.*					
22. Broom and brush factories, button factories, charcoal and coke works, cigar and tobacco factories, electric light and power plants, electrical supply factories, gas works, oil refineries, rubber factories, straw factories, other miscellaneous industries	5,179	2,463	47.6	2,716	52.4
D. TRANSPORTATION.					
23. Steam railroads	5,256	3,433	65.3	1,823	34.7
24. Telegraph and telephone companies	1,925	893	46.4	1,032	53.6
25. Water transportation; construction and maintenance of streets, roads, sewers, and bridges; electric and street railways; livery stables; truck transfer, cab and hack companies; express companies; Postal Service	1,619	1,036	64.2	583	35.8
E. TRADE AND MERCHANDISE IN GENERAL.					
26. Banking and brokerage, insurance, real estate, sundry wholesale and retail trades, buying and selling of all sorts of articles, any kind of store or shop, grain elevators, stock yards, warehouses and cold-storage plants	4,403	3,752	85.2	654	14.8
F. PUBLIC SERVICE (NOT ELSEWHERE CLASSIFIED).					
27. Public administration (United States, State, county, city, and township employees), national defense (Army and Navy), marshals, sheriffs, policemen, watchmen	1,255	887	70.7	368	29.3
G. PROFESSIONAL SERVICE.					
28. Actors, professional showmen, etc., artists, sculptors, and teachers of art, clergymen, officials of lodges, religious and charity workers, legal profession, literary professions (journalists, etc.), dentists, physicians and surgeons, veterinary surgeons, musicians and teachers of music, scientific professions, teachers, professors in colleges, etc., other professional pursuits, students	4,842	4,094	84.7	748	15.3
H. DOMESTIC AND MANUAL SERVICE IN GENERAL.					
29. Barbers and hairdressers; bartenders; cooks; hotel keepers and managers; janitors; porters; restaurant, café, and lunch-room keepers; saloon keepers; servants; waiters; clerks; laundries; other occupations	1,839	1,363	74.0	476	26.0
30. Laborers (in general)	902	683	75.7	219	24.3
Total	140,892	82,656	58.7	58,236	41.3

32.2992

[1] The figures to the left of the table are the code-serial numbers given each local board by this office; thefirst figure representing the State, the second the district board, the third the local board in each district. Cities are indicated by capitals and counties by small letters. Where a city or county contains two or more local boards the totals for such community for gross quota and enlistment credits appear for the last board. The figures in all other columns are taken from the reports of local boards dated about Nov. 12, 1917.

Numbers of registrants, gross quota, credits, net quota, called, etc., shown by local boards in every State—Continued.

ALABAMA—Continued.

	Local board.	Total registrants.	Gross quota.	Enlistment credits.	Net quota.	Called for examination.	Failed to appear.	Accepted physically.	Rejected physically.	Total claims for exemption and discharge.	Claims allowed.	Claims disallowed.	Certified to district boards.
